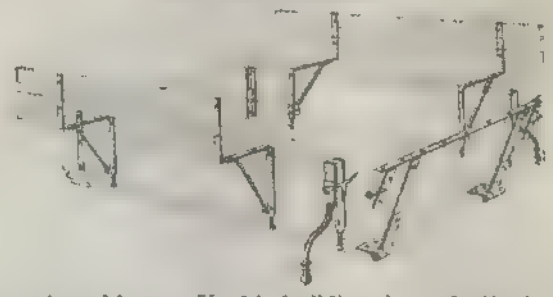
BODY IRONS

BILD-YUR-OWN,

For Ford Roadsters.



Drop forged irons. Used in building slip-on bodies for Ford Roadsters.

This set is known as the extension flare board set. Note the additional capacity due to this style of flare board and the additional strength given by the extra flare board brace. This set will make an ideal body for the truck-garden farmer, small fruit grower, plumber, painter or a contractor needing a light truck for carrying tools to a job.

Each set packed in individual box with patterns for cutting out the wood, and full instructions for building bodies.

Set No. A-3B, For 9 Inch Panel Body.

Consists of the following:

4—Flare Board Irons	2—End Gate Hinges
4—Flare Board Braces	2—End Gate Fasteners
2 Rear Outside Braces	2—Pivot Plates
3 Rear Inside Straps	1—Tail Gate Edge Irons
2 Front Corner Irons	Bolts, Nuts, Screws, etc.

Per Set

No. A-3B—Complete as described above ..... +15 00

SHOT GUNS

DOUBLE BARREL, HAMMERLESS
A. H. FOX

No. "CE" Grade, Breech Loading.

This is the grade that is making good everywhere. In every respect it is unusual, a high grade gun at a very moderate price. Its a beauty in looks and finish, no gun will stand up better in hard work.

Engraving—Is the work of an artist, scroll and picture work stands out clear and beautiful in design.

Barrels—Best quality Krupp fluid steel; cylinder, modified and full choke bored.

Stock—Choice selection of dark, curly English walnut, the grain is beautifully brought out in the finish, straight, half or full pistol grip; rubber butt plate; checkering is of a fine diamond pattern, on grip, panels and fore-end.

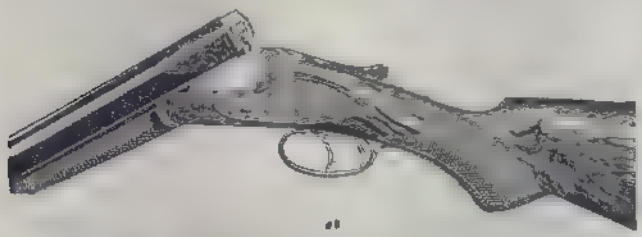
Weights—12 gauge, 6½ to 8 lbs.; 16 gauge, 5¾ to 7 lbs.; 20 gauge, 5¼ to 6¾ lbs.

When ordering, specify length of barrel, weight, style of grip and boring wanted.

With Automatic Ejector.

	Each
No. CEF12—12 gauge, 26, 28, 30 or 32 in. barrels	✚$303 00
No. CEF16—16 gauge, 26, 28, 30 or 32 in. barrels	✚ 303 00
No. CEF20—20 gauge, 26, 28, 30 or 32 in. barrels	✚ 303 00

One in cardboard box; ten in wood case.



No. "XE" Grade, Breech Loading.

This grade is the result of the increasing demand for a trap gun which shall be as nearly perfect for the purpose as it is possible to be made. Each gun receives an elaborate amount of hand work, which in spite of the number of cheap machine made guns built, is still the only way to produce a really accurate and high grade gun.

Engraving—A new design conforms to the artistic standard of the other high grade Fox guns. It has never been equalled before in a gun under $200.00.

Barrels—Krupp fluid steel; cylinder, modified or full choke bored.

Stock—Beautifully marked Circassian walnut, straight, half or full pistol grip, or in the Monte Carlo type; rubber butt plate; grip, panels and fore-end beautifully checkered.

Weight—12 gauge, 6¼ to 8 lbs.; 16 gauge 5¾ to 7 lbs.; 20 gauge, 5¼ to 6¾ lbs.

When ordering, specify length of barrel, weight, style of grip and boring wanted.

With Automatic Ejector.

	Each
No. XEF12—12 gauge, 26, 28, 30 or 32 in. barrels	✚$503 25
No. XEF16—16 gauge, 26, 28, 30 or 32 in. barrels	✚ 503 25
No. XEF20—20 gauge, 26, 28, 30 or 32 in. barrels	✚ 503 25

One in cardboard box; ten in wood case.

Note—From Factory can furnish higher priced Fox Guns. Write for catalog and prices.

✚F. O. B. Pennsylvania Factory Only.

SHOT GUNS

THE FOX-KAUTZKY SINGLE TRIGGER
FOR THE A. H. FOX GUNS

This single trigger is recommended and guaranteed by the A. H. Fox Gun Company. It is exceedingly simple and is operated by the locks of the gun. No matter how heavy the recoil, the trigger will not engage the locks of the second barrel until you release it. It cannot double and will never balk. When only one barrel is fired and gun reloaded, trigger returns to original barrel without attention from the shooter. The only trigger with automatic safety. This trigger fitted to any A. H. Fox hammerless gun, new or old, at an extra charge.

For Any A. H. Fox Hammerless Guns.	Each
Single trigger	✚$87 00

Note—To have single trigger fitted to guns already in use, the entire gun must be returned to factory, shipping charges prepaid.

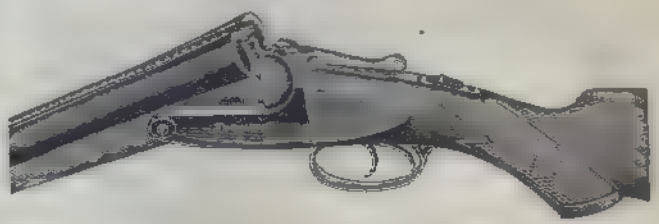
DOUBLE BARREL, HAMMERLESS
PARKER

The mechanical construction of all Parker hammerless shot guns is the same. A special feature is the coil main spring, which the manufacturers guarantee for twenty-five years against breakage. Parker guns are bored on the latest improved system for shooting nitro or smokeless powder. All guns are tested before they leave the factory.

Regular dimensions carried in stock; length of stock about 14 inches; drop measures about 3 inches.

By shipping from factory, we can supply Parker guns (except 12VH Grade), with stocks 13½ to 14½ inches long, with drop 2 to 3¼ inch without extra charge. Extra charge for dimensions varying from above. If 12VH grade with 14¼ inch stock or longer and special drop is wanted, same will involve additional charge. Six to eight weeks are required to make Parker guns to order.

Pistol grip guns sent unless otherwise specified. No extra charge for straight grip except on 12VH.



Trojan Grade, Breech Loading.

A most excellent well proportioned gun at a very low price

Barrels—Imported Trojan steel, matted top rib; cylinder modified or full choke bored.

Stock—American black walnut, of good color and finish; made only with full pistol grip; hard rubber butt plate, fore-end and grip neatly checkered.

Weights—12 gauge, 7½ to 8 lbs.; 16 gauge, 6½ to 7 lbs.; 20 gauge, 6¼ to 6¾ lbs.

Automatic ejectors will not be furnished on Trojan grade guns.

Without Automatic Ejector.

	Each
No. TP12—12 gauge, 28 or 30 in. barrels	$150 00
No. TP16—16 gauge, 26 or 28 in. barrels	150 00

Character

¶ It has been said that the word "Uneeda" is worth, to its owners, one million dollars per letter.

¶ Character in merchandise is responsible for such a high valuation and fine standing.

¶ The character and standing of the Fry Visible Pump is, we believe, just as outstanding in this industry as "Uneeda" is in the biscuit field.

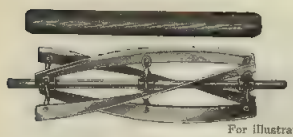
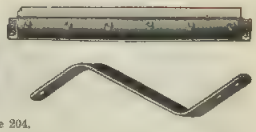
LAWN MOWER REPAIR PARTS
FOR GALCO MOWER





For illustration of other repair parts, see page 204.

Always give NUMBER or LETTER with description of parts wanted. **Be Sure and Give Diameter of Drive Wheel.**

Always give SIZE and NAME of machine.
If broken part is lost, give number of corresponding part and complete description.
The terms "Right" and "Left" are used with relation to the position of the operator when using mower.

	Weight	
Drive wheel, No. 34—9 letter cast in wheel is B	5¼ lbs., each	$1.60
Right hand side plate, No. 441	4½ lbs., each	2.00
Left hand side plate, No. 442	4½ lbs., each	2.00
Reel, 4 blades, complete, all sizes (state size of mower, number of blades and cutter bar number), express only	each	5.50
Cutter bar, complete, with steel blade (state size wanted, give number appearing on cutter bar) A 512	3½ lbs., each	2.00
Cutter bar, complete, with steel blade (state size wanted, give number appearing on cutter bar) A 514	3¾ lbs., each	2.00
Cutter bar, complete, with steel blade (state size wanted, give number appearing on cutter bar) A 516	4 lbs., each	2.00
Cutter bar, complete, with steel blade (state size wanted, give number appearing on cutter bar) A 518	4½ lbs., each	2 00
Cutter bar, complete, with steel blade (state size wanted, give number appearing on cutter bar) A 520	4½ lbs., each	2 00
Handle irons, both sides alike (state size of mower and cutter bar number)	3½ lbs., pair	.60
Shrub rod (state cutter bar number)	.5 lbs., each	1.00
Extra reel blade (state cutter bar number)	.3 lbs., each	1.00
Wood roller, all sizes (state size wanted and cutter bar number)	.2 lbs., each	.50
Wrench	.7 oz., each	.10
Wood handle, complete, express only	each	1.60

Prior to 1916 the following numbers were used..... 41 Right hand side plate; 42 Left hand side plate; Cutter bars. B 512, B 514, B 516, B 518, B 520

Prior to 1915 Pawl No. 0 was used

Prior to 1922 the following numbers were used: 411 Right side plate; 422 Left side plate

	Weight	
Pinion, right 55, left 66	4 oz., each	$0.25
Roller arms, No. 4, both sides alike	4 oz., each	.20
Cones, No. 2, both sides alike	2 oz., each	.50
Wheel washers, No. A, both sides alike	1 oz., each	.10
Pinion cap, No. 3, both sides alike	2 oz., each	.15
Hardened steel pawls, No. 916, both sides alike (state side plate number)	1 oz., each	.10
Ball bearing case, No. 1, both sides alike	1 oz., each	.40
Ball retainer, No. 27, both sides alike, with balls (Extra balls, 5c each)	2 oz., each	.50
Cutter bar adjusting screws	1 oz., each	.05
Cutter bar pivotal screws	1 oz., each	.05
Roller arm bolts, with nuts	1 oz., each	.05
Pinion cap machine screws, with nuts	1 oz., each	.05
Set screws for fastening side plate to axle rod	1 oz., each	.05
Handle iron bolts, with nuts	2 oz., each	.05
Handle grip joint bolt, with nut	2 oz., each	.10
Upper handle cap	2 oz., each	.10
Lower handle cap	4 oz., each	.20
Springs for ball bearing device	1 oz., each	.20
Metallic sleeve for ball bearing device	1 oz., each	.30

Prior to 1912 the following numbers applied ... No. 5 Right hand cone; No. 6 Left hand cone

Prior to 1911 the following cutter bars were used: 512, 514, 516, 518, 520

Body, in.	6x12	7½x15	9x18
Rear wheels, in.	4½	6	6
Front wheels, in.	4½	4½	6
Weight dozen, lbs.	37	58	76
Per dozen	$26.50	32.00	37.00

Nos. 9S and 9R, One Dozen, Nos. 8S, 7S, 8R and 7R, One-half Dozen in a Carton.

COASTER WAGONS

BLUE STREAK, JR.

Disc Wheels, Rubber Tires

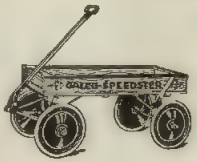
Selected hardwood body, front and rear boards mortised into sides, selected hardwood bolsters, double disc wheels, rubber tired, finished in bright Indian red, natural finish body.

Nos.	27	28	29	30
Body, in.	8x16	10x20	11x24	12x28
Wheels, in.	4⅝	4¾	5⅝	7
Rubber tire, in.	½	⅝	⅝	⅝
Weight dozen, lbs.	90	120	150	240
Per dozen	$3 60	4.40	5.40	7.00

One-sixth Dozen in a Carton.

COASTER WAGONS

GALCO SPEEDSTER



All Steel Gear

Body—Made of selected, well seasoned wood, glued and reinforced with four heavy cleats, top rails.

Gear—Front gear one piece fifth wheel construction with tongue and gear braces, rear gear made of extra heavy channel steel, reinforced with two steel braces.

Wheels—Steel, double disc, self-retained roller bearings, enameled bright red, nickel plated hub caps, rubber tired.

Finish—Natural varnish finish, artistically decorated and lettered by machine.

Rubber Tired Wheels

Each

No. 137—16x36 in. body, 2½ in. wheels, ⅜ in. tires, weight each 35 lbs. $10.00

One in a Carton.

BLUE STREAK

All Steel Gear

Body—Box, bottom and top made of selected ash hardwood, beautifully grained, bed reinforced with four hardwood cleats, front and rear boards mortised into sides.

Gear—Front gear heavy steel fifth wheel construction with tongue and gear braces, rear gear made of extra heavy channel steel, reinforced with two steel braces.

Wheels—Steel, double disc, self-retained roller bearings, enameled bright red, striped in yellow, nickel plated hub caps, heavy corrugated rubber tires.

Finish—Natural varnish finish, artistically lettered and decorat- decorated by machine, top rails and edge of bottom finished in red.

Improved steel roller brake furnished regularly with all numbers.

Gardner Turmo Portable Air Compressor

These portable outfits consists of the well known **Turmo** four-cylinder engine and the Gardner Duplex Vertical XH type compressor, mounted on a heavy steel frame as shown, with hood covering both engine and compressor.

Steel sides are furnished which incloses the entire outfit except the air tank. Standard wheels furnished are steel. Rubber tired wheels with roller bearings can be furnished and can be mounted without any change in the axles.

The engine and compressor are cooled by the same radiator, which is of ample size to take care of both units. The water is circulated by pump.

Each outfit is furnished with automatic unloader and a pressure safety valve set at 100 lbs. pressure.

The air tank is mounted on the rear as shown, and is furnished with drain valve on bottom side and 2 service valves on the top. Has a hand hole large enough for inspection purposes and will meet the requirements of any state.

All unnecessary weight has been eliminated, making a well balanced and easily handled outfit.

Westinghouse, Vertical, Steam Driven, Locomotive Type Air Compressors

For General Industrial Purposes

The constantly increasing demand for these compressors in all classes of industrial work is, in a large measure, due to their simplicity, neatness and compactness. They are attachable to wall, column, or can be mounted on floor, requiring no foundation. The fact that they are the recognized standard air compressors for railroads is, we believe, a sufficient guarantee of their reliability.

In point of design, it will be readily seen that the compressor is arranged vertically and consists of a steam and air cylinder joined together by a centerpiece. The main stream piston and air piston are both fastened to the same rod and move together as one piece. The supply and exhaust of steam to and from the steam cylinder is controlled by a distribution slide valve in conjunction with a main valve by which it is operated. The movements of the main valve are governed by a reversing valve which is actuated by the main piston. The valve motion is compact, being entirely within the top head, and all its parts are so arranged as to readily permit of their examination or replacement.

Automatic Governors keep the air pressure in receiver at any predetermined point by automatically shutting off the steam supply when the desired pressure is attained in tank.

When in operation over 50 per cent of the time or where required for continuous service at pressures exceeding 100 pounds water jacketed machines are to be used. We can also furnish other sizes to meet special conditions.

Automatic Compressor Governors, 1-inch Single **$42.00**; 1¼-in. **$54.00**

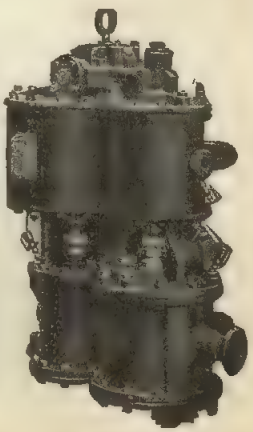
Westinghouse 10½ inch, Cross Compound, Vertical Steam Driven Air Compressor

Capacity 150 cubic feet of free air per minute at normal speed of 131 single strokes per minute, with 100 pounds steam pressure against 80 pounds air pressure.

This Compressor is a serial arrangement of two standard single stage machines, actuated by the same controlling mechanism and with pistons moving uniformly in opposite directions.

Only a few moving parts are employed, comprising, first, the high pressure steam, low pressure air pistons, connected by a vanadium steel piston rod drilled for the reversing valve rod which operates the reversing valve, and which in turn moves the main piston valve, controlling the admission of steam to and the exhaust from both the high and low pressure steam cylinders, and, second, the low pressure steam and high pressure air pistons connected by a piston rod having no mechanical connection with the valve gear.

The air cylinders are not water jacketed and no intercooler is required.



Dimensions

Diameter of High Pressure Steam Cylinder	10½ in.
Diameter of Low Pressure Steam Cylinder	16¾ in.
Diameter of High Pressure Air Cylinder	9½ in.
Diameter of Low Pressure Air Cylinder	14½ in.
Length of Stroke	12 in.
Governor	1½ in.
Diameter of Steam Admission Pipe	1½ in.
Diameter of Steam Exhaust Pipe	2½ in.
Diameter of Air Admission Pipe	2½ in.
Diameter of Air Delivery Pipe	1½ in.

Overall dimensions, approximate 52x42x21 inches in depth.
Net 1,800 pounds. Boxed for shipment 2,150 pounds.
Price ..... **$1,074.60** 1½ Auto Governor **$82.00**

Air Receivers, Lubricators, Valve, Piping and Hose are listed in other sections of Catalog.

"Gardner" Air Cooled Air Compressors

Enclosed—Self-Oiling

High grade machine —accurately made and good for any pressure up to 200 lbs. for intermittent service, or 125 lbs. continuous service.

The air cooled compressor has been found thoroly satisfactory for garage work, operating small air tools, vulcanizing work, blowing dust, and other work within its capacity. Crank case is enclosed for automatic splash lubrication. The trunk style of piston is used with split metallic packing rings. The mushroom suction and ball discharge valves assure maximum efficiency and the machine is practically noiseless in operation. Crank shaft is drop forging working in renewable die cast bearings. Connecting rods are also drop forgings.

2 x ¼ and 3 x 3 compressors are of one bearing type construction.

Gardner Motor Driven Air Cooled Compressors

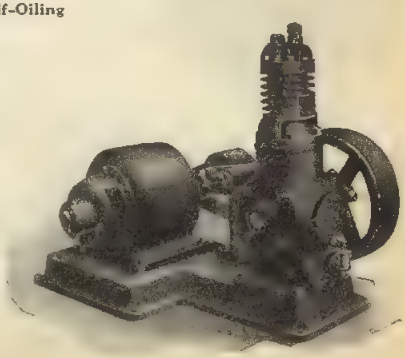
Enclosed—Self-Oiling

For the kind of reliability that is alone worth the initial cost of the outfit these motor-driven air compressor outfits are unequalled. Under the most trying, constant, hard usage they more than fulfill expectations of the highest order.

They are equipped with motors of recognized make.

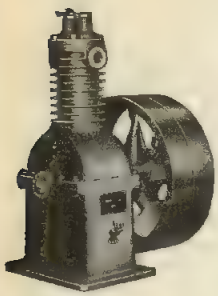
Compressor and motor are mounted on a sturdy cast-iron sub-base that guarantees perfect alignment of compressor and motor.

Prices on application



Curtis Air Compressors

Air Free From Oil



1—Controlled-splash self-oiling system, no excess in cylinder, no external leakage nor waste, no oil gets to tires. Closed crank case, keeps out dust.

2—One-half pint of oil ample for 100 hours.

3—High and low level oil filling gauge.

4—Fan fly-wheel assists in cooling.

5—Valves of light weight, large area.

6—Safety cage under valves.

7—Hand unloader permits starting against pressure.

8—Adjustable renewable die cast bearings.

9—Dropped forged steel crank shaft.

10—Head removable without breaking pipe connections or bending pipe. Only one gasket.

*The tanks listed are not suitable for use in California, Chicago, Detroit or Canada. Tanks for use at those points quoted on application.

SCALES

DORMANT WAREHOUSE

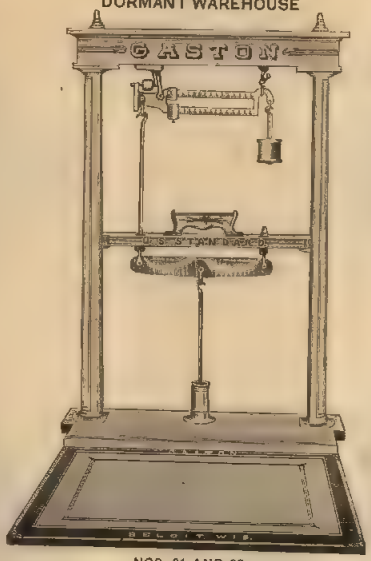
Gaston Scales have some patented features which causes them to be known as leaders in scale manufacturing.

No. 1—Ball bearing construction, which positively eliminates any platform binding, also preserves life of pivot bearings by absorbing shock of load, and eliminating scraping across the knife edges.

No. 2—Self-aligning bearings assure a line contact between pivots and bearings. The load is thus distributed over the entire length of the pivot, reducing wear to a minimum.

No. 3—All pivots lie in parallel planes. The load is not transmitted through an angle.

No. 4—Corner loops are easily removed yet applied to the scale in such a manner as to make accidental disengagement impossible. The above reasons are vital because the accuracy and sensitiveness of a scale depend wholly upon the condition of its pivot bearings.



NOS. 91 AND 92

No. 5—The sturdy construction of this scale eliminates distortion and probability of breakage.

No. 6—Heavy solid brass arrow tip beam is given best possible action by suspension from accurately processed hardened loops.

No. 7—Special construction permits that scale may be out of lever and still weigh correctly.

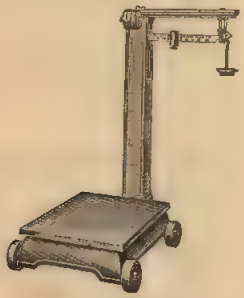
No. 8—Scale is supported by continuous axles

No. 9—The superiority of these scales is accomplished by its unique design accompanied by absolute accuracy of all its parts.

With two iron pillars and graduated counter poise platform set level with floor, making an ideal scale where considerable weighing is done in one spot.

No.	Capacity	Size platform	Wt. each	Each
91	2500 lbs.	36x37 in.	775 lbs.	**$224.00**
92	3500 lbs.	42x44 in.	800 lbs.	**260.00**

PORTABLE SINGLE BEAM



NOS. 601 AND 1001

A general purpose scale that will weigh accurately from no load to full capacity. Beam graduated in quarter pounds on 600-lb. size and in half pounds on 1000-lb. size.

No.	Capacity	Size platform	Wt each	Each
601	600 lbs.	17x23 in.	150 lbs.	**$42.50**
1001	1000 lbs.	18x26 in.	180 lbs.	**51.00**

One in a case.

PORTABLE DOUBLE BEAM

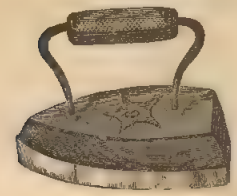
NOS. 602 AND 1002

Scale especially adapted to take care of tare weight. Will weigh accurately from no load to full capacity. Beam graduated in quarter pounds on 600-lb. size and in half pounds on 1000-lb. size.

No	Capacity	Size platform	Wt. each	Each
602	600 lbs.	17x23 in.	175 lbs.	**$62.00**
1002	1000 lbs.	18x26 in.	185 lbs.	**75.00**

SAD IRONS

COMMON



Sharp or round point.

		Per 100 lbs.
Common	4 to 6 lbs.	$21.00
	7 to 10 lbs.	20.50

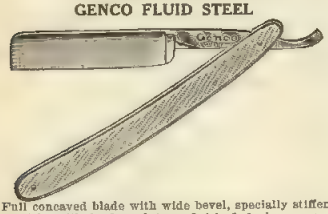
615—Vanadium Tortoise Shell, 5/8 Round Point	$3.00
621—Head Barber, Imitation Oak, 5/8 Sq. Point	$3.00
612—DeRoma, White Handle, 5/8 Sq. Point	$3.50
Total Retail Value	$35.00

One Dozen in a Leather Back, Flannel Lined Roll.

No. 1000 One dozen razors in a roll . . . . Per Roll **$10.00**

RAZORS
GENCO FLUID STEEL

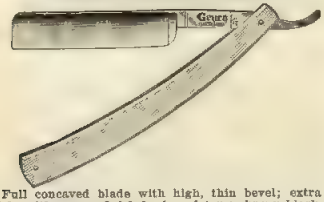


Full concaved blade with wide bevel, specially stiffened; fine polish, with back and tang finished dark gun metal; celluloid handle with flat sides.
Fluid Steel—⅝ in., honed point .. ....Per dozen $60 00

GENCO BULL DOG

Half concaved ground blade, round back, extra fine finish, specially attractive handle, with flat sides.
Bulldog—⅝ in., round point .....Per dozen $50.00

GENCO MASTER BARBER

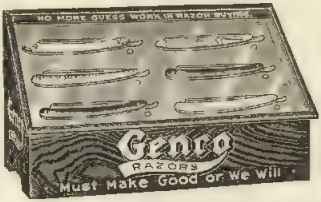


Full concaved blade with high, thin bevel; extra fine polish, with crocus finish back and tang; heavy black rubber handle with flat sides
Master Barber ⅛ in., round or square point.....
.....Per dozen $50.00

GENCO HENRY'S X

Concaved blade, finely polished, oval black handles.
Henry's X—⅝ in., round point .. .. Per dozen $32 00
One in a case, six in a box, weight each 3 oz.

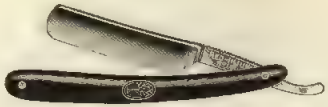
RAZORS
GENCO ASSORTMENT



This assortment consists of twelve genuine Genco razors in seven different patterns and grades ranging from the highest to the medium and are the most popular sellers of the Genco line.
"A Genco must make good or we will" is the manufacturer's guarantee with each razor.

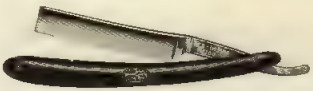
No. 1—Assortment (12 razors) .....Per asst. **$36.00**
Each assortment is furnished packed in a glass top Circassian walnut case with purple plush lining

RED INJUN RAZORS



Hollow ground blue glaze finish blade, black hard rubber handle.
Particularly adapted to expert professional work.
Red Injun—⅝ in., round point.....Per dozen **$99.00**

One in a case, six in a box, weight each 3 oz.



Hollow ground blue glaze finish blades, black hard rubber handle.
Red Injun—½ in. square point .....Per dozen **$99.00**

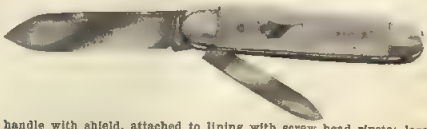
One in a case, six in a box, weight each 3 oz.

Special hollow ground blade with front side crocus polished and etched, black hard rubber handle.
No. 1101—⅝ in. blade, round point...Per dozen **$54.00**

One in a case, six in a box, weight each 3 oz.

POCKET KNIVES

CRANBERRY



Fine flat white bone handle with shield, attached to lining with screw head rivets; large spear point blade, etched; small pen blade, glazed; brass lining; nickel silver bolster and cap.
No. 267—White bone handle, length 4 5/8 inches, weight per dozen 3 1/2 lbs .... Per dozen **$31 50**
One half dozen in a box.

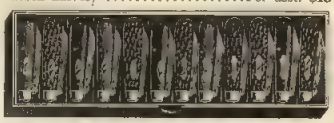
KNIFE ASSORTMENTS

A free display case with each assortment. Each assortment contains three trays—one consisting of two patterns of jack knives with stag and rosewood handles, brass lined to sell at 50 cents each one consisting of twelve patterns assorted stag and celluloid handles; brass lined with nickel silver bolsters and caps to sell at 75 cents each—one consisting of twelve different styles jack knives with assorted stag and celluloid handles, brass lined with nickel silver bolsters and caps, the large blades polished to sell at $1.00 each
No. 50 Crown Asst.—3 dozen knives. .Per asst **$40.50**
One assortment in a box

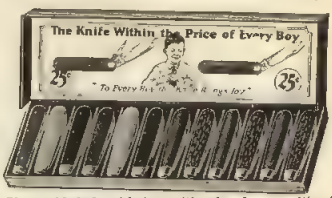
One dozen pen knives attractively assorted colored composition handles, each with two blades, brass lining and nickel silver bolsters and tips.
No. 800—Pen knife assortment (one dozen knives)
. . . . . .Per asst. **$24 00**
One assortment in a display box

KNIFE ASSORTMENTS

A popular jack knife assortment containing six stag and six fancy celluloid handled knives, brass lined with nickel silver bolster and caps.
No. 600—3 3/8 in. jack knife assortments (one dozen knives) .....Per asst. **$18.00**



Stag handle jack knives assorted large clip and spear point blades, brass lined; nickel silver bolsters and shields.
No. 400—3 1/4 in. jack knife assortments (one dozen knives) .....Per dozen **$12.00**



Six one blade boys' knives with colored composition handles and six two blade with stag and rosewood handles, steel lined and with metal bolsters.
No. 200—3 1/4 in. boys' assortments (one dozen knives) .....Per asst **$6 00**
One assortment in a display box

HUNTING KNIVES

Stag handle; nickel silver guard; high grade clip point sabre blade, tempered and ground to a keen cutting edge; length of blade 6 inches.
No. 150—Stag handle with guard.....Per dozen **$36 00**
Each knife in a genuine leather sheath

Stag handle; nickel silver guard, scimeter blade with file back, ground and tempered, specially designed for skinning; 5 inch blade.
No. 154—Stag handle with guard.....Per dozen **$36 00**
Each knife in a genuine leather sheath

Do Motorists Know Your Store?

You may give splendid service, carry the best merchandise and have the best trimmed show window on the street, and yet be passed unnoticed by many a motorist. For motorists don't do their shopping leisurely from the sidewalk — their fleeting glances have only time to take in the obvious signs.

A gasoline pump at the curb is an obvious sign that every motorist recognizes instantly. It signifies to him a place to stop and get what he needs. Putting a G & B pump on your curb, puts your store in his mind.

Ask your oil man for information and prices on Gilbert & Barker gasoline pumps today. If he cannot supply it, write us mentioning his name and address.

PORTABLE AUTOMATIC WEIGHER

The Portable Automatic Weigher is designed for accurate sacking of wheat, rice, barley, malt, seeds, or any free flowing material directly from bins to bags, barrels or packages.

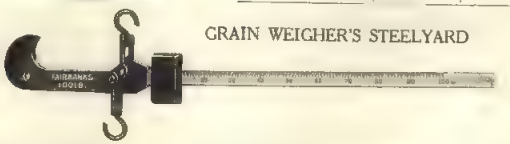
One man can sack more material with this Automatic Weigher than two or three by hand methods. An Automatic Counter is provided which counts the sacks or packages without any attention from the operator. Can be equipped with type-registering counter when so ordered at an additional price.

The scale is provided with an adjustable platform which may be raised through a range of 35 inches to suit the size of the package used. The speed of the scale can be regulated to suit the operator for various materials. Heavy grain can be handled at the rate of 200 sacks per hour. The size of bag or package that can be weighed varies from 10 lbs. to 200 lbs.

A small auxiliary hopper, 18 x 10 inches and 6 inches deep, must be provided between the bin spout and the scale.

Portable Automatic Weigher

No.	Capacity Range	Head Room Required	List Price
1991.....	10 to 200 lbs.	5' 10"	$480.00



GRAIN WEIGHER'S STEELYARD

Verified and approved by the Government to be used in check weighing threshing machine discharges in connection with automatic registers or tallies.

A Fairbanks Steelyard of this type should be in every thresherman's possession.

Capacity 100 lbs. x ½ lbs.

No. 10112 .....Price $8.00

COMBINATION GRAIN BEAMS

The Combination Grain Beam is designed for weighing grain in bushels the entire amount being indicated on the beam. The upper bar is graduated by 100 lbs. and marked with the graduations for wheat, flax, barley and oats.

The fractional graduations are on the small auxiliary side beam, and the tare is taken care of by the lower beam.

6-ton pattern Graduations

Main Bar ..	1st Row	12,000 lbs x 100 lbs.	
	2nd "	200 Bu. x 1 Bu.	Wheat
	3rd "	214 " x 1 "	Flax

	3rd "	357 " x 1 "	Flax
	4th "	416 " x 1 "	Barley
	5th "	588 " x 1 "	Oats
Fractional Bar.....		100 lbs. x 1 lb	
Tare Bar.....		2500 lbs. x 5 lbs.	

Grain and Flour Scales

ALL-METAL BAGGING SCALE

with extra step platform

This scale is especially adapted for convenient and accurate bagging of all materials of any net bag weight up to 500 lbs. The beam is mounted on agate bearings for fine sensitiveness and fitted with a latch poise which will lock in any desired position on the beam.

The platform is designed to lie practically flush with the floor, being only slightly raised to hold an iron framework with two natural wood platforms to allow of convenient weighing of the smaller sacks of material. These platforms may be readily reversed or removed altogether, leaving the regular iron platform beneath for larger loads.

The scale is made of metal throughout, built strong to withstand the pound of packing material into sacks on the platform. The single, *arrow-tip* beam is of brass, graduated 25 x ½ lbs , fitted with small tare bar graduated 26 oz. x ¼ oz., to balance the container so that the *net* weight of material may readily be obtained. The following counterpoise weights are supplied with the scale, adapting it for any standard sacking weights:—24, 24½, 25, 48, 49, 50, 98, 100, 110, 140, 196, 200, 220, 280 lbs.

Durably finished in black and well varnished for protection.

All-Metal Bagging Scale with Extra Step Platform

No	Capacity	Beam	Platform	List Price
1070	500 lbs.	25 x ½ lbs	18″ x 27″	$117.00

Note.—In the platform size above, the first figure is the dimension parallel with the beam.

SELF-CONTAINED WITH FOOT LEVER

The design of this scale is somewhat like the one above, to set with platform flush with the floor so that barrels and sacks may be easily loaded and unloaded. In addition, the scale is arranged with a foot lever mechanism to relieve the bearings and levers from the jar and shock of loading and unloading. For either operation, the scale is in the position shown above, with the platform firmly at rest upon the framework beneath. For weighing, the foot lever is depressed, thus raising the platform to its free weighing position.

The platform is of iron with a circular rise in the middle to help center the barrel and sack loads for greater accuracy of weighing. A wooden shelf is placed part way up the pillar, well braced to hold weights or to serve for recording purposes.

The beam is of nickel-plated steel, graduated 25 x ½ lbs. and fitted with brass latch poise to lock at any notch. A small tare bar may be furnished to balance the weight of sacks, on special order at an additional price. Weights are supplied to indicate 25, 49, 98, 140, 196 and 280 pounds respectively, to weigh all standard barrel and sack loads.

Durably and attractively finished in blue and gold, all well varnished for protection.

Self-contained, with Foot Lever

No	Capacity	Beam	Platform	List Price
1072	600 lbs.	25 x ½ lb	20″ x 28″	$130.00

Note.—In the platform size above, the first figure denotes dimension parallel with the beam.

Each

No. 10CS—Table only..... **$54 00**

One in crate; shipping wt each 60 lbs.

RADIO SETS AND PARTS

VACUUM TUBE RECEIVING SET
GREBE "SYNCHROPHASE"

Operating Distance Up To 3000 Miles. Wave Length Range 200 to 600 Meters.

Consists of two stages of balanced tuned Radio Frequency, detector and two stages of non-regenerative Audio Frequency Amplification. Has the Grebe Synchrophase Circuit.

Will tune out any local broadcasting and bring in distant stations without distortion.

The setting of the three large tuning dials is always the same for any particular broadcasting station.

After a station has been brought in positions of the dials should be noticed. The same station can be brought in whenever it happens to be broadcasting by lighting tubes and turning dials to these readings. This set has such tremendous volume that it is only necessary to light the tubes about half way except when receiving the most distant stations like those across continent.

Has no Whistle like that of the Regenerative circuit and no tubes reflex.

Greater Sensitivity has been gained by balancing as well as tuning two stages of Radio Frequency.

Greater Selectivity has been gained by means of fieldless Binocular coils, transformers with which the two stages of Radio Frequency and the Detector are tuned.

A new type of volume control gives an unbroken range of six variations of Audio Frequency.

Hand rubbed Walnut finish cabinet, polished black panels, gold plated trimmings.

The antenna furnished with this set includes everything necessary; 150 feet of stranded copper antenna wire, 25 feet No. 14SBRC lead-in wire, 20 feet No. 18 rubber covered ground wire, 1 No. 200 lightning arrester, 1 No. 708 battery switch, 2. 7½x6 inch porcelain tubes, 3 No. 1NC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 counter and 12 insulated staples.

Set includes the following:			Each
No. MU-1—Receiver	348	75	$156 00
No. UV201-A—Tubes (5 only)	10	20	4 00
No. CHS—Telephones	27	00	12 00
No. 767—"B" Batteries (3 only)	7	86	3 75

No. BGA—Antenna Equipment	12	00	5 00
			Per Set
No. MU-1-C—Complete as described, ready to be installed	504	09	$221 85
			Each
No. BC-1—Battery case for the above set	33	75	
Carefully packed in carton; wt per set 42 lbs.			$15 00

If you are not selling radio, start now. Write us. We'll furnish all information necessary.

RADIO SETS AND PARTS

VACUUM TUBE RECEIVING SETS
"SLEEPER MONOTROL"

Operating Distance Up To 3000 Miles, Wave Length Range 200 to 600 Meters.

Consists of four tubes. Has the Grimes Inverse Duplex Circuit, which by means of the Reflex arrangement gives the effect of a seven tube set, three stages of radio frequency amplification, a detector and three stages of audio frequency amplification. Will tune out local stations and bring in distance stations without distortion. Has three large dials on which wave lengths are marked. To bring in a station it is merely necessary to turn large dial to wave length of station desired and then turn small dial until station comes in. The setting of the two dials is always the same for any particular Broadcasting Station. After Station has been tuned in the dials should be noticed, same station can be again tuned in very easily by setting dials to same readings. Has greater volume and long range of distance. Hand rubbed walnut finish; polished black panels, bakelite dials.

The antenna furnished with this set is the same as furnished with No. MU-1-C.

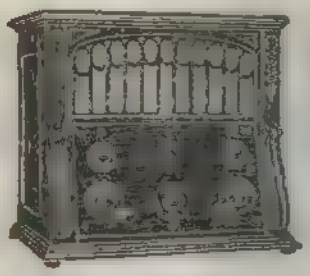
RADIO SETS AND PARTS

RADIOLA X

Radio Corporation of America. Operating Distance 1500 Miles.



A four tube dry battery operated regenerative receiver, highly selective and non-radiating, for use with an aerial, embodying extraordinary improvements which will prove a revelation to the broadcast listener. It provides selectivity capable of meeting the requirements in congested broadcasting zones.

It is a non-radiating receiver employing a new discovery in radio circuits, the Regenoflex circuit which provides a regenerative receiver which prevents the broadcast listener from interfering with his neighbors entertainment and reciprocally he is not interfered with by his neighbor. On a suitable antenna Radiola X will receive across the continent and it enables the reception of far distant broadcast stations while local stations operate.

Mounted on an unusually handsome cabinet with a self contained loop antenna, it operates on a new principle providing more melodious reception than anything hitherto produced. The new loud speaker muffles background noises, hisses, etc., giving quiet operation and natural quality.

The tuning circuits of Radiola X are so adapted to aerials of various lengths, that very good results may be had without selectivity thus giving maximum energy signals.

The antenna furnished with this set includes everything necessary: 150 feet of stranded copper antenna wire, 25 feet No. 14 SBRC lead in wire, 20 feet No. 18 rubber covered ground wire, 1 No. 200 lightning arrester, 1 No. 708 battery switch, 2 2½x6 inch porcelain tubes, 3 No. INC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 connector and 12 insulated staples.

Set includes the following:		Each

RADIO SETS AND PARTS

RADIOLA REGENOFLEX

Radio Corporation of America. Operating Distance 1500 Miles.

A four tube dry battery operated regenerative receiver, highly selective and non-radiating, for use with an aerial, embodying extraordinary improvements which will prove a revelation to the broadcast listener. It provides selectivity capable of meeting the requirements in congested broadcasting zones.

It is a non-radiating receiver employing a new discovery in radio circuits, the Regenoflex circuit which provides a regenerative receiver which prevents the broadcast listener from interfering with his neighbors entertainment and reciprocally he is not interfered with by his neighbor.

A table type of the Radiola X for use with external loud speaker. Radiola Regenoflex gives identical performance when used with Radiotrons and Radiola loud speakers, and has space for the necessary batteries, connections to the aerial and earth wires are made from the rear, thus doing away with unsightly wires, batteries, etc.

The antenna furnished with this set includes everything necessary: 150 feet of stranded copper antenna wire, 25 feet No. 14 SBRC lead in wire, 20 feet No. 18 rubber covered ground wire, 1 No. 200 lightning arrester, 1 No. 708 battery switch, 2½x6 inch porcelain tubes, 3 No. INC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 connector and 12 insulated staples.

ALUMINUM WARE

—BLUE GRASS—

Blue Grass aluminum ware is made of 99% pure aluminum of good, heavy stock—each article shaped of one solid hard piece of metal—highly polished outside and in.

Fruit acids have no effect on Blue Grass aluminum ware. It will stand a heat of 1,100 degrees Fahrenheit and will not break by dropping. There is nothing to rust, corrode, no seams to let loose and with proper care will last a life time.

STOVE HOLLOW WARE

GRISWOLD, EXTRA FINISH

Griswold extra finished iron hollow ware is of the highest quality. Each piece is carefully molded by experienced workmen insuring thicker, heavier metal, where durability and heat are required. The choicest of high grade superior iron is used, making possible the highly polished surface. To preserve this finish each piece is vaporized with a transparent anti-rust preparation, which eliminates the danger of rust from atmospheric changes.

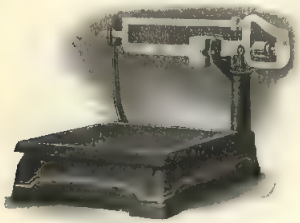
PACKAGE SCALE WITH FULL CAPACITY BEAM



This scale is especially adapted for the accurate weighing of packages up to 55 lbs. for express or parcel post shipments. It takes up but very little space on counter or table, yet is strong and sturdy to stand the impact of rapidly handled packages. The full capacity beam assures exceptional speed in weighing, for there are no lower weights required, each reading being given directly by the poises.

The beam is of the *arrow-tip* pattern, of brass with brass sliding poises. The upper bar is graduated 5 lbs. x 1 oz., the lower 50 x 5 lbs. The platform is of a convenient size for the packages. The scale is durably and attractively finished in black baked enamel and bronze striping

No.	Capacity	Beam	Platform	List Price
532	55 lbs x 1oz	Upper–5 lbsx 1oz Lower–50 x 5 lbs	10½"x12"	$32.00

Note.—In the platform size above, the **first** figure is the dimension parallel with the beam.

PLATFORM COUNTER SCALE

with short iron pillar

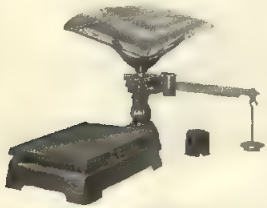
This is one of the most efficient scales for general service, where a strong, compact outfit of fair capacity is needed for accurate weighing. It is used in retail business for merchandise of every nature, in factory for weighing parts or products of brass, copper and other high-priced metals; in the dairy trades for weighing out cheese and butter; in hospitals, diet kitchens and the like for weighing supplies and also for weighing infants; in fact, this scale practically fills a universal need.

It is built of metal throughout sturdy and strong, with a short iron pillar and iron platform of convenient size.

The No. 1216 scales are similar to those described above, with the addition of the suspended platform feature. This construction is of the greatest advantage for fine, permanent accuracy, sensitiveness and durability and adapts these scales for weighing valuable commodities, such as fine silks and other fabrics, bullion, valuable castings and such similar products as require a rugged scale as well as a sensitive scale.

No.	Capacity	Beam	Platform	Price Single Beam
528	200 lbs.	5 lb x 1 oz.	10½" x 14"	$32.00
1212	300 "	10 lb x 2 oz.	13½" x 19½"	42.00
1216	300 "	3 lb. x ⅛ oz	13½" x 19½"	52.00

Extra for Double Beam, $15.00



PLATFORM SCOOP SCALE

This scale, commonly called the Union Scale, offers the combined service of a platform and a scoop, each weighing certain commodities most conveniently and in fairly large quantity.

The entire scale is a strong, compact outfit, with a substantial iron frame.

The scoop is snugly supported in a broad fork and may be furnished either in tin or brass.

The beam is of brass, fitted with sliding poise and may be supplied either angle or double graduated as given below. A counterpoise and suitable weights make up the full capacity. The scale is durably and attractively finished in baked enamel

Capacity 240 lbs. x ½ oz. in scoop. 240 x ¼ lbs. on platform.

Beam Graduations: Single Beam—Upper graduations, 5 lbs. x ½ oz.; lower graduations, 40 x ¼ lbs. Double Beam. Front bar graduated 4 lbs. x ½ oz.; back bar graduated 32 x ¼ lbs

Scoop Size: 18½ inches long x 9 inches wide x 5¾ inches deep

No.	Description	Capacity	Platform	Price
500	Single Beam, Tin Scoop.	240 lbs.	10½" x 13½"	$24.00
502	Single Beam, Brass Scoop.	240 lbs.	10½" x 13½"	27.00
504	Double Beam, Tin Scoop.	240 lbs.	10½" x 13½"	27.00
506	Double Beam, Brass Scoop.	240 lbs	10½" x 13½"	30.00

Note.—In the platform sizes above, the **first** figure is the dimension parallel with the beam.

PLATFORM COUNTER SCALE

These are high capacity scales for counter use in weighing the heavier commodities.

They are equipped with nickel-plated double beam, the upper bar being graduated 15 lbs. x 1 oz. and the lower bar 50 lbs. x ½ lb.

No. 505 has the standard iron platform and No 521 has a sanitary marble platform.

If desired the scales can be fitted throughout with *agate bearings* at an additional cost

No.	Capacity	Platform	Price
505	250 lb. x 1 oz....	12 x 15 Iron.....	$44.00
521	250 lb. x 1 oz....	12½ x 15½ Marble.	47.00

COUNTER SCALE WITH SQUARE PLATE

These scales are of the regular counter type, with broad, stable base, rigid column and strong construction throughout, to weigh accurately up to 25 pounds. For weighing butter, cheese, meats and products of a similar nature, an opal glass plate 10 inches square is provided, firmly held in suitable prongs, and offering a highly sanitary and easily cleaned surface.

The *arrow-tip* brass beam may be single or double and has a notched top for use with the nickel-plated hanging poise provided. The beam is graduated 5 lbs. x ½ oz. on one or both bars, the full capacity being made up by loose nickel-plated weights for counterpoise. The scales are durably and attractively finished in baked enamel maroon. May be furnished with *agate bearings* at an additional price.

No.	Description	Capacity	*Beam	Plate	List Price
564	Sing. B.	25 lbs	5 lbs.	10" sq. O. Glass	$20.00
566	Dbl. Bm.	25 lbs.	5 lbs.	10" sq. O. Glass	23.00

*Beam graduated to ½ oz.

COUNTER SCALE WITH SCOOP

These scales are particularly sensitive, for use in weighing drugs and other materials calling for special accuracy. They are equipped with a brass scoop, well supported upon a broad fork, so as not to tip easily. The scoop furnished is seamless 14½" long x 7" wide x 4" deep. It is regularly fitted with an *arrow-tip* brass single beam. The beam has a notched top to hold a nickel plated hanging poise and full capacity is made up by nickel plated loose weights on a counterpoise. All scales are durably and attractively finished in baked maroon enamel and ornamented. May be fitted with *agate bearings* at an additional price.

One in paper bag; three doz in crate.

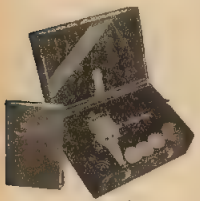
VIBRATORS

HAMILTON-BEACH

The devices shown below consist of small light motors provided with a suitable handle, and to the shaft of the motor is attached a small coupling or fitting for holding the various applicators used. They are for use in the treatment of certain ailments where massaging is advised. Their use is much more effective and less fatiguing than manual massage. All types shown here give both the lateral or rubbing strokes for facial massage, and percussion or striking strokes for body treatments. They operate from any lamp socket. Each outfit is furnished with vibrator; six applicators, Nos. 1, 2, 3, 4, 6 and 7, as shown below, 6 feet cord and separable plug; and the 300-page book treating on the subject of vibratory massage; all packed in a handsome black leatherette carrying case lined with satin.

TYPE C



TYPE C

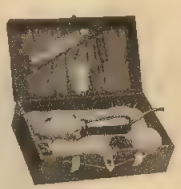
For professional use. Especially recommended for physicians, nurses, masseurs, barbers, and for energetic home treatment. Its nosepiece action gives the true Swedish rotary movement which medical science recognizes as the most effective stroke. Very powerful motor with seven speeds. Attractively finished in triple buffed and polished aluminum motor and shaft housing. Black japanned wood handle and 6 feet of heater cord and separable plug.

The following applicators are furnished with machine, Nos. 1, 2, 3, 4, 6 and 7. 1/30 h. p., 60 watts, 110 volts, 25-60 cycles A. C. motor

	Net wt. ea.	Ship'g wt. ea.	Each
Type C	3 lbs.	7 lbs.	$29.00

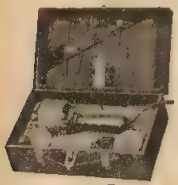
TYPE A

For home use. The motor shaft does not extend out from the motor housing as does Type C, shown above, hence the applicators are coupled much closer to the motor. This decreases the range of work which may be done, as it is impossible to reach the many places accessible to Type C only. Otherwise this outfit is practically the same as Type C. 1/50 h. p., 45 watts, 110 volts, 25-60 cycles, A. C. motor.



TYPE A

	Net wt. ea.	Ship'g wt. ea.	Each
Type A	2¼ lbs.	6¼ lbs.	$20.00



TYPE F

TYPE F

Very popular for home use when a moderate priced good vibrator is wanted. Very similar to Type A, shown above, except the motor housing is cast iron, highly polished nickeled finish, which makes this outfit somewhat heavier than Type A. Motor is just as carefully built and is fully guaranteed. 1/40 h. p., 50 watts, 110 volts, 25-60 cycles, A. C. motor.

	Net wt. ea.	Ship'g wt. ea.	Each
Type F	3 lbs.	6¾ lbs.	$19.00

All the above, one in a shipping carton.

TYPE D

Same as Type F, except it has a one-speed 1/40 h. p. Universal motor for use on 110-volt, 25 to 60 cycles A. C. or D. C. A push button switch for stop or start is in the handle. 50 watts.

TYPE D

	Net wt. ea.	Ship'g wt. ea.	Each
Type D	3 lbs.	6¾ lbs.	$17.00

One in a shipping carton.

APPLICATORS

For use with Hamilton-Beach Vibrators only.

The New-Life applicators shown here have been found to be the most practical to fill every need where vibration is advisable. Each is fitted with a little threaded stem, which may be readily screwed to the end of the shaft and quickly taken off and changed when desired. The first six are included with every New Life vibrator. Nos. 8 and 9 are special and are not furnished with vibrators.

No.		Each
1	Flat disc made of hard rubber for rubbing and kneading the muscles of the body	$0.50
2	Soft rubber, bell-shaped applicator, for face, neck, arms and bust	.50
3	Velvet sponge for the face, especially adapted to the treatment of eyes, nose and throat	.75
4	Round ball made of hard rubber, the most powerful applicator made for cases requiring vigorous treatment	.50
6	Soft rubber. A favorite for treating skin and scalp	.50
7	Soft rubber. 12-prong	.50
8	Bristle brush. Wonderfully effective for scalp treatment	1.00
9	Soft rubber rectal applicator	1.55

HAIR DRIERS

POLAR CUB

No. B-92—OLD IVORY FINISH

Standardization of the Polar Cub Motor enables this electric hair dryer to be put on the market at an extremely low price. Weighs only 27 ounces, small and easy to use. Equipped with blower of most efficient type. Has switch in handle for hot or cold air. Handle designed particularly to fit woman's grip. Nickel and ivory finish. Wonderfully well balanced. Has Universal motor for operating on A. C. or D. C., 110 volts. Easily oiled. Porcelain heating element guaranteed for one year. Separable two-piece plug and heavy cord.

No.	Each
B-92	$0.45

One in a box; eight in a case

No. B-92C—BLACK FINISH

This is the lowest priced hair dryer on the market, putting it within the range of any woman.

It is equal to B-92 Hair Dryer, except that it has hot air feature only and has black rubber enamel finish. We find upon investigation that the individual user very rarely uses cold air. We have therefore, eliminated cold air from this hair dryer.

Has single plug. Operates on A. C. or D. C., 110 volts.

No.	Each
B-92-C	$4.98

One in a box; eight in a case.

VIBRATORS

POLAR CUB

No. B-87

Lowest priced rotary motor vibrator on the market. A universal motor vibrator that operates on either D. C. or A. C., 110 volts. Comes complete with three applicators—brush, button and cup.

Circular vibrations, the only true form of massage. Automatic oiling system. Used on either A. C. or D. C.; socket rotator; spring friction relief. Fully guaranteed.

Two-part drawn steel shell and wood handle, finished in rubber enamel black. Length of handle, 4⅝ inches; length over all, 7 inches. Furnished with 5½-foot black twisted lamp cord and standard screw plug. Vibrator extension brass finished. 22 watts.

No.	Finish	Length handle	Length over all	Ship'g wt. ea.	Each
B-87	Black	4⅝ in.	7 in	2½ lbs.	$4.95

One in an attractive carton; twelve in a case.

No. B-91

Finished throughout in ivory, this vibrator makes a strong appeal to women who are naturally attracted by its beautiful appearance. It is the same mechanically as the B-87 vibrator, except for the handle fitting which has been improved considerably to obtain a rigid connection, practically freeing it from handle vibration. Equipped with heavy cord and two-piece separable plug.

No.	Finish	Length handle	Length over all	Ship'g wt. ea.	Carton	Each
B-91	Ivory	4⅝ in.	7 in.	2½ lbs.	12	$6.75

One in an attractive carton; twelve in a case.

WASHING MACHINES

"MOTOR"

High Speed. Hand Power.

Louisiana Red cypress tub; hoops and all gearing aluminum finish; corrugated sides and bottom on inside of tubs; stave legs.

The four-winged wooden dolly sends 320 gallons of suds through the clothes each minute.

All gearing is encased to prevent accidents. All gears are machine cut, making an absolutely smooth running gear with the least possible friction. There is no racking of the balance wheel and noise is practically eliminated.

Outside dimensions, diameter of tub at top 21 inches; diameter at bottom 25 inches; depth inside 15 inches; height 28½ inches.

	Each
No. 6—Wt each 90 lbs	$45 00

One in crate.

RESTRICTIONS GOVERNING THE SALE OF NO. 6 WASHING MACHINE

In quantities of not less than six machines >ll each less. We are permitted to sell in the following counties of Illinois

Cass, Champaign, De Witt, Douglas, Ford, Fulton, Hancock, Henderson, Iroquois, Knox, Logan, Macon, Mason, Menard, Morgan, McLean, McDonough, Pratt, Sangamon, Schuyler, Tazewell and Warren.

We cannot sell No. 6 Motor High Speed Washers North of the Ohio or West of the Mississippi Rivers, elsewhere than above.

No. A50—Wing dolly	3 75

WASHING MACHINES

HAPPY HOME, STEAM WASHER

Washing machine consists of reservoir, perforated, revolving zinc cylinder, removable top, malleable iron crank and fittings.

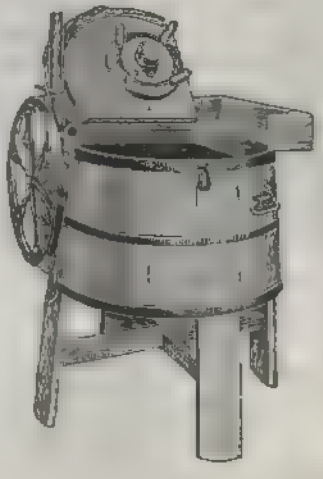
Designed to do a family washing in one hour, without the use of chemicals or washboard.

Built on the same principle and works like the commercial washing machines used in laundries

May be used on any cook stove or gas hot plate. Cylinder will wash from 12 to 17 sheets at one time. Capacity cylinder 4 gallons; diameter 12 inches; length 19 inches; length reservoir 22¼ inches; width 14½ inches; height 10¾ inches.

	Each
No. H-H2—Galvanized steel reservoir and top, gray enameled	$39 00
No. H-H1—Copper reservoir and top	52 50

One in carton; shipping wt each 35 lbs.



HORTON

Hand Power.

Red cypress tub, natural finish and varnished; heavy steel hoops; legs are extended, staves strongly braced. Hinged wood cover; heavy mechanism is on side of tub and not on lid to be lifted; dolly post guarded to prevent tearing clothes.

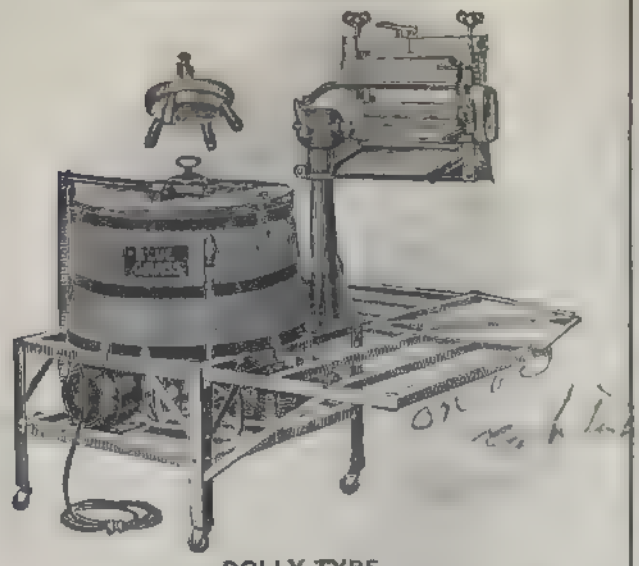
Cut gears that mesh perfectly and require very little power. Lever can be placed in either horizontal or perpendicular position. So designed that fly wheel may be exchanged for 8 inch belt wheel suitable for engine power.

	Each
No. 22—Diam top 20½ ins; diam bottom 22½ ins; depth 13 ins	42 75
Crated, shipping wt each 100 lbs.	*$18 00*

For prompt service, quality merchandise and right prices send your orders to us.

WASHING MACHINES "Also Dept. 5."

—BLUE GRASS—ELECTRIC



DOLLY TYPE

Equipped with accurately cut gears completely enclosed and operating in hard oil which insures smooth running and prevents wearing. Tub equipped with special lid locking device that holds lid in place and prevents wearing and working loose of hinges. Non-leak brass drain cock threaded for hose, drains tub from bottom. All power mechanism is under the frame and out of the way

Frame of high grade angle steel reinforced and braced on all corners with all sections securely riveted together, aluminum finish. Mounted on easy rolling steel casters. The steel extensions for holding three tubs are hinged to the side of main frame and provides substantial support for the tubs. When not in use they are folded down close against the frame.

Improved splash-proof motor, specially designed and with excess power to more than take care of heavy load on both washer and wringer. Equipped with improved adjustment for tightening or loosening belt by turning adjusting knob.

Ball-bearing swinging type wringer with special 12 inch power electric rolls made of highest quality rubber. Equipped with shifting lever that starts, stops and reverses rolls with perfect ease, regardless of load. Special lever permits swinging and locking of wringer in any desired position. Mounted on supporting post securely bolted to angle steel frame and entirely independent of tub, eliminating any strain on the tub. Floor space with extension closed 28x29 ins; height over all 47 ins. Furnished with 10 ft extra heavy insulated cord and attachment plug.

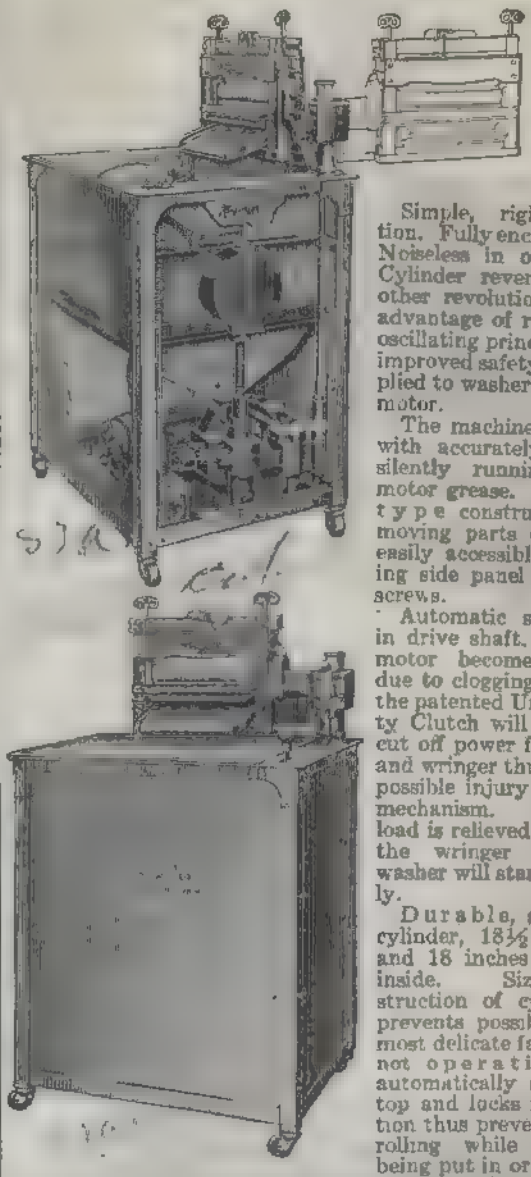
Alternating Current, 60 Cycle, 110 volts.

	Each
No. BG34—Wood tub, selected southern cypress	**$216 00**
No. BG70—Copper tub, tinned inside	**240 00**

Crated; ship wt 300 lbs.

WASHING MACHINES "Also Dep't 5."

UNIVERSAL, ELECTRIC



Simple, rigid construction. Fully enclosed cabinet. Noiseless in operation. Cylinder reverses every other revolution combining advantage of revolving and oscillating principle. Latest improved safety features applied to washer, wringer and motor.

The machine is equipped with accurately cut gears, silently running in light motor grease. Automobile type construction. All moving parts enclosed but easily accessible by removing side panel attached by screws.

Automatic safety clutch in drive shaft. Should the motor become overloaded due to clogging in the rolls, the patented Universal Safety Clutch will immediately cut off power from cylinder and wringer thus preventing possible injury to motor or mechanism. When overload is relieved by reversing the wringer control the washer will start immediately.

Durable, sanitary zinc cylinder, 18½ inches long and 18 inches in diameter inside. Size and construction of cylinder holes prevents possible injury to most delicate fabric. When not operating cylinder automatically stops at the top and locks in that position thus preventing it from rolling while clothes are being put in or taken out.

Tub, quick draining, easily cleaned, with settling zone. Drain cock outside of cabinet 10¾ inches from floor, has threaded end for attaching hose if desired.

Six sheet capacity. Handsome blue gray finish. Detachable swinging wringer. Table top cover easily removed. All electric connections thoroughly insulated. Detachable 10 foot cord with rock-off connection. Height to top of tub 36¼ inches; floor space 24x30 inches.

Grand Opera PHONOGRAPHS

Grand Opera Phonographs are high grade instruments with a rich, mellow, resonant tone resulting from a highly developed tone chamber. They have all recent improvements and at these low prices are exceptional values. The cabinets are strongly built of beautifully grained woods. In tone, appearance and size they will compare favorably with any phonographs on the market, regardless of name or price. Extra well finished and packed.

SHOT GUNS

SINGLE BARREL, HAMMER
HARRINGTON AND RICHARDSON

The special feature of this gun is that the top lever can be operated either right or left hand, as desired. The cocking of the gun locks the top lever, making it impossible to be opened.

We desire to call special attention to the new patented hinge pin used in this gun, which we consider superior to anything of its kind on the market.

Adapted for taxidermists and collectors on account of the small charge of shot doing little injury to the plumage of birds or the skins of small game. It also makes an ideal gun for ladies, being a light, small bore gun. It combines all the excellent qualities of the larger and higher priced guns; blued steel frame.

Barrel—Blued steel, choke bored, adapted to black or smokeless powder.

Stock—Fine black walnut, with plain pistol grip, and fore-end; hard rubber butt plate.

Without Automatic Ejector.

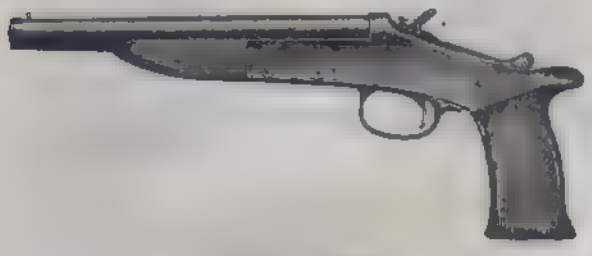
	Each
No. H & R28—28 gauge; shoots 28 gauge loaded shells: 26 or 28 in. barrel; wt 4¾ lbs	$26 25
No. H & R410—44 Caliber 410 gauge; shoots 410 gauge or 44 W. C. F. shot cartridges; 26 in. barrel: wt 4½ lbs	26 25

With Automatic Ejector.

	Each
No. H&R410E—410 gauge; shoots 410 gauge loaded shells; 26 in. barrel; wt each 4½ lbs	$27 30

One in cardboard box, ten in wood case.

HARRINGTON AND RICHARDSON, HANDY



Breech Loading.

This gun is used as a weapon of defence for the home, office and bank, a small game gun for the hunter; also for the automobilist for protection.

The action and working parts are the same as used in H. & R. single guns. The hammer is rebounding, therefore always in the safety notch.

Barrel—Blued steel, cylinder bore, adapted to black or smokeless powder.

Stock—Selected walnut, checkered grip and fore-end.

	Each
No. H28-12½—28 gauge; shoots 28 gauge loaded shells; 12½ in. barrel; wt each 3¾ lbs	$37 50
No. H410-8—410 gauge; shoots 410 gauge loaded shells or 44W. C. F. shot cartridges, 44XL and 44 game getter shot cartridges; 8 in barrel; wt each 2½ lbs	37 50

One in cardboard box.

SHOT GUNS

SINGLE BARREL, HAMMER
IVER-JOHNSON CHAMPION
Large Wide Fore-End.

Breech Loading, Take Down.

An ideal gun for small game. High grade in every particular, light, compact, beautifully balanced, strongly built and accurate.

A three-piece, take down gun. Lug and barrel are a single forged piece. Joint pin is solid in the frame. Coil main spring is adjustable to either light or heavy pull. Compensating locking bolt to take up wear.

Barrel -Blued steel, full choke bored.

Stock—Walnut, with half pistol grip; plain fore-end; rubber butt plate. Weight 6 lbs.

Without Automatic Ejector.

	Each
No. C12—12 gauge, 30 or 32 in barrel	$27 00
No. C16—16 gauge, 30 in. barrel	27 00

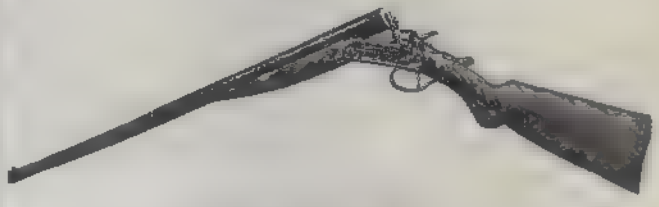
No. C410E-26—410 gauge, 26 in. barrel	28 50

One in cardboard box, ten in wood case.

STEVENS'



Breech Loading.

Adapted to any standard make of shell; loaded with either black or smokeless powder.

Action, top snap, low rebounding hammer; case hardened frame. Barrel compressed forged electro steel, hollow tapered; bored for nitro powder, full choked.

Stock—Plain walnut, pistol grip; ruboer butt plate; metal joint.

Without Automatic Ejector.

	Each
No. 105-12—12 gauge, 30 or 32 in. barrel; wt 6¾ lbs	$27 00

½ doz. in box. Doz $4.25

Hauck Heaters for Concrete Mixers

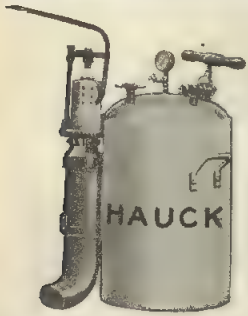
Hand Pump Type

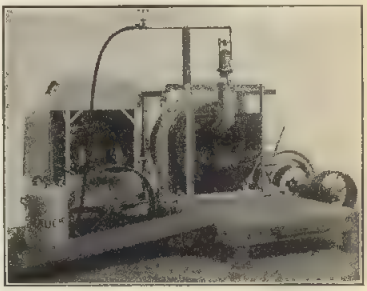
With this heater concrete work may proceed without interruption throughout the year It enables concrete to be placed just as safely during the coldest weather as in mid-summer.

The mixture is produced hot and uniform. The temperature may be raised to 90° Fahrenheit or higher. Rapid hardening occurs and the concrete sets thoroughly before freezing. The most severe weather should not cause the mixing speed to drop more than 10 to 30%.

They are easily attached and operated on any size or type of mixer. They conserve all the heat and deliver it to the mixer drum. It eliminates the heating of water or the aggregate separately, and the rehandling of all materials. The cost of winter is practically the same as the cost of summer operation. The cost of kerosene is trifling and any ordinary workman can operate it.

These heaters are of the hand pump type as compressed air is not usually available on the job. It consists of an oil supply tank with a powerful hand pump built in. One 12-foot length of special oil hose with a vaporizing type burner attached to a steel distributing pipe which is oval shaped at the discharge end. The burner is designed for cold weather operation. It vaporizes kerosene and produces a flame of intense heat which is directed into the mixer drum at an angle, which quickly thaws out and heats the aggregate. The burner is of special heat resisting metal supplied with needle valve and strainer. The tank is of steel with bottom interlocked and all seams welded and brazed.





Prices

No. 80 Heater for concrete mixers up to 10 ft., materials. Oil consumption. 2 gallons per hour. Capacity of oil tank, 12 gallons, approximate shipping weight, 155 pounds.

Price, complete **$165.00**

No. 90 Heater for concrete mixers from 10 ft. to ¾ yard material. Oil consumption, 2½ to 3 gallons per hour; capacity of oil tank, 16 gallons Shipping weight approximately 175 pounds. Price, complete **$187.50**

Contractor's Portable Water Heater

Portable, Light, Compact, Durable

A practical heater built the right way. Heater is made up of 100 ft. of 1-in pipe coils, so constructed as to obtain the most heat, put into a heavy reinforced salamander, self-draining, and will heat a steady stream of water to a temperature suitable for mixing concrete, mortar, etc., in zero weather.

Will last for years.

Weight..... 300 lbs.
List Price..... **$97.50**

WOOD MINNOWS
CREEK CHUB

Famous Pikie Minnow.

Genuine cedar, slim body; rust proof bronze hooks set in sockets and blend with color of body. This new nature lure so closely imitates the pike minnow in shape, color and movement that the combativeness of the bass is aroused and they strike it to kill. Gives best results when reeled slow but does not revolve if reeled fast. Especially designed near surface wiggler but by turning up the screw eye and reversing mouth piece it becomes a surface splatter. Length body 4½ inches.

	Per Doz

WOOD MINNOWS

HEDDON'S DOWAGIAC

Every "Dowagiac" minnow is coated with from seven to twelve coats of the special "Dowagiac" porcelain enamel, the number of coats depending upon the style of finish. This enamel is guaranteed against peeling or cracking.

Every metal fitting, including treble hooks, are nickel plated.

All of the "Dowagiac" minnows are made of selected cedar, which is chemically treated to prevent absorption of water, and are so weighted as to cause them at all times to run absolutely true in the water.

GAME FISHER

Flexible body. Equipped with two treble hooks, non-rotating hook fasteners and eyes; floats while at rest, draws below the surface in a zig-zagging motion. Length of body 4 3/4 inches.

	Per Doz
No. 5501—Rainbow	$33 00
No. 5502—White, red head and tail	33 00

DRILL CHUCKS
STANDARD IMPROVED

This chuck has no projecting jaws, and the plate prevents the use of larger work than the chuck is designed for, very substantial guaranteed to hold true and not injure the shank of the drill; holds round or square work; the jaws are guided by three strong gibs, and the screws are larger than in any chuck of similar size and type. The jaws and screws are of tool steel, carefully tempered. The hole in the nut is made to fit a taper arbor, but can be bored out and threaded to a special templet at small cost.

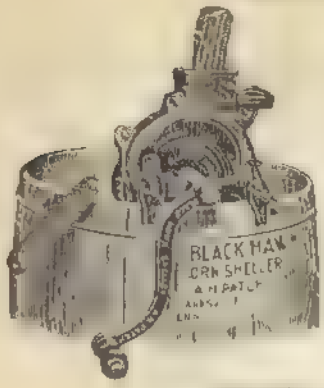
CORN SHELLERS

BLACK HAWK



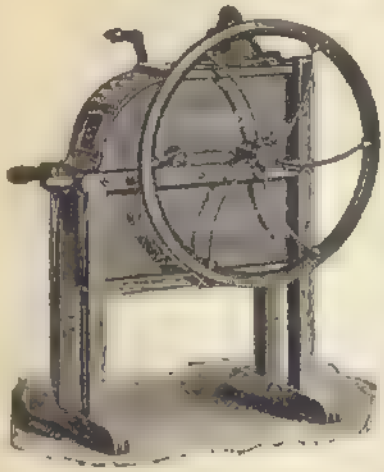
Sheller and Separator

Shells easily and clean; does not scatter; clamps to barrel, box, bin or tub; no tools required, no holes to bore. Malleable iron hopper, separator and crank; all bearings extra long and chilled.

Black Hawk — Capacity 8 to 14 bushels per hour; weight each 15 pounds. .....Each $4 00

Open stock.

HOCKING VALLEY



One Hole, Hand Feed

A right hand sheller with end delivery; has a capacity of 20 to 25 bushels per hour Whether ears of corn are large or small, it will shell them perfectly clean without breaking a grain or throwing out with the cobs. Balance wheel is large and symmetrical, and having wrought iron spokes and a heavy rim, it gives the sheller so much momentum that a child can operate it Will not choke and is easy running.

Hardwood frame unusually rigid, maintaining perfect alignment of working parts; natural color finish, panels painted rich vermilion; neatly striped, varnished and handsomely finished.

Bearings bored and reamed to machine-fit on shaft, bolted to side rails; gearing bored and reamed. Cross rails have mortised and tenoned joints, held in place by joint bolts. Feed and shelling wheel shafts ⅝ inch cold rolled steel; wheels machine fitted and solidly keyed to shaft Crank shaft has turned shoulder to hold drive pinion in place and prevent it from striking shelling wheel

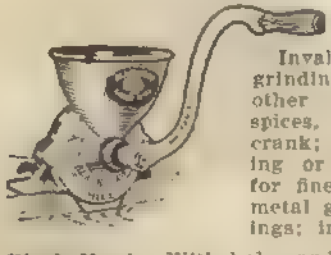
GRIST MILLS

BLACK HAWK



For Farm or Family Use

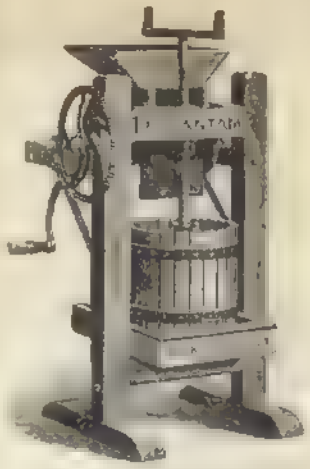
Invaluable for poultry keepers for grinding corn, wheat, rye, rice or other small grains, beans, peas, spices, etc. Long malleable iron crank; easily taken apart for cleaning or repairing, quickly adjusted for fine or coarse grinding; strong metal grinding plates; chilled bearings; interchangeable parts.

Black Hawk—With holes and slots for fastening to table, bench or other support; complete with bolts and wrench; weight each 17 pounds.....Each $6 00

Open stock.

CIDER MILLS

HOCKING VALLEY



Grinding device consists of a series of serrated crucible steel knives, set in a laminated wood cylinder, grate the fruit in such a way as to reduce it to the consistency of apple sauce. This process breaks down all the juice cells, reaches the very heart of the fruit and gives a full flavored, uniform product, which is not possible where the fruit is merely crushed.

Crushing the fruit between iron surfaces results in a brown color and unpleasant taste because of the continuous wiping contact between the fruit and crushing rolls

A pure, clear, full-flavored, amber cider and more of it; greater quantity and a higher quality. Equally well adapted for the handling of grapes, and the only type of cider mill that is adapted to the grinding of grapes before pressing.

Easily adjustable for other fruits and berries

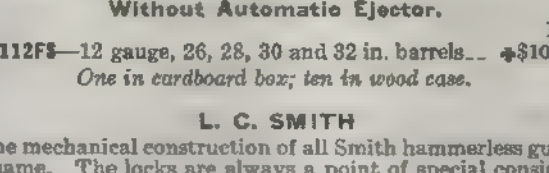
L. C. SMITH

The mechanical construction of all Smith hammerless guns is the same. The locks are always a point of special consideration. Great care is taken in their production; in all grades they are of the highest standard that the best of material, improved machinery and skilled mechanics can produce. Simplicity of construction and strength are the two leading characteristics of the locks on all Smith guns. Each grade has a design and finish peculiar to itself.

Standard lengths of stocks 14 to 14½ inches; standard drops 2½ to 3½ inches, but can furnish any length and drop of stock as desired from factory, without additional charge.



Field Grade, Breech Loading.

Especially designed for those requiring a cheap, sound and plainly finished gun.

Barrels—Armor steel, blued. Can furnish cylinder, modified or full choke bored.

Grip—Full pistol regular, half or straight to order.

Stock—English walnut, with pistol grip, checkered and well finished; fore-end nicely checkered.

SHOT GUNS

DOUBLE BARREL,

AMERICAN GUN CO.

Breech Loading.

An American made gun, of the best material and workmanship; all parts interchangeable; case hardened frame; low circular hammer; rebounding locks.

Barrels—High grade armor steel, finely blued, matted extension rib. Can furnish cylinder, modified or full choke bored.

Stock—Checkered pistol grip and fore-end; rubber butt plate.

With Plain Extractor.	Each
No. 144-410—.44 caliber and 410 gauge, 26 ins. barrels; shoots 44 W. C. F. short cartridges, or 44 XL cartridges; wt 4¾ lbs.	$63 00

One in cardboard box; ten in wood case.

—ESSEX— HAMMERLESS

Breech Loading, with Automatic Safety.

Every part is drop forged, highly polished and case hardened.

The cocking mechanism is simple and strong and the cocking operation requires no more exertion than is used to open an ordinary hammer gun, and they may be closed with the hammer cocked or otherwise, if desired.

Frame and action parts drop forged from best refined steel; locked by heavy round barrel lug-bolt and cross-bit on extension rib, which makes it impossible to shoot loose.

Barrels—Genuine armor blued steel, matted extension rib. Can furnish cylinder, modified or full choke bored.

Stock—Nicely finished, with full capped pistol grip, neatly checkered; Deeley and edge fore-end neatly checkered; fancy rubber butt plate.

Weights—12 gauge, 7¼ to 8 lbs.; 16 gauge, 7 to 7¼ lbs.; 20 gauge, 6¼ to 6¾ lbs.

With Plain Extractor.	Each
No. 0112E—12 gauge, 26, 28, 30 or 32 in. barrels.	$66 00

LAWN MOWERS

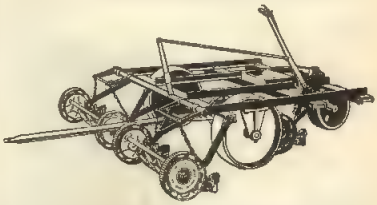
*IDEAL THREE UNIT GANG MOWERS



For horse or tractor hitch; is compact, sturdy and long lived; is equipped with Ideal Bulldog cutting units which have been carefully designed and constructed to withstand the strains and speed incident to tractor drawn machines.

The mowers are regularly furnished for use with horses and later they may be converted to use with tractor. The illustration shows the tractor hitch.

The Ideal with its wide-faced wheels, roller casters, hinging frame and freely suspended units rides smoothly and evenly over level and rolling ground.

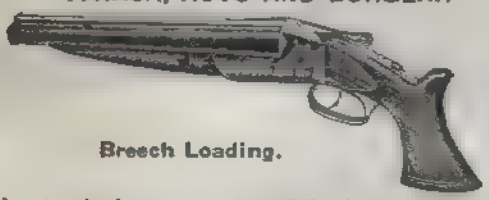
DOUBLE BARREL,
ITHACA, AUTO AND BURGLAR



Breech Loading.

Used extensively as an automobile, home, office and bank protector. Far superior to a revolver or pistol, because it gives a killing pattern. With it the average person can hit an object easier than with the regulation shot gun fired from the shoulder. Will handle any load from the finest shot up to buckshot or even a ball.

Barrel—Best Fluid steel, cylinder bore.

Stock—Selected walnut, checkered grip and fore-end.

Each

No. AB20—20 gauge only, 10 in. barrels; wt each about 4 lbs. $98 25

One in cardboard box.

HOLSTERS

For No. AB20 Gun. Each

No. AB20H Best quality cow-hide russet leather $9 75

Packed loose.

✦F. O. B. New York Factory Only.

SHOT GUNS

DOUBLE BARREL, HAMMERLESS
A. H. FOX

The mechanical construction of all Fox hammerless shot guns is the same. All parts are interchangeable, being made accurately to gauge. The barrels are locked securely to the frame by a heavy rotary bolt through the extension rib, the bolt being so tapered as to automatically take up all wear and keep the gun tight for all time. The top lever is operated by a coil top lever spring, which is an exclusive feature of the A. H. Fox Gun.

Coil main and top lever springs guaranteed against breakage for all time and also guaranteed to shoot any smokeless powder and never shoot loose.

Sterlingworth, Breech Loading.

A plain, staunch, trustworthy gun that will make good all the time and under all conditions.

Engraving—Consists of line work around frame and guard.

Barrels—Genuine Sterlingworth fluid compressed steel; cylinder modified or full choke bored.

SEDGLEY "BABY", HAMMERLESS

Especially designed for vest pocket and handbag or where a larger revolver would not be practical.

This new model ejector is the simplest possible method of removing the shells from the cylinder and still retain the strength of the solid frame with all the conveniences of the swing out, without their disadvantages. To remove cylinder, pull forward and sideways on base pin, which brings cylinder clear of frame, ejecting empty shells at the same time.

Has folding trigger, interchangeable parts and a new one-piece main and trigger spring.

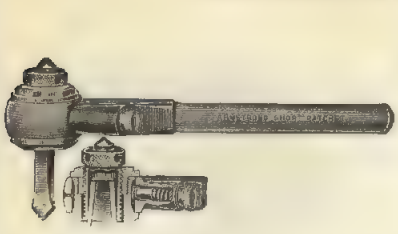
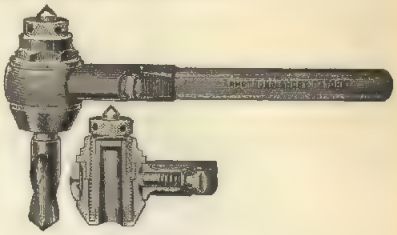
The Armstrong Short Ratchet Drill





Its short head, strength, compactness and quick reverse make it a perfect boiler ratchet. Has a long feed and a short head, making it especially desirable for drilling in close quarters.

Style	Price Each	Length Over All, Inches	Size of Socket or Hole	Length of Head, Inches	Feed, Inches	Weight, Pounds
62-R	$12.00	12	No. 1 Taper Square Shank	2⅜	1½	6
63-R	15.00	18	No. 1 Taper Square Shank	2⅜	1½	8
62-A	12.00	12	No. 2 Taper Square Shank	2⅜	1½	6
62-E	12.00	18	No. 2 Taper Square Shank	2⅜	1½	8
63-A	15.00	12	No. 3 Morse Taper Shank	3⅜	2½	6¾
63-E	15.00	18	No. 3 Morse Taper Shank	3⅜	2½	9

Extra spindles, Styles A, E or R, with nut and feed screws $3.50

By means of sleeves and sockets, these ratchets can be made to take smaller size drills, drills with square taper and blacksmith's straight shank drills

Packed One in a Box.

The Renshaw Ratchet Drill

These tools are made in two sizes—No. 1 taking drills to ¼-inch, No. 3 taking drills to 1½ inches. All the parts are made from steel and hardened.

No. 1 has one collet for drills, with shank ⅜-inch square at shoulder, and one collet for drills fitting No. 1 Morse's standard taper socket.

No. 3 has one collet, No. 5, for drills, with shank ⅞-inch square at shoulder, of ¼ to 1½ inches diameter, which are the extreme sizes that this ratchet is adapted to carry, and collets Nos 1, 2 and 3, for Morse's standard taper shanks. No. 3 and No 5 collets are held in the spindle by screw thread No. 1 and No. 2 collets are tapered externally to fit No. 3 socket.

No.	Price Each	Length of Handle	Depth of Head	Depth of Feed	With Collets
1	$11.00	9½	3	1⅛	With 2 Collets
1	9.40	9½	3	1½	With 1 Collet
3	15.00	18	5	2⅜	With 4 Collets
3	11.05	18	5	2⅜	With No 3 or 5 Col
3	13.25	18	5	2¾	With No. 1, 2 or 3 Col.

No. 1 Collet with square or taper hole. $1.60
No. 1 or 2 Collet for No. 3 ratchet. 1.10
No. 3 or No. 5 Collet for No. 3 ratchet 1.75

Armstrong Universal Ratchet

For general use in machine shops and structural iron and bridge work in setting up work. Very efficient for close, cramped positions. Two inches of motion at end of handle in any direction will drive drill.

66-S	No. 6	With No. 4 Morse Taper Shanks

Note.—When ordering specify style spindle wanted. We ship No. 4 ratchet equipped with M spindle, No. 5 ratchet with J spindle, and No. 6 with F spindle, unless otherwise ordered.

By means of sleeves and sockets spindles can be made to take smaller sizes of Morse taper shank drills, drills with square taper shanks and blacksmith drills.

Rail Benders and Car Replacers

"Jim Crow" Rail Benders

Forged from solid machine steel; steel screws. Square, machine cut threads, three to the inch. Bolted on cross bar and forged wrench.

Number	For Rails	Weight Each Pounds	Price Each
1	100 lbs. and lighter	180	**$50.00**
2	85	150	**43.00**
3	75	110	**32.50**
4	50	85	**24.50**
5	25	60	**20.50**
6	16	40	**18.00**

Chicago Screw Rail Bender

Without Cross-Bar

Widely used in mines because of compactness. May be used for many purposes.

Forged from best O. H. steel.

Square threads, machine cut, three to the inch, steel screws. Malleable cap to fit rails. Furnished with or without steel lever.

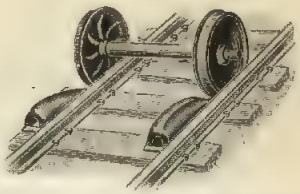
Size No.	Capacity, Size of Rails	Weight, Each	Price, Each Without Lever	Size No.	Capacity, Size of Rails	Weight, Each	Price, Each Without Lever
1	100	170	**$50.00**	4	50	85	**$24.50**
2	85	145	**43.00**	5	25	65	**20.50**
3	75	110	**32.50**	6	16	40	**18.00**

Samson Type Rail Benders

These Rail Benders are made in five sizes. The frames are of high quality heat treated cast steel. The screws are of cold rolled steel, and the bushings are made of special bronze. They will bend rails into position, when taking kinks out of track without drawing spikes—can be operated by one man.

Size	For Rails	Weight Each, Pounds	Price Each
D	45 lbs. and under	36	**$28.00**
C	60 " " "	65	**31.00**
B	80 " " "	126	**42.00**
A	110 " " "	147	**45.00**
AA	150 " " "	202	**50.00**

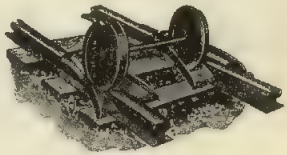
The Aldon Car Replacers



Frogs are marked right and left. The right frog is always placed adjacent to the right rail, the left frog to the left rail. Place the high ends as close to the rail as possible. The wings at the low end of the frogs must never be placed on top the flange of the rail.

No.	Material	Equipment Suitable For	For Rail, Lbs.	Wt., Lbs.	Price per Pair
1	Cast Steel	Heaviest	90	190	**$45.00**
2	Cast Steel	Modern	80	170	**43.50**
3	Mall. Iron	Elec. Sub'n	70	100	**27.00**
3½	Mall. Iron	Elec. Sub'n	50	100	**29.00**
4	Mall. Iron	Industrial	35	55	**24.00**
5	Cast Steel	Street Railways on Paved Streets		40	**9.00**

Johnson Wrecking Frogs or Car Replacers



These are in general use by Standard and Logging Railroads, Contractors and Mines. Have three points of contact for support—at small end by rail, at broad end by rail and tie. Straddle the rail and replace wheels on both sides of rail at one setting. Do not require bolts, clamps, spikes or wedges to hold in place while in operation. Fit all sections of T rail from 6 inches down. These frogs will also de-rail.

Type	For Rail up to		Capacity Locomotive	Wt., Lbs.	Price per Pair
	Wt., Lbs.	Height Inches			
M	45	3½	20 ton	30	**$22.00**
C	65	4⅛	30 ton	60	**28.50**

TARGETS

BLACK DIAMOND

Finished in black with white face. Can be thrown from any trap. Excellent breaking qualities.

Per Barrel
No. 1BDT—Wt per barrel 180 lbs $15 00
594 in barrel.

BLUE ROCK CLAY PIGEONS

The Blue Rock target is of correct shape and weight, can be thrown from any trap, and has best breaking qualities. They are very carefully packed so as to prevent breaking in shipping.

Per Barrel
No. 3BRT—Wt per barrel 145 lbs $15 00
600 in barrel.

SHOOTING GALLERY TARGETS

Figures are of heavy iron; heavy iron plates protects the hinges of figures from being broken.
The birds and stars fall back out of sight when hit, and are reset by means of a rope from shooting stand.

Each
No. 11—Six Figures; wt each 15 lbs $7 95
No. 15—Eight Figures; wt each 21 lbs 10 50
Packed loose.

TARGET TRAPS

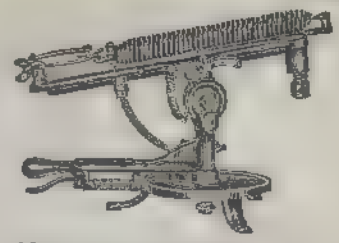
DU PONT HAND TRAP

A simple, practical and efficient apparatus for throwing all standard makes of clay targets. Strongly constructed, and with proper care will give excellent service for an indefinite period.
Nothing yet devised approaches the hand trap for practice for hunting and trap shooting, as an endless variety of flight and angles can be thrown with it. Novice and veteran trap shooters find it just the thing with which to keep in practice and their scores show improvement after using it.
Constructed of high grade malleable iron, japanned; steel spring.

Each
No. DHT—Length extended 34 ins; length closed 23 ins; wt each 6¼ lbs $12 60
One in cardboard box.

TARGET TRAPS

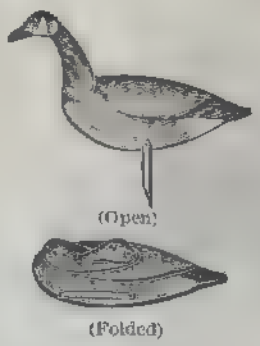
EXPERT



For individual or private use, the Expert is a great favorite; any angle can be obtained by swinging the lever; one trap will afford efficient means for throwing Blue Rocks where it is not advisable to use a Magautrap. The throwing mechanism is simple and durable; may be operated by rope or electric pull.

Each
No. 2ET Black japanned, cast iron frame; steel springs; length of arm 15 ins; spread of feet 11 ins; wt each 30 lbs $25 95
One in wood box.

DECOYS

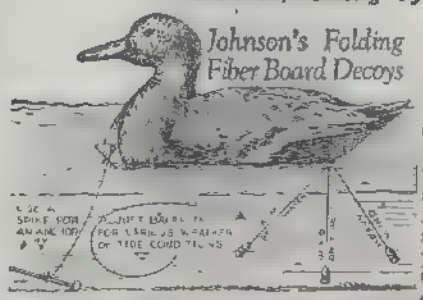


GEESE, CANADA

Wood; all parts are riveted together so they will fold very neat and compact.
Very light in weight and designed for use in field shooting and on sandbars. Represents full size geese in side view and may be stuck up to show from any view point by use of the pointed stick which is attached to the body.

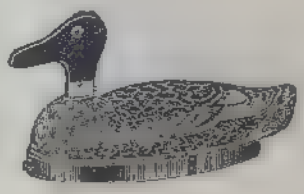
Per Doz
No. 2—Wt per doz 14 lbs $30 00
One doz in carton

DUCKS, Folding Type.



Printed in natural colors on tough, water-proof fibre. Board, mounted on 5/16 inch cedar float which slides inside the body to spread and float the duck. A balancing device attached to the float prevents tipping. Complete with anchors and cord. Assorted six Drakes and six Hens to the dozen.

Per Doz
No. 1FD—Mallard, complete $14 40
No. 1FB Bodies only, without float 9 75
No. 1F—Cedar floats only 4 95
One doz in canvas bag; wt per doz 4½ lbs.



Sheet metal body, mounted on ⅞ inch wood float, fastens with two metal clamps; removable rubber head; will float evenly on the water at all times, are well balanced, and painted in natural colors, true to life. Assorted 8 males and 4 females to the dozen.

Per Doz
No. 50—Mallard $31 50
One doz in cardboard box; wt per doz 18 lbs.

Model A29

Black Leatherette Covered

Price Each

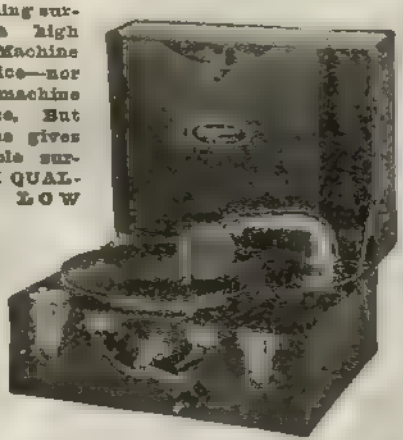
12.50

The New Ace Portable machine is deemed by far to be the greatest value ever produced. The cabinet is made of wood and is covered with black leatherette. Cabinet is fitted with strong catch lock and carrying handle. Has positive stop, a needle cup, and speed regulator. Cover contains place to carry records. This machine is equipped with the well known Silent Motor and a wonderful tone arm which produces a tone equal to that of any high priced machine. Sound box in rear. Size when closed 15x11½x6¾ inches. Each in box.

Model A29. Each **12.50**

New Model Portable

There's nothing surprising in a high grade talking Machine at a high price—nor a low grade machine at a low price. But the portophone gives you the double surprise of HIGH QUALITY at a LOW PRICE.



Model A24
Black Leatherette Covered
Price Each

15.75

This machine was perfected after two years of development. It has a sound equal to that of any $150.00 machine, made possible by a specially designed throw-back tone arm, a new Portophone Concert reproducer, and a scientifically designed tonal chamber. This increases the volume many times, yet fully retains the purity of tone for which the Portophone has long been famous. It is covered with new long grain black leatherette. Record cabinet on inside of cover. Size when closed 15½x11½x8¾ inches.

KELLY VANADIUM HATCHETS

High Polish Finish

Drop forged from chrome vanadium steel. Tempered and tested with special care, to obtain the fine tough temper which this steel is designed to take and hold. The blades are thinner than on ordinary hatchets, without sacrifice of strength. The handles are second growth hickory, special shape, swell end, correct in grip and balance.

High Polish Finish

Special heavy hardened head for driving. Extra thin blade, stronger than ordinary heavier blade.

This line represents the peak of development in the manufacture of high grade hatchets. Consideration has been given to every detail which could enhance the quality and attractiveness in design and finish

SHINGLING

POPCORN POPPERS

With Warmer.

In addition to popping corn, this popper keeps it hot. By including a peanut cylinder you have a combination roaster, popper and warmer.

Warmer made of galvanized iron and painted; glass front and ends. One inch of asbestos under warmer prevents over heating. Equipped with shelf for butter pot, salt shaker and with tank for extra supply of butter.

This method surpasses the shaker or any other method of popping. It increases the yield and turns out larger, whiter and tastier corn, because there is no damage done to the popped corn by being over the fire until the popping is complete. With each revolution of the cylinder it is separated from the unpopped and ejected while the unpopped remains. Imperfectly popped grains go with the residue.

Capacity, 4 bushels popped corn per hour; capacity of warmer, 1 bushel. Height to top of warmer, 40 inches; width 26 inches, depth 13 inches; size warmer, 10x13x8 inches.

For hand or steam power. If steam power is used, 11 inch pulley attached.

Hand.

	Each
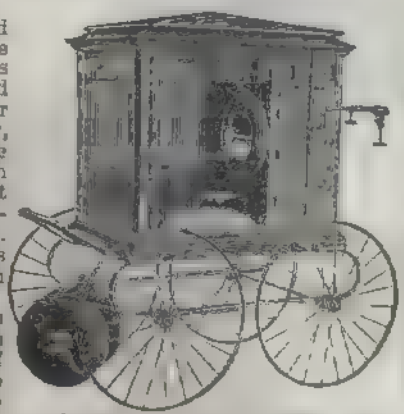
No. 2PC—Capacity 2 pecks	✣$33 00

COMBINATION PEANUT ROASTERS AND POPCORN POPPERS



Double oak case and frame, with double strength glass. Case has display shelf. Furnished with a peanut cylinder and a popcorn cylinder, either of which can be removed or replaced in a few seconds. Heat from popper keeps contents of case warm. Mounted on steel wheels and is equipped with torch for illumination.

Capacity of popcorn cylinder, 8 quarts each four minutes; capacity of peanut cylinder two pecks each twenty five or thirty minutes; capacity of popcorn case, 8 pecks; capacity of display shelf, 14 sacks. Height to top of base, 64½ inches; length over all, including wheels, 61 inches; width, including wheels, 35½ inches.

✣F. O. B. Ohio Factory Only.

COMBINATION POPCORN POPPERS AND PEANUT ROASTERS

KINGERY

Continuous Corn Popper With Butter Coater And Peanut Roaster.

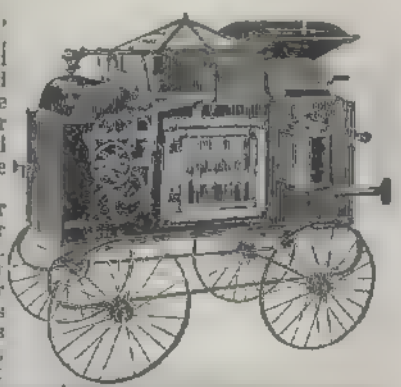
Cabinet of metal construction body and case made in one piece of heavy furniture steel with all joints securely welded; outside finished in mahogany, inside gray enameled. Metal doors and window frames with bevel plate glass, nickel plated decorations and finish of the visible mechanism impart the right touch and add to the attractiveness of machine. Equipped with flash type electric sign flashing on and off at regular intervals. Corn popper designed that it may be operated independently of the butter coater, allowing an accumulation of corn permitting operator to prepare it specially for each customer.

Capacity of hopper 12 pounds; pop corn case 1 bushel; butter tank ½ pound; corn popper 16 to 40 quarts per hour; peanut roaster ½ bushel; peanut warmer 1 bushel.

Note—Operates on A. C. or D. C. 110 to 115 volts. When ordering state whether for A. C. or D. C. if alternating current give number of cycles.

	Each
No. 994—Floor space required 29x30 ins.	✣$1875 00

Crated, set up; shipping wt each 750 lbs.



Constructed of steel, cast iron galvanized iron, copper, nickel silver and glass. No wood used except for holding the glass in the nickel silver frames at side of case and top of warmer, where the heat does not affect it.

The peanut cylinder is run by spring power and the popper by hand. Warmer made of copper and heated by hot water and steam from pipes leading to the burners under peanut cylinder, and so constructed that the nuts can get almost heat, a very important feature.

The nuts can be tossed without stopping the cylinder. When roasting is completed the nuts are dumped into the warmer by a swinging frame, whereon the cylinder is lifted and the contents emptied. The popped corn rolls from the popper into the case. Equipped with a torch for illumination and a gong all attached under machine, which by pulling a chain, attracts attention of the people.

Capacity of peanut cylinder, 10 quarts per roasting; capacity of warmer 3 pecks; capacity of popper, 4 bushels of popped corn per hour; capacity of popcorn case, 2 bushels of popped corn; height 51 ins; height to top of tank 64 ins; length, including wheels, 52 ins; width, including wheels, 27 ins.

Kissel 4-passenger speedster

New Kissel Model Appears

KISSEL announces a new 4-passenger Speedster. In appearance this new Speedster is identical with the two-passenger Speedster except that the cover of the turtle-back deck which is built much wider can be swung back and made to form a rear seat. This rear seat which provides seating capacity for two additional people is quite comfortable. Extension of the dickey seat tunnel forward provides ample leg room.

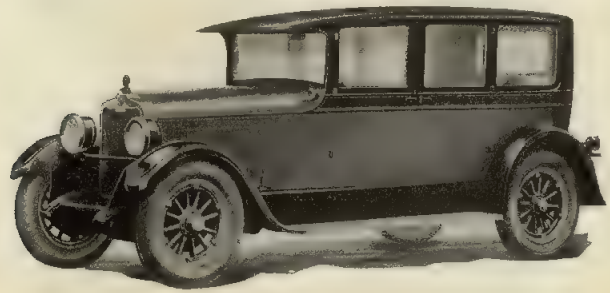
This new car has just made its appearance and is furnished with either a six or eight-cylinder chassis in both the deluxe and standard types.

The same idea is being carried out in the design of the Kissel Enclosed Speedster which can also be furnished if desired with the extra seat for two under the deck, the same as in its open prototype.

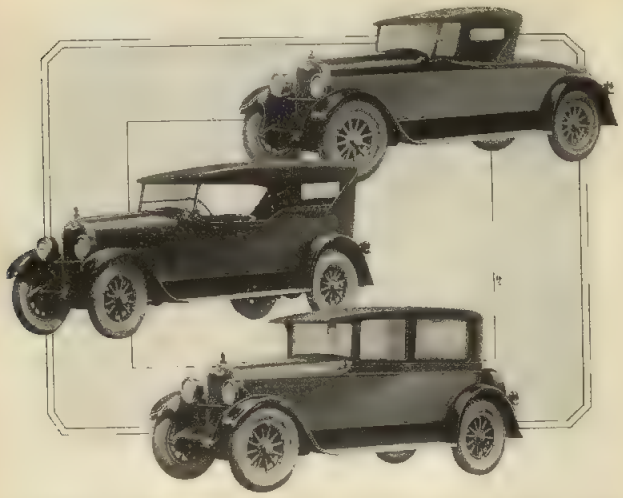
Peerless Six Body Lines Same as Eight

CHANGES in the design of the radiator hood and cowl lines have been made on the Peerless six-cylinder chassis, it was announced recently by the Peerless Motor Car Company. The appearance of the six-cylinder chassis, now known as Model 72, is similar to the "Equipoised 8" model introduced seven months ago. Other than a few minor refinements in the engine and chassis, no changes have been made.

Extending the tops over the windshields, obviating the necessity for separate sun visors and the employing of a double line of belt molding adds to the appearance of the length of the closed models. A large variety of two-tone color combinations are



New Peerless 7-passenger sedan



Top: Sport roadster which is mounted on the 133 inch wheelbase chassis. Center: Seven-passenger phaeton. A 5-passenger phaeton is available on the shorter chassis. Bottom: The 5-passenger coupe. Note that bodies on 6 and 8 cylinder chassis are practically identical.

available to choose from. As before, the chassis come in 126 and 133 in. wheelbase.

A new sport roadster selling at $2285 and $50 less than the former 2-passenger model has been included in the line. In addition to the wide 3-passenger driving seat, a comfortable folding seat located in the sweeping deck provides ample space for two extra passengers. Through a door on the right side of the deck, bags, luggage and golf clubs may be stowed away under lock and key.

The roadster and 7-passenger models are mounted on the 133 in. wheelbase chassis and the remaining body styles are carried on the 126 in. wheelbase chassis.

Lincoln Adds Open Sport Body to Its Line

A sport touring car, duplicate of the type displayed in the Lincoln exhibit at the Automobile Salon, held early in the year in Chicago, has been added to the Lincoln line. Introduction of this new body comes as the result of the popularity which it attained at the show and the numerous orders coming in for it since that time.

Paint is in lively colors with striped moulding which accentuates the long, sweeping lines of the car. The upholstery is of a special leather done in plain paneled effect to harmonize. Fender well forward for spare tires, front bumper and rear fender guards, windshield wings, folding trunk rack and nickeled windshield frame comprise standard equipment for this body type. The top, made of special material over mahogany bows, with nickel trimming, when not up, may be folded back unusually flat and fitted into a top boot of the same material.

Ford Retail Sales

Retail sales of Ford cars and trucks for April totaled 205,580, of which 187,144 were sold in the United States. The April sale in the United States represents an increase of 33,215 over March. Enrollments under the Ford weekly purchase plan during April were 34,188, an average of about 1,300 daily, and an increase over March enrollments of 7,362.

HIGH GRADE KITCHEN CABINETS

Wonder Combinations Of Strength and Beauty

Klein's Electricians' Linemen and Mechanics' Tools

Pole Supports

This construction is distinctly superior to the ordinary article. The uprights are 2x4 dressed on all sides. The joint where the uprights cross is gained and the joint reinforced by strong iron plates bolted through the uprights. The bottom has spiked iron shoes bolted through the uprights.

No. 4004-6. Size 6 feet. Price Ea. $9.25
No. 4004-7. Size 7 feet. Price Ea. 10.00
No. 4004-8. Size 8 feet. Price Ea. 11.00

"Staysalite" Linemen's Torch

Small and light in weight. Stays lit in the wind, burns alcohol without odor or noise. Can be used as a small heater for soldering iron.

Provided with a cup for holding soldering paste. To suspend the torch on a wire under a joint, place the wire in the slots on the upper edge of the rim, give the body of the torch a half turn in the opposite direction, and it is off. Drop it back in your belt by means of the hook.

Price each..... $5.00

Pay-Out Reel on Barrow

Constructed of hardwood and reinforced with steel plates. The barrow is supported by substantially made steel legs, side braced and bolted through the wood. Will stand hard usage. Guard pins are adjustable for 12, 18 and 24-inch coils. Weight, 80 pounds. Price each, $14.00

Extra heavy reel. Weight, 90 pounds. Price each..... $16.00

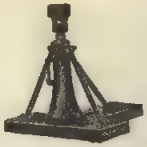
Improved Take-Up Reel

Showing How Cross Piece Can be Detached for Removing Coil of Wire

Constructed of oak throughout. Solidly built, securely bolted and riveted. Cross sections fully mortised and bolted. Sides are steel braced. Has separate guard base which slips over shaft and fastens with a flat key, allowing wire to be removed easily.

No. 4608-3. For 18-inch coil. Price each..... $20.00
No. 4608-4. For 21-inch coil. Price each..... 20.00

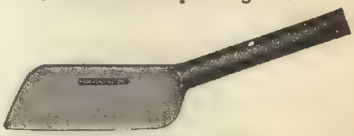
Cable Reel Jack



A pair of these jacks will support cable reels of any size while the cable is being run off. The forked head will hold a 2½-inch diameter shaft and will swivel to any position. The cable may be raised or lowered while it is supported on the jacks. The screw is operated by inserting a bar into the holes in the head of the screw. These jacks are fitted with 2x16-inch locomotive jack screws, braced on oak bases. No. 4700-2 is same as 4700-1, but with ratchet operated screw.

No. 4700-1. Price each..... $22.00
No. 4700-2. Price each..... 30.00

Cable Sheath Splitting Knives



Knife edge tempered and ground to keen edge. Forged complete in one piece. Handle and blade made of tool steel.

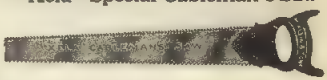
Price each..... $2.75

Cable Stripper Knife

3½-inch blade. Length overall, 8½ inches. For stripping heavy insulated wire and cable. Hardwood handle. Blade securely riveted in handle. Rivet is deeply countersunk, eliminating chance of shock.

Price each..... $2.25

"Xela" Special Cableman's Saw



Has coarse teeth on one side for cutting through lead cable sheath. Other side has fine teeth for cutting through the wire core. 14-inch blade, 18 inches overall.

Price each..... $2.50

Common Pay-Out Reel

Substantially built of hardwood and reinforced with steel plates. We also furnish reel spools with turnpin and disk, without base, for wagon reels or for multiple stringing. Guard pins are adjustable for 12, 18 or 24-inch coils.

Price each..... $8.00

Union Tool Chests

Union Tool Chests are built up to a higher standard of quality and more of them are in use to-day than any other make of similar chests. Acknowledged the best by tool users everywhere in the B and B B chest the Tills and tops are lined complete, the drawers are lined bottoms only. D, DD, E, F, & FF chests—the drawers are lined bottoms only. EE chests—the three small drawers only are lined. G, GG, chests—are not lined.

Kennedy Steel Kits

For electrical workers, mechanics, railroad men, construction men, repair men, installation men and contractors. Made of prepared steel but are no heavier than other bags and tool kits Built to stand the wear and tear of hard usage Re-enforced throughout, fitted with brass side catches, strong two-tumbler Yale locks, steel leather covered handles and riveted so that they cannot pull out. Protected by solid brass corner irons. Finished in three coated baked enamel of brown or black, they present an appearance neat and attractive and look like leather traveling bags. Material, special construction and overlapping features make these kits wear-proof, waterproof, and weather-proof. They are thief-proof because they can be locked and chained and cannot be cut open. WOOD SAWING MACHINES

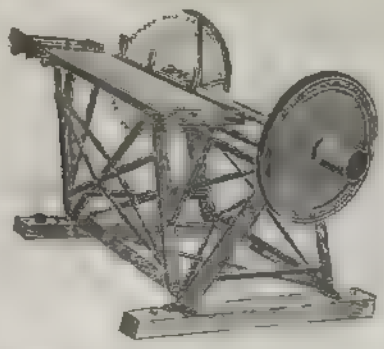
APPLETON



Steel Frame with Tilting Table.

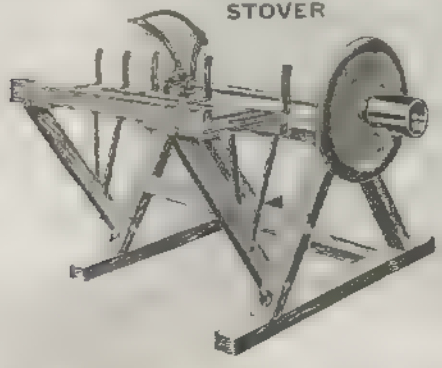
Frame is of angle steel, strongly bolted and firmly braced. The saw arbor is a piece of lathe turned steel 4 ft. 4 in. long and 1¼ inches diameter. It is turned down to 1¾ inches for the saw blade, and to 1 7/16 inches for the balance wheel, pulley and boxes. Boxes are of ball and socket type, well babbitted, dust proof, non heating and self-adjusting. The tilting table has a roller at one end to accomodate long poles. Interchangeable balance wheel and pulley. Frame is equipped with a saw guard.

Frame is arranged to receive the blade to the left of the operator, but if so ordered it can be arranged without extra charge to receive the blade to the right of the operator.

No. 1—Without blade; takes blades from 20 to 30 Each ins diam; pulley 5x6 ins; speed 1000 to 1500 R. P. M.; power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft 6 ins..... ✦$73 50

Shipping wt each 285 lbs.

STOVER



Wood Frame with Tilting Table.

Frame is well seasoned hardwood of ample size and weight to insure great strength, mortised, bolted and firmly braced. The saw arbor is a piece of lathe turned steel, 4 ft. 4 in. long and 1½ inches diameter. It is turned down to 1⅝ inches for the saw blade, and to 1 7/16 inches for the balance wheel, pulley and boxes. Boxes are of the ball and socket type, well babbitted, dust proof, non-heating and self-adjusting. The tilting table has a roller at one end to accomodate long poles. Interchangeable balance wheel and pulley. Frame equipped with a saw guard.

Frame is arranged to receive the blade to the left of the operator, but if so ordered it can be arranged without extra charge to receive the blade to the right of the operator.

No. 2—Without blade; takes blades from 20 to 30 Each ins diam; pulley 6x6 ins; speed 1000 to 1500 R. P. M.; power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft 6 ins..... ✦$66 00

Shipping wt 274 lbs.

Note—For circular saw blades see Dept. 1.

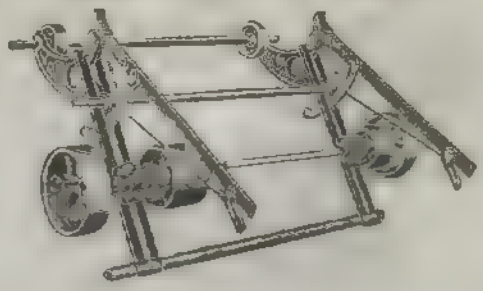
LAY PORTA POWER



A wonderful new farm implement which quickly transforms practically any make of automobile into a portable power plant.

It is universally adapted to operation in connection with practically any small size car. However, with the Ford car, in connection with which it is most commonly used, from six to seven Horse Power at the belt is about the maximum that should be developed.

With Lay Porta power attached to the car such machinery as the wood saw, grinding mill, hay press, pump, corn sheller, etc. can be successfully operated.

(Fig. 1)

After the car is backed into suitable position, the Lay Porta Power is pushed beneath the rear of car as shown in the accompanying illustration (Fig. 1), one foot resting on the base.

The hand clasps control the quadrant, are pressed in, and the handles pushed down. This jacks the car up and pulls it back until tires make contact with rollers. It is locked in this position (See Fig. 2).

(Fig. 2)

(Fig. 3)

Rear of car is now off the ground, the axle resting securely in the pockets on the end of each handle of the Lay Porta Power (see Fig. 3). Everything is ready in place, and the outfit now ready for belt application.

COTTON, CORN AND PEANUT PLANTERS

LEDBETTER "ONE SEED"

The Ledbetter planter plants every kind of seed, cotton, corn, peas, peanuts cane, and in fact all row crops and each as though made expressly for that particular seed

When equipped for cotton, it is distinctly a cotton planter, then put in a corn plate, corn cut-off and corn spur and you have a corn planter that has no equal for accuracy and precision of drop. The same applies to planting of all other seeds. Put in the plate to suit the kind of seed you want to plant and you have a perfect planter for that purpose.

The planting is always in plain sight, you see every seed as it passes out of the hopper.

A full set of plates is furnished; one for single cotton seed, one for more cotton seed, one each for large and medium corn, one for small corn and peas, one for maize, cane and other small seed. The peanut planting attachment and hill drop cotton seed plates are furnished at additional cost

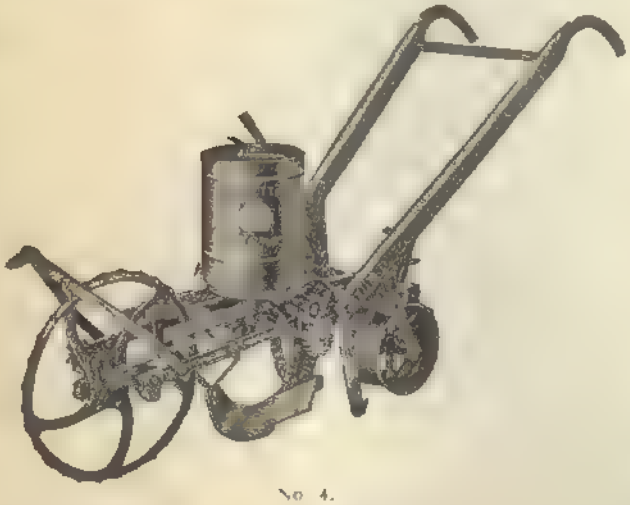
In designing the combined planter and fertilizer distributor, the usual practice of putting a make-shift fertilizer hopper on a planter frame or a make-shift planter on a fertilizer distributor is not followed. This is a complete machine that does the work required in the best possible way.

The seed being distributed evenly, without bunches or skips, one can appreciate the increased value of the fertilizer. None of the fertilizer is lost on bunches of useless plants that are soon to be thinned out, nor wasted where no seed has been dropped.

A shovel, adjustable to depths, opens the drill. The fertilizer is placed in the drill close behind the shovel, spoon coverers follow and level the bed over the fertilizer; the seed drill is then opened by the runner opener at depth desired and seed is planted, covered and firmed by press wheel. Steady flow of fertilizer can be regulated by turning hopper on base

Either planter or fertilizer parts may be used alone, each having separate cut-off lever

WITHOUT FERTILIZER DISTRIBUTOR



No 4.

No. 3—Ledbetter "One-Seed" planter, pitman drive, having shovel openers, shovel coverers and without press wheel; weight each 105 pounds.....Each **$35.00**

No. 4—Ledbetter "One-Seed" planter, double pitman drive, with shovel opener, spoon coverers and with press wheel; weight each 120 pounds.....Each **$35.00**

No. 4DH—No. 4 planter, equipped with double or duplex hopper only; plants all seeds except cotton; weight each 130 pounds.....Each **$40.00**

WITH FERTILIZER DISTRIBUTOR

No. 2

No. 20—Combined Ledbetter "One-Seed" planter and fertilizer, chain drive, weight each 150 lbs .Each **$60 00**

Fertilizer Hopper—To interchange with planter hopper on Nos. 3 and 4 planters; weight each 25 pounds.....Each **$6 50**

Duplex or Double Hopper—To interchange with regular hopper on Nos. 3 and 4 planters weight each 40 pounds .Each **$10 00**

The double hopper is for planting two kinds of seeds, such as corn and peas or velvet beans alternating in the row, also for planting peanuts, corn, peas, beans and all row crops except cotton.

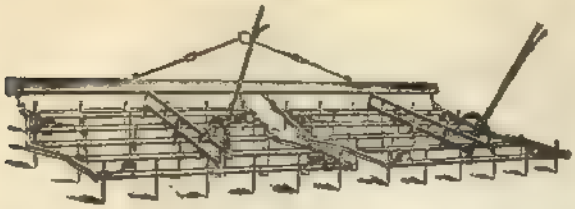
ATTACHMENTS

Peanut Planting Attachment—For Nos. 3, 4 and 20 planters; weight each 7 pounds . Each **$2 00**

No. 17B—Hill Drop Cotton Seed Plate..... Each **60**

HARROWS

GENUINE BROWN



U-Bar Lever

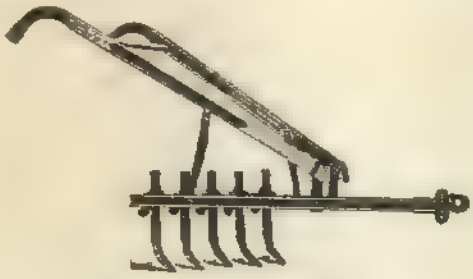
Made of the best grade of U-bar steel, insuring strength; teeth are held in position by U-clips bolted through the bar, are headed and made of the best grade of high carbon steel.

Connecting bars are of heavy steel, attached to teeth bars by malleable castings, and well braced.

Note—When guard rail is desired, the letter "C" should be added to the serial number.

No. 9A—Two section, 50 teeth; cuts 8 feet wide; weight 200 pounds .....Each **$40.00**

No. 7A—Two section, 60 teeth; cuts 10 feet wide; weight 225 pounds .....Each **$50.00**



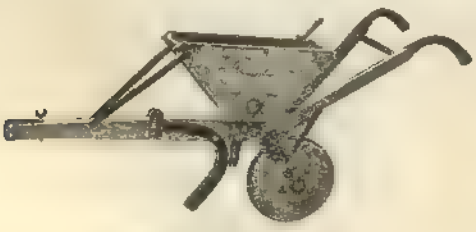
Gayoso Side Harrow

This is a very simple and strong tool that has always been a favorite with cotton growers. The triangular frame is one continuous piece of special "I" bar steel, giving great strength. Teeth held securely in position by heavy steel "U" clips. Handles adjustable. Teeth and handles reversible, to make the Harrow either right hand or left hand as desired

Gayoso Side Harrow—Weight 45 pounds.....Each **$9.00**

GUANO DISTRIBUTORS

GENUINE BROWN



Wood or Steel Wheel

This tool is made of the very best materials and strongly braced throughout. All wearing parts fit perfectly. Force feed distributes the Guano evenly, whether wet or dry. The cut-off is of improved design with lever within easy reach of the operator's hand. Adjustable shovel standards, furnished with wood or steel wheels. Painted red and nicely finished. Furnished with wood wheels when desired.

Guano Distributor—Weight 75 pounds.....Each **$10.00**

SEED SOWERS

HORN

Jointed Spout

For sowing clover, timothy, millet, Hungarian hemp, flax, mustard, turnip and all other small smooth seed that is sown broadcast. Sows 50 acres per day; quickly adjusted to sow any amount per acre. Easily and quickly operated; fully guaranteed to do perfect work.

Heavy canvas sack with shoulder strap and tapering discharge neck. Four section tapered tin spout; simple seed gauge, can be set to sow any amount per acre; scatterer provided in discharge end of the horn

Horn—Capacity of sack about ½ bushel; shipping weight per dozen 9 pounds; complete with directions... .....Per Dozen **$20.00**

Half dozen in a carton.

CYCLONE

Automatic Feed Adjustment

For sowing clover, timothy, alfalfa and other seeds that can be sown broadcast. Sows 50 acres per day; runs easily and will distribute any desired quantity of seed per acre. Slope feed board gives seed a gravity flow and always keeps hopper outlet properly filled without tilting machine.

Automatic feed adjustment gives a positive force feed, quickly adjusted for different seeds, flow started or stopped instantly by touch of lever; seed cannot clog or rush, no waste of seed

Distributing wheel scatters seed evenly and will distribute equal amounts of seed equal distances on each side of operator.

Gears adjustable to take up wear. All wood parts painted; metal parts black enamel.

Seed container of heavy canvas duck with carrying strap

Cyclone—Capacity ½ bushel; shipping weight per dozen 44 pounds; complete with directions..... .....Per Dozen **$48.00**

Packed in cartons of two or three each.

COTTON PLANTERS

GENUINE BROWN

Dow Law

This Cotton Planter is simple in design and strongly constructed of first-class materials. It is the most popular one-horse planter sold in the south. Has heavy hitch head and adjustable opening standard. Agitator prevents seed from clogging and keeps the feed uniform. Furnished with metal wheels.

No. 2—Weight 60 pounds.....Each **$12.00**

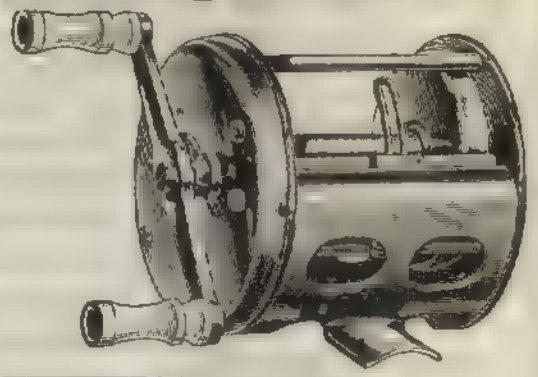
Level Winding Fishing Reels

"MODERN" LEVEL WINDING REEL

"Modern" Level-Winding Reel is simple in construction and of few parts, thus avoiding troubles usually found in reels of this type. Its original and novel style of frame affords an exceedingly staunch alignment for its working parts and strength and protection not found in other level-winding reels. Finest tempered gears; transverse screw and pawl of a special alloy; bushings of both screw and pawl of same material used in most expensive reels, perfectly balanced crank handle with ivoroid grips slightly more than quadruple multiplying radiant nickel finish.

The price is so conservative that it reaches an entirely new and immensely broad field of purchasers. Each in box.

No. 16B35 Each **2.90**



ORENO

LEVEL-WINDING ANTI-BACK-LASH REEL

ORENO Level Winding Anti-Back-Lash Reel. This reel is the same in every respect insofar as action and operation are concerned, as the South Bend Level-Winding Anti-Back-Lash. It is so priced that every angler can now own a Level-Winding Anti-Back-Lash of South Bend construction.

Thumbing and spooling are entirely eliminated. It cannot back-lash, snarl or tangle, and it automatically spools itself, winding the line smooth and even. Like the Oreno Anti-Back-Lash it is of dual use and by a very simple adjustment can be converted into a straight level-winding reel.

Satin finish with double grip. Quadruple multiplying gear. Capacity 100 yards 14-to-20 pound test silk casting line. Spool diameter is 1¼ inches and 1¼ inches wide. One in a box. Weight 9 ounces.

No. 16B42. Each **5.56**

SOUTH BEND

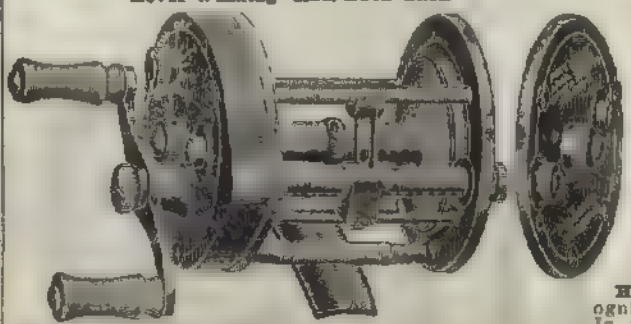
Level-Winding Anti-Back-Lash Reel

South Bend Level-Winding Anti-Back-Lash Reel, intended to make every cast a perfect cast so as to throw your bait and line accurately without a back-lash snarl or tangle, agate jeweled spool caps with adjustable spring tension grip, easily screwed off to permit oiling. Gearing is quadruple multiplying; crank has double grips of white ivoroid. Level-winding attachment winds the line evenly and closely upon the spool. Capacity 100 yards. Each in box complete with genuine leather case and practice casting weight.

No. 16B24. Each **10.78**

PFLUEGER SUPREME FISHING REEL

Level-Winding Anti-Back-Lash



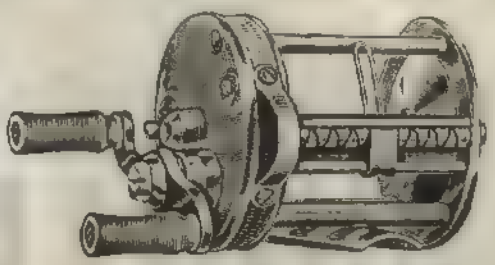
Pflueger Supreme Fishing Reel, level winding anti-back-lash quadruple multiplying, generated spiral tooth gears, steel pivots, tempered and polished. Phosphor bronze bearings, adjustable back sliding click, fancy balanced double handle crank.

Anti-Back-Lash mechanism, contained within the reel automatically thumbs the spool and stops the same instant the bait strikes the water, thus preventing all possibilities of back-lashing.

The Adjusting Screw with dial regulator so constructed that any tension desired can be secured by turning the adjusting screw, and can be thrown off altogether, thereby making an open level-winding reel. Will hold from 75 to 100 yards according to size of line used. A booklet describing and also giving instructions how to operate reel is inclosed.

No 16B39. Each **16 34**

HEDDON'S 3-35 LEVEL-WINDING REEL



Heddon's Level Winding Reel, is up to the recognized high standard of quality in every respect. Is made of the best, tested, hard drawn, watch nickel; stud, shaft, pivots, and pinion are of Stubbs drill rod, hardened, oil tempered, ground to size and highly polished. Full quadruple multiplying with exactly the correct ratio of speed between the spool and line carriage to produce enough of that criss-cross of the line which prevents back-lashing. The spiral gears are of a special hard drawn phosphor bronze and are much stronger than are ordinarily used. Has a capacity of 100 yards of 15 pound test line. Equipped with Heddon designed double handle. Weight 9 ounces. Each reel furnished with one drop oil can, bottle reel oil and tube of high grade vaseline. In genuine leather reel case.

No. 16B28. Each **22.86**

THE SHURE WINNER PRICE LIST

LIBERTY SEALED FIVE

The Perfectly Balanced "Low Loss"

RADIO RECEIVING SET

FIVE TUBES

FIVE TUBES

INSIST ON HAVING A RADIO SET WITH THESE QUALITIES

Delivers Pure Tone with Volume
Reproduces Music equal to Original
Brings In Stations You Want to Hear
Keeps Out Stations You Don't Want to Hear

The Liberty Sealed Five is Dependable at All Times

Receiving with the LIBERTY Sealed Five is like being connected to your distant station with a direct private wire. Even when powerful local stations are on, you can tune past them without interference. This is of greatest importance, as it enables you to draw your radio pleasure from nation-wide sources. If local stations do not please you, turn for a while to the **best** program from a dozen others. That's what makes a dependable radio set give so much pleasure!

And when once you have located a station it will always be found at exactly the same place on the dials.

Every part is the best obtainable—tested before being assembled, tested during assembly, and tested again in the final set. Result: a minimum loss of power, a minimum of internal interference. Simplicity of construction permits power to be tuned on the station you desire to receive. From 1,000 to 2,500 miles clearly on a loudspeaker is the usual record of the LIBERTY Sealed Five.

Each tube is controlled by a separate rheostat, although the average commercial set economizes by controlling **more than one** tube with a rheostat. Such practice is at the expense of good reception, because tubes in use are known to develop peculiarities. Tubes must be controlled separately to bring in distant stations clearly. All good sets have volume and pure tone **some of the time**; all hear distant stations **some of the time**. But the LIBERTY Sealed Five consistently, day-after-day does this, and in addition, is acutely selective in tuning! Steady performance certainly counts. Continually seeking great distance is fun for the operator.

The LIBERTY Sealed Five is as dependable as the clock on your mantle. It brings you unlimited entertainment—the kind you want—**as often as you want it.**

The sponsors of the LIBERTY Sealed Five have been marketing radio sets ever since radio became generally popular. They knew, therefore, the need for a radio set that was instant and "sure-fire" in operation.

Each complete in beautiful Two-Tone Walnut Cabinet.

MURDOCK RADIO HEAD PHONES

"Murdock" Radio Headphones—(Mfrs. No. 56) Best quality steel bi-polar magnets, flat spring head band covered with black mercerized cotton webbing regulation phone cord. Each in box.

No. 1R16. 2,000 ohms. Per set..... Out
No. 1R17. 3,000 ohms. Per set..... Out

FROST FONES

Frost Fones hold their dominant position in the radio world because they are made right and sold at the right price. For those who wish the economies made possible by the aluminum shell type of construction, having highly polished drawn shells and composition caps. Each in box.

No. 1R18. 2,000 ohm headset.
Per set..... **1.95**

No. 1R19. 3,000 ohm headset.
Per set..... **2.30**

Kellogg Head Phone

Kellogg Headsets (Mfrs. No. 69A) have proven as sensitive and thoroughly efficient as they are light in weight and small in size. The magnets are of special tested steel eliminating any possible variation. The magnet windings are accurate, mountings and plates, wire, insulation etc., are of the best material. Each in box.

No. 1R20. 2,400 ohm headset.
Per set..... **4.35**

FROST-RADIO

FROST RADIO SINGLE AUTOMATIC PLUG

Single Automatic Cord Tip Plug. The neatest cord tip plug on the market. The cord tips are held by an automatic spring device which insures perfect contact and the quickest way possible to change from phones to loud speaker. Each in box, 10 in carton.

No. 4R26. Each..... **.25**

FROST RADIO DOUBLE AUTOMATIC PLUG

Double Automatic Cord Tip Plug. This plug is of the same design and is the same high grade material as the No. 4R26 plug. This plug takes two pairs of phones or two loud speakers. Each in box, 10 in carton.

No. 4R27. Each..... **.30**

FROST RADIO DOUBLE AUTOMATIC CORD TIP PLUG

Double Automatic Cord Tip Plug. The aristocrat of radio plugs. The cord tips are held by an automatic spring device which insures perfect contact. All metal parts are best grade electric brass, highly polished except the springs which are of the finest spring steel. Each in box, 10 in carton.

No. 4R53. Each **.45**

Frost Extension Cord

Frost-Radio Extension Cord is a convenient means of connecting receiving set and loud speaker. Set may be in one room, loud speaker in another without unsightly wires along ceiling or floor. Each in box.

No. 4R29.	10-ft. length.	Each.	1.10
No. 4R30.	20-ft. length.	Each	1.50
No. 4R31.	30-ft length	Each	1.70

Frost Radio Jac-Box

Frost-Radio-Jac-Box. This accessory enables four pairs of Frost Fones to be used at one time, or three pairs and a loud speaker, thus quadrupling any receiving set Jack capacity. Supplied in highly polished mahogany finish with green felt base and polished formica front and back panels. Each in box.

No. 4R28. Each complete..... **1.70**

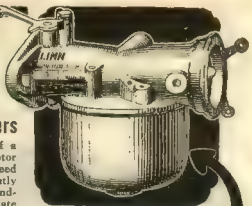
1F64— [illegible] in., 8 in. wheels attached with roller [illegible] 2 in carton, 26 lbs Each **2.90**

The LINN Non-Adjustable CARBURETOR $9.50



Satisfies Every Demand of Ford Owners

For FORDS

The Linn gets the best out of a Ford always by feeding the motor the right fuel diet for every need and speed. Performs efficiently and constantly, affording dependable and flexible control, from date of installation.

Sold on 30-day money-back guarantee if not satisfactory. Guaranteed one year against defective construction.

"Fool Proof"—No Adjustments—No Extra Devices
It Sells Itself—5 Minutes Installs It
REQUIRES NO SERVICE
PROFITABLE TO HANDLE

Linn Atomizing Principle

Accomplished by the Multiple Orifice Compensating Tube admitting gasoline at a terrific speed which mixes with air in such a way as to produce a powerful, dry and unexpanded highly explosive mixture. Quality of mixture inherently controlled to suit climatic changes and to negotiate all grades of gasoline from high to low test.

Write for Descriptive Folder and Our Profitable Proposition to Dealers and Jobbers
Now in Process of Adaptation for Other Makes of Cars
Every Carburetor individually tested on Ford Engine before leaving factory

LINN MOTOR DEVICE CO. *Mfrs.* 404 N. RICHLAND ST. *HOMEWOOD* Pittsburgh, Pa.

This is the Selling Season! Push These Balloon Jacks!

Now is the time when everybody is using his car—and now is the time to sell balloon jacks to balloon tire users.

Here is a good sales tip for you: Most of the cars factory equipped with balloon tires are not equipped with balloon jacks!

What could be easier for you than to sell these owners easy-working Reliable Balloon Tire Jacks? The long handle, double screw construction and maximum extended height with minimum starting height, are features which will make sales easy. Try it and see!

Any jobber can supply you with the No. 7 and No. 15 as well as the No. 12 for heavy pneumatic tired trucks and the No. 18 for all types of buses.

LINN MOTOR DEVICE CO. *Mfrs.* 404 N. RICHLAND ST. *HOMEWOOD* Pittsburgh, Pa.

LOBSTER PACKER'S SCALE GALVANIZED

Fitted with two round iron plates, slightly convex and heavily galvanized. Equipped with *agate bearings* and nickel-plated pivots and can be furnished with or without side beam.

No.		Capacity	List Price without weights
816 820	L. P. without side beam L. P. with side beam 8 oz. capacity ...	2 lb. 2 lb.	$20.80 22.80

BOTTLE TESTING SCALE

This scale is used in glass blowing to determine whether or not the bottles are up to standard. It is accurate and sensitive, being built especially stable and strong to withstand the effects of this rough and constant usage.

The scale is of the regular counter type, fitted with special brass double beam and set-screw poise. Both beams are graduated 1 lb. x ¼ oz. Fitted with a round brass load-plate 7 inches in diameter. Durably and attractively finished in baked enamel, maroon color

No.	Capacity	Plate	List Price
467	2 lbs x ¼ oz.	7" diam.	$35.00

FINE SCALE

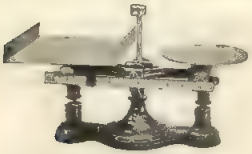
WITH TWO PANS AND DOUBLE BEAM

This is a very practical small scale, used principally by photographers, but as well for general laboratory work. For photographic use it combines in one, the two scales ordinarily needed in this service, being fitted with two pans and a double beam to weigh both in grains and avoirdupois ounces.

The front bar of the beam is graduated 60 x 1 grains and is used with the small pan on the right. The rear bar is graduated 8 x ⅛ ounces avoirdupois and is used with the large pan at the left. Both bars are notched, the rear one having a sliding poise and the front one a rider. Both pans are of nickel-plated brass of a form suitable for materials to be weighed and fitted with a handle for convenient lifting. The small pan is 2½ inches in diameter and the large pan, 4½ inches in diameter. The beam and poises are also nickel-plated, the stand being finished in black.

No.	Capacity	Pans Diameter	List Price
3025	Front bar, 60 x 1 grains..... Back bar, 8 x ⅛ oz. avoirdupois	2½" and 4½"	$23.00

EVEN BALANCE SILK SCALES



Designed for weighing silk, it is equipped with agate bearings throughout and is very sensitive.

The pan, weight plate and indicator, are of polished brass. Scale is finished in maroon, handsomely ornamented.

Side beam is graduated 1 x 1-100 oz., and no weights smaller than 1 oz. are required.

No.	Capacity	Platform	Price Without Weights
902.	8 lbs x 1-100 oz	7½" x 9"	$52.00

GROCERS' TRIP SCALES

Trip Scale with Side Beam

These scoop scales are adapted to weigh a great variety of loose materials, such as are handled to a great extent by the grocer. These scales are fitted with seamless brass scoop and iron plate.

The scales may be fitted throughout with *agate bearings* at an extra cost and also with side beam. Nickel-plated loose weights in convenient units give up to full capacity. Finished in durable and attractive baked enamel, maroon color.

Instead of the oval regularly furnished a funnel scoop may be furnished at a slight extra cost.

These scales always sent with weights unless ordered "without weights."

Without Side Beam

No.	Capacity Lbs.	Price Without Weights	Price With Iron Weights
709	16	$26.00	$33.00
710	10	21.00	26.00
711	6	16.00	20.00
712	2	15.00	17.00

With Side Beam

No.	Capacity Lbs.	Price Without Weights	Price With Iron Weights
713	16	$29.80	$34.00
714	10	23.80	26.00
715	6	18.00	20.00
716	2	16.50	17.00

DRUGGISTS' TRIP SCALES

These scales are equipped with a round brass pan of a size convenient for weighing materials in bags or other containers. They have one pan with weight plate of iron, or two similar brass pans adapted for weighing drugs or other merchandise.

They are furnished with or without side-beam as shown, and with agate bearings if desired, at an additional price.

Nickel-plated loose weights in convenient units make up the full capacity. Finished in durable and attractive baked enamel, maroon color.

Scales will be sent with weights unless otherwise ordered.

Without Side Beam

No.	Capacity Lbs.	Price Without Weights	Price With Iron Weights
877	16	$28.00	$34.00
878	10	21.00	26.00
879	6	19.00	23.00
880	2	17.00	20.00

With Side Beam

881	16	$32.00	$46 00
882	10	27.00	30.00
883	6	24.00	26 00
884	2	22.50	23.00

HARVARD TRIP SCALES

Originally designed for Harvard University for elementary experiments in physics and chemistry, yet recognizing the need of such an instrument for general laboratory use, the scale is made with great care both in respect to accuracy and durability.

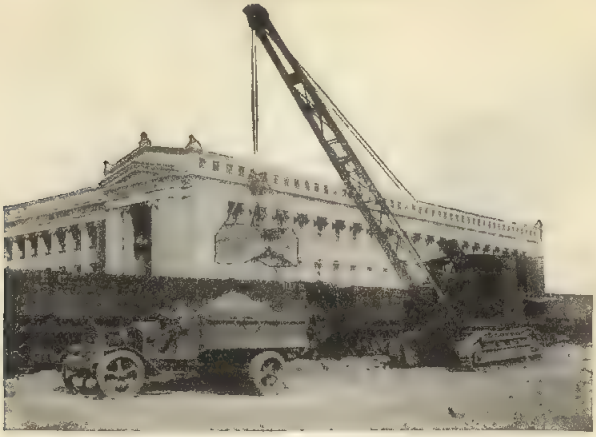
Fitted with two 6-inch porcelain plates, side beam 5 x 1-10 grams, upright indicator and balance adjustment.

Scale finished in black, well ornamented, with all brass parts nickel-plated.

Extra charge will be made for fitting this scale with agate bearings.

No.		Price
932	Capacity 1 kilo x 1-10 gram. Without Weights	$19.00
	Set Iron Nest Weights, hexagonal pattern, 1 kilo to 5 grams Extra	4 00

Locomotive Crane



Dependable Flexible Tread Cranes

Steam, Gasoline and Electrically Operated

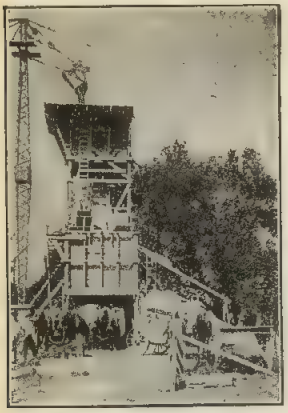
The outstanding feature of this Crane is its flexible (spring type) crawling tread. No other machine on the market is equipped with this "shock absorber of the crane."

The tread conforms to the uneven surface of the road and maintains a uniform pressure upon every square inch of the traveling base of the tread. The weight of the crane is carried by two large steel sprockets at both ends of the tread, and by a number of pairs of chilled tread rollers. Each pair of rollers is carried in an equalizer which is backed up by a specially constructed heavy coiled spring. When traveling over railroad tracks or other obstructions the rollers deflect enough to develop an equal pressure on each tread.

It is readily seen that an unbalanced carbody puts considerable strain on the engine and running mechanism of a crane. With the Flexible Tread Equipment all secondary stresses are practically eliminated. It is surprising to note how this feature adds to the long life of the crane.

The tread links are made of high carbon steel and of exceptionally heavy section. The rollers and sprockets are bronze bushed. Alemite lubrication system insures smoothness in the functioning of the springs, treads and rollers. The TREADS ARE OVERLAPPED AT ALL TIMES, making it almost IMPOSSIBLE for hard material to work in between them and cause breakage.

The treads are steered from the cab with the turntable in any position. Steering is done by the use of a DIFFERENTIAL and by FRICTION BRAKES. Each differential shaft has a brake which permits either tread to be retarded or stopped while the opposite tread goes backward or forward. The main sprocket is driven by large shafts and heavy slowmoving steel gears. NO CHAINS ARE USED IN THE DRIVE.



Drag Line Excavator Equipment

Drag Line Excavators

For rapidly, economically digging bank or bed materials, in the dry or from under water, there is no more satisfactory device than the Pioneer Improved Drag Line Excavator. It is shovel, conveyor and elevator; and it is operated wholly by one man. Low in first cost and in maintenance expense, economical in wages and power costs for operation, and rapid in direct and dependable delivery of materials, this excavator shows yardage cost so low as to make its use very profitable in many lines of work.

The Drag Line Excavator is extensively used for delivery of materials to sand and gravel washing plants, and many outfits have been furnished in connection with plants of this character—not only with new Channon plants, but also for older plants of other original design. In this work there is often special advantage in the ability of the drag line excavator to dig from below water as readily as in the dry. It is also adapted for carrying the material back into the worked-over excavations.

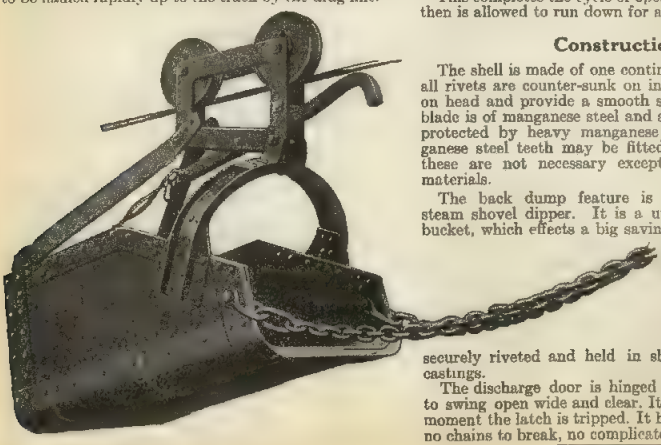
Method of Operation

The excavator bucket is suspended from a trolley which runs on an inclined wire rope track, extending from the upper end of a mast of proper height—50 to 100 feet—to any suitable anchor or bridle line—out where the materials are to be dug. The inclination must be such that the bucket and trolley will run rapidly and freely down.

A two-drum hoist operates the excavator. From one drum runs a rope to the top of the mast, where it is reeved through a pair of blocks, one attached to the mast, and the other to the track rope. This is called the "slack line," as it slackens and tightens the track line. The rope from the other drum runs from the block on the mast to the draft chains on the front of the bucket. When the clutch on the drag line drum is released the bucket runs down the trolley, its speed is controlled by a brake at the hoist. Reaching a point over the material to be dug, the track line is lowered by paying out the slack line at the hoist. When the bucket rests on the material the hoist hauls in on the drag line and the bucket picks up its load as dragged forward. Then the slack line is hauled in, raising the track line and lifting the bucket out of the material, to be hauled rapidly up to the track by the drag line.

At the dumping point which may be anywhere along the track line—the dumping lever ahead of the bucket strikes a stop-casting clamped to the track line (see the illustration above), causing the rear dump gate to open and the material to drop out.

This completes the cycle of operation and the bucket then is allowed to run down for another load.



Construction

The shell is made of one continuous steel plate, and all rivets are counter-sunk on inside to prevent wear on head and provide a smooth surface. The digging blade is of manganese steel and all wearing points are protected by heavy manganese steel plates. Manganese steel teeth may be fitted over the blade but these are not necessary except in extremely hard materials.

The back dump feature is patterned after the steam shovel dipper. It is a unique feature of this bucket, which effects a big saving of time and power.

The sheaves are of cast steel. Self-lubricating and bronze bushed they revolve on a steel pin with bronze sleeve. The bucket throughout is securely riveted and held in shape by strong steel castings.

The discharge door is hinged off center, causing it to swing open wide and clear. It dumps instantly the moment the latch is tripped. It has few parts to wear, no chains to break, no complicated mechanism.

Leader, Musette and Saal Loud Speakers

THE LEADER

"The Leader" Loud Speaker, made of genuine fibre, thereby eliminating all tin or metal sound; has 10-inch diameter bell, sporting arm 23 inches high mounted on a base of solid cast iron and is full nickeled. **This truly wonderful reproducer combines true reproduction of voice and music in every detail.** An external adjustment provides control of volume. Each in box.

No. 1R23. Each... **6.75**

Frost Radio Musette is the very latest development in loud speakers. It secures a true reproduction of the human voice and all musical instruments. There are no degrees of tone or pitch which it will not reproduce accurately. The large correctly shaped bell, base and throat are crackle finish. Complete with cord.

Height 22½ inches. Each in box.

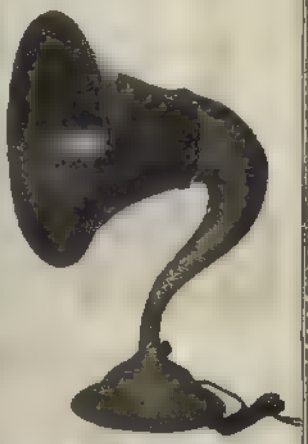
No. 1R24. Each. **8.25**

SAAL JUNIOR SOFT SPEAKER

Saal Junior Soft Speaker is an ideal speaker that will recreate the true, original tones of the artist. From the sound chamber upward to the very tip of the bell unrestricted amplification reproduces with absolute fidelity all the radio broadcast. No battery or power is needed, just plug in and you have your program. Height 21½ inches, black crackle finish with 12-inch bell. Each in box.

No. 1R26. Each **9.30**

SAAL



Saal Soft Speaker. No blast, no distortion. Scientifically and gracefully designed. **No battery or power needed.** Height 21½ inches. Finished in black crackle with 13-inch black bakelite bell. Each in box.

No. 1R25. Each.. **15.00**

Leader Loud Speaker Unit

For Connecting Radio with Phonograph

The Leader loud speaker unit, invented and designed by an expert in acoustics, reproduces so perfectly the voice or music that you can shut your eyes and believe that the concert being played across the continent is really going on in your house. No harsh vibrations or rattles. Finished in bakelite and aluminum. Connection permits attaching to almost any standard phonograph and horn. Each in box.

No. 1R21. Each..... **2.45**

Frost-Radio Musette

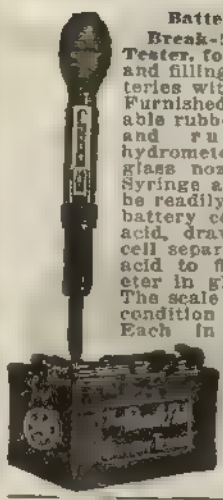
For Connecting Radio with Phonograph

By using this unit and attachment any standard make of phonograph may be converted into a loud speaker at a very low cost. This is the same aluminum unit as is used in Musette. It is remarkably sensitive, powerful and insures true reproduction of all tones without distortion. Each in box.

No. 1R22. Each..... **4.55**

Radio Necessities

Battery Tester



Break-Not Battery Tester, for testing acid and filling storage batteries with electrolyte. Furnished with durable rubber bulb, glass and rubber tube hydrometer connecting glass nozzle to body. Syringe allows acid to be readily drawn from battery cells. To test acid, draw from each cell separately enough acid to float hydrometer in glass test jar. The scale indicates the condition of battery. Each in screw top, metal end, pasteboard tube

No. 15C192. Each **.65**

Voltmeter

Designed for voltage measurements of 22½ and 45 volt blocks of "B" batteries of either dry cell or storage type

0-50 volt scale, 1-volt divisions.

Voltmeter	Leader Cheaper Quality
No. 4R25 Sterling	No. 4R24

Complete Antenna Outfit

Complete Antenna Outfit. Includes all materials necessary to erect an aerial. There are ten different items: 100 feet antenna wire, 50 feet insulated lead in and ground wire, 25 feet insulated interior connecting wire, 2 high duty insulators, 2 screw eyes 3 porcelain knobs and screws, 1 ground clamp, 12 insulated staples, 1 6-inch porcelain bushing, 1 storm king lightning arrester. With complete instructions for erecting. Each set in carton

No. 4R16. Each complete.. **2.50**

Balkite Trickle Charger
For Charging Radio "A" Batteries

A low rate charger for 4 and 6-volt "A" storage batteries

Specially adapted to use with sets of relatively small "A" current requirements—dry cell sets and sets having a small number of storage battery tubes.

With a low capacity storage battery of the sort commonly used with dry cell tubes makes possible a very economical installation with sets using these tubes.

Will furnish more current than is used by six dry cell tubes so that if the charger is used while the set is in operation it need not be used at any other time

Also adapted to use with the usual type of storage battery if allowed to charge for longer periods. Will furnish current necessary for as many as 8 storage battery (201-A) tubes if the charger is allowed to "trickle charge" continuously

Size 5¾ inches long, 2¾ inches wide, 5 inches high. It may be put in the usual dry cell compartment. Shipping weight, approximately 3 lbs. Charging rate, ½ ampere with a 4-volt 2-cell storage "A" battery, .4 ampere with the 6-volt 3 cell storage battery

Characteristics and principles of operation the same as those of the standard Balkite battery charger. Current consumption less than that of a 10 watt lamp. Shipped dry, without electrolyte, which may be purchased from us or standard battery electrolyte may be used. Operates from 110-120 A.C. 60 cycle current. Each in box.

No. 3R17. Each **6.86** Each (in lots of 6) **6.50**

Fansteel Balkite Battery Charger

The Fansteel Balkite Battery Charger, is especially designed for Radio "A" & "B" batteries A noiseless, bulbless battery charger unfailing in operation. It has no moving parts or bulbs, nothing to adjust, break or get out of order. Cannot discharge or short circuit the battery; requires no attention other than occasional filling with distilled water, will not over-charge; cannot fail to operate when connected to battery and line current, simple, effective and indestructible. May be used while radio set is in operation

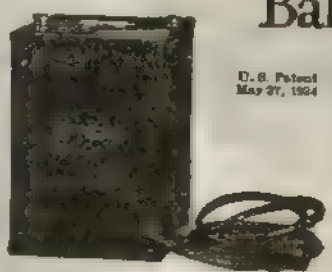
No. 3R15. Each **13.38** Each (in lots of 6)..... **12.67**

Fansteel Balkite "B"

This is a new model, designed especially to serve sets of five tubes or less, or sets where four 22½ volt blocks of dry batteries are recommended Current cost about that of a 10-watt lamp. Size: 8¼ inches long, 8 inches high, 3¾ inches wide. Occupies approximately the same space as a 45-volt dry "B" battery. Operates from 110-130 A.C. 60 cycle current. Each in box

No. 3R18. Each **24.01** Each (in lots of 6)..... **22.75**

Balkite "B" II



Balkite "B" replaces the "B" battery and gives a positive, unfailing source of plate current supply. It keeps the "B" circuit always operating at maximum efficiency, for with its use the plate supply current is never low. It delivers at all times the current given by four or five 22½ volt dry "B" batteries. It can be put in operation at any time by connecting it to a light socket. No change or additions to the set is necessary. It has nothing to break, replace, wear out or get out of order and requires no attention. The current consumption for operating is under one-tenth of one cent per hour

No. 3R16. Each..... **37.73** Each (in lots of 6)..... **35.75**

The "Lots of 6 Price" will apply on "Balkite goods" assorted as well as of one kind

SHOT GUNS

DOUBLE BARREL, HAMMERLESS

L. C. SMITH

Crown Grade, Breech Loading.

This Crown grade is of excellent quality of material, manufacture and finish, and is well balanced. The engraving is designed to please the most fastidious.

Barrels—Nitro steel regular; cylinder modified or full choke bored.

Stock—Choice French walnut, checkered grip and fore-end.

Grip—Full pistol regular, half or straight to order.

Weights—12 gauge, 6¼ to 8¼ lbs.; 16 gauge, 6¼ to 7 lbs.; 20 gauge, 5¾ to 6½ lbs.

When ordering, specify length of barrel, weight and style of boring.

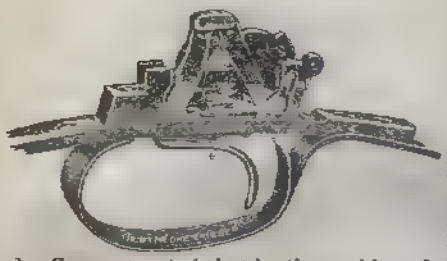
With Automatic Ejector.	Each
No. 5SE12—12 gauge, 26, 28, 30 or 32 in. barrels	✚$654 00
No. 5SE16—16 gauge, 26, 28, 30 or 32 in barrels	✚ 654 00
No. 5SE20—20 gauge, 26, 28, 30 or 32 in. barrels	✚ 654 00

One gun in cardboard box, ten in wood case.

	Each
Above guns fitted with hunter one-trigger	✚$712 80

THE HUNTER ONE-TRIGGER

FOR THE L. C. SMITH GUNS



The Hunter One Trigger is exceedingly simple. It can not be doubled or balked; parts are large and strong; it is independent of any recoil, is not frictional and will never hang when pulling second barrel. So constructed that by the pushing of a button the shooter can shoot right and left, or left and right, all right or all left. The shooter has the same control over the firing as in the two trigger gun.

Illustration of gun showing one-trigger.

Hunter one-trigger fitted to any L. C. Smith gun, hammerless, new or old. For price see each respective grade.

NOTE—To have the one-trigger fitted to two-trigger guns, same must be returned to the factory.

From Factory can furnish Eagle and Crown Grade Guns without Automatic Ejector, also higher priced Smith Guns. Write for catalog and prices.

✚F. O. B. New York Factory Only.

SHOT GUNS

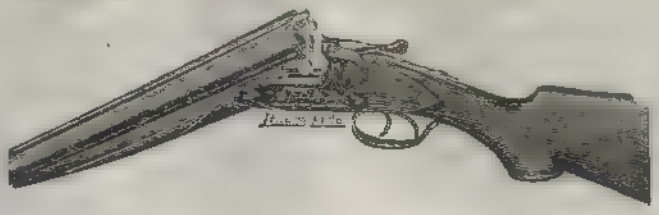
DOUBLE BARREL, HAMMERLESS

ITHACA

The mechanical construction of all Ithaca hammerless guns is the same; special features are the three piece lock, which operates in 1/125 part of a second. All Ithaca hammerless guns have three bolts and are guarante d never to shoot loose, and coil springs guaranteed never to break.

Ithaca guns are low in price, and high in quality.

Standard length of stock, 14 inches; regular drops run from 2¾ to 3½ inches, but will furnish any length or drop of stock desired, without additional charge, from factory.



Field Grade, Breech Loading.

A gun capable of standing the continuous strain of high pressure smokeless powder loads.

Barrels—Imported cockerill steel, nitro powder proved; cylinder, modified or full choke bored.

Stock—Black walnut, with half pistol grip, good color and well finished; fore-end and grip neatly checkered.

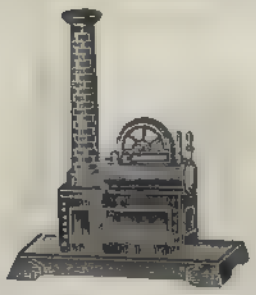
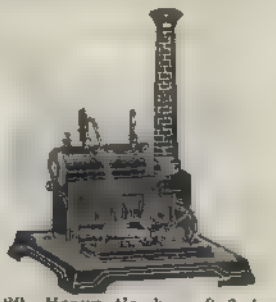
BING'S STEAM ENGINES

Burn Denatured Alcohol; Guaranteed



T4175—Heavy tin base 4x8 ins.; blued steel foundation; polished brass boiler, fly wheel with pulley whistle, safety valves; stamped imitation brick chimney; height 11 ins.; each in box. Each 1.58

T4176 — Same as T4175, larger; 4¾x9½ in. base, 13 in. high; each in box. Each 2.25



T4180—Heavy tin base 8x8 ins., blued steel foundation; oxidized finish brass boiler; whistle, safety valve, nickeled rim 2 in. fly wheel, nickeled cylinder and connecting tube; reversible throttle; stamped imitation brick chimney; height 12 in.; each in box. Each 3.25

T4189—Same as T4180 larger, with water gauge; base 9½x9½ ins., 14 in. high; each in box. Each 5.75

MAGIC LANTERN AND PICTURE MACHINES

Up to the minute, and embody new features not found in other machines; well built, handsomely finished, powerful lenses, producing good pictures.

MAGIC LANTERNS
OIL BURNING

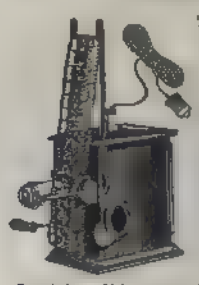
Made of heavy black sheet iron, blue steel finished; metal fount, brass burner, glass globe; polished reflector; slide focus tubes, brass ends; bent air shaft; complete with 1 dozen slides in box

T3901—Total height 11 ins.; body 2¾x4½x5¼ ins.; 2 trusses; hinged rear door; 6 slides; each in box. Dozen 8.75

T3905 — Total height 10½ ins.; body 3x5x6½ ins.; 2 lenses; hinged rear door; each in box. Each .95

T3906 — Same as T3905 larger, hinged side door; total height 13½ ins.; body 3¼x5¾x7¼ ins.; 2 lenses. Each 1.75

FILM AND MAGIC LANTERN
ELECTRIC



T3907—Black enameled Russia steel housing; adjustable focus lens tube, automatic film tracker; side crank, with 1¾ in. balance wheel; complete with 1 roll film, one ⅞x4 in. slide; and 6 ft. cord; size 3½x5½ ins., 5½ ins. high. Each 1.75

FILM AND MAGIC LANTERN
OIL BURNING

T3908—Russia steel body and smoke stack; double telescope lens, automatic film tracker; side crank; metal fount with glass chimney, can be used as magic lantern; base 3½x5¾ ins.; 10½ ins. high; each in box, complete with 3 films and 3 slides. Each 1.75

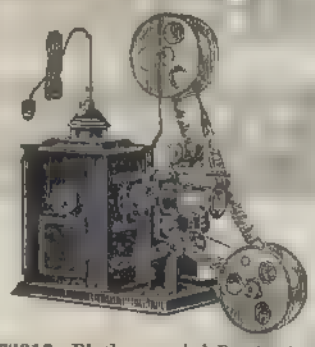
ELECTRIC

T3909 Russia steel black enameled housing, hinged rear door; adjustable focus lens tube; double lens; adjustable film holder; automatic film tracker, side crank; complete with lamp socket, 6 ft. cord, connecting plug, 2 films and 3 lantern slides; size base 4x7½ ins., total height 11 ins.; each in box. Each 2.25

Our miniature cedar chests for dolly's clothes and fittings are exact duplicates of the large size chests; selected cedar.

TWO SPECIAL EXHIBITION PICTURE MACHINES

T3915—Black enameled Russia steel housing; hinged rear door; polished brass focusing lens tube, thumb screw adjustment; adjustable film holder, with automatic rewind, coil spring belt and pulleys; automatic film tracker, which prevents film from tearing; flicker shutter, side crank; complete with lamp socket, 8 ft. cord, plug, adjustable lamp attachment, 3 films and 1 dozen lantern slides; size base 6½x10 ins.; 18 in. high; each in box. Each 12.00



T3916—Black enameled Russia steel housing; cast iron base; hinged rear door; polished brass focusing lens, thumb screw adjustment, with powerful condensing lens; flicker shutter; special automatic film tracker which prevents film from tearing, special rewinder with coil spring belt and pulleys, adjustable film reel; side crank; complete with lamp socket, 8 ft. cord, plug, lamp adjustment attachment 3 films and 1 dozen lantern slides; size base 6x11¾ ins., 20 in. high; each in box. Each 15.00

ELECTRIC ATTACHMENT FOR LANTERNS

T3920 This attachment can be used on any lantern; consists of an adjustable cap which fits over the chimney hole, supporting a lamp socket so that by manipulating a thumb screw the lamp can be raised or lowered; complete with sockets and wire. Each .1.25

FILMS

Standard gauge, 1⅜ in. wide, with real action; no two alike; each in can; assorted to the dozen.

25c MECHANICAL TOY ASSORTMENT

Assortment consists of 6 dozen of from 12 to 18 varieties of our best selling mechanical toys, to retail at 25 cents each; these goods are taken from our regular stock.

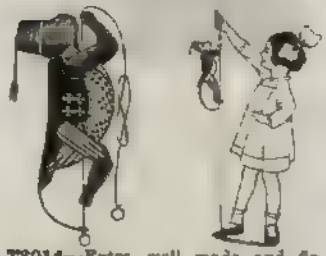
T3121 Assortment of 6 dozen, (1.98 dozen, no less sold) Total 11.88

MECHANICAL TOYS

The better selling numbers only. Strong, durable, well made, and handsomely finished with good strong springs. Popular favorites and big sellers; the remarkable natural actions of these wonderful mechanical toys will at once appeal to everyone who sees them, don't overlook our special 25 and 50c assortments.

STRAUSS MECHANICAL TOYS "Known the World Over"

CLIMBING MONKEY



T3014—Extra well made and finished; lithographed in six different colors, with tassel hat; extra strong cord; when string is taut, monkey climbs up in lifelike motion, arms and legs moving; height 9¾ ins., 3 ins wide; each in box Dozen 2.00

DELIVERY VAN

T3132—Red Star Van, all metal; bright colors; runs straight and in circle; 7¾ ins. long; 3¾ ins. high; ½ dozen in carton. Dozen...2.10

HAUL-A WAY TRUCK

T3133—Haul-a way truck; litho in bright colors; all metal; body dumps; runs straight and in circle; 7¾ ins. long, 3¾ ins. high; ½ dozen in carton Dozen 2.10

YELLOW SPEEDSTER

T3135—Yellow speedster; bright yellow, green wheels; runs straight and incircle; 9¼ ins. long, 3 ins. high Dozen 2.10

SPEED BOAT

T3013—Speed boat; bright color lithographed; all metal; runs with bobbing motion, like real speed boat; length 9¼ ins. Dozen 2.15

BALKING MULE

T3019—Balking mule; goes forward and backs, throws hind legs into air and does other amusing stunts; all metal handsomely finished; 9 ins. long, 5½ ins. high; each in carton. Dozen 4.00

MAIL PLANE

T3048—Mail plane; scoots along just like the real thing; propeller whirling around; all metal; finished in green, yellow and red; 8 inches long, 7 ins. wide, 3½ ins. high; each in carton. Dozen 4.20

JAZZBO JIM

T3077 — Lithographed negro cabin 3½x4¾x2¼ in. high; with full jointed negro dancer on roof; when wound up, Jazzbo Jim does all the best jig dances; height dancer 7½ ins., total height 10 ins.; each in box Dozen....4.25

KRAZY KAR

T3073—Yellow enameled auto with clown driver; when wound up, runs ahead, then automatically reverses, going in various directions, as if driver had lost complete control; length 8 in., 3½ in wide, 5 in high; each in box. Dozen....4.25

SEE ZEPPELIN

T3195—Los Angeles; aluminum finished 6½ in. dirigible, with propellor; hanger for suspending on cord; when wound up runs in wide circle, like the big ship, each in box Dozen 4.25

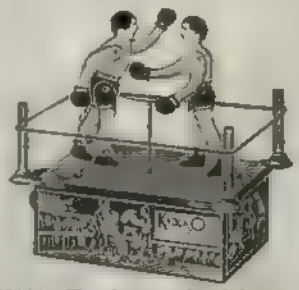
BOOB McNUTT

T3084—Boob McNutt, the popular comic strip character; jointed hips, arms and head, nicely dressed in colors, all metal, when wound up does a funny dance, 8 ins. high each in carton Dozen . 4.35

TRAVEL CHICKS

T3104—Travel chicks; attractively lithographed; all metal; perched on roof of car, four chickens are busily engaged in scratching feed from pan runs in circle; 8½ ins long, 4½ ins. high; each in carton. Dozen 4.35

PRIZE FIGHTERS

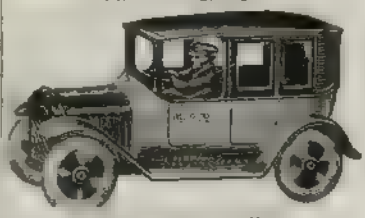


T3109—Knock out prize fighters; a real battle, the bout lasting about a minute with each winding; side button for stopping and starting durably constructed and attractively colored; 4¼x6 ins., 6 ins. high; each in carton. Dozen 4.35

RED CAP PORTER

T3036—Red Cap Porter negro walking along pushing hand truck with trunk; suddenly lid opens and up pops dog, then back into trunk again; continually jumping out and in; all metal; good colors; 6 ins long, 6½ ins. high; each in carton Dozen 4.35

YELLOW TAXI



T3151—Yellow taxi; yellow and black; finished with disc wheels, runs in circle and straight away, 8 ins. long, 4¾ ins. high; each in carton Dozen 4.35

BRONCHO BUSTER

T3171—Jointed broncho with cowboy rider, finished in bright colors; when wound up broncho bucks, throwing rider over head, rider springs back into saddle only to be thrown again; repeating until finally rider breaks pony and retains his seat; on base 2½x6 ins.; 8½ ins. high, each in box. Dozen . . .4.35

SANTA CLAUS

T3100—Santa Claus; sleigh painted, full of dolls and toys, with prancing reindeers and jingling bells; glides along, in wide circle, when in motion, a beautiful piece; 12 ins long; 7 ins. high each in carton Dozen 8.25

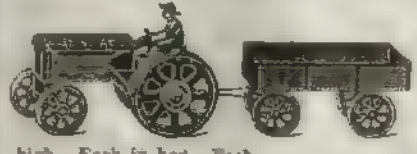
ALL DEPENDABLE VALUES

TWIN TROLLEYS

T3063—Pay as you enter duplex trolleys; when wound up run 'round and round in wide circle; two toys in one; lithographed in bright colors, and substantially built of heavy gauge metal; total length 15 ins each in carton. Dozen 4.20

TRACTOR AND TRAILER

Bright colors; perfect in construction.



T3180 — Mechanical tractor with trailer; lithographed in bright colors; tractor 8¼ ins. long, 4 ins. wide, 5 ins. high; trailer 6¾ ins. long, 3½ ins wide, 3½ ins. high. Each in box. Each 1.00

LAMPS

MAMMOTH JUPITER

Central Draft

Takes No. 3 Jupiter chimney and wick; 14 inch plain opalescent dome shade; smoke bell and very simple mechanism for operating the wick

Lamps are packed and sold complete with shade, chimney, smoke bell and wick.

Weight packed 11 pounds.

No. 25—Brass Fount . . . Each **$18.00**

LOUD SPEAKERS

CABINET TYPE

ARMSTRONG

CROSS SECTION OF ARMSTONG SPEAKER
A-ROOF OF CHAMBER
B VIBRATING SOUNDING BOARD
C LOWER MEMBER
D OPENING IN SOUND NG BOARD
E-SOUND POST
F RESONATOR

Shaped Like a Singer's Mouth.

The only loud speaker that qualifies or naturalizes the tone waves as they pass through the speaker. All others act as megaphones to amplify the tone. Shaped like a singer's mouth (see cross sectional illustration). Has curved upper member (A) like the roof of a singer's mouth; a sounding board (B) in place of the tongue, occupying the same relative position; a lower curved member (C) like the lower part of the mouth The sounding board (B) is under stress and is very sensitive to vibrations. This stress is made constant by the sound-post (E), as in a violin. Any material under stress is tuned and has its own fundamental tone. Therefore, as sounding board (B) is under stress, it naturally is tuned and has its own tone. When this particular tone or any of the upper partials or harmonics of this tone passes over the sounding board, one or more of these tones would be over-developed, hence would predominate, thus impairing the performance. This is overcome by opening (D) in sounding board, just as is used in a violin, guitar, etc. The space (F) between the sounding board and lower part makes an ideal resonator which rounds out the tone as developed, qualified and naturalized by the sounding board. The tone is developed at the front, just as a finished singer produces the tone at the teeth. This can be proved by having a listener stand twenty feet away from the speaker; let the operator turn it sideways, backward, upside down or in any other position, and one will be surprised at the slight difference in volume—the tone is precisely the same.

The Armstrong Speaker is a long step in advance in radio reception. Since its advent, with its refinement of case work, its far better and more natural tone quality, perfect enunciation and clarity, the incongruity of detracting from an otherwise attractive appearing radio set by the use of the ordinary horn type, has become doubly apparent. It is no longer necessary to mar the artistic appearance of any set, nor to be content with inferior or indifferent tone reception.

The Armstrong Speaker is correctly and scientifically made in accord with established acoustical principles. To hear it is to be convinced of its superiority over all others. Its fine case in solid walnut, satin finish, will prove ornamental wherever it is placed.

Unit is a non-adjustable special Utah. Does not rely upon any springs to function nor to respond to its own vibration. Constructed to give maximum results on any set. Push and pull in its operation, not a one way unit. The member agitating the diaphragm, pushing and pulling it, floats in a magnetic field, hence cannot "freeze."

The cabinet is walnut, with basswood chamber, non-resilient, and a genuine sounding spruce sounding board Paneled sides. Length, 14⅛ inches, width 11¾ inches, height 8¾ inches. 5-foot cord for attaching to set. No plug included. Weight, 18 pounds net, 20 pounds crated for shipment

No.	Each
Armstrong	$36.00

One in a carton.

CABINET TYPE

MANHATTAN

No. 2556

The Symphonic Speaker pioneers in appearance, construction and performance. It fills the need for an instrument of quality appeal and will find a warm reception in carefully furnished homes

Ordinary loud speakers send out their vibrations in one direction, as a locomotive, for instance, sends out the long beam of its headlight. This results in a concentration of the vibration and a tone which seems to have great volume.

In the Symphonic Speaker the tone is emitted from all four sides; it therefore produces no intensity of tone in any one direction. Thus, persons on all sides of the room can hear the music or lecture with equal enjoyment.

The design is modeled into graceful curves reminiscent of the flowing body lines of a fine old violin. The exterior is of mahogany, hand finished in an antique manner so that the natural graining of the wood is developed, not hidden under a heavy coat of stain

Special attention has been given to all details of molding, grille and carving. The beauty of appearance, as well as of performance, will earn for the Symphonic Speaker an outstanding place in the loud speaker market.

No.	Each
2556	$37.50

One in a carton.

HORN TYPE

JEWETT SUPERSPEAKER

No. 1000

An exceptionally high class receiver which faithfully reproduces every note in the musical scale and is highly endorsed by the leading artists. Resonance is eliminated. No vibration. Works on one-tube sets as well as on multi-tube sets. Micrometer adjustment to bring in extra distant stations. Non-metallic horn finished in ebony gloss. A big, handsome musical instrument. Over all height, 30 inches. Bell of horn, 14 inches diameter. Furnished with 5 feet of silk cord, no plug. Weight, 12 pounds.

No.	Each
1000	$82.50

Manley Service Runway

Price $90

All Open in the Middle—No obstructions to interfere with the workman.

Double Legs and Extra Heavy Bracing—Tremendous strength and rigidity.

Truss Construction—Can be set up on any flat surface without any necessity for providing foundations of any kind.

High Guard Rails—Makes it safe even for inexperienced drivers. This feature inspires confidence and makes car owners prefer to come to you.

Shipped with Legs Assembled—Cuts in half the time you spend setting it up after you get it. Saves trouble figuring out how it goes together.

Wood Treads—Gives better traction, saves weight, and permits the use of metal cleats on incline.

DIMENSIONS

Height	28 inches
Horizontal Length	15 feet
Length of Incline	12 feet
Height of Guard Rail	5 inches
Width of Tracks between Guard Rails	10 inches

Manley Air and Water Station

Price $50

THE hose of the Manley Service Stations on account of its freedom from injury by kinks, preventing cars running over it, etc., will outlast several lengths of hose not so protected. The garage may, therefore, expect to repay the cost of the station in a reasonable time, by the saving of the hose alone. Hose is returned by gravity—not by springs.

As a rule, the motorist who needs air or water will buy gas and oil where he gets the air and water service. In many cases, instead of looking for a gas pump he looks for an air station, knowing that where he can get air he can also get gas and oil.

Manley Grease Bucket

Price $15

WHEN oil or light greases are used, it is possible to operate the pump plunger by means of the plunger handle alone.

When using heavy grease, the compound ratchet leverage makes it easy to either draw in or discharge the grease. With this leverage the pump will handle grease or oil that could not be sucked in by the plunger handle alone.

It is of a valveless construction having a cylindrical three-way port attached to the bottom of the pump.

The Manley Grease Bucket may be used as a syringe to draw the old lubricant out of the differential or transmission box and then force kerosene or gasoline over the gears to clean them—after which the kerosene or gasoline may be withdrawn and the differential or transmission box filled with new lubricant.

Self-Measuring

The capacity of the bucket is 25 pounds. A pound of grease is sucked in and discharged by one stroke.

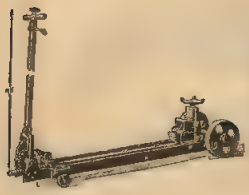
HI-SPEED



MODELS 550 AND 551

The Manley Hi-Speed Jack is fast, safe, reliable and is built to give long service. Less working parts to get out of order, which are all exposed, making adjustments, oiling and inspection easy. The handle has six operating positions allowing jack to operate perfectly under low bumper and overhanging spare tires and deliver cars with overhanging bodies and operates in short space and crowded positions. Built low to enable short turning under wheel of car. Equipped with ball-bearing drop forged front casters, dogs and ratchets. Chrome nickel steel pinion gears.

Model		Wt. each	Each
550	Steel Wheels	120 lbs.	$36.00
551	Rubber Tired	120 lbs.	47.00

The Manley Low Hi-Speed Jack is built on exactly the same principle of operation as the Hi Speed Jack and the six operating positions of the handle have been retained. This feature of the Manley Jack is absolutely necessary in order to use the jack under all conditions. The short stroke with the handle in the vertical position enables the jack to be operated in close quarters, such as next to cars, wall, etc. The short stroke of the handle in the horizontal enables the jacks to be operated under low, overhanging bodies, under cars equipped with gas tanks, two tires at the rear, as well as the bumper.

	Models 550-551	Models 552-553

TRUCK WHEEL DOLLY

MODEL 275

To remove and replace a truck wheel of even normal size weighing 1000 lbs. is a most difficult piece of work without the aid of the Manley Dolly. It is dangerous and heavy work requiring several men, blocks, wedges, crow bars, etc., consuming minutes instead of seconds. To say that the Manley Dolly is sixty times faster than this method is conservative.

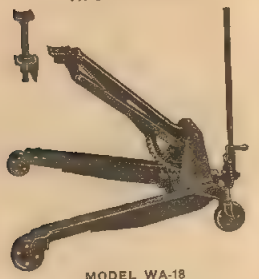
The Manley method of raising the wheel from the bottom allows the dolly to be used on any truck in existence, no matter how far the body projects over the wheel, or if the truck is equipped with fenders that practically touch it. This feature of the Manley Dolly stamps it at once as 100 per cent efficient. Its other features of superiority, combined with this one, mark it beyond question as the only successful tool for this work. Capacity 1 ton.

Model	Wt. each	Each
275	210 lbs.	$85.00

JACKS

WEAVER

HI-LIFT JACKS



MODEL WA-18

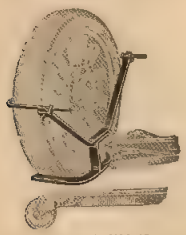
The new Weaver Hi-Lift jack is unique in possessing a range of lift far greater than any other jack on the market, being the first jack to employ successfully, the cantilever principal of supporting its construction. The saddle of the jack can be lowered to a minimum height of seven inches and raised to a maximum of 38 inches. The removable standard shown in the above cut provides additional height up to 7 inches, giving an extreme elevation of 45 inches.

This jack is extremely rugged in construction, being of steel and malleable iron throughout, with lifting arm of cast steel. Lifting capacity, 3000 lbs. Maximum width, 40 inches Ample to straddle largest truck wheel and narrow enough to go between front or rear wheels of any car. The two wheels nearest handle are mounted on ball and roller-bearing casters and make the jack easy to guide. Shipping weight approximately 200 lbs.

Model		Each
WA-18		**$60.00**

TRUCK WHEEL ATTACHMENTS

For Weaver Hi-Lift Jack.



MODEL WA-19

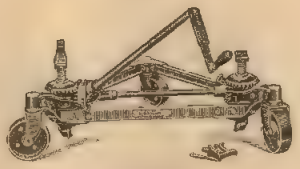
The attachment shown in the accompanying cut is supplied at a slight additional cost, for removing and transporting truck wheels. The two clamps which grip the tire are adjustable to handle tires of any size. The attachment can be attached instantly without tools. Note there is ample space between the arms to use wheel puller.

Model	Wt. each	Each
WA-19	32 lbs.	**$10.00**

Loose.

AUTO TWIN

GARAGE TYPE



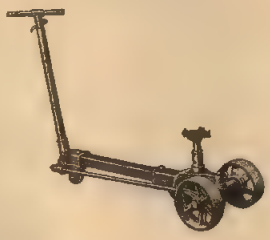
MODEL WA-12

The Weaver Auto Twin Jack meets every requirement for handling both complete and dismantled cars. The great diameter of the wheels—about 6½ inches diameter—assists greatly in enabling them to convey heavy burdens over comparatively rough floors with ease. This feature is of particular value in shops, wash room and paint shop, where it is necessary to move cars to take advantage of the best possible light. The general construction is of high carbon steel and malleable iron.

No		Wt. each	Each
WA-12	Regular	100 lbs.	**$27.50**
WA-13	Rubber Tired	100 lbs.	**39.00**

Loose.

NEW WAY JACKS



MODEL WA-16

All the features which have made Model WA-16 New-Way Jack so popular, including the pivoting wheels are included in this model jack together with many refinements in construction that add materially to its ruggedness and durability.

This jack is entirely of bolted construction which makes it possible to replace any worn or broken part without special tools. The roller bearings are located within the axle housing, instead of within the wheel hubs, preventing undue friction and wear under side thrust. The rear caster has two sets of ball bearings and is clamped to jack by heavy bolt. Maximum height, 17½ inches. Steel wheels.

Every jack is tested to lift its maximum capacity of 5,000 pounds before leaving the factory.

Model	Wt. each	Each
WA-16	100 lbs.	**$30.00**

One in a crate.

GAME GETTER GUNS

MARBLE'S

Two Guns in One—One Gun for All Game.

Upper barrel 22 caliber, rifled, chambered for short, long and long rifle cartridges. Lower barrel, .410 gauge (12 m/m) 2½ in. paper shot shells, also .44 and .410 ball cartridges (not conical bullet.)

Single Trigger—Striker is adjustable to either barrel instantly.

Hammer—Rebounds to safety notch after firing.

Receiver Lock—Trigger guard is pulled back to open breech.

Ejector—Partially ejects from both barrels at same time.

Folding Stock—Is held rigidly in position by sliding lock.

Sights—Rear sight has stationary Buckhorn with large U notch, also leaf with small U notch, and folding peep with $\frac{5}{32}$ in. aperture.

Front sight has $\frac{1}{16}$ in. gold bead.

Specifications: Frame, drop forged, finish, blued. Stock formed from sheet steel, nickeled. Grip plates, walnut. Holster, finest strap leather.

	Each
No. M21 With 15 in. barrels, complete with fine leather holster, weight each 3¾ lbs.	$27.00

A more accurate .22 cannot be found. The shot cartridges for small furred and feathered game almost equal 28 gauge. The .44 ball is very accurate and powerful at medium range. Smokeless powder may be used with perfect safety and slight recoil.

No. 341E—410 bore, 26 and 28 in. barrel, weight each 5¾ lbs.	11.50

Because of its performance under all sorts of shooting conditions, and its enduring qualities, the Iver Johnson Champion single barrel shot gun has proved a great favorite for nearly half a century with lovers of outdoor sport—men, women and boys who hunt.

In design and construction it represents advanced ideas of exceptional merit, and is beautifully finished. The stocks are of real black walnut, with two coats of Spar varnish cut back between each coat, and hand rubbed. The action is developed to the utmost simplicity, and the workmanship is of the best.

One in a Carton.

COMBINATION RIFLE AND PISTOLS

FIALA

Model 1920, 10 Shot.

An accurate well balanced target pistol which can be easily changed into a long range, fine shooting rifle. An important feature of this arm which is particularly valuable when used at the target range is, that breech may be left open while the arm is lying down or in the hands of operator until the very moment of firing. Equipped with a positive safety device.

When safety catch is raised the trigger is entirely disengaged, making it impossible to fire the gun or move bolt.

Black imitation leather covered case, velvet lined fitted with lock and key.

As a Rifle.

Length over all 35 inches.
Length barrel 20 inches.
Distance between sights 23½ inches.
Sights, folding peep sight adjustable for range.
Weight each 3¾ lbs.
Capacity magazine 10 cartridges.
Full pistol grip, walnut grips, forearm and butt.
Ammunition 22 caliber, long rifle rim fire, greased cartridge loaded with lesmok of semi-smokeless powder.
Finish, blued steel.

As a Target Pistol.

Length over all 11½ inches.
Length barrel 7½ inches.
Distance between sights 9⅝ inches.
Sights, open Navy type.
Weight each 31 ounces.

As a Pocket Pistol.

Length over all 6½ inches.
Length barrel 3 inches.
Weight each 27 ounces.

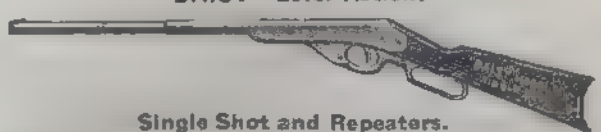
Each

No. 22C—22 caliber; shoots 22 rim fire long rifle cartridges. Complete with 3 barrels, receiver and butt stock as above described $74 25

One in imitation leather covered case; wt complete 5 lbs.

AIR RIFLES

DAISY—Lever Action.



Single Shot and Repeaters.

Lever action; extremely simple; removal of one screw enables user to remove all parts for inspection or replacement.

Peep rear sight and Rocky Mountain front sight; black walnut stock; length over all 31½ ins; weight each 1 11/16 lbs.

Per Doz

No. 12 Single shot, shoots air rifle shot and 17/32 darts; blued finish $37 50
No. 11—350 shot, repeater; shoots air rifle shot only; nickel finish 50 25

One doz in wood case; wt 26 lbs

AIR RIFLES

DAISY—Lever Action.

500 and 1000 Shot Repeaters.

Magazine repeater lever action loaded by operating the lever, shooting arm provided with patented shot retainer that enables the user to shoot downward without losing the shot.

Steel barrel and frame; turned stock of genuine black walnut, highly polished, fitted with blued steel butt plate. This rifle shoots with great force and precision; shoots air rifle shot; length over all 36 in.; wt. each 2 9/16 lbs. Per Doz

No. 30—500 shot repeater; blued $63 00
No. 3—1000 shot repeater; nickeled 75 75

Half doz in wood case: wt 20 lbs.

DAISY

Automatic Pump Action, Repeater. Take Down Model.

A real rifle with genuine pump action, that can be fired repeatedly from the shoulder, the loading action is automatic, the smoothest and easiest action ever invented. Operates by pulling the slide toward the stock, fires rapidly from the shoulder, the magazine having a forced feed.

Blued steel barrel and frame, non-rusting; genuine black walnut stock, hand polished; adjustable sights front and rear. Magazine holds about 75 shot. Length over all 38 ins.

Per Doz

No. 25AR—Repeater, 75 shot; shoots air rifle shot only; wt each 3¼ lbs $126 00

Six in wood case wt 25 lbs.

DAISY, MILITARY TYPE

Lever Action, Repeater. With Bayonet.

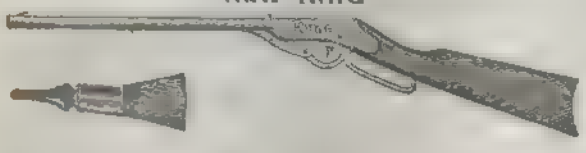
Beautiful walnut stock; all metal parts blued finish; rear sights are open and adjustable, front sight is of the target type, adjustable strap for carrying rubber tipped detachable bayonet for drill use. Has forced feed so that it can be fired in any direction without losing a shot.

Designed after the latest military rifle, with true army appearance. Shoots strong and accurately, is very neatly finished and will appeal to all boys. Per Doz

No. 40—50 shot repeater; shoots air rifle shot only; length over all, including bayonet 45 ins; wt each 3½ lbs $126 00

Half doz in wood case.

NEW KING



Single Shot.

Lever action, loads by operating lever.

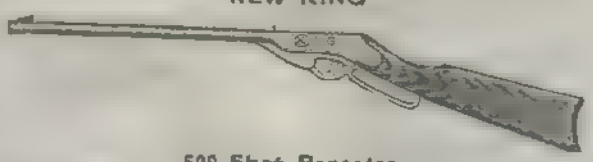
Blued steel barrel, frame and trimmings, knife blade front and peep rear sights, varnished walnut stock, all parts interchangeable. Length over all 31 ins. Per Doz

No. 21—Single shot; shoots air rifle shot or darts; wt each 1½ lbs $37 50

One doz in wood case; wt 25 lbs.

AIR RIFLES

NEW KING



500 Shot Repeater.

A well balanced repeater; shoots with force and accuracy. All parts interchangeable.

Barrel and frame one-piece blued steel; open rear sight; walnut finished stock; length over all 31 ins. Per Doz

No. 22—Shoots air rifle shot; wt each 1⅝ lbs $44 25

One doz in wood case; wt 25 lbs.

NEW KING

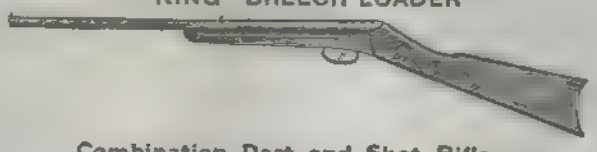
1000 Shot Repeater.

Hammerless magazine repeater, easy lever action; heavy blued steel barrel and frame; selected walnut stock; loads automatically and shoots air rifle shot with great force and accuracy. 1000 shot one at a time. Per Doz

No. 55-AR—Length 35 ins; wt each 1¾ lbs $50 25

One doz in wood case.

"KING" BREECH LOADER



Combination Dart and Shot Rifle.

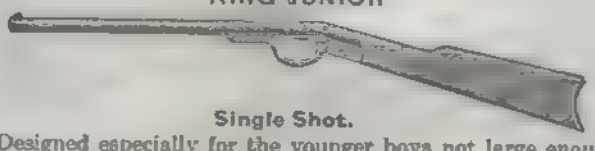
Gun blue steel barrel and all metal parts; stock made of select walnut, neatly finished. It breaks about the center of the rifle, and has an automatic locking device. The shot is placed in the shot seat on the front end of the rifle portion of the barrel; the dart is inserted point first in the rear end of the front barrel.

Per Doz

No. 17—Length over all 32 ins $63 00

One doz in case wt per doz 24 lbs.

KING JUNIOR



Single Shot.

Designed especially for the younger boys not large enough for a heavy air rifle.

Steel barrel, hardwood ebony finished stock; good sights and perfect action; length over all 29 ins. Per Doz

No. 10AR—Nickel plated barrel and frame; wt each 1⅛ lbs $22 80

One doz in wood case.

UPTON MACHINE CO.

Model 20, Single Shot, Lever Action.

Army blue finish steel barrel, frame and trimmings; safety lever action; walnut stock; length over all 32 ins.

Per Doz

No. D20—Single shot; shoots air rifle shot $37 50

Federal Mercoid Electrical Control Switches

For use where it is desired to control, electrically, pressure, vacuum or thermostatic apparatus.

Pressure Type. Fig. 31

Mercoid room thermostats, hot water temperature controls, steam boiler controls, float type switches, air compressor switches, refrigerator controls.

Contact is made within the Federal Mercoid sealed glass tube, containing inert gases and mercury, accurate and positive in operation. No open arc, contact is locked in place on both the on and off positions.

Furnished for any service requiring definite on and off points.

Fig. 31, standard type for pressures to 500 pounds.

Single pole, each.. .... **$30.00**
Double pole, each..... **40.00**
Two-circuit (single pole and alarm), each..... **36.00**

Prices covering special ranges or requirements on application.

Low Water Alarm and Fusible Plug Combined

An auxiliary safety device for application to horizontal or vertical tubular boilers.

It combines a fusible plug melting by steam pressure and a whistle alarm which is sounded when low water line is reached. The cut shown here is the globe pattern for horizontal boilers. Applied to this type of boiler, a piece of ½-inch galvanized pipe leads from the bushing on the low water alarm down to within 1 inch above low water line. Under a satisfactory water level, the condenser is occupied by water, thus protecting the fusible plug filler. When low water line is reached, the water is replaced by steam, which melts the fusible plug and sounds the whistle alarm. A new fusible plug filler inserted in the whistle portion puts the device in service again.

As an auxiliary device, our low water alarm is acceptable to the A. S. M. E. State Inspection Bureaus and Insurance Companies, and is standard equipment with many of the large manufacturers of boilers.

No. 1 Plugs fuse below fifty pounds pressure.

No. 2 Plugs fuse below eighty pounds pressure.

No. 3 Plugs fuse below one hundred and sixty pounds pressure.

No. 4 Plugs fuse over one hundred and sixty pounds pressure.

In ordering, kindly state boiler pressure carried, and whether the device is wanted for application on horizontal or vertical boiler.

Price each, complete **$6.50**
Price each, extra fuse plugs ..... **.25**

Engine Room Clocks

These Clocks are designed for use in Stationary and Marine Engine Rooms. They are regularly supplied in Deep Brass or Nickel-plated Case, and in Black Enameled Case to order. In appearance, they are designed to match our Standard Gauge Case and are, therefore, particularly adapted for Gauge Board mounting. They are fitted with hinged ring and snap lock. Made with Seth Thomas, Howard or Chelsea Eight-Day Movements.

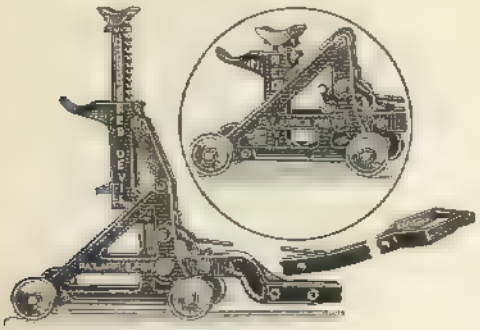
MARQUETTE GARAGE JACKS AND IRON HORSE

MARQUETTE QUICK LIFT TIRE JACK

(Formerly Wood Imes)



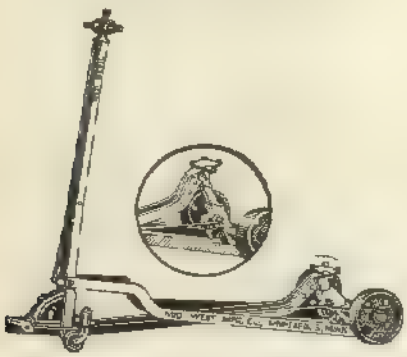
Marquette Quick-Lift Tire Jack. Simple, quick, sure and safe. A time, labor and money saver in tire changing, removing springs, and other general jack uses.

The handle is 48 inches long, and the jack is on wheels so it rolls right into position ready for use. Then each stroke of the handle lifts the car an average of 1¾ inches, and in four strokes you have a clearance of 7 inches. The cap is pivoted so its full surface supports the axle, and the low, broad wheel base 12x6 inches, makes the Marquette a tire jack that will never topple over. In construction the Marquette is 8½ inches high when in lowered position. The adjustable rack bar can be extended 5¾ inches, and the 7-inch lift gives the Marquette Tire Jack an over all height of 20¾ inches. Built of best steel, it weighs 52 pounds, and has a quick lifting capacity of 1,500 pounds.

Marquette Quick-Lift Tire Jack. ... ...each $20 00

MARQUETTE DOLLY JACK

(Formerly Wood-Imes)



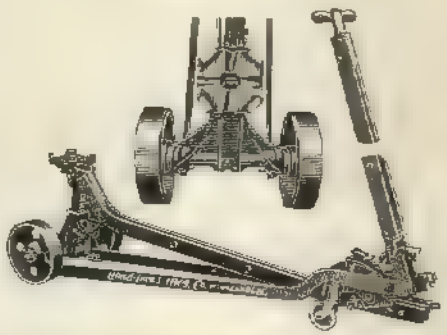
Marquette Dolly Jack. A quick-lift jack and turntable for use in every garage. Used for unloading cars, on the wash rack and in crowded places. Range of adjustment, 8 to 14½ inches; diameter of wheels, 8¼ inches; tread, 2 inches; width of track, O. S., 15 inches; length of truck, 24 inches; distance between wheels, 13 inches.

This jack is made also in two other types, one with 5 inch wide steel tires which enable the jack to roll easily over the rough places, and the other with rubber tires is for use on highly polished floors, Mosaic or tile floors. Tires are securely held in bolted split clincher wheels.

Marquette Dolly Jack.. .... each $30 00
Marquette Dolly Jack, with 5-inch wide steel tires
Each $35 00
Marquette Dolly Jack, with rubber tires.. ..each 45 00

MARQUETTE LEVERAGE JACK

(Formerly Wood-Imes)



Marquette Leverage Jack has a large all-steel swivel cap (5x5-inch) with large center hole (1⅝ inch) to take drain plug in the differential housing, and grooved to accommodate truss rods, assuring a steady, firm grip on the car, and as the swivel cap is in a horizontal position at any height there can positively be no slipping of the load. The handle can be leaned up out of the aisle when the load is up, and when not in use the handle folds down flat on the jack, so that it can be shoved under a bench.

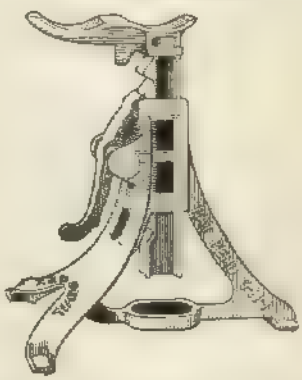
MARQUETTE ADJUSTABLE IRON HORSE

(Formerly Wood-Imes)



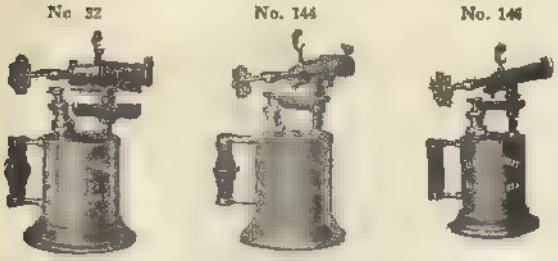
Marquette Adjustable Iron Horse eliminates the use of wood blocks in the shop, storeroom and on the display floor. It will not slip or tip over. To lower the car it is not necessary to use a jack, as a slight tap on the pawl releases the rack bar, and the car drops to its normal position.

It is 9¾ inches high and extends to 16¼ inches, giving a raised clearance of 6½ inches. Extra racks for special heights may be obtained. Weight, 8 pounds.

Marquette Adjustable Iron Horse.....each $2 75

TORCHES, SOLDERING IRONS AND CRANES

C. & L. SINGLE NEEDLE TORCHES



No. 32 Clayton & Lambert Gasoline Torch. Single needle. Capacity, 1 quart. It produces over 300 degrees more heat than any other torch. Burns low test fuels. Tank is heavy gauge brass strongly reinforced on the inside. Pump and all fittings are the very best. Sturdy construction. Hook is removable. Weight, 4¼ pounds.

No. 32 C. & L. Gasoline Torch.....each $18 00

No. 144 Clayton & Lambert Gasoline Torch is made to meet the demand for a cheap torch. Capacity, 1 quart. The tank is made of polished brass. Burner has an open generator that injects the air which mixes with the gas, producing a steady blue flame. Made with removable cast hook and support. Weight, 4¼ pounds.

No. 144 C. & L. Gasoline Torch.....each $15 00

No. 146 Clayton & Lambert Torch is of the same construction as No. 144 but smaller, pint size, fitted with hook and support for holding a soldering iron. Hook is removable. Shipping weight, each, 3 pounds

No. 146 C. & L. Gasoline Torch . . . . . each $14 00

ADROIT JUNIOR SOLDERING IRON

Adroit Junior Electric Soldering Iron. For radio, home or light factory use. Operates on either A. C. or D. C. Is light but strong, uniform in temperature, and with its three styles of tips will reach joints usually inaccessible to ordinary irons.

Adroit Junior Soldering Iron . . . . . each $2 25

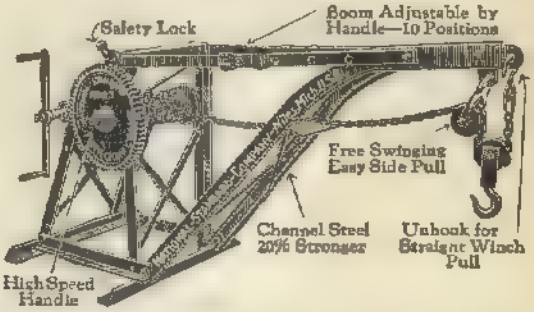
Soldering Copper Handles.....each $0 10

NATIONAL-STANDARD WRECKING CRANE



Safety Lock
Boom Adjustable by Handle—10 Positions
Free Swinging Easy Side Pull
Channel Steel 20% Stronger
Unhook for Straight Winch Pull
High Speed Handle

National-Standard Wrecking Crane. The base of the "Standard" Wrecking Crane is 30 inches wide by 36 inches long, a compact size that enables it to be installed on small cars such as the Ford, Chevrolet and others. Yet its construction is such that this small base does not decrease its strength

The boom may be adjusted for height by one man without danger of dropping, for when placed in its lowest position, lugs attached to the sliding strap prevent the boom from falling. Two locking pins are easily removed, making ten working heights instantly available.

Equipped with a positive locking device so that the locking ratchet which is in constant mesh with the large gear when power is being applied can be locked in engagement making it impossible for it to jar out while towing a wreck.

The drum is equipped with chain guides, preventing chain from piling up on the side of the frame.

The Crane has a capacity of two tons with one man and the handle is so constructed that additional leverage may be obtained where necessary.

For power and ease of operation, place crank on small gear shaft. For speed, place crank on large gear shaft, reeling the chain five times as fast. Crank can be used on either side of crane. Thumb screws make change very easy

The base of this Crane is made from angle irons, drilled with several holes so that where desired rods may be run through the bed of the truck or wrecking car direct to the frame of the car, thus taking unnecessary strain off the car body. The main frame is built of heavy angles, well braced by trusses, while the boom is constructed of channels which are also well braced for side pulls. The adjustable bars connecting the boom to the main frame of the Crane are made from heavy flat stock, and a locking pin gives quick adjustment. An extra heavy chain is furnished and the drum has extra capacity so that additional chain may be added if desired.

It is not necessary to get the car directly in line with the wreck, as the "Standard" Crane will pull at any angle. This is accomplished by a swinging pulley on the boom.

Specifications: Height, from 40 inches to 70 inches. Base, 30x36 inches. Maximum leverage, 120 to 1. Size of chain, 5/16 inch—26 feet long. Length of boom, 72 inches. Net weight, 390 pounds. Shipping weight, 415 pounds.

Model 93 "Standard" Wrecking Crane.....each $95 00

"They Keep a-Running"

¼-h.p. Century Repulsion-Start Induction Single-Phase Motor

No Special Starting Fuses Required

1 Usually no special starting fuses are required for Century Repulsion-start Induction Single-phase Motors.

2 Starting-current requirements are low—not to exceed of 265% of full load current.

3 This permits the use of any standard single throw starting switch.

4 Fuses which will protect the motor while running and carrying its load are generally of ample capacity for starting because of the low starting current and quick acceleration.

The Century Wool-yarn System of Lubrication (applied to Century Repulsion-start Induction Single-phase fractional horsepower motors) is a real engineering advance. It consists of a number of continuous unbroken strands of pure wool-yarn lapped over the shaft and dipping down into the oil well. Especially applicable to emery stands, bench grinders and similar equipment, because the filtering properties of the pure wool-yarn strands prevent abrasive particles, emery dust or compounds from reaching the bearing surfaces through the oil wells.

In addition to this feature, the Century Wool-yarn System of Lubrication permits more than one year's continuous operation without refilling. Oil well is especially large and is not fitted wth a drain plug at the bottom—therefore oil is conserved indefinitely.

Built in all standard sizes, from 1/8 to 40 horsepower—temperature rise not more than 40 degrees Centigrade.

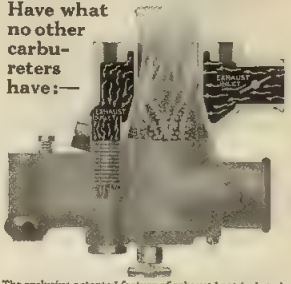
MARVEL
Carbureters

Have what no other carbureters have:—

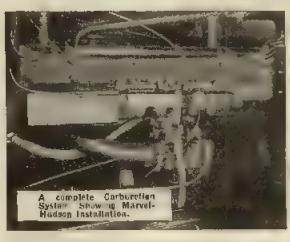


The exclusive patented feature of exhaust heat jacketed around the throttle automatically controlled.

Exhaust heat around the throttle changes the fuel "Rain Drops" in the mixture to the proper combustible gas as shown, and this heat is available from the first explosion

THINK WHAT THIS MEANS TO

HUDSON OWNERS



A complete Carburetion System showing Marvel-Hudson Installation.

QUICK WARM UP FROM COLD ENGINE
LESS CHOKER MANIPULATION
LESS CRANK CASE DILUTION
LESS CARBON DEPOSIT
POSITIVELY BETTER WINTER PERFORMANCE
POSITIVELY INCREASED MILES PER GALLON

The heat must be at the throttle and under automatic control to get the change in mixture conditions shown above. This has been established as a scientific fact.

SEE WHAT THIS DOES TO YOUR HUDSON.
Our guarantee protects against dissatisfaction.

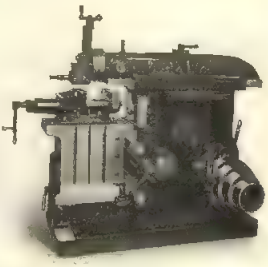
SHAPERS

McDougall Cone Drive

16", 20" and 24" Single and Back Geared



No. 2549

The 24" back geared shaper shown in the illustration is not only the heaviest and most powerful machine of its stroke in the market but except in length of stroke the machine is practically equal to the next larger size of most other makes, this fact plainly indicating its unusually massive and substantial construction

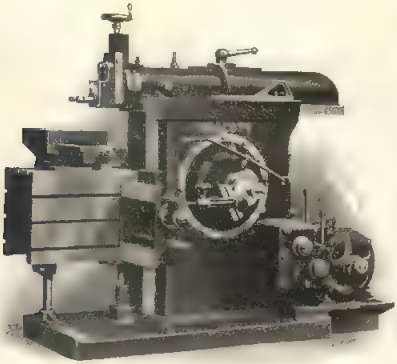
Among its labor saving features may be mentioned the safety stop for the cross feed, the large opening under ram for keyseating shafting, the arrangement for quickly changing the down and cross feeds while machine is in operation or at rest, the graduated swivel vise base, the graduated swivel head, the stroke indicator the heavy pan base, etc.

One of the most interesting features of the McDougall 24" Shaper and one which is absolutely essential to the life and accuracy of any **heavy** shaper, is the use of **full length taper gibs** for all flat bearings for taking up the wear. These gibs are arranged for end screw adjustment, by means of which a perfect full length metal to metal bearing can be constantly maintained. This shaper is from new patterns throughout and represents the latest and most approved ideas in shaper construction

McDougall Shapers are also made in 16" and 20" sizes.

Gear Box Drive Crank Shaper

16", 20" and 24"



No. 2550

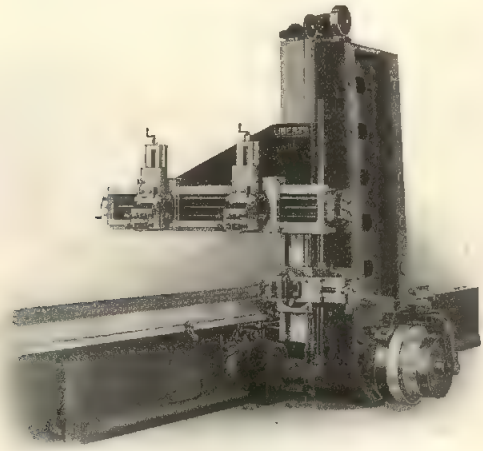
In the single pulley drive and motor drive machines power is transmitted through a friction clutch. All gears and shafts are hardened and ground and run in oil. Four changes of speed are obtained with positive clutches, and these are multiplied by sliding gear in column of machine, giving eight ram speeds in geometrical progression.

All levers are conveniently located on the working side of machine, the control being within easy reach of the operator. A brake spool is provided in connection with friction clutch, which enables ram to be stopped in exact position desired.

All gears in machine are of helical design, course pitch and wide face, and are cut on a machine especially designed for that purpose. These gears insure a quiet running machine, with a steady, powerful stroke, and an absence of any chatter or roughness.

Power feed to tool head may be furnished, if desired, and each machine is regularly equipped with vise, table support and all necessary wrenches.

Liberty Planers



No. 2548—Open Side Planer

(Continued)

In operation the power is transmitted from a spur gear on the end of the bull pinion shaft, through a pair of reversing mitre gears to the vertical splined feed shaft A handle conveniently located operates a positive clutch and determines whether the feed is to take place on the cutting or return stroke. Placing the handle in a neutral position disengages all feeds. A pair of mitre gears on the vertical feed shaft operate the self-releasing friction attached to the feed gear on end of rail or side head. An automatically locked adjustable stop operated by a knob determines the amount of feed obtained. The usual trigger gears meshing with the feed gear are replaced by reversible ratchet gears, operated by shifting handles. The position of these handles coincides with the desired direction of the feed.

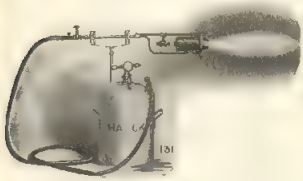
Hauck Portable Kerosene Burner



Hand Pump Type
No compressed air required

For kerosene only, having a quick acting hand air pump built inside the tank. It was designed for field and shop work where compressed air is not available or convenient for use. The flame is intense and easily regulated as desired. The burner operates approximately five hours with a few strokes of pumping.

Stands as shown, holding above burner, are furnished when ordered

No.	Capacity of Seamless Tank	Length of Hose	Oil Consumption per Hour	Shipping Weight	Weight of Burner	Price Complete
1500-7	10 Gal.	12 Ft.	1¾ Gal	80 lbs.	5 lbs.	70.00
1500-8	12 Gal	12 Ft.	2½ Gal	95 lbs.	6 lbs.	85.00
1500-9	15 Gal	12 Ft.	3 Gal.	110 lbs	8 lbs.	98.00

Either of the above outfits can be furnished with two or more burners on one tank

Hauck Thawing Outfits

No. 1501

For Railroads and Terminal Yards. Prevent derailment and traffic tie-ups

This simple way of melting snow and ice from switches, frogs and derails, is so inexpensive that no Interlocking Plant, Switchtower, Terminal Yard or Section can afford to be without a Hauck Thawer. It is an insurance against costly delays of trains during snow and sleet storms on account of frozen frogs and switches.

For Terminal Yards and on Snowplows where compressed air is available, we recommend Hauck Compressed Air Type Burners, which can be attached to blow-off valve on air brakes. They can be used with any kind of crude fuel or kerosene oil and start instantly without previous heating of the burner. Ask for special bulletin

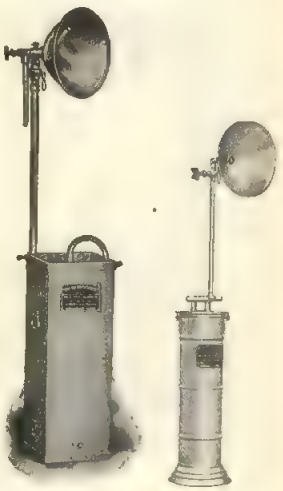
One man with a Hauck Thawing Outfit is equal to ten men with picks and brooms. It is a necessary equipment for every emergency car and snowplow.

Distillate or gas oil, residue of Pintsch gas, may also be used.

Additional lengths of hose furnished if desired.

For full information and prices see "Portable Kerosene Burners" above.

Milburn Lights



No. 8 RELIANCE

Milburn High Power Portable Acetylene Lights are manufactured in a large variety of styles and sizes suited to any requirement of outdoor night work. They are extensively used in industrial plants, foundries, mines, quarries, material yards, railroad service, shipping, contractors' work and Government departments. They range from 100 to 30,000 candle-power.

Milburn Lights are extremely simple in operation and are understood by an ordinary laborer. They are safe, economical and durably constructed. Ordinary commercial carbide and water are the only requirements for its operation, the carbide being obtainable everywhere, with the same ease as oil or gasoline, and at a uniformly low price.

Lamp carbide has a much higher gas yield than any other form and is bought in an open market, leaving the consumer independent of any special controlled sources of fuel supply. These points are important factors in the economy of the Milburn Light.

No.	Candle Power	Burning capacity Hours	Height	Carbide Charge	Weight empty
1502-22	100	8	19"	1 lb.	3 lbs.
1502-Builder	500	12	29"	1½ lbs.	11 lbs.
1502-Reliance	1000	8	51"	2 lbs.	17 lbs.
1502-8	8000	12	6'	8 lbs.	60 lbs.
1502-12	12000	12	6'x6"	12 lbs.	85 lbs.

Automatic Acetylene Generators

No. 1503

The Automatic Acetylene Generator is of the medium pressure, carbide to water type, and is made in 15, 25, 50 and 100 lb. sizes, to meet every service requirement.

Aside from the important advantage of never running short of acetylene gas just when you have a rush job to do (as often happens when acetylene cylinders are used), this Acetylene Generator produces an absolutely pure acetylene gas that insures successful welding.

It produces pure acetylene gas from carbide and water for welding and cutting and lead burning by the Oxy-Acetylene process.

It can be used with any make of welding cutting or lead burning apparatus.

The Acetylene Generator possesses many marked advantages the most important of these being the absence of weights, clockwork and complicated mechanism. The carbide feed is simple sure and dependable, and is automatically controlled by the gas consumed by the torch—the generating of the gas automatically stops when the torch is extinguished and automatically starts generating when the torch is relighted, thus automatically maintaining a constant even gas pressure.

Interlocking safety levers make the generator absolutely foolproof, and compel the users to follow the proper sequence of the operations necessary to start or shut off the generator. A dependable safety blow-off makes it impossible to obtain more than 15 lbs. pressure.

The gas purifier has a water seal which seals the gas and absolutely prevents a back flash reaching the generator.

A truck holding the generator and one cylinder of oxygen can be supplied with 15 and 25 lb. generators when desired.

Further information and prices on application.

TABLE OF CAPACITIES OF ACETYLENE GENERATORS

Acetylene Gas Generated per Charge of Carbide	Approximate No. of Torches used at Same Time: Light Work	Medium Work	Heavy Work	Size of Generator Required	Carbide Capacity Lbs.	Carbide Used per Hour Lbs.	Acetylene Gas Generated per Hour cu. ft.	List Price

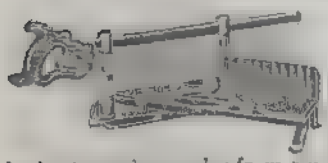
One in wood box.

NEW LANGDON



With Saw.

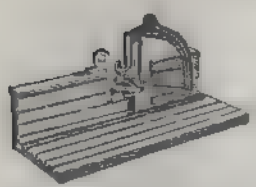
Cast iron frame, painted corrugated back, Malleable iron legs, polished steel uprights with spur center clamping device to hold stock, arms pinned to lock at regular angles from right angle to 45°, capacity 3⅛ ins at right angle and 6⅜ ins at mitre.

Each

No. 23 Size with 24x4 inch saw, length frame 19⅛x4¼ ins $39 00

One in wood box; wt each 27½ lbs.

PERFECTION



Without Saw.

Japanned malleable iron frame, polished cast steel post, varnished inlaid hardwood base, tongued and grooved. Guide is held at any desired angle by sliding key and depth of cut is controlled by clutch on guide post, saws at any angle from 9° to 90° with work lying parallel to back of box. Detachable from wood base and takes hand, panel or back saw.

Each

No. 10—Length base 16 ins; width 6 ins; 4x¾ in back $9 45

Two in wood box; wt each 5½ lbs.

MITRE BOX SETS

C. E. JENNINGS & CO.

Frame made of seasoned hardwood, held securely together by screws. Complete with 10-inch back saw, hardwood back which prevents sawing frame. Especially adapted for amatuers and for sawing picture frames and other mouldings.

Per Doz

No. 011—Length base 10 ins; outside width 3⅛ ins; inside width 1⅞ ins; depth 1¼ ins $51 00

One in cardboard box; wt per doz 18 lbs.

LATHE, WITH SCROLL SAW ATTACHMENT

MILLER FALLS CO.

Japanned iron frame drive wheel and treadle; 7½ inch iron tilting table, 20½ inch hardwood arms, with blower attachment; 13 inch drive wheel, round leather belt. Height 39 inches. Base 25x15 inches, bed 24 inches long, has 2 inch face plate, one spur center and one screw center. The scroll saw can be taken off by loosening one bolt. The tailstock has a screw feed center which is secured at any point desired by a clamping device like that on modern engine lathes.

Driving wheel is made with two grooves of different depths to give change of speed, as the belt runs from it to the cone pulley. On the outer side of the pulley is a 4x¾ inch solid emery wheel.

Each

No. 320—Complete with lathe attachment, 12 saw blades, wrench, sheet of designs, long tool rest, short tool rest, 6 drill points, 1 straight turning chisel, 1 skew turning chisel, 1 turning gouge and screw driver (no circular saw attachment included) $72 00

One in wood box; wt each boxed about 75 lbs.

Each

No. 319 -Circular saw attachment only $4 05

One in wood box; wt each 3 lbs.

PLANES

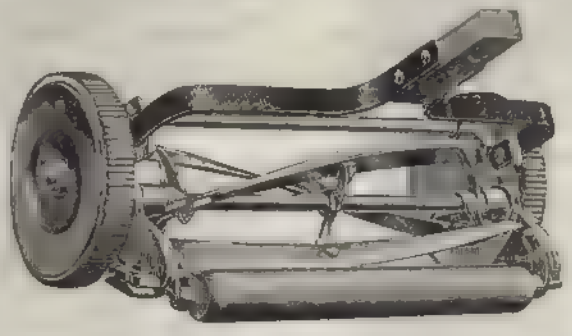
LAWN MOWERS

Including the famous "Electric"—the lowest priced good lawn mower in the market

Excellent Money Makers For You!

"Electric" Ball-Bearing Ratchet Mowers

Have many of the specifications of higher priced mowers. Remarkably high grade instrument at remarkably low prices.



8 in. solid drive wheels, 8 blades, reel [illegible] in. diam., ½ in. cutter shaft, making a very [illegible] cutter that will not cut if knocked out of [illegible] place; plate, [illegible] ball-bearing ratchet mower [illegible] plate adjusting [illegible] to raise, lower, right, [illegible] drive wheels; depressed [illegible] cut grass in any position up to 10 in. high; in case, about 35 lbs.

	Each		Each		Each
2H7855—14 in. cut	$6.25	2H7856—16 in. cut	$6.75	2H7857—18 in. cut	Out

"MOHAWK" BALL-BEARING MOWERS

Best quality steel cones, cups and balls, guaranteed not to wear or require adjusting for life of mowers, self-sharpening blades, fitted for grass catcher, hand painted and striped, superior varnished handles.

STAR VALUE **"Minneapolis"**—10 in. open [illegible] wheels, 4 Diamond [illegible] blades, 4 steel [illegible] automatic ball bearing cup and cone [illegible] bushings for [illegible] steel [illegible] gold [illegible] striped [illegible] Adjustable [illegible] to [illegible] any position [illegible] cut grass up to [illegible] in. high; in case, about 45 lbs.

2H7843—16 in. cut Each **$8.25**

"Superior"—8 in. solid center drive wheels, 4 [illegible] blades, reel 5½ in. diam., ball bearing cutter journal, heavy [illegible] frame, [illegible] adjustable [illegible] Will cut [illegible] in. high; in case, about 40 lbs.

2H7867—16 in. cut Each **$8.95**

"Standard"—10 in. solid center drive wheels, 4 revolving blades, reel [illegible] in. diam., [illegible] raised gear, automatic ball bearing cups and cones, [illegible] bushings for [illegible] adjustment, [illegible] gold bronze body, silver and red trim. Will cut 6 or 7 in. grass in any position [illegible] in case, about 55 lbs.

2H7857—16 in. cut Each Out

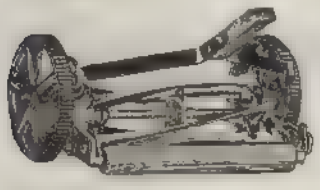
"Aero"—10 in. open drive wheels, steel bearings, 4 revolving blades, reel 6 in. diam., extra [illegible] wide case, knife bar pivoted on rocker arms on [illegible] bronze bushings, [illegible] steel [illegible] Will cut [illegible] in. standing grass, adjustable to cut lengths ⅝ to 1¼ in.; in case, about 60 lbs.

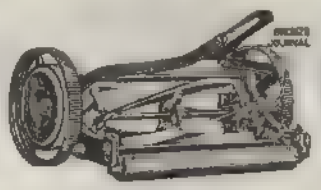
2H7859—16 in. cut Each **$11.25**

2H7860—18 " " " **$11.15**

"BELMONT" MOWERS

Self-sharpening blades, fitted for grass catcher, hand painted and striped, superior varnished handles.





"Majestic"—Triple gear, 10 in. open drive wheels, 4 extra heavy revolving blades, reel 6 in. diam., drives from both ends, extra long wheel base, trussed, patented knife bar, automatic ball-bearing drive wheels and reel, white enameled black superstructure, gold bronze trim, curling gear gold bronze, long handle. Will cut 5 and 6 in. grass, adjustable to cut lengths ¾ to 1½ in., 3 in case, about 68 lbs.

2H9858—16 in. cut ... Each **$16.50**

"Blue Bird"—[illegible] open wheels, 4 revolving blades, reel [illegible] in. diam., knife bar pivoted on rocker arms, [illegible] body, gold trim. Will cut grass up to 5 in., in any position; 1 in case, about 46 lbs.

KEROSENE ENGINES

MONARCH LINE

These engines are scientifically designed for a general utility power unit. Heavy enough to withstand any strain, light enough to be easily handled. Throttling governor regulates fuel supply, and keeps the engine running at a uniform speed. They are primarily a Kerosene burning engine, but will operate on gasoline with equal satisfaction, developing the same horse power and utilizing a like amount of fuel.

Economical in operation, easy to start, no multiplicity of complicated parts or fittings. All parts easily accessible for inspection and repair. Every part uniform and interchangeable. Each engine thoroughly tested and shipped complete ready to run.

Pump strokes per minute	35
Length stroke, ins	5, 7½, 10
Shipping wt, lbs	375
Each	$243 00

Crated

Note—If pump is ordered with engine, specify depth of well and height to which water is to be lifted above pump, in order that we may determine size of cylinder required.

The farm pumping engine has an automatic oiling system for the piston. All bearings are lubricated with hard oil.

Speed of the main shaft is adjustable from 500 to 600 revolutions per minute. Speed of the jack shaft is 31 to 35 strokes per minute.

The governor is on the inside of the fly-wheel and the fly-wheel is extra heavy turned and then carefully balanced.

Ignition is by dry cells working through a high grade vibrating spark coil and regular automobile spark plug. Magneto equipment can be furnished if desired.

All gears except the two operating the pump rod are machine cut and mesh perfectly and are enclosed in the crank case. The stroke of the pump can be 5, 7½ or 10 inches.

The pump can be used in winter or summer out of doors. The engine is air cooled and cannot freeze.

Manufacturers Guarantee.

1st. To be free from defective material and workmanship, and will replace at their factory, any parts proving defective within five years from date of purchase.

2nd. To pump water from a well of any depth which a windmill pump will handle.

3rd. To run any machine which is sold by its makers as a hand power machine.

4th. To run successfully if given reasonable care, kept properly lubricated and supplied with good, clean gasoline.

5th. To run smoothly, to start easily on the coldest days of winter and if kept properly oiled, to run continuously without overheating on the hottest days of summer.

6th. If the engine fails to fulfill the above guarantees, it will be replaced with a new one or money refunded.

7th. It is distinctly understood that under this guarantee they are not responsible for the successful operation of the engine if the instructions (furnished with the engine) are not followed, or for injury due to accidents, carelessness or abuse.

♦F. O. B. Michigan Factory Only.

FARM PUMP ENGINES
FULLER & JOHNSON

Pumping Capacity. The farm pump engine will pump any ordinary well as follows: Total head and corresponding size and capacity of pump cylinders at 35, 5 inch strokes per minute.

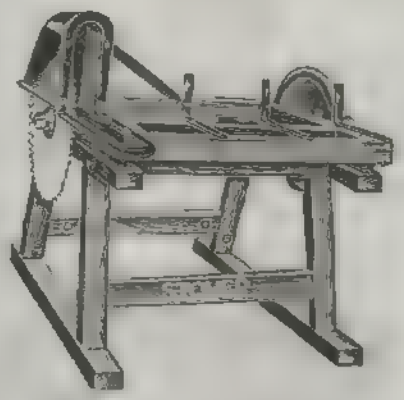
Total lift of water, Ft	Diam of Cylinder Ins	Water delivered, Gal. Per Hour
500	1⅝	65
400	1¾	95
275	2¼	170
200	2¾	240
175	3	290
125	3½	400
100	4	550
65	5	800
45	6	1150

If the water in the well is not as far from the surface or is not to be raised as high, so that the total lift is less than given in table, a stroke longer than 5 in. may be used, and the amount of water will be correspondingly increased, provided the work done is within the capacity of the engine. For example, if the cylinder used is 4 inch diameter and the total lift only 50 ft., the 10 inch stroke may be used and the capacity would be increased to 1100 gallon per hour.

Pulleys. If pulley is desired, give size and specify whether flat or crown face is wanted

Flat belt pulley for intermediate or slow speed shaft, ins.	These pulleys fit on in place of the cap on crank side of flywheel	
	Flat belt pulley, ins	Round belt pulley, Diam, ins
3x2¼	3x3	2
4x2¼	4x3	4
5x2¼	5x3	6
6x2¼	6x3	8
	7x3	

WOOD SAWING MACHINES
STOVER



Wood Frame with Sliding Table.

Seasoned hardwood frame, mortised, bolted and braced. The saw arbor or shaft is a piece of lathe turned steel 4 ft. 4 in. long and 1⅝ inches diameter. It is turned down to 1⅜ inches for the saw blade, and to 1 7/16 inches for the balance wheel, pulley and boxes. Boxes are swivel type, well babbitted, dust proof, non-heating, self- adjusting to compensate for wear or shrinkage, and have large oil chambers.

The table has anti-friction iron rollers on the under side, which permit it to slide easily and with minimum friction over a metal track that is bolted to the frame. A roller at one end of the table is a great help in handling long poles. Frame equipped with a saw guard. Each

No. 7—Without blade; takes blades from 20 to 30 ins in diam; pulley 5x6 ins; speed 1000 to 1500 R. P. M.; power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft 6 ins. ♦$85 05

Shipping wt each 351 lbs.

Note—For circular saw blades see Dept. 1.

Moon brings out new four-door sedan at $1595

A new five-passenger four-door sedan at $1595 f. o. b. St. Louis has just been announced by the Moon Motor Car Co. The body of the new Moon four door Standard sedan is mounted on a regular Series A long wheelbase chassis, has four large doors and is finished in two tone Duco—dark blue below the belt with light blue above. The equipment of the new four-door Standard sedan includes four-wheel hydraulic brakes, new patented steering gear, especially designed for use with balloon tires which are standard on this car, vertical one-piece windshield sun visor integral with top, dome light and a new headlamp control lever mounted on top of the steering wheel column. The upholstery is done in haze blue corduroy, the floor being fully carpeted.

Flint Producing New Series

Flint Motor Co. is now in production on its new series B-forty models, and has added a sedan model to this line priced at $1580. The price on the improved touring car is $1285 and the brougham is priced at $1620.

New Reo Sedan at $1645

Reo Motor Car Co. is now shipping a new sedan type priced at $1645. The car conforms to the standard 20th Anniversary sedan model announced early in the year but carries additional equipment and refinements.

Overland adds a two-door sedan to 4-cylinder line

Willys-Overland announced the addition of the Standard Sedan at $655 f. o. b. Toledo, to its Overland four-cylinder line. The new body model is a sedan, upholstered in Bedford cloth and finished in blue, with deep beading, its color scheme resembling that of the regular all-steel four-door sedan. Both of the front seats of the new body have hinged backs which make it possible to convert the seat cushions into an emergency bed by removing the front cushions, laying seat backs forward, placing rear cushions on the floor between front and rear seats, and placing front cushion on rear seat.

POCKET COMPASSES

CEEBYNITE

Hunter style white metal case, heavy beveled crystal, jeweled center, aluminum floating dial, "S" and "N" points treated with a permanently luminous compound, which enables direction to be seen at night, dust and water tight.

MOON

Spring Salon of New De Luxe Models

MOON distributors all over the country are holding a special spring salon at their respective salesrooms, May 16-23, inclusive.

Write or wire us as to the nearest place you can see this splendid exhibit. Learn why Moon dealers all over America are broadcasting a new story of motor car satisfaction.

It will also give us an opportunity to explain the quick-profit, quick-turnover plans that make Moon dealership highly profitable on a comparatively small capital.

All Moon cars have 6 cylinders, 4-wheel hydraulic brakes, balloon tires, patented steering gear, Duco finish.

MOON MOTOR CAR COMPANY, St. Louis, U. S. A.

New coach mounted on Jewett Six chassis.

New Jewett Coach

THE Paige-Detroit Motor Car Co. are bringing out a new coach model mounted on their Jewett Six chassis to sell at $55 more than open car prices. Unusual roominess has been the aim of the design, this body being of the same size as the sedan. Ample accommodations are allowed for five occupants with extra space for the carrying of packages in the tonneau. There are only two doors but they are 36 in. in width the layout of the front seats permitting rear seat passengers to leave or enter while the front seats are occupied. Large windows are to be found in the front and rear and the external appearance of the car is enhanced by a belt moulding and round upper corners on the rear. Cobalt blue Duco finish is used and is applied over a baked-on primer coat. Harmonizing with the color scheme of the car is a new blue-gray shade of upholstery material which is claimed to combine beauty and durability. All body joints are screwed as well as mortised and glued, this precaution making for body permanency and in addition every point where exposure might cause decay the wood has been painted with a water-proofing solution. The price has been set at $1260 f.o.b. Detroit, tax extra.

Refinements in Paige Brougham

Only minor changes have been made in the new five passenger Paige Brougham, the body following quite closely the original design introduced a little over a year ago. Rear quarter window of the reversed D type are used in place of the oval style formerly used. Zapon grey finish with black trimmings is now standard, this finish offering advantages of greater durability and permanency. An arm rest and a tassel to assist in entering and leaving the rear compartment are refining touches that have been incorporated. Other items of equipment that are included are four balloon cord tires, trunk, heater, snubbers, windshield wiper, dash gasoline gauge, all at $2195 f.o.b. Detroit, tax extra. Hydraulic four wheel brakes are optional at added cost. Mechanical refinements of the 1925 Paige were described previously in Automobile Trade Journal.

New Star Coupster

Durant Motors, Inc., Long Island City, N. Y., are bringing out a new closed model, mounted on the Star chassis, to be known as the "Coupster," which will list at $625 f.o.b. factory. It possesses many of the refinements of the advanced type of closed car, such as permanent top, glass rear window, clear vision, one-piece glass windshield, wide generously-upholstered seats, covered with durable gray Spanish artificial leather, enough leg room for tall men, side and ceiling in a good quality of gray cloth, flexible transparent door windows, instantly adjustable like a Pullman car curtain, that disappear within the top of the car when raised. A cowl ventilator provides fresh air without exposure to the weather. The lower portion of the body is finished in blue lacquer with a white stripe, upper portion in grained artificial leather. The radiator shell is nickeled.

FOOT BALL GOODS

HEAD HARNESS

Made of the finest grain leather, lined with best white felt; extra strong, well ventilated. Made extra long in back and affords a thorough protection for the base of the brain and is the best protection for the head now on the market. Adjustable to fit any size head. Endorsed by the leading universities and colleges.

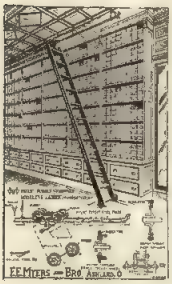
STORE LADDERS

*MYERS CUSHION TIRE LADDERS

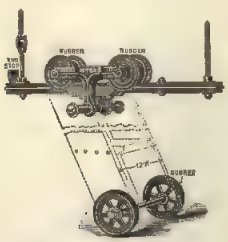


Directions for Fitting Store Ladder

Give the exact height of the ceiling and the length of each track, and all the fitting will be done at the factory. If the height of the ceiling varies, give the height of the ceiling at each end and center of each run of track.

Cut illustrates a view of the Myers Cushion Tire store ladder, showing the track, hanging hook, end stop, upper and lower trolleys all complete, mounted ready for use.

The ladder is constructed of the best clear Georgia pine, nicely finished and varnished, showing the natural wood. Has open panel sides, 5 inches wide, steps have 5½ inch tread. Have malleable iron dowel tee under each step. Ladder is 12 inches wide over all.



Showing Trolley Track and Floor Travelers

The trolley is self adjusting, fitted with turned steel bearings and a 3 inch anti-rattle wheel, turned and bored on lathe and fitted with special rubber tires.

The track is double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble and without any bridging or blocking

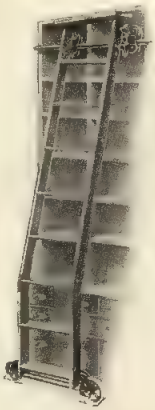
The floor travelers are 5 inches in diameter, composed of metal sides with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle.

Ladder and Trolley—Complete .....Each $29.00
Track—Complete, with hangers.....Per foot .40

*Not carried in stock; will ship from factory.

STORE LADDERS

*RELIABLE BENT SIDE LADDERS



This ladder is intended for use where projection of the base shelf is too great for a straight ladder.

The top fixture is self-adjusting with a perfect bearing on the track, allowing the ladder to roll easily whether perpendicular or at an angle, to pass over uneven places in the floor and to be placed close to the shelving when not in use, taking up practically no floor space. The two large floor wheels are rubber tired, making the ladder perfectly noiseless and easy running.

Track is regularly furnished in four, six, eight and ten foot lengths.

With this track the brackets are regularly furnished for three foot spacing

The ladder is made of oak and is furnished complete with fixtures but not with track.

No. 85—Ladders ..Each $50.00
No. 1L—Track ..Per foot .25

Note—Above price is for ladders up to 10 feet; if distance from floor to track exceeds 10 feet, add to price for each foot or fraction of a foot $1 50 per foot.

HOG RINGERS AND RINGS

WOLVERINE RINGERS

Japanned cast iron, wrought iron rivet at joint. For Wolverine rings Nos. W1 and W2.

	Per Doz
No. 10—Length 7¾ ins	$5 85

Half doz in cardboard box; wt per doz 9 lbs.

WOLVERINE RINGS

Stamped from sheet steel, coppered.

	Per Doz Boxes
No. W1 For pigs	$6 75
No. W2—For hogs	6 75

One hundred in cardboard box, one doz boxes in package.

BLAIRS RINGERS

Japanned cast iron, closes all Blair rings.

	Per Doz
No. 58 Length 7 ins	$6 00

Half doz in cardboard box, wt per box 3 lbs.

BLAIRS RINGS

Coppered soft steel wire; circular shape when closed.

	Per Doz Boxes
No. 81 Pig Rings 100 in box	$3 45
No. 28 Hog Rings 100 in box	3 45

One doz boxes in pkg; wt about 8 lbs.

STEWART RINGERS

Malleable iron, reinforced at all points and so designed that it is easy to grip when inserting rings. The adjusting screw is equipped with a lock nut which enables the user to lock the screw after it is properly adjusted.

	Per Doz
No. 57—Length 7¼ ins	$7 20

One doz in cardboard box; wt per doz 7½ lbs.

STEWART RINGS

Standard.

Coppered steel wire triangular shape when closed. On the front of the ring is welded at right angles a piece of same size wire which is of sufficient length to cover the snout. When the animal lifts on a wire it slides down the snout and engages the cross piece, or in rooting comes in contact with the ground, which causes temporary pain.

	Per Doz Boxes
No. S1—Pig Rings 24 in box	$6 30
No. S2—Shoat Rings 20 in box	6 30
No. S3—Hog Rings 12 in box	6 30

One doz boxes in pkg; wt per doz 3 lbs.

Special.

This ring differs from the standard ring in having the bar bent outward and standing parallel to the ground in place of horizontally when attached in the snout. The only device that will successfully stop hogs from catching chickens.

	Per Doz Boxes
No. S4—Hog Rings 12 in box	$22 50

Three doz boxes in shipping case; wt per doz 5 lbs.

ANTI-ROOTERS

NEW IDEAL

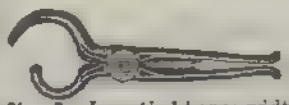
Blades are of oil tempered steel, with copper base or anvil to cut on; aluminum finish.

Does not injure the nerves of the snout or rooter.

	Per Doz
No. 1—Length 12 ins	$33 00

One in cardboard box; wt per doz 2¼ lbs.

HOG TONGS



HILL'S PATTERN

Malleable iron, japanned and painted; suitable for all size hogs

	Per Doz
No. 2—Length 14 ins; width between jaws 3 ins	$12 75

Half doz in cardboard box; wt per doz 16 lbs.

PIG FORCEPS

PRATT'S

Made of best quality steel, nickel plated and polished. Simple in construction and perfect in operation; will not slip or injure the sow.

	Per Doz
No. 10—Length 14 ins	$38 25

One in cardboard box; wt per doz 8 lbs.

MEDICATED SALT BRICK

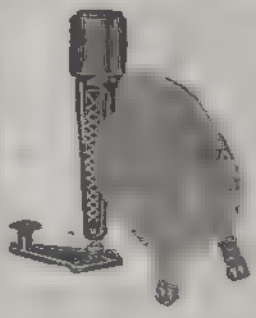
DR. BLACKMAN'S

Live stock conditioner and tonic.

	Per Doz
No. 58MSB Size 25/8x35/8x7 ins	$6 60

One doz in fibre board container; wt per doz 35 lbs

HOG OILERS



NATIONAL AUTOMATIC

Answers the purpose of a dipping tank. Distributes the oil on the belly and in the armpits as well as on the backs of large and small hogs. Built entirely of solid cast iron.

	Each
No. NS Oil capacity 1½ gallon; height over all 35 ins	+$29 25

Crated; shipping wt each 50 lbs.

BULL RINGS

THE NEW IDEAL

Polished copper, self piercing; it is not necessary to make or pierce a hole in the animal's nose before inserting the ring, but is only necessary to back small screw out until it is clear of the lower half of the ring, open the ring up and insert in the animal's nose.

	Per Doz
No. 10—Diam of bowl 2½ ins	$10 20

Half doz in cardboard box; wt per doz 2¾ lbs.

STANDARD

Polished copper; 5/16 inch metal, with set screw joint, fastener and steel wire screw driver.

No.	4	5	6
Diam, ins	2	2½	3
Wt per doz, lbs	1¾	2¼	2½
Per Doz	$6 75	8 40	9 45

One doz in cardboard box.

+F. O. B. Indiana Factory Only.

BULL RINGS

ALUMINUM

Light and strong; 5/16 inch metal, with set screw joint, fastener and wire screw driver.

	Per Doz

A Quality Christmas Leader
that looks like twice its price

$1.75

Two Dollars West of the Mississippi

NEVA-LOST
LOCKING RADIATOR CAP

The price surprises 'em always—*such* quality at $1.75 makes it a real feature for holiday sale.

Shoppers see at a glance that it is handsomer than caps that cost much more.

Easy to open and close—no fooling with snaps or latches. The husky bayonet fastening is built *inside*, and the hinge is husky too.

A quality cap at a *minus-price*—a wonderful item for Christmas.

How the Neva-Lost looks when opened. Note simplicity of its construction.

Made for Universal size Moto-Meter. No charge for adapters to use with Midget size.

Ask your jobber's salesman—or one of the following representatives:

WELKER-HOOPS MFG. CO., Middletown, Connecticut

Manufactured by the Makers of Neva-Lost Gas Tank Cap

$1.75

NEVA-LOST

LOCKING RADIATOR CAP

Quality built for quantity sale. That tells the story of the new Neva-Lost radiator cap. Never has there been so beautiful a radiator cap at anywhere near the low price of Neva-Lost.

It locks the Moto-Meter and locks itself against the cleverest thief. Can't be stolen or even loosened when once in place.

A quarter turn and it opens on its husky hinge. Close it and a quarter turn locks it tight and leak-proof.

Made for the Universal size Moto-Meter. Adapters for Midget size furnished without charge.

Ask your jobber's salesman for details. Ask him about the handsome display stand, too. It's free.

New Gardner 8 cylinder sedan

Gardner 8 Cylinder Sedan in Production

GARDNER MOTOR CO., INC., of St. Louis, are now in production on a sedan model of the new eight-in-line series, on which shipments are going forward regularly to all dealers. The new sedan is mounted on the regular eight cylinder chassis which has a wheelbase length of 125 in. carried by a 7 in. frame with 6 cross members.

The interior is equipped with silver finished vanity case set, corner and dome lights with satin finished mountings, cigarette holder, match case and ash tray. Arm rests are furnished for the rear compartment passengers as are satin window curtains. All doors carry rotary locks and all windows are furnished with rotary lifts. Mohair upholstering and trimmings are utilized throughout the interior. The one piece ventilating windshield is operated by rotary lifts and additional ventilation is provided by a flush type cowl ventilator. Head lamps are equipped with indirect non-glare lenses and the body finish is two tone Duco.

Standard equipment includes 30 x 5.77 balloon tires, shock absorbers front and rear, four wheel brakes, five Disteel wheels, bumpers front and rear, extra tire tube and cover. An automatic windshield wiper and a rear vision mirror are also furnished as regular equipment for this model.

Fords Now Have Quick Detachable Linings

All model T Ford cars coming through to dealers are now equipped with new style transmission bands. These new bands have quick detachable ends and are made in two pieces. Replacement of transmission band linings is now accomplished without removing the transmission case, as the detachable end permits withdrawal of the band assembly after the case cover is removed.

Hudson and Essex new coaches have increased visibility

Improvements to give better vision for driving have been made on the Hudson and Essex coaches by the use of narrower front window posts which are now made of steel instead of wood. Photograph shows improved Hudson coach.

VIOLET RAY MACHINES "Also Dept. 8."

A Marvelous Achievement in Health Building.

There is practically no ailment that will not respond to the healing influences of Violet Ray.

These machines are used, approved and recommended by Physicians, Osteopaths, Beauty Specialists and Scientists everywhere.

BLEADON DUN

A specially constructed Tesla coil is contained in a handle composed of highly polished insulated hard rubber, and is shock proof, the magnet coil adjustment is mounted in an imitation leather covered case, size 10x5½x3 inches. Complete with 7 feet of flexible cord and attachment plug; 6 feet of heavy insulated spark proof cord to handle

No.	VR-110BA
Voltage	110
1 to 11, Each	$25 30
12 or more, Each	24 30

One in carton; wt each 3 lbs.

MARVEL

One piece Violet Ray instrument. Simple in construction, easily operated. Equipped with a special applicator, 7 feet of heavy insulated cord to handle that enables treatments to be made at home. Each outfit packed in a handsome imitation leather case.

		Each
No. MVR-110—110 volts	19 20	$8 50

One in carton; wt each 2½ lbs.

ELECTRIC VIBRATORS "Also Dept. 8."

STAR

Nickel plated motor, with black enameled wood handle.

Outfit consists of one vibrator with 6 foot cord and attachment plug and three applicators:—vacuum cup applicator, made of finest rubber; comb applicator, made of high grade rubber and hard ball applicator. Alternating current.

No.	S-110-AC
Volts	110
1 to 11, Each	10 50
12 to 24, Each	10 05

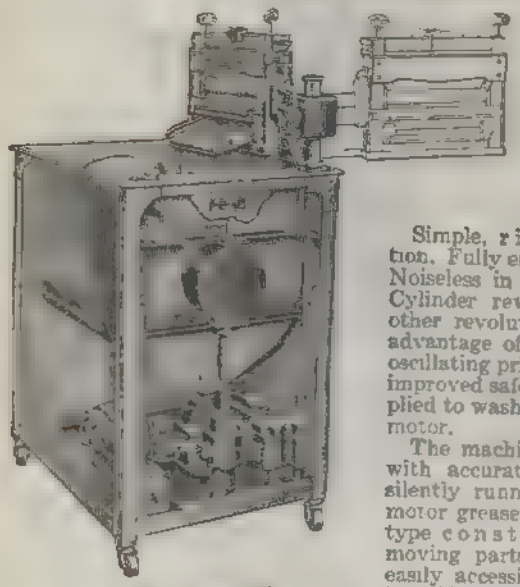
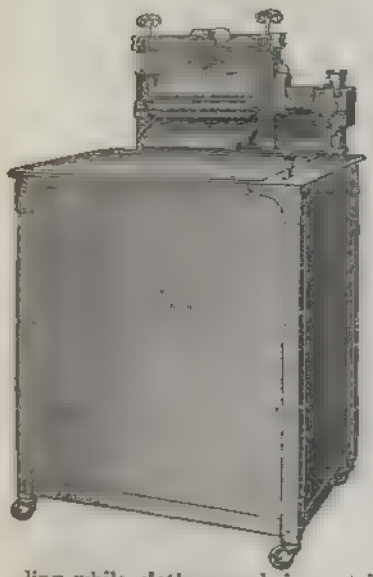
WASHING MACHINES "See Dept. 6."

UNIVERSAL, ELECTRIC





Simple, rigid construction. Fully enclosed cabinet. Noiseless in operation. Cylinder reverses every other revolution combining advantage of revolving and oscillating principal. Latest improved safety features applied to washer, wringer and motor.

The machine is equipped with accurately cut gears, silently running in light motor grease. Automobile type construction. All moving parts enclosed but easily accessible by removing side panel attached by screws.

Automatic safety clutch in drive shaft. Should the motor become overloaded due to clogging in the rolls, the patented Universal Safety Clutch will immediately cut off power from cylinder and wringer thus preventing possible injury to motor or mechanism. When overload is relieved by reversing the wringer control the washer will start immediately.

Durable, sanitary zinc cylinder, 18½ inches long and 18 inches in diameter inside. Size and construction of cylinder holes prevent possible injury to most delicate fabric. When not operating cylinder automatically stops at the top and locks in that position thus preventing it from rolling while clothes are being put in or taken out.

Tub, quick draining, easily cleaned, with setting rim. Drain cock outside of cabinet 10 inches from floor has threaded end for attaching hose if desired.

8 x 8 sheet capacity. Handsome blue gray finish. Detachable swinging wringer. Table top cover easily removed. All electric connections thoroughly insulated. Detachable 10 foot cord with rubber connection. Height to top of tub 30½ inches, floor space 24x30 inches.

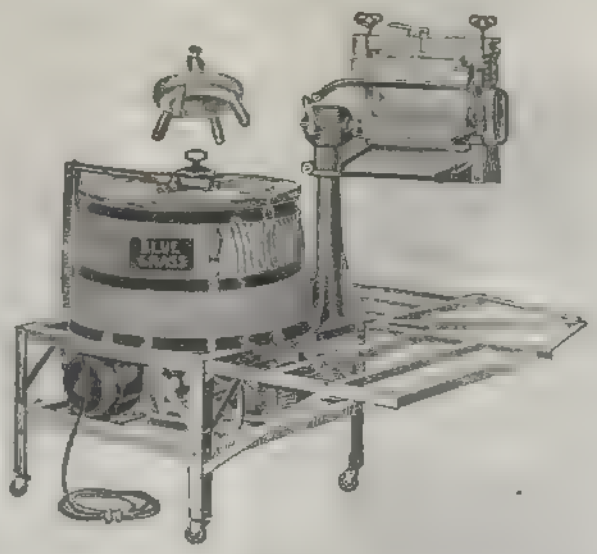
WASHING MACHINES "See Dept. 6."

—BLUE GRASS—ELECTRIC



Dolly Type.

Equipped with accurately cut gears completely enclosed and operating in hard oil which insures smooth running and prevents wearing. Tub equipped with special lid locking device that holds lid in place and prevents wearing and working loose of hinges. Non-leak brass drain cock threaded for hose, drains tub from bottom. All power mechanism is under the frame and out of the way.

Frame of high grade angle steel reinforced and braced on all corners with all sections securely riveted together, aluminum finish. Mounted on easy rolling steel casters. The steel extensions for holding three tubs are hinged to the side of main frame and provides substantial support for the tubs. When not in use they are folded down close against the frame.

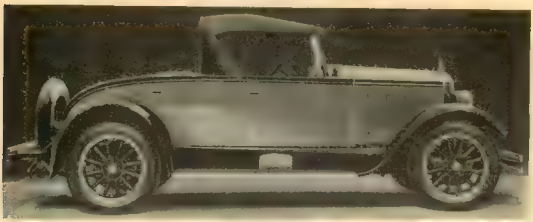
Improved splash-proof motor, specially designed and with excess power to more than take care of heavy load on both washer and wringer. Equipped with improved adjustment for tightening or loosening belt by turning adjusting knob.

Ball-bearing swinging type wringer with special 12 inch power electric rolls made of highest quality rubber. Equipped with shifting lever that starts, stops and reverses rolls with perfect ease, regardless of load. Special lever permits swinging and locking of wringer in any desired position. Mounted on supporting post securely bolted to angle steel frame and entirely independent of tub, eliminating any strain on the tub. Floor space with extension closed 28x29 ins; height over all 47 inches. Furnished with 10 foot extra heavy insulated cord and attachment plug.

Alternating Current, 60 Cycle, 110 volts.

	Each
No. BG34—Wood tub, selected southern cypress	$216 00
No. BG70—Copper tub, tinned inside	240 00

Crated; ship wt 300 lbs.



Velie four-passenger sport roadster

New Velie Sport Roadster

The Velie Motors Corp., of Moline, Ill., has just announced a new four-passenger sport roadster that has several interesting and unusual features. These relate particularly to the rear-deck dickie seat arrangement that provides accommodations for two additional passengers. An extra door at the side of the car permits easy entrance to the rear compartment—an improvement over the step plates heretofore common to cars with rear-deck compartments, as it eliminates climbing over the rear fender. The provision of a top over the rear-deck seat that may be folded out of sight when not in use constitutes an interesting departure.

Choice of two body colors is offered, both light tan or gray finish with upholstery in green Spanish leather being available. A detailed check-up of the new model's equipment discloses the fact that, in addition to possessing such features as hydraulic four-wheel brakes and balloon tires, that many supplementary features are to be found, including a cigar lighter, clock, dash gasoline gauge, automatic windshield cleaner and scuff plates. It has, besides, all of the more common accessories, such as bumpers, front and rear, motometer, stop light and cowl lights. The price is $1650 f.o.b. Moline, Ill.

Two new Moon sedan models.

Above are shown the new Moon four-door sedan listing at $1785 factory, finished in two-tone green and the two-door sedan at $1695 factory, done in marine blue and gray.

NILCO
NILCO LAMPS
make light of darkness
Nice house — but not so inviting
as it is over here with better lighting
Do you need more light at home?
LAMPS WILL HELP

$1.00

The window display above is the current trim of our Window Display Service which is sold to Nilco Dealers for one dollar. Each trim costs more than twice that much.

The Quality of Nilco Lamps

has been their outstanding feature for so many years (and still is) that we may neglect to tell our dealers about our plans to help sell them

The Merchandising Helps pictured here are all backed by the same "best or nothing" policy and the same careful attention to detail that stands behind the lamps themselves.

$10.00

The Counter Lamp Display stand, with individual switches and test sockets, sells for ten dollars, which pays for years of service from this talented salesman.

The Price and Data Book, the Price Folder and the "House You Live In" folder are imprinted with the dealer's name and furnished free to whoever can use them

NORIDAS

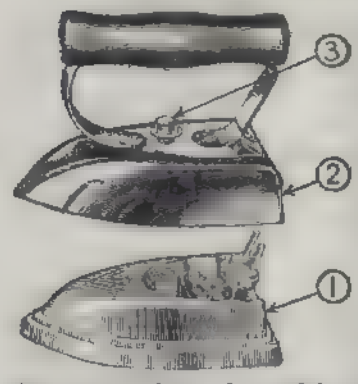
Cast iron base, stamped steel top, nickel plated and polished; nickeled handle bracket; ebonized wood handle; heat-proof stand. Complete with 6 feet of cord and attachment plug. Size face 6⅝x3⅛ inches; weight each 6 lbs.

Voltage 110 (can be used on any voltage from 105 to 115); operates on A. C. or D. C. current.

No.	NI
Less than full case, Each	$8 55
Full case of 24, Each	8 25

One in cardboard box, 24 in case, wt per case 144 lbs.

DOMANCO



Polished bright base, other exposed parts nickel plated. Top section consists of heavy sheet steel hood, formed to prevent radiation of heat from interior of iron, to which are attached the round steel handle supports. The handle of black enameled wood, is held firmly between the supports. A heat reservoir of solid iron is bolted to the heating element, and extends into the space formed by the hood. The contact posts are rigidly attached to this plate. Rounded ironing face. Heating element consists of special resistance wire imbedded in composition which is a perfect electric insulator, and readily conducts heat, prevents overheating of wire, protects wire from oxidation and saves current.

Complete with 6 feet of insulated cord and attachment plug and one two deck steel stand; has detachable plug.

Voltage 110 (can be used on any voltage from 105 to 115); operates on A. C. or D. C.; size face 8⅝x6¼ ins; wt each 6 lbs.

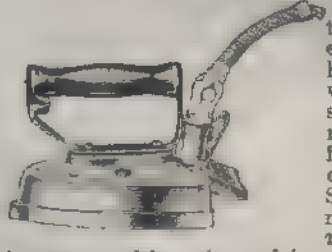
HOTPOINT, AUTOMATIC



Cast iron face, pressed steel tape, nickel plated and polished; nickel plated stamped steel handle frame with ebonized wood handle and thum rest. A sturdy anchor securely and hermetically sealed in a special fusible alloy, embeded in the center of the iron bottom. Should iron overheat, the alloy melts, allowing anchor to move, releasing a simple double pole, long gap, quick make and break switch with silver contacts. In a few moments after switch operates the alloy soldifies, securely holding anchor in place.

	Each
No. 115F25—Voltage 110 (can be used on any voltage from 105 to 115); wattage 575; operates on A. C. or D. C current; wt each 6 lbs	21 00
	$8 35

One in carton; three in std pkg.

ELECTRIC IRONS "Also Dept. 5."

HOTPOINT

Cast iron face, pressed steel top, nickel plated and polished; nickel plated stamped steel handle frame, with ebonized wood handle.

Heating element is in two sections arranged V shape on the sole-plate. The sections meet at the point of the iron, thus supplying most heat where most needed. The heating element is clamped between the heavy cast sole-plate and pressure plate, insuring excellent heat-retention.

The 5 and 6 pound irons are equipped with the hotpoint hinged plug cord protector and thumb rest. The new plug prevents troublesome cord breakage, remains always cool, and is easily removable. The thumb rest is an additional convenience. It rests the wrist and makes ironing easier. Complete with cord and attachment plug. Operates on A. C. or D. C. current.

CORD SUPPORTS FOR ELECTRIC IRONS

Iron base, black enameled. Equipped with strong steel spring for clamping to ironboard or table; steel clamp for holding cord. Flexible and adjustable up or down.

Per Doz

No. H-50—Height 11 ins; height over all 19 ins. $13 50

One in cardboard box; wt per doz 15 lbs.

ELECTRIC IRONS "Also Dept. 5."

NORIDAS

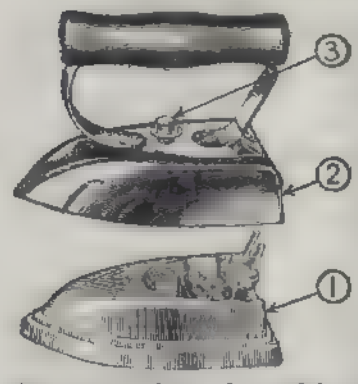
Cast iron base, stamped steel top, nickel plated and polished; nickeled handle bracket; ebonized wood handle; heat-proof stand. Complete with 6 feet of cord and attachment plug. Size face 6⅝x3⅛ inches; weight each 6 lbs.

Voltage 110 (can be used on any voltage from 105 to 115); operates on A. C. or D. C. current.

No.	NI
Less than full case, Each	$8 55
Full case of 24, Each	8 25

One in cardboard box, 24 in case, wt per case 144 lbs.

DOMANCO



Polished bright base, other exposed parts nickel plated. Top section consists of heavy sheet steel hood, formed to prevent radiation of heat from interior of iron, to which are attached the round steel handle supports. The handle of black enameled wood, is held firmly between the supports. A heat reservoir of solid iron is bolted to the heating element, and extends into the space formed by the hood. The contact posts are rigidly attached to this plate. Rounded ironing face. Heating element consists of special resistance wire imbedded in composition which is a perfect electric insulator, and readily conducts heat, prevents overheating of wire, protects wire from oxidation and saves current.

Complete with 6 feet of insulated cord and attachment plug and one two deck steel stand; has detachable plug.

Voltage 110 (can be used on any voltage from 105 to 115); operates on A. C. or D. C.; size face 8⅝x6¼ ins; wt each 6 lbs.

No.	5
Less than 5, Each	10 50

One in cardboard box.

DOMANCO, TOURIST

(In use as Grill)

Cast iron base; stamped steel top, nickel plated and polished; nickel plated stamped steel handle frame with removable, ebonized wood handle securely bolted to frame. Especially designed so that it may be converted from an electric iron into an electric grill by removing handle and using stand as illustrated. Complete with stand, 6 feet of cord and separable attachment plug.

	Each
No. 3½—Voltage 110 (can be used on any Voltage from 105 to 115); operates on A. C. or D. C.; size face 3½ x5¹¹/₁₆ ins; wt each 3½ lbs	$10 80

One in carton.

ELECTRIC IRONS "Also Dept. 5."

EDISON

Family Iron.

Cast iron face, pressed steel top, nickel plated and polished; nickel plated stamped steel handle bow and heel rest; ebonized wood handle. Complete with 6 feet of cord and attachment plugs. Size face 6⅝x4 inches.

	Each
No. 215F56—Voltage 110 (can be used on any voltage from 105 to 115); wattage 575; operates on A. C. or D. C. current; wt each 6 lbs	11 55
	$6 00

One in carton; six in standard package.

"UNIVERSAL"

Seamless brass hood and base, nickel plated. Ebonized wood grip. Complete with reversible heat proof spring stand, 6 ft mercerized cord and lamp socket plug. Heater cord furnished with detachable extension cord spring prevents the cord from dragging when in use. Size face 6⅞x4¼ ins.

	Each
No. E909—Voltage 110 (can be used on any voltage from 105 to 115); wattage 580; wt each 6¼ lbs	15 00
	$6 75

One in carton; 6 in stand pkg.

"UNIVERSAL"

Cast iron face and core, highly nickel plated and polished; ebonized wood grip; aluminum finish reversible stand. Complete with 6 feet of insulated cord, with Edison screw socket attachment plug, and patented pull plug. The Ni-chrome heating element is made of ribbon steel wound on mica and is fastened between the face of iron and core. Size face 6½x4 inches.

	Each

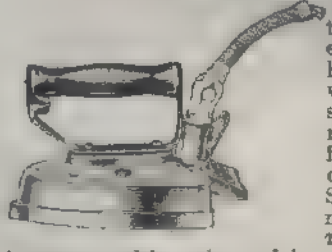
HOTPOINT, AUTOMATIC



Cast iron face, pressed steel tape, nickel plated and polished; nickel plated stamped steel handle frame with ebonized wood handle and thum rest. A sturdy anchor securely and hermetically sealed in a special fusible alloy, embeded in the center of the iron bottom. Should iron overheat, the alloy melts, allowing anchor to move, releasing a simple double pole, long gap, quick make and break switch with silver contacts. In a few moments after switch operates the alloy soldifies, securely holding anchor in place.

	Each
No. 115F25—Voltage 110 (can be used on any voltage from 105 to 115); wattage 575; operates on A. C. or D. C current; wt each 6 lbs	21 00
	$8 35

One in carton; three in std pkg.

ELECTRIC IRONS "Also Dept. 5."

HOTPOINT

Cast iron face, pressed steel top, nickel plated and polished; nickel plated stamped steel handle frame, with ebonized wood handle.

Heating element is in two sections arranged V shape on the sole-plate. The sections meet at the point of the iron, thus supplying most heat where most needed. The heating element is clamped between the heavy cast sole-plate and pressure plate, insuring excellent heat-retention.

The 5 and 6 pound irons are equipped with the hotpoint hinged plug cord protector and thumb rest. The new plug prevents troublesome cord breakage, remains always cool, and is easily removable. The thumb rest is an additional convenience. It rests the wrist and makes ironing easier. Complete with cord and attachment plug. Operates on A. C. or D. C. current.

NORTHEASTER

$7.50

THE Northeaster is a real Magnetic Horn that marks a sweeping advance in horn construction. It is the last word in simplicity and scientific design.

It has a strong, clear note. It is full of punch and persistence without disagreeableness. It has a sure and instant response. And it is built throughout with characteristic North East ruggedness and long life.

Here is a Horn that is bound to win immediate favor regardless of price. Add to this the unbelievably low figure at which it is offered, and there is no limit to the demand that will be created for the Northeaster.

Now is the time. Get in at the start. Full details from any North East Service Station or Branch.

A Real Magnetic Horn at a *Low* Price

The good will which the Oakland Six is winning and holding finds significant reflection in the success and loyalty of Oakland dealers everywhere.

THE SATURDAY EVENING POST
The confidence with which buyers purchase the Oakland Six is richly rewarded. The car's outstanding performance, stamina and economy go far beyond every expectation and explain why the Oakland Six is winning and holding the good will of all who buy it.

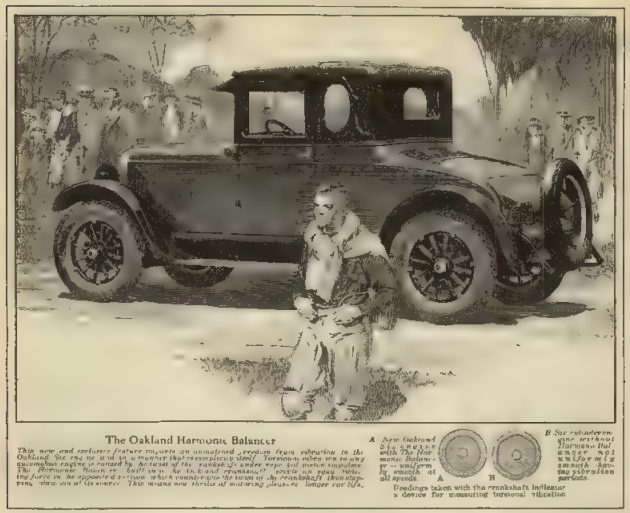
PRODUCT OF GENERAL MOTORS

Oakland Motor Car Company, Pontiac, Michigan

OAKLAND SIX

PRODUCT OF GENERAL MOTORS



The Oakland Harmonic Balancer

This new and exclusive feature reports an unbalanced speed-up from vibration in the Oakland Six engine in a manner that is simplicity itself. Torsional vibration in any six-cylinder engine is caused by the twist of the crankshaft under every full motion impulse. The farther back from the flywheel a cylinder is, the greater the twist of the crankshaft from this force. In the opposite end of a cylinder which is farthest from the flywheel, this twist is greatest and causes an uneven, jerky motion at high speeds. The Oakland Harmonic Balancer is placed on the front end of the crankshaft where the twist is greatest and counteracts this vibration. This results in smooth, even running at all speeds. This new thrill of motoring pleases — longer car life.

A. Six Oakland engine without Harmonic Balancer — uneven, jerky motion at high speeds.

H

B. Six Oakland engine with Harmonic Balancer — smooth, even running at all speeds.

Readings taken with the crankshaft indicator a device for measuring torsional vibration

The overwhelming demand for the new Oakland Six emphasizes one of the outstanding advantages of the Oakland franchise—The Oakland line *moves rapidly,* permitting Oakland Dealers to turn their capital frequently and reap correspondingly larger profits.

WINNING AND HOLDING GOOD WILL

OAKLAND SIX

PRODUCT OF GENERAL MOTORS

Motor car dealers often experience loss in money, and good will besides, by being compelled to correct shortcomings in new cars. Oakland spares its dealers all such expense and loss by taking time to build each car right.

THE SATURDAY EVENING POST
The power, smoothness and stamina of the Oakland six-cylinder L-head engine disclose advanced engineering achievements which reveal in large measure why the car is winning and holding the good will of all who buy it.

Heavy Duty Side Crank Automatic Engine

Ohio Frame Type

As indicated by the illustration and table below, this engine is of the medium speed, heavy duty class with single automatic cut off valve.

The frame is well proportioned, pleasing in appearance, strong and rigid under severe strains. The cross head guides and main bearing are cast as part of the frame. The guides are circular and are bored at the same time that the frame is turned to receive the cylinder, thus assuring perfect alignment between piston and cross head

The governor is of the well known Rites Inertia type and is of latest improved design and is the most efficient and sensitive regulating device ever applied to a steam engine.

There is also furnished a sheet steel oil shield of neat appearance which protects the floor and allows the oil to be caught, filtered and used again. The entire system of lubrication is very simple and efficient.

Every engine before leaving the shop is tested under steam, with brake, indicator and hometer, so that all parts are properly adjusted, valves properly set and speed determined under extreme conditions These tests are more severe than is likely to occur in practice. The engine is placed in first class running order before it leaves the testing room.

3, 4, 5 and 6-inch shaft engines have angle bearing.
7, 8 and 9-inch shaft engines have quarter box bearing.
Quarter box bearings can be furnished on 4, 5 and 6-inch shaft engines, if desired, at an additional cost.
Note.—All engines good for 150 pounds working pressure.

Standard Fittings

With each heavy duty automatic engine we furnish elbow throttle valve, sight feed oil cups, sight feed cylinder lubricator, centrifugal oiler for crank pin, safety cylinder drain valves and pipe, oil shield for crank disc, three drop forged wrenches, blue print setting plan.

Extras. Steam and exhaust pipe and fittings, foundation bolts, plates and templates, piston and valve rod packing.

Full Length Tube Vertical Tubular Boilers

These boilers are made of open hearth flange steel plate, having a tensile strength of 60,000 pounds per square inch of section.

All sizes above 20 inches are well braced by means of stay bolts, and all boilers 30 inches and upward in diameter have their vertical seams double riveted. From No. 1 to No. 10, inclusive, the shells are made of a single sheet.

Boilers 20 to 30 inches in diameter have two, and the larger sizes three hand holes around the water leg, and the same number above the crown sheet. In boilers 20 inches in diameter the water space around the firebox is 1½ inches wide, in the 24-inch diameter 2 inches, and in all other sizes 2½ inches wide.

The fixtures comprise base, grate, hood, steam gauge, glass water gauge, gauge cocks, either pop or lever safety valve, blow-off valve, check and stop valve.

FLOOD LIGHTS

OSTRANDER

NOS. 900 AND 901

Equipped with universal bracket. Allows adjustment to wall, ceiling or floor Furnished with one clear glass and five colored screens—red, blue, green, yellow and amber.

No.	Size	Std. pkg.	Wt. std. pkg.	Each
900	8 in.	8	40 lbs.	$ 8.50
901	10 in.	8	50 lbs.	12.50

COLOR CAPS

Made of natural colored glass in ruby, green, amber, blue, purple and opal—they snap on the lamp. Colors may be assorted in making up standard package.

Style "A"

Specify—With every order: Size of bulb and style "A" or "B".
S-14 fits 1¾-inch diameter bulb, 2½, 5, 7½ and 10-watt (sign type).
S-17 fits 2⅛-inch diameter bulb, 15 and 25-watt lamps.
S-19 fits 2⅝-inch diameter bulb, 40 and 50-watt lamps.
S-30 fits 200-watt nitrogen bulb. Made only in Style A, Opal.

	Style "A"				Style "B"		
Nos	AS 14	AS 17	AS 19	AS 30	BS 14	BS 17	BS 19
Each ...	$0.19	$0.43	$0.46	$0.48	$0.20	$0.47	$0.50

Style "B"

How to Use Color Caps

Style "A" Caps are usually preferable for large roof signs; permanent displays and channel letters, as they produce the color effect by reflection without "killing" the light. The S-30 is for light diffusion.

Style "A" Color face of letter or design same color as the caps to be used. Use gloss paint.

Style "B" These can be used like colored lamps on any background They are especially adaptable for frequent color changes or where a deep color is required We also recommend them for street decorating, window display, fire exits, elevator signals, stage lighting effects, etc.

DE LUXE

For lighting store windows in color, flood lights and spotlights.

Fits all standard reflectors such as X-ray, Holophane and Pittsburgh. Five colors—Flaming Ruby, Royal Blue, Tree Green, Golden Amber and True Daylight in sizes from 50-watt B to 300-watt C Mazda and P-19 lamp.

Type	Fits following lamps	Std pkg	Each
OS-1	P-19	5	$1.85
S-1	50-150 watt	5	2.00
S-2	200-300-watt	5	2.50
S-3	200-300-watt spot-flood	5	2.50

Each **$20.00**

Popular Priced Wardrobe

Navy Blue Fiber
12 Veneer Hangers

42x24x22½ In.

5A256—Navy blue vulcanized fiber, fiber bound round edges, velvet lined open dome top. Equipped with extension rack with 12 hangers, 5 drawers with nickel plated steel reinforcements and locking device locking all drawers in one operation, also laundry bag and shoe box. Weighs about 95 lbs. Each **$35.00**

Built for Strength

Study this diagram! It shows how "Overland" trunks are built to last through many seasons of service.

Boxes are of selected, thoroughly seasoned basswood and veneer—all first quality stock—and are covered with hard, heavy, tested fiber. We never use soft fiber or substitutes.

"Overland" wardrobe trunks are hand riveted and fitted with snap lock and lever bolts. Heavy brass plated hardware throughout; tastefully lined with fancy cretonne cloth.

All trunks listed here are shipped from factory, F. O. B. New York City.

Large Wardrobe

Heavy Black Fiber
12 Veneer Hangers

45x24x22½ In.

5A260—Black heavy vulcanized fiber, steel reinforced sides, fiber bound round edges, closely nailed, reinforced open dome top. Equipped with nickel plated double sliding wardrobe rack with 12 hangers, 5 drawers with nickel plated steel reinforcements and locking device for all drawers in use operation, also laundry bag, shoe box and dust curtains. Weight about 100 lbs. Each **$42.50**

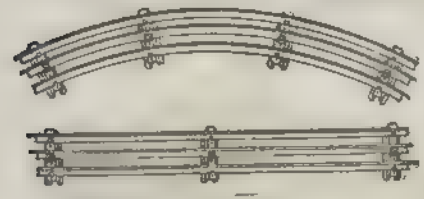
EXTRA PARTS FOR ELECTRIC AND MECHANICAL TRAINS

ELECTRIC



TRACK "O" GAUGE

T3326 OS, straight track, 10¼ ins. long. Section 10

T3327—OC, curved track. 10¼ ins. long. Section 10

SWITCHES WITHOUT ELECTRIC LIGHTS

T3329 — "O" gauge; post lever which throws and sets track; insulated plate; length 11 in., 9 in. wide; one pair in box, right and left. Pair 2.00

WITH ELECTRIC LIGHTS

T3330—Same, but equipped with electric signal light. Pair . . 2.50

CROSS OVER

T3328—"O" gauge, 45 degree cross-over; used in conjunction with switches, for making figure "8" and figure "8" loops; length 11 ins., 5½ ins. wide. Dozen . . . 7.50 Each 65

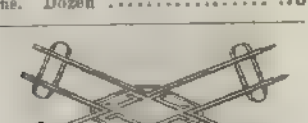
EXTRAORDINARY VALUES

MECHANICAL

TRACK

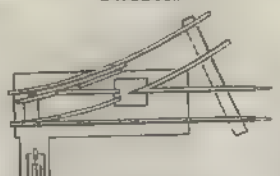
T3241—Straight track units with pins on one end only; length 10¼ ins. Dozen 75

T3242—Curved track units with pins on one end only; length 10¼ ins. Dozen 75



T3243—Cross-over, with pins on two ends only.
Dozen . . 4.25 Each . . .38

SWITCH



T3244—Switch; right and left, with lever throw, pins on one end only.
Pair 79

WARNING SIGNAL

T3415—Cast iron 2¼ x2¼ in. base, with upright and diamond shaped signal, finished in black and white enamel, black lettering on white, height 7 ins.; 1 dozen in box. Dozen 3.75

WARNING SIGNAL With Bell

T3420 Metal base 3¼x3¼ ins., supporting crossing post, warning signals and nickeled key wind bell, attaches to track; when train passes over trip, bell rings, height 7½ ins.; each in box.
Each 78

RAIL ROAD CROSSING

T3414—Black enameled, 2¼x2¼ in cast iron base, with square white enameled post, and two cross arms marked "Railroad Crossing;" reading from both sides, height 7¼ ins.; 1 dozen in box.
Dozen . . 3.75

TELEGRAPH POLES

T3411—All iron; 1¾ in. round base, ¼ x 6 in. pole, two 1¾ in. cross arms, with 4 insulators, nicely finished in colors, height 8½ ins.; 1 dozen in box.
Each 35

T3412—Same, 10 in. pole, two 2½ in. cross arms with 8 insulators; height 10¼ ins.; 1 dozen in box. Each. .87

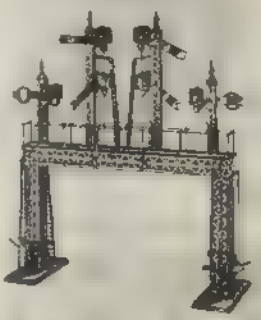
SEMIPHORES

T3424—Round 3 in. black base; 9 inch round white pole; semaphore operated by lever; height 9¾ ins.; 1 dozen in box.
Dozen . . 1.95

SEMIPHORES OIL BURNING

T3251—Oil burning, stamped tin steel; 3 in. round base; lattice upright, with double semaphore arms, operated by rods and weights, brass founts for holding oil, height 13¾ ins.; 1/3 dozen in box.
Dozen 4.50

ELECTRIC



T3422—Two 2¾ x4¼ in. bases, latticed frame supporting bridge and one single arm and one double arm semiphores; electric wired, each arm operating by lever independent; side ladder; nicely finished in black, white and red enamels, width 11¼ ins., height 16 ins.; each in box. Each . 3.00

T3423 Same as T3422 but with 3 single semiphores with lights and one double arm semaphore, without lights; width 16 ins., height 16 ins.; each in box. Each 4.50

ELECTRIC STREET LAMPS

T3396—All metal, black enameled steel, 2 inch round base, clear globe; height 7½ ins.; complete without bulbs; 1 dozen in box. Each . . 70

T3397 all metal 2 inch base, height 6¼ ins.; each in box without bulb. Each . 72

ELECTRIC ARC LAMPS

T3402—All metal 3x3 in base fancy cast column, supporting single 2x3½ in. frosted globe; height 14 ins.; each in box, without bulb. Each 1.25

T3403—Same as T3402 but with double arc lamps, height 14 ins., each in box, without bulb. Each . . 1.50

BUNGALOW

T3488 — Buff stucco finished all metal house, green trim, red roof, electric wired, size 3½x4½ ins., 6 ins. high; each in box. Each 72

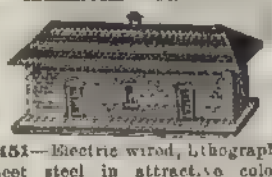
TUNNELS

T3442 Embossed metal base in rock formation, plaster covered and decorated to represent real tunnel; size 10x6 ins.; 7½ ins. high; 1 in box.
Each 72

T3443 — Extra fine wood frame, plaster covered, and an excellent reproduction of a mountain railway tunnel; 10x12 ins., 10 ins. high; each in box. Each 1.25

T3444 Same as T3443, larger; 11x15 ins., 13 ins. high; each in box. Each 2.75

RAILROAD STATIONS



T3451—Electric wired, lithographed sheet steel in attractive colors; with waiting rooms, ticket office, etc.; removable top, all edges turned; 5½x10½ in. 5 in. high; each in box, without bulb.
Each 1.15

T3452 Same as T3451, larger; divided into 3 rooms, with telegraph office; colored glass windows; 6½x14½ in., 7 in. high; each in box, without bulbs. Each . . 2.75

T3453—Same as T3452, larger, 9x20 ins., 8½ in. high; each in box, without bulbs. Each 5.00

WATER TANK

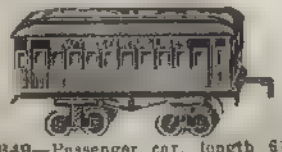
T3440 — Red enameled tank 3x3x3½ ins., mounted on gray enameled angle irons, braced and with ladder; spout; height 8 ins.; each in box.
Dozen 6.50

EXTRA CARS FOR "O" GAUGE TRAINS

SINGLE TRUCKS PASSENGER CAR

T3341 Passenger car, length 6½ ins.; ¼ dozen in box. Dozen 3.75

DOUBLE TRUCKS PASSENGER CAR



T3349—Passenger car, length 6½ ins.; ¼ dozen in box. Dozen 5.50

EXTRA CARS FOR "O" GAUGE TRAINS

OBSERVATION CAR

T3350—Observation car, length 6½ ins.; ¼ dozen in box. Dozen 5.50

BAGGAGE CAR

T3352—Baggage car, length 6½ ins.; ¼ dozen in box. Dozen 5.50

T3352½—Combination baggage car and day coach; length 6½ ins.; ¼ dozen in box. Dozen.....5.50

GONDOLA CAR

T3356—Gondola car; length 6¾ ins.; ¼ dozen in box. Dozen 5.50

COMBINATION CAR

T3330—Combination baggage and day coach; length 8 ins.; each in box. Dozen 8.00

ASSORTED CARS

SINGLE TRUCK

T3342—Assorted 6 kinds.
A—Santa Fe
B—Illinois Central
C—Erie
D—Dutch Cleanser
E—Swift
F—Pennsylvania
length 5¾ ins.; ½ dozen in box, assorted. Dozen 3.75

DOUBLE TRUCK

T3353—Assorted 4 kinds
A—Swift
B—Dutch Cleanser
C—B & O
D—Santa Fe
length 6½ ins.; 1/2 dozen assorted in box. Dozen 5.50

TRANSFORMERS

That embody all the latest improvements; they are designed to be connected to the alternating light circuit for reducing the current to operate all classes of electrical toys. Complete line of Lionel Transformers, page 20.

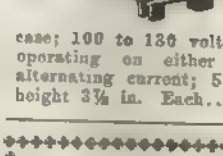
T3462—"Little Jeff"; capacity 50 watts, 100 to 120 volts, 50 to 133 cycles; equipped with regulating switch delivering secondary voltage 5½ to 10½ volts, in one volt steps; black enameled and complete with cord and plug; size 4x3x2¾ ins.; each in carton. Each 1.95

T3465—Capacity 150 watts, 100 to 120 volts, 50 to 133 cycles; regulating switch delivering secondary voltage of 1.2 to 30 volts in 1.2 volt steps; permanent voltages 6, 12, 18 and 24 volts; black enameled; cord and plug; will also operate tree outfits up to thirty-two 14-volt lamps; size 5¾x5½x4¼ ins.; each in carton Each 4.95

T3463—"Midget"; capacity 75 watts, 100 to 120 volts, 50 to 133 cycles; regulating switch delivering secondary voltages 5½ to 22½ volts in one-volt steps; black enameled; cord and plug; size 3¾x3¾x3 ins.; each in carton. Each 2.50

T3464—Capacity 100 to 120 volts, 50 to 133 cycles; regulating switch, delivering secondary voltages 5½ to 23 volts in ¾ volt steps; permanent voltages from 4½, 9 and 13½ volts; black enameled; cord and plug; will also operate tree outfits up to sixteen 14 volt lamps; size 4½x4½x3½ ins.; each in carton. Each 3.85

ELECTRIC MOTORS



T3487—Heavy cast black enameled iron base, 3¾x4 in. full nickel polished case; 100 to 130 volts, 60 cycle, operating on either direct or alternating current; 5 foot cord; height 3¾ in. Each.....3.68

We are offering you this season the best selling Holiday items in all lines and at rock bottom prices — values you can not obtain anywhere else in this country.

WEEDEN STEAM ENGINES

Exact models of the big engines; all the best selling up-to-date numbers; every one guaranteed to be mechanically perfect and to operate.

T4168 — Weeden upright steam engine, blued steel boiler; iron fire box; metal base and engine frame handsomely finished in colors; 2 inch nickel plated balance wheel; good whistle; diameter base 4 ins.; 9½ ins. high. Each in box. Dozen 6.00

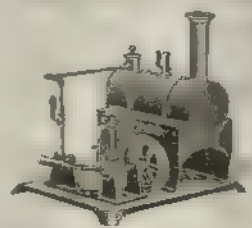
T4170 — Weeden upright steam engine, blued steel boiler; iron fire box; metal base and engine frame finished in colors; large cylinder; 2½ inch nickel plated; turned face balance wheel; whistle; diameter base 4½ ins.; 11¼ ins. high. Each in box. Each... .75

T4172—Weeden upright steam engine; blue steel boiler, iron fire box, metal base red enameled; 2½ in. nickel plated balance wheel; brass finished cylinder; with whistle and water gauge showing the actual amount of water in the boiler; diameter base 4½ in., height 11¾ ins.; each in box. Each 1.00

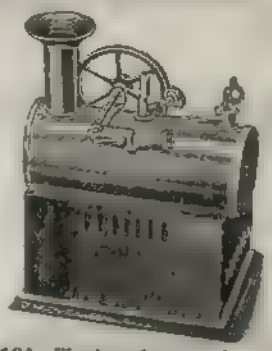
T4183 — Upright engine; polished brass boiler; blue steel fire box; 5 in. red base, 3 in. polished nickel fly wheel with pulley; water gauge and whistle; height 12½ ins.; each in box. Each 1.89

With Coal Oil Burner

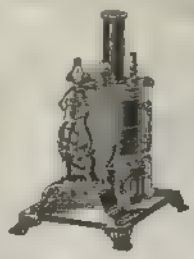
T4181 — Weeden upright steam engine; boiler polished brass, base and running parts finished in colors; special lamp and draft being adapted for burning coal oil, fitted with water gauge; large, turned face balance wheel, a very attractive model; height 11 inches; each in box. Each 2.15



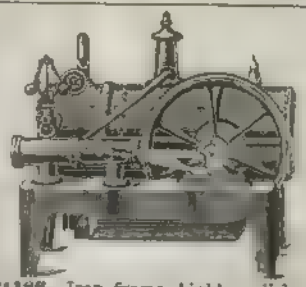
T4173—Horizontal; polished brass boiler; red enameled fire box; gray base; 2½ in. nickeled fly wheel with shaft and pulley; whistle and governor; size base, 4x8 ins., 10½ in. high; each in box. Each 1.50



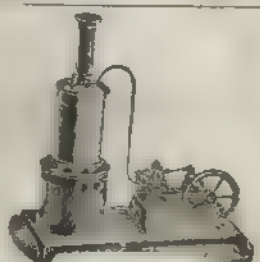
T4184—Weeden horizontal steam engine; polished brass boiler, iron fire box, mounted on strong base, finished in colors; safety valve, whistle, 2 in. diam., turned face balance wheel; size base 5¾x4½ ins.; 9 in. high; each in box. Each 1.75



T4182 Weeden Reversible Engine; highly polished brass boiler; whistle securely locked to the boiler and made steam tight; oscillating cylinder with short stroke, which makes it run at a very high speed, being equipped with a reverse lever by which it can be run forward and backward; this makes it desirable for running small launches or boats; fully equipped with water glass, whistle, filler and governor and smokestack; each in a box. Each 2.89



T4186—Iron frame, highly polished brass boiler, with steam dome, whistle, safety valve, and water gauge; cylinder, steam chest and slide rest are cast in one piece; balance wheel polished steel face; rapid and easy running; size of base 6x6½ ins., 7¼ ins. high. Each 3.95



T4180—Brass boiler, gun metal finish; nickeled trim., 2½ in. nickeled balance wheel, whistle, throttle valve, and rotating governor; maroon enameled iron base; blue steel fire box; size base 6½x9 ins., 8¾ in. high; each in box. Each 4.25

DUMB WAITER FIXTURES

PARAGON

Paragon Automatic Dumb-Waiter Fixtures Only

Constructed so that it will hold the car stationary at any point without the use of a brake or rope clamp. Works easily and with perfect safety for the moment the operator ceases pulling the hand rope, either raising or lowering, the automatic clutch will hold the car in its place. Illustration shows the machine which goes at the top of well and which is arranged to have the weight at the right. Furnished regularly with babbitt bearings.

Showing Dumb Waiter with Fixtures

Fixtures Only

No.	Capacity Lbs.	Well In.	Wheel In.	Shaft	Single Face Each	Double Face Each
P1	50	20x20	16	16	$38.00	$49.00
P2	100	27x27	20 or 24	19	46.00	58.00

Weight per Set about 75 Pounds

The Nos. P1 and P2 are sheave machines and are arranged for the weight to come at the right unless otherwise ordered. If it is desired to have the weight at the left, place the hoist wheel on the back end of the shaft. The pulley wheels should be placed from 3 to 6 inches below the weight rope wheel. The pulley at left in such position that the groove of the wheel will be directly over the center of the car. The other pulley shown in the illustration is to guide the weight rope over the center of the weight box. With the fixtures only a third pulley is furnished, for weight at back. This, however, should not be done unless absolutely necessary. Use ⅜-inch diameter Manila rope for the center and one foot for each foot of well in height. Use ⅝-inch diameter Manila or Hemp rope for the hand rope, and two feet for each foot of well in height, plus 10 feet.

Not Carried in Stock, Shipped Direct from Factory.

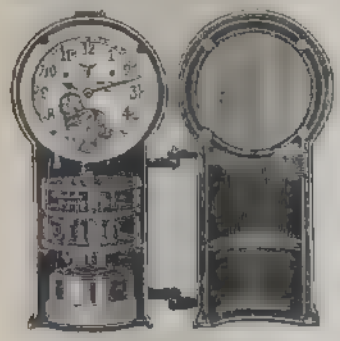
TIME SWITCHES

PARAGON

Cast iron case, black japanned; equipped with corbin lock and felt gaskets, furnishing complete protection from dust and weather. Will automatically turn on and off lights or other electric circuits up to four operations a day on one weekly winding. Equipped with high grade eight day jewel bearing marine clock movement. Switch operated by a powerful motor which is independent of the movement, allowing it to function solely as a clock and keep accurate time.



For Indoor Use.
Glass Face. Double Pole.

TIME SWITCHES

AMERICAN

Cast iron case, black japanned; equipped with lock and felt gaskets, making it absolutely dust, dirt and waterproof. The air is automatically conditioned by a secret process that requires no attention. It maintains regularity in the timing and switching movements and entirely prevents congealing of oil and slowness in action during cold weather. Will automatically turn on and off lights, control burglar and fire alarm systems, or other electric circuits on one weekly winding.

Composed of two individual mechanisms, a clock and a switch motor, each individually wound, but directly connected by intermeshing gears, together functioning as a single mechanism.

Equipped with high grade sapphire jewel bearings. A rotary type H & H switch is directly connected on the main spindle of the powerful motor, assuring instantaneous functioning and positive on and off connections. An ingenious brake and lock device eliminates all stress or shock from the entire clock at the time the quick acting switch functions.

GLASS FACE

For Indoor or Outdoor Use.

Height 10 inches; width 6 inches; depth 4 inches. White dial diameter 4 inches; black hands and numerals.

DISTRIBUTING TRANSFORMERS

ALLIS-CHALMERS

60 Cycles—Single Phase, 2300 (4000Y) Volts—Primary. 115 to 230 Volts Secondary Out Door Service—Maximum Rated.

The coils in these transformers are form wound and impregnated by the vacuum process, with insulating compound of the highest dielectric and mechanical strength obtainable. Special protection against injury is provided by extra reinforcement of insulation where required. The laminated cores, are of the best grade silicon steel, each lamination being well insulated with special core plate varnish.

After complete assembly of the core and coils, same are mounted in a rectangular case. The cases are all of sheet steel, electrically welded and are free from oil leakage frequently encountered in the old cast iron cases which are apt to be cracked or injured by rough usage.

The complete transformer is submerged in oil and the cover of the case forms an effective seal against entrance of moisture or dust by means of oil-proof gasket. Prices and weights are for transformers boxed for domestic shipment. Transformers will have the oil shipped in cans if the amount per transformer does not exceed 280 lbs. (40 gallons); for an amount exceeding 280 lbs. per transformer, oil will be shipped in steel drums having a capacity of 350 lbs., (50 gallons) each. Oil drums will be billed to the purchaser and credited upon their return by purchaser to original point of shipment free of transportation charges.

Secondary Voltages—Transformers are arranged for series, multiple of three wire service by connection of leads outside the case. Transformers will carry the rated KVA load continuously with a temperature rise not exceeding 55° C.

For light and power service, single phase 60 cycles they are designed for the following:

Normal 2300 Volts H V to 230/115 L V.
Can be used 2200 Volts H V to 220/110 L V.
Can be used 2400 Volts H V to 240/120 L V.

By changing connections inside of covers same transformers can be used as follows:

Normal 2300 Volts H V to 460/230 L V.
Can be used 2200 Volts H V to 440/220 L V.
Can be used 2400 Volts H V to 480/220 L V.

Note—Prices include oil for all sizes and cutouts for 50 KVA and smaller.

WAGNER W. S. TYPE

60 Cycle—Single Phase, 2300 Volts—Primary—110 to 220 Volts Secondary, Complete.

Transformers enclosed in rugged cast iron case that will not leak oil. Cases so shaped as to be easy to handle in line construction. Special design lead bushings are inserted from the inside of case and so shaped that large end is inside of case making it impossible to bump the bushings by moving transformer.

A special arrangement by which the copper lead is stripped of all its insulation when it is under the surface of oil prevents siphoning oil out of case, various layers of high voltage coils are separated by bakelite tubes sufficient to withstand a higher voltage than actually exists between these parts.

The coils in these transformers are wound with double cotton covered copper strips with each turn insulated separately. End turns of coils which connect to out going leads are extra heavily insulated to prevent damage due to surges or other abnormal line voltages.

The coils are finished with a layer of linen tape treated with a non-hydroscopic compound which effectually removes all moisture and produces a winding practically impervious to moisture.

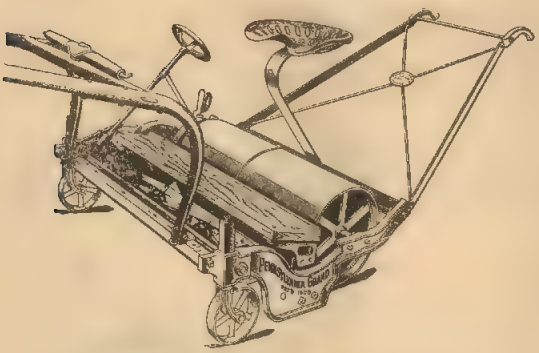
LAWN MOWERS

PENNSYLVANIA GRAND HORSE



The wheel at right of driver's seat regulates height of cut from ⅜ to 2⅞ inches. Height of cut can be instantly changed without leaving the seat. All wear of either revolving or stationary knives is taken up by a pair of set screws on top of cylinder journal boxes. The cylinder journals run in phospor bronze boxes, which are split so that all wear may be taken up by a set screw. Crucible steel, self-sharpening stationary knife. Cylinder 7½ inches in diameter, rollers 15 inches in diameter. Complete, with seat, shaft, etc., as illustrated.

LAWN CLEANERS

PENNSYLVANIA

Removes all cut grass, leaves, etc., leaving the grass standing upright. The action of the three revolving brushes or rakes is beneficial to the turf. The suction created by the rapidly revolving brushes or rakes cleans the lawn on the same principle as a vacuum cleaner operates on a carpet. The brushes are recommended for removing worm casts from putting greens, tennis courts and other close cut lawns where a smooth surface is essential. Adjustable to take up the wear of brushes or rakes until entirely worn out.

PRESSES

ENTERPRISE

The cylinders of Enterprise lard presses are made of cast iron, bored perfectly true. The tin cylinder inside the cast cylinder has lips to enable the operator to remove the hot cracklings with little or no inconvenience. No hot cylinder to handle when pressing lard. The patent latch prevents breakage of plate. New patented corrugated spout prevents air entering the casing, thus assuring the preservation of sausage.

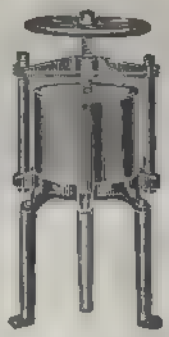
ENTERPRISE



For Fruit, Wine, Jelly and Lard.

23 gauge high grade tin plate cylinders with heavy bottom and top rims. All parts coming in contact with the fruit acids are covered with pure block tin. Equipped with swing top to admit of cylinder being readily filled with fruits and emptied of pulp. Plunger plate attached to end of feed screw which withdrew from cylinder when screw is raised. Bottom of cylinder fitted with a strainer plate to prevent the pulp from flowing out with the juice.

Black japanned wheel and legs; swing top and base heavily tinned.

	Each
No. 6—Without legs—Capacity 6 qts; inside cylinder 8x7 ins; outside cylinder 8¾x7½ ins; height over all 16 ins; wt each 51 lbs	19 95
	$9 00

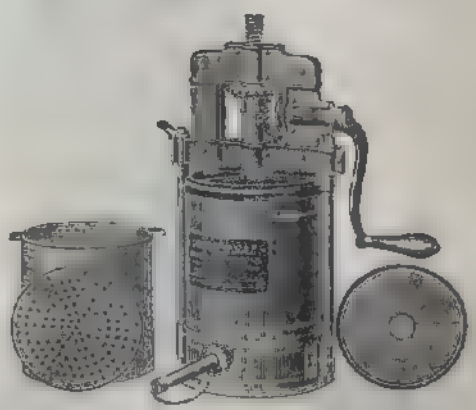
	12 50

One in crate.

UNIVERSAL



Combined Sausage Stuffer, Lard and Jelly Presses.

Japanned, with beveled gear and screw movement, swinging top arch, removable steel side bolts. Bowl is made of a single piece of sheet steel drawn up in dies insuring uniformity of size and permitting a closer fit between the plunger plate and cylinder than in the cast iron machine.

Complete with perforated lipped tin strainer or cylinder, perforated strainer plate and one each large and small cast ribbed plunger plate.

McCord Radiators for Fords

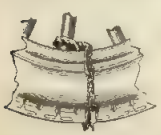
McCord Radiator & Mfg. Co.
Detroit, Mich

MADE in two types, the Type T which is a tubular radiator and the Type S which is of combined tubular and cellular construction both have the feature of a triple riveted side bracket, shown in the illustration, made of spring steel. These are said to protect the core by absorbing road shock and vibration thus augmenting the life of the radiator. They are made to fit the 1917-23 as well as the 1924-25 models of Fords

Drednaut Balloon Tire Jack

Auto Specialties Mfg Co.
St. Joseph, Mich.

THE Drednaut No. 24 has been designed for use on any car including those equipped with balloon tires. This Jack weighs approximately 13 lb and has a capacity of 2,000 lb. Has an adjustable side step which allows a minimum height of 4 in. and adjustable up to a stand height of 10 in. with a 7 in. lift. Is equipped with ball bearings and is operated by a 48 in. auger type folding handle, which affords maximum ease in placement and operation. This Jack lists for $5.75



St. Pierre Super Grip Emergency Chain

St. Pierre Chain Corp.
Worcester, Mass.

ESPECIALLY designed to be used in an emergency where the car is stuck or is liable to become stuck in bad going these chains may be attached directly to the wheel by placing the raised tread member around the tire and fastening it directly to the wheel or spoke. A ⅞ in. drilled hole is required for use with disk wheels. List prices per pair are from $2 for the 2½ in. size to $3 for the 5 in. size.

Duck Foot Universal Puller

Manufacturers Machine Products Co., Mfr
Tripp Secord & Co., Dis
642 Beaubien St
Detroit, Mich

CONSISTING of two parts, a three-fingered puller unit and a set of plates or nuts to fit different sizes of wheels, this puller is claimed to offer the following advantages: 1 It is unbreakable on account of having no bell shaped housing. 2. Reversibility of the pulling plates gives them twice the life and enables them to be trim in case of stripping. 3. The puller can be used on any wheel for which the plate is furnished thus reducing the cost of puller equipment. The wheel pulling plate is not shown in the illustration as it is here shown being applied to pulling a gear. The puller set consisting of a chrome nickel steel puller unit and six steel wheel puller nuts suitable for popular makes of cars sells for $17.00 f.o.b. Detroit.

Elgin Tire Valve Tool

Pacific Rim Tool Co.
16606 Waterloo Rd., Cleveland, Ohio

FIVE distinct tire valve servicing operations are possible with this tool. It may be used to remove valve cores, rethreading the inside of the valve stem, remove the valve core when the tangs are broken, rethread the outside of the valve stem, and remove the wire and spring after the core nut has been taken out. The tool is such a size that it may be carried in the vest pocket. List price, $1.25.

Broadway Model Clock

Phinney-Walker Co.
250 W. 57th St., New York, N. Y.

EASE of winding and setting are the outstanding features of this clock which may be mounted to either a wood or steel dash by means of a suitable U clamping device—there being no screws visible with this mounting. The rim of the clock is used to wind and set. Price, $11.50.

THE prestage of the Playwell Pianos holds the world over is the inevitable result of the determined policy and standard to produce the very best in Piano construction. The Playwell Piano embodies every quality that means lasting service and satisfaction—the natural result of years of fine Piano building.

The tone is rich, pure and musically perfect. Every case is artistically proportioned, beautifully finished, staunchly built and mechanically correct. As either a Straight Piano or Player they are musical masterpieces. Guaranteed and backed by an organization of over half century's musical experience.

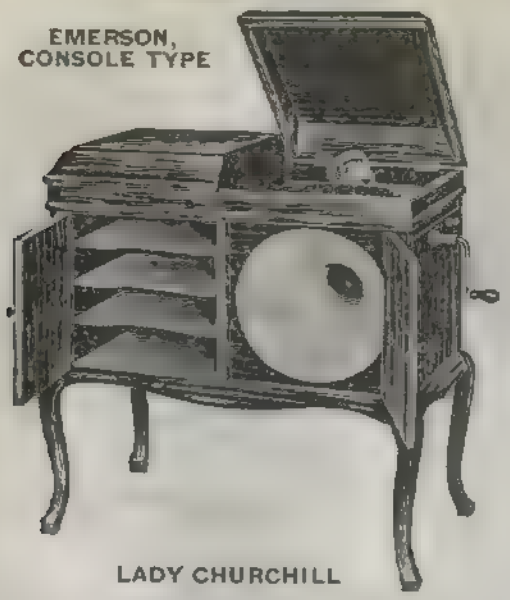
PHONOGRAPHS

EMERSON, CONSOLE TYPE



LADY CHURCHILL

Everything possible has been done, to make the Emerson one of the finest phonographs ever created. Each has the famed Music Master straight spruce horn, famed for its resonance and true tone carrying qualities. This with the Emerson Tri-ash Throat Universal Tone Arm and Emerson True Tone Reproducer constitutes a distinctive betterment of the Emerson. The heavy precision motor, the bevel edge clamp ring turn-table and Emerson perfect tone control. Plays all makes of records.

All Emerson Phonographs are designed by experts having a knowledge of the finest principle of acoustics, resulting in a machine which, for beauty and fidelity of tone production is rivaled only by nature itself.

BERGUNDY

Genuine mahogany or walnut veneered case, improved Emerson throw-back tone arm; heavy triple spring motor; 12 inch beveled edge, velvet turn table, automatic stop and tone modifier. Gold plated trimmings. Height 37½ inches; width 40 inches; depth 21 inches.

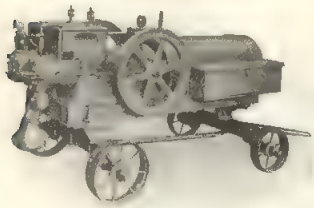
Portable Engine-Driven Air Compressors



Nos. 20, 30 and 40 Portable Engine-Driven Air Compressors

No. 3363

These portable compressor outfits are mounted on an all-steel truck, with broad-faced wheels. On the same truck is an air tank with pressure gauge, safety valve and globe valve. The truck also contains the proper tool and battery boxes. The engine is of the four cycle angle cylinder type, high tension jump spark ignition and water cooled. These compressors can be used in mechanical painting by means of the power spray. The advantages of the power spray lie in the fact that the spray can be adjusted to deliver any volume of paint and to handle any kind of paint, cheaply and effectively, on any surface. The modern air gun drives the paint into every nook and corner and applies a perfectly even coat to the entire surface. On such work as mill interiors from 5,000 to 7,000 square feet of surface can be covered in an eight hour day.

No. 20 Double-Cylinder Portable Electric-Driven Compressor

Double-Cylinder Portable Electric-Drived Compressor

No. 3364

These Portable Electric-Driven Air Compressors consist of the standard horizontal, hopper-cooled compressors, connected to heavy duty electric motors and mounted on truck complete with switchboard. These outfits are built in sizes ranging from 15 to 140 cubic feet capacity. This range of sizes makes it possible to handle any pneumatic tool required in the construction field. Electric railway companies, electric light and power companies, municipalities, in fact, wherever electric power is available, have been using these machines for a number of years with the greatest amount of satisfaction.

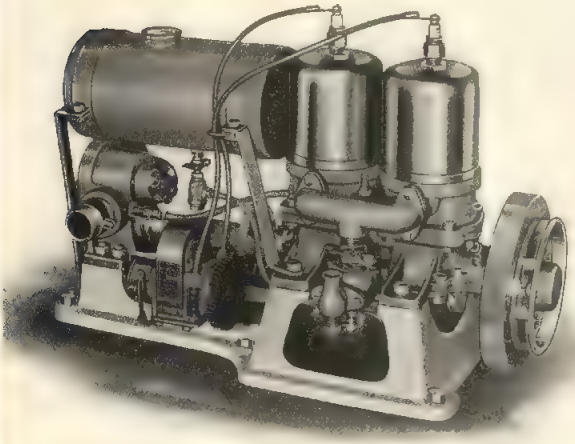
Fairbanks-Morse Forest Fire Pump



No. 3362

The Fairbanks-Morse Portable Fire Fighting Pump is the product of experience gained during many years of manufacturing and careful experimenting carried on in co-operation with well-known Forestry Engineers The Federal and Provincial Governments have tested these engines and pumps under the most difficult service conditions and proved the rugged durability, minimum attention and easy starting qualities as well as the reliability and trust that can be placed in one of these fire-fighting outfits.

The engine is two cycle, two cylinder, water cooled, with copper jackets and aluminum base, 3" bore and 3" stroke, developing 5-6 h p. It will give excellent results and the moderate speed eliminates the possibility of breakdowns and costly repairs Outstanding among these exclusive features are the Berling High Tension Waterproof Magneto, which provides constant electric current under most adverse conditions and the Schelber Model "D" Carburetor which is used because it is simple to adjust and specially suitable with two-cycle engines.

Drop forged crank-shaft and connecting rods to withstand the strain of constant stopping and starting under full load

The pump is a bronze rotary of the highest quality, especially designed and accurately machined to give the maximum results with our engine.

The engine and pump mounted on carrying board complete, weighs only 110 lbs.

We carry in stock for immediate shipment, parts for the later models. Replacements for older models can be made up on short notice. The outfit is "Made in Canada."

OIL ENGINES

PRIMM, SEMI-DIESEL

The high cost of labor and the uncertainty of coal production, delivery and cost make it desirable for users of power to search for dependable engines that may be operated at a lower cost for both fuel and labor than can steam engines.

This demand has brought about the rapid development of Semi-Diesel engines, which use crude oil or any of its by-products such as fuel oil, gas oil, solar oil, distillate or kerosene. These engines are operated much more easily than full Diesel engines, having a lower compression, and are maintained at a much lower expense for repairs They are easily installed and little or no expert attendance is required.

They have been on the market for seventeen years. During this time the improving and developing of these engines have been continuous and we believe that the present line is superio to all other-makes of oil engines.

The mechanical features which will appeal to engineers are fully described in the Bulletin which will be sent to prospective purchasers upon application. The economical features which will appeal to owners are:

Low Cost For Labor Primm Power Units are one man plants No coal to handle, no ashes to take out; no dirt; no time lost in firing up; no continuous attention to maintain proper steam pressure.

Low Cost For Fuel Six to eight gallons per horse power hour of a gravity twenty-four Beaumme or better which is sufficiently distillate to flow through pipes leading to fuel pump.

Low Cost For Lubricating Oil Crank pin, main bearings, all other bearings except cylinder, lubricated by the splash system Forced lubrication to piston Uses one-half to one-quarter gallon per hour

Low Cost For Repairs: The wrist pin in the cross-head instead of in the piston does away with wear to cylinder and piston and insures long life and continued efficiency.

Low First Cost: No smoke stack, boilers, coal bunkers, small building, small erection cost.

These engines are especially adapted for electric lighting plants. Steam driven plants with single units, requiring not more than 300 horse power, which are being operated without profit or at a loss, may be made to pay dividends by junking or disposing of the steam equipment and substituting PRIMM engines.

MANUFACTURERS' GUARANTEE

The manufacturers guarantee each engine to be free from defective material and workmanship for twelve months following shipment and to replace any part of it which shall prove defective within said time, provided such part is returned to them, transportation charges prepaid (transportation charges on large parts to be arranged for). This guarantee does not cover breakage, abuse, misuse, neglect or accident. The company will not be responsible for repairs made on engines outside of their shops by others than their own representatives, and will not entertain any claim for the cost of repairs made by others than the above except upon written request. They further guarantee each engine to have been thoroughly tested in the factory previous to shipment and that it has during said test, developed brake horse power greater than that at which it is rated, that at which it will not use more than pounds of fuel per brake horse power per hour, when properly handled, from three-fourths to full load, not less than six-tenths of a gallon of fuel oil of a gravity of twenty-four Beaumme or better, containing at least thirteen thousand B. T. U. per pound and continuing not more than one-half of one per cent of moisture, the quality of which will allow it to flow through pipes leading to fuel pump.

REGULAR EQUIPMENTS INCLUDE THE FOLLOWING

Type "CBU" fuel straining tanks of 50 gallon capacity for engines up to and including 45 H. P. and 100 gallon capacity for larger engines; tanks not furnished when equipment is fuel and water circulating pumps with auxiliary fuel tanks and fittings are furnished, see extras, exhaust large vertical pipe and elbow, full set of wrenches, lubricators; and small fittings necessary for setting up the engine; water circulating pump rotary type; the equipment will also include standard air starting equipment and clutch pulley. Type "EBU" will be furnished Type "CBU" except outer pulley will not be furnished except as an extra.

If any of the equipment mentioned above is not desired, the cost of such equipment will be deducted from the price of such an engine.

Extras Special pulleys, mufflers, extra shafts, clutch couplings, extra pumps for oil and water, exhaust pipes and foundations, bolts are not included in regular equipment but will be furnished at small extra costs.

SPECIFICATIONS

All measurements and weights are in inches and pounds, and are approximate, only for estimating

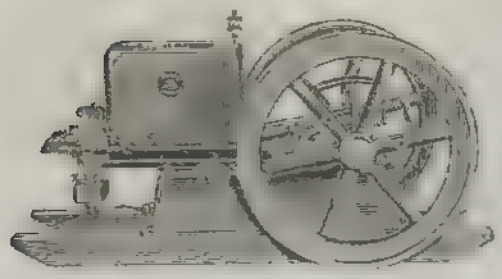
KEROSENE ENGINES

FULLER & JOHNSON

Model "K"—Throttling Governor.



3, 5, 7, 9 and 12 Horse Power.

Well adapted for electric lighting plants, for use on the farm, in shops, elevators, mills, creameries, etc., or on concrete mixers, balers, etc. Has new and improved throttling governor; extra heavy fly-wheels which further insure constant, steady power, so essential for operating the electric dynamos, cream separators, etc.

The engines are beautifully painted and striped in gold, and are mounted on substantial hardwood skids. They may easily be skidded from place to place, or installed as stationary engines. If it is desired to mount the engine on a hay baler, well drill, concrete mixer, or other machine, simply remove the skids as the engine is self-contained, that is, the engine is hopper cooled with no pipes or screens, and the fuel tank is mounted in the full base and connected to the mixer above the base line.

3, 5 and 7 H. P. engines equipped with built in low tension gear driven magneto. 9 and 12 H. P. equipped with starting battery in addition to magneto. Will run on kerosene, benzine, naptha, distillate, motor spirits or gasoline.

Furnished with a heavy galvanized fuel tank; a machine turned pulley, which fits on either side of the engine; a good muffler; a sight feed lubricator; large grease cups for the bearings; a full set of dry batteries, and a water-proof spark coil, all wired up and neatly packed in a good battery box, nicely painted; all necessary wrenches; oil can; priming cup; starting crank (except on 12 H. P.); a can of oil; a can of grease; and a complete book of instructions.

Pulleys other than those specified below can be furnished, charge being made according to the size of the pulley.

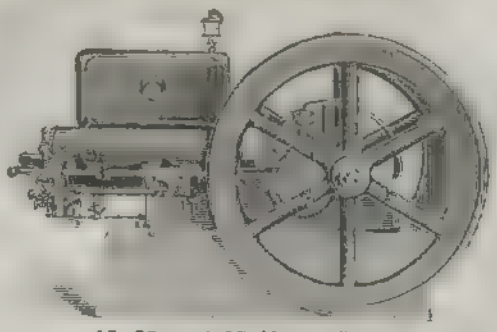
KEROSENE ENGINES

FULLER & JOHNSON

Model "K"—Throttling Governor.



15, 20 and 25 Horse Power.

These larger sizes embody the very latest developments in Throttling Governor Kerosene Engines. They run very smoothly and quietly and at a uniform, steady speed, with a big surplus of power. They operate perfectly on kerosene. Especially suited for [illegible] creameries, feed mills, grain elevators, electric light plants, etc.

They are regularly equipped with fuel pump so that the large fuel tank may be placed outside the building.

Each engine is furnished with plain pulley; exhaust pot (or muffler when ordered); starting battery; coil, switch; built in, low tension magneto; water gauge; wrenches; cylinder oiler; grease cups; priming cup; supply of cylinder oil and cup grease; oil can; 53 gallon outside connected tank with sufficient pipe to connect tank 30 feet from engine.

Pulleys other than those specified below can be furnished, charge being made according to the size of the pulley.

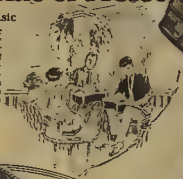
Ideal for Home or Professional Use

Learn to Play Hawaiian Music

That haunting Hawaiian music which sounds difficult, is really very easy to play. The Hawaiian Guitar is like any other guitar in general construction, and is played practically the same. The weird, wailing effect of Hawaiian music is produced by a steel bar which you slide along the strings when playing.



$5.50

High Quality Band Instruments

Artistically Engraved

Concertone B-Flat Slide Trombone

$7.95

This is the greatest Trombone value we have ever offered in our entire history. Knowing that many of our customers are looking for a large quantity of these instruments at a low price, we have purchased a large number at a special price and have combined many of the best features of other makes in making this one. No other Trombone at this price can equal it. It is an instrument of unusual merit, excellence, outstanding tone quality and low price.

It is made of the finest brass and offered in three finishes: Lacquered, polished nickel and silver plated with gold plated bell. Bell is artistically engraved.

Medium bore

Perfect balanced and easy to play.

With 7-inch bell gives a full resonant tone suitable for band or orchestra. The easy running slide is fitted with extra heavy tubing so it will not wabble or get out of line and long wearing. Over-sprung B-flat, G and E valves, with a large quantity of these instruments we have been able to secure the most modern improved make and construction at the lowest possible price. Bell is hand engraved, has gold lacquered finish and is silver plated. Complete with case and instruction book included.

All gold plated valves finish ... Postage, 16c extra

Pearl Buttons Engraved

Three-in-One C-B-Flat and A Cornet

$13.65

The instrument is really three Cornets in one. You can play vocal music or hymns without transposing by tuning to C. When in B-flat for band or concert use it is equipped with a quick change to A. A combination cornet without the short shank mouthpiece. This type of instrument has the positive action medium bore. Monel Metal valves. Instruction book and instruction book included. Length, 19½ inches. Diameter of bell, 4½ inches.

851 C 933 Brass finish	$13.65
851 C 934 Nickel plated	15.25
Silver plated gold plated bell, Postage, 16c extra	21.25

Engraved Pearl Buttons

Rotary Change to A

Concertone Professional B-Flat Trumpet

$37.25

The improved rotary quick change to A makes this an exceptionally desirable instrument for the professional player. The change is such a quick and positive one with best rotary valves. Large bore. Beautiful B-flat low set with monel metal valves and water key. Perfect, dynamic tonality. Finished with engraved bell and pearl buttons.

Length, 19½ inches. Instruction book included.

851 C 973 Brass finish	$37.25
851 C 974 Nickel plated	39.25
851 C 975 Silver and gold plated	45.25
851 C 976 All gold plated, velvet finish. Postage, 16c extra	51.75

Compare the Quality and Price See What You Save

In nearly every community and in almost every organization of men or boys, there is enough musical talent to organize a good Brass Band. There is no more popular organization in any city than its brass band. It is a necessary part of the life of every community. A big obstacle to forming such organizations has been the cost of the necessary instruments. Realizing this, our musical instrument department decided to bring within the reach of all such organizations, quality Brass Band Instruments at prices fully one-fourth less than dealers usually ask. This was possible because we buy direct and sell direct and take but one small profit. We buy for seven great stores, serving millions of people. The average dealer, selling a few instruments each year, can not possibly offer you such low prices.

Made from Our Own Specifications

But we were not content with only the saving that our large purchases would make possible. So we sent buyers over to the great musical instrument centers of Europe, where the very best instruments are made. We provided specifications for the instruments most popular in the leading American brass bands. Then we placed orders for tremendous quantities. The saving we made is astonishing; and it explains why we can sell you band instruments of a quality we are exceedingly proud to recommend and guarantee, at prices from one-quarter to one-half below what dealers must ask you.

Every Concertone Instrument Is Fully Guaranteed

When you buy a Concertone Band Instrument you are protected by Ward's well known guarantee that you must be thoroughly satisfied with your instrument or your money will be refunded.

Plating Takes Ten Days

Your instruments will reach you clean and bright. We do all our plating and polishing after your order is received. This requires about ten days.

Beauty Features of Concertones

Every Concertone Band Instrument is beautifully finished and engraved with an artistic design. Each valve is tipped with an inlaid button of pearl.

Organize a Band—Let Ward's Save You Money on Your Instruments

Get the musicians of your community together and organize a Band. A band is always in demand, and it is well paid for its services. Our price for a complete band outfit is one-quarter to one-half below the total cost if each member bought his instrument separately from a dealer.

Complete Band Outfits at Special Low Prices

Band of 8 Pieces $116.50

2 Cornets No. 851 C 924 @ $10.75 ea. $21.50

FIRE EXTINGUISHERS

PYRENE

Kills Fire—Saves Life

The double-acting pump throws a steady, continuous stream, no matter in what position the extinguisher is held. The contents will not freeze at 50 degrees below zero. Needs no recharging until used

For automobile, truck or tractor protection, Pyrene is best, because it is light and compact. Is not affected by jolting of the car, and is the most effective type of extinguishing gasoline or oil fires. Automobile fire insurance is reduced 15 per cent by the installation of a Pyrene Extinguisher. Pyrene is also best for motor boat protection, and is approved by the U. S. Steamship Inspection Service.

Pyrene is the only safe type of extinguisher to use on electrical fires, of all kinds. The liquid is non-conductive and will not injure electrical equipment.

For fires starting in oil, paint or other highly inflammable materials, Pyrene is the ideal extinguisher because it has an instantaneous effect on the flame—smothering the fire like a blanket

Pyrene is an excellent extinguisher for protection of schools and homes, being light enough to be easily handled by women and children, and the liquid will not injure delicate fabrics. Pyrene is approved by the Good Housekeeping Institute

Labelled by the Underwriters' Laboratories, Inc.

Use only Pyrene Liquid in Pyrene Extinguishers Other liquids may damage the mechanism.

Complete with Black Bracket

Pyrene—Brass ..... Each **$12.00**
Pyrene—Nickel plated ..... Each **13.00**

Twelve in a case

Extra Bracket ..... Each **$1.00**

PYRENE METAL BOXES

With Glass Front

These boxes are substantially made of metal, rust-proof. The heavy box is finished in black and will stand severe service outdoors, on trucks, etc. The light box, painted red, is for indoor use. Each box holds one extinguisher and prevents tampering

GUARDENE, SODA AND ACID TYPE

Standard Design, 2½ Gallons Capacity, Complete with Charge

The Guardene, well designed and well built, embodies all the latest improvements in soda and acid extinguishers. There are few fires that a Guardene won't handle if it is used promptly. This extinguisher throws a stream 40 feet.

The Guardene is made of cold-rolled copper, burnished outside and heavily lined with non-corrosive metal. Each extinguisher is tested to 350 pounds per square inch. The actual working pressure is about 100 pounds. 17 in flexible hose. Weight filled 40 lbs.

To operate, tip extinguisher upside down. To stop operation, turn right side up.

The Guardene Extinguisher is labelled by the Underwriters' Laboratories and approved by the U. S. Steamboat Inspection Service

Guardene Standard—Polished copper ..... Each **$20.00**
Guardene Standard—Nickel plated ..... Each **22.00**

One in a carton, complete with recharge and bracket and screws for hanging

EXTRA RECHARGES FOR GUARDENE EXTINGUISHERS

Guardene soda and acid recharges are scientifically compounded and absolutely accurate. They are standard recharges for Guardene Extinguishers or any standard soda and acid extinguisher All soda and acid extinguishers to be efficient should be recharged once each year.

Extra Recharges—For Guardene Fire Extinguishers..... Per Dozen **$9 00**

Twenty-four cartons in a case.

PHOMENE

Foam Type, 2½ Gallons Capacity, Complete with Charge and Hanging Hook

This extinguisher is effective on all classes of fires, including oil, gasoline, naphtha, enamel, tar, wax, grease, shellac, lacquers, inflammable solvents and chemicals

Wherever quantities of materials of an oily or highly inflammable character are manufactured, used or stored, Phomene is the only suitable extinguisher to install

For manufacturing plants, Phomene affords more complete protection than the ordinary soda-and-acid extinguisher. Phomene will extinguish all classes of fire.

No matter what the burning material may be, liquid or solid, Phomene foam will float or spread over the surface, forming a tough, heavy blanket which is airtight and fireproof.

Heavy cold-rolled copper, polished and lacquered; labelled by the Underwriters' Laboratories; actual capacity (size of tank) 3 gallons; rated capacity (volume of liquid) 2½ gallons; height 24 inches; weight empty 18 pounds; weight filled 42 pounds; amount of foam produced 20 gallons; length of stream 25 to 35 feet. Must be recharged yearly and protected from frost.

Phomene—Complete with charge and hanging hook. ..... Each **$25 00**

One in a shipping carton.

EXTRA RECHARGES FOR PHOMENE EXTINGUISHERS

Extra Recharges—For Phomene Fire Extinguishers.. .... Each **$1 75**

One in a shipping carton

DIEHL ELECTRIC FANS

REGULAR

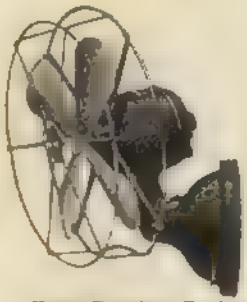
Desk Position

9 Inch

Oscillating and non-oscillating fans for desk or wall bracket use on all commercial circuits. Substantially built and well proportioned. Finished in black enameled throughout. Attachment plug and 8 foot cord with each fan

No. 9/NO—Non-Oscillating . . . . . Each $10 00
No. 9/O —Oscillating . . . . . Each 15 00

One in a box; weight each 8 pounds.



Wall Bracket Position.

10 Inch

Oscillating and non-oscillating fans. Four blades, three speeds, for all commercial circuits. Easily adjusted for desk or wall bracket service. Finished in black enamel with polished brass blades. Attachment plug and 8 foot cord with each fan.

No. 10 NO—Non-Oscillating . . . . . Each $16.00
No. 10 O —Oscillating . . . . . Each 20 50

One in a box; weight each 17 pounds.

EXHAUST

Bucket Blade

For all commercial circuits Light in weight and can be installed at small expense. Finished in black japan. Gives more positive air movement than flat blade fans. Strongly built use little electric current.

No. DE—Size fan, inches. . . .	9	12	15
Weight each, lbs.	28	37	67
Each	$29.00	38.00	50.00

One in a box.

REGULAR

Desk Position

12 Inch

Oscillating and non-oscillating three speed fans for all commercial circuits. Finished black enamel with four polished brass blades. Speed regulator in base of fan. Adjustable for wall bracket use. Attachment plug and 8 foot cord with each fan

No. 12 NO—Non-Oscillating . . . . . Each $23 50
No. 12 O —Oscillating . . . . . Each 30 00

One in a box; weight each 35 pounds

Wall Bracket Position

16 Inch

Oscillating and non-oscillating fans. Rugged construction, well proportioned. Fan blades, polished brass, three speeds. Finished black enamel. For all commercial circuits. Easily adjusted for desk or wall bracket use. Speed regulator in base. Attachment plug and 8 foot cord with each fan

No. 16, NO—Non-Oscillating . . . . . Each $27.00
No. 16/O —Oscillating . . . . . Each 35.00

One in a box; weight each 45 pounds.

VENTILATING

Flat Blade

For use on all commercial circuits Finished in dull black and are exceptionally serviceable to ventilate kitchens lavatories etc Can be easily installed in transoms or partitions Rugged construction, quiet in operation, low consumption.

No. DV—Size fan, inches.	12	16
Weight each, lbs.	35	52
Each	$28.00	32.00

One in a box.

CEILING

Alternating Current

Four blade, ball bearing, three speed. Finished dull black Polished mahogany finished blades, Furnished with three speed switch, ceiling canopy, ceiling hook and insulated hanger loop

No. C52—Alternating current; 52 inch sweep; weight boxed 75 pounds . . . . . Each $50.00

Direct Current

Four blade, three speed. Finished in black enamel with gold lines. Move a large volume of air with small current consumption. Standard equipment consists of fan, three speed switch, four polished mahogany finished blades, ceiling canopy, ceiling hook and insulated hanger loop.

No. C56—Direct current; 56 inch sweep; weight boxed 83 pounds . . . . . Each $50.00

Note—For List Price on 220 volt A. C and D. C. Fans and 25 cycle, 110 volt, A. C fans add $2.00 to above prices Add $7.00 to List Price A. C. Ceiling Fan for use on 25 cycle, 110 volt current.

FIRE EXTINGUISHERS

PYRENE

Pyrene Fire Extinguishers are the safest and most efficient type for electrical and all fires starting in oil, gasoline, shellac, paint or other highly inflammable substances. Water only spreads oil fires and is dangerous to use on an electrical fire.

When Pyrene is thrown onto a blaze, the heat of the fire transforms the liquid into a heavy, non-poisonous gas blanket which extinguishes the fire by cutting off the air supply.

The lightness and ease of operation of Pyrene extinguishers by women and children commend them to anyone for home protection.

Being adopted as standard fire protection for incipient fires by large railroads, factories, etc.

There is within the container a manually operated double-acting pump which throws a continuous stream.

Length 14 in., diameter 3 in., weight filled ready to use 6 lbs.

Each

No. PB—Capacity 1 quart, brass finish, complete with black enameled bracket $12 00

PYRENE LIQUID

Pyrene liquid will not injure delicate fabrics or sensitive machinery. Can be kept in unheated buildings or in exposed places as it does not freeze even at 50 degrees below zero.

Per Can

1 Quart Can—Sufficient for one filling for Pyrene extinguisher $1 80

Per Can

1 Gallon Can $7.20

GUARDENE

Cold rolled copper, polished and lacquered, heavily plated inside with non-corrosive metal. At top of cage is a bottle holding 4 fluid ounces of sulphuric acid and closed with a lead stopper. The tank when ready for use is filled with a solution of 2½ gallons of water and 1½ lb. of bicarbonate of soda

Guardene extinguishers are well designed and do not look out of place in any office, school or theatre. Besides bearing the Underwriters' label, Guardene extinguishers are approved by the U. S. Steamboat Inspection Service now and for use after January 1, 1920. Guardene extinguishers are also approved by the factory mutual insurance companies.

To use the extinguisher it is simply turned upside down; the stopper falls out and the mixing of the acid with the soda solution generates a gas pressure that will throw a stream 40 feet. The stream can be shut off by turning the extinguisher rightside up again.

Guardene Fire Extinguishers are tested to 350 pounds pressure, but the working pressure is only about 100 pounds.

Each

GUARDENE—Capacity 2½ gals., 22 in. high, complete with chemical charge, bracket and screws, weight each, filled, 40 lbs. $20.00

One in a Carton

RECHARGES

Each

Guardene—Soda and acid recharges, scientifically compounded, for Guardene or any standard soda and acid extinguisher $0.75

FIRE EXTINGUISHERS

PHOMENE

Heavy cold-rolled copper polished and lacquered, labeled by the Underwriters' laboratories.

The extinguisher that affords complete protection, and will extinguish any fire that the soda and acid extinguisher would handle.

Phomene Extinguishes Fires that the Soda and Acid Extinguisher Would Not Touch!

The soda and acid extinguisher ejects 2½ gallons of water; Phomene ejects 20 gallons of fire-fighting foam, and the foam is effective on burning liquids as well as dry materials.

Phomene extinguishes burning oil, enamel, tar, wax, grease, shellac, lacquers, inflammable solvents or chemicals. Wherever such materials are used or stored, Phomene is an absolute essential, and in nearly every industry these inflammable materials are used; therefore we recomm-end Phomene for general protection, to replace the old style soda and acid extinguisher

Each

Phomene—Actual capacity tank, 3 gallons, rated capacity 2½ gallons, 24 in. high, amount of foam produced 20 gals., length of stream 25 to 35 ft., weight each empty 18 lbs., filled 42 lbs. $25.00

RECHARGES

Each

Phomene Recharges—Consist of 3 separate cartons A, B and C, each carton contains 2 packages of dry powder and one can of liquid with complete directions $1.75

HOSE REELS

Green enameled tubular steel frame, 7 in. black cast iron wheels, solid steel reel arms, heavy corrugated galvanized steel drum

Each

No. 2W&K—9 in. diameter drum, capacity 100 ft. ¾ in. rubber hose, weight each 15 lbs. $2.00

Wolf's Head Pennsylvania Base Motor Oils are ready sellers with the best class of trade from Maine to California. Have better body, grade for grade, than any other oils on the market.

QUAKER STATE OILS

AN OIL WHICH MEETS ALL REQUIREMENTS

A scientific formula has been evolved for an oil which meets all the varied demands of motor lubrication. Quaker State Medium, the certified oil, is refined exactly on this formula. A chemist not in the employ of the refiners tests every "run" of the oil to make sure that no deviation from any detail of the formula has occurred in the refining process. He puts his seal on each can and barrel of Quaker State Medium sold, and this seal certifies to the following uniform lubricating qualities:

(1) The correct viscosity: maintained the most evenly throughout the wide range of working temperatures.
(2) Greatest resistance to evaporation and burning: "flash" and "fire" points 445 deg. and 500 deg. F.
(3) Easy starting in cool weather: cold test 25 deg. F.
(4) Least carbon deposited in the cylinders, has coke content of 30-100 of 1% (Conradson test) and almost no carbon residue.
(5) Slowest breaking down or sedimentation: absolute purity—no acids nor adulterations.

CAR PUSHERS

EASY

Japanned, solid steel bar, tempered at points; malleable iron heel with extended lugs to prevent slipping; finest tool steel; triangular bit, grips rail firmly and prevents slipping back. Bit can be inverted and all three sides used. Steel spring prevents bit touching rail when not in actual operation. Each

No. 15—Length 5½ ft with extra triangular bit; wt each 20 lbs $13 50

No. 15B—Extra bits; wt each ½ lbs 81

Packed loose.

ATLAS

Japanned malleable iron frame and socket; finest tool steel square heel, can be inverted and all four sides used. Selected maple handle, varnished. By the compound lever arrangement the moving power is applied on the rim of the wheel so far from its contact with the rail that the moving force is utilized to roll it forward, instead of wasted in an effort to raise it from the track. Each

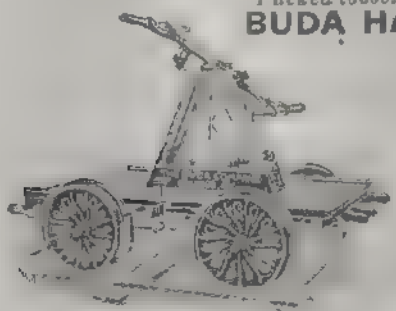
No. 10—Length over all 67 ins; complete with handle; wt each 15 lbs $16 50

Per Pair

No. 10B—Extra bits; wt each ½ lb $1 20

Packed loose.

BUDA HAND CARS



BUDA FOUNDRY AND MFG. CO.
Helical Cars.

Unless otherwise specified hand cars will be furnished with helical gears. The teeth are cut in a diagonal manner creating a continuous rolling contact.

Taper Wheel and Pinion Fit—Furnished with the im- [illegible] If straight fit is preferred, this fact should be specified when ordering.

Framework—Specially selected maple, thoroughly seasoned. Platforms or decking is of long leaf pine dressed on both sides to uniform thickness. Each

No. 1—Buda standard hand car, standard gauge, platform 6 ft long by 4 ft 5 ins wide; axles 1½ ins in diam; wheels 20 ins in diam; wt 525 lbs ..... +$285 00

HARVEY PUSH CARS

BUDA FOUNDRY AND MFG. CO.

Harvey push cars are made in the same thorough manner as the Buda hand cars described above, using the same pressed steel wheels taper fitted to axles, unless straight fit is specified on order. These cars can also be furnished with insulated axles for use on roads using block systems with track circuits. These are always extra and cars so desired should be specified on order, otherwise they will be shipped without insulation.

The framework is of specially selected maple thoroughly seasoned. Platform or decking is of long leaf pine, dressed on both sides to uniform thickness and has hardwood end rail at each end, bound with a substantial iron strap. Each

No. 4—Harvey push car, standard gauge, platform 7 ft long by 5 ft 6½ ins wide; axles 1½ ins in diam; wheels 20 ins in diam; wt 850 lbs ..... +$225 00

+F. O. B. Illinois Factory Only.

MINE CAR TRUCKS

PLAIN BEARINGS

Plain bore wheel with an oil recess around hub, designed for small cars of country mines. Set consists of 4 wheels and 2 axles.

Per Set

No. 1—Diam wheels 10 ins; 1½ in. square axle ..... +$79 80

Packed loose; wt per set 360 lbs.

Plain bore wheel. Designed for small cars only. Set consists of 4 wheels and 2 axles.

Per Set

No. 2—Diam wheels 10 ins; 1½ in. square axle ..... +$63 00

Packed loose; wt per set 200 lbs.

JACK SCREWS

Cast iron frame, wrought iron screw. Threads fine enough for power, and coarse enough for speed. Standards shaped to insure strength, used for raising buildings, cars, engines, boilers, locomotives etc.

LEVER JACKS

BARRET PATTERN

Malleable iron frame, forged steel rack, drop forged open [illegible] steel pawls, high carbon steel [illegible] pinion pin, hardened steel bearings, selected hardwood handles.

BARRET PATTERN
Double-Acting, Trip.

Recommended for track work only; able to quickly discharge its load to permit its immediate withdrawal. Lifts load on upward and downward strokes. Each

No. 1B—Capacity 10 tons; height bar down 24 ins; height bar raised 37½ ins; rise of bar 13½ ins; size of bar 1½x1½ ins $42 00

Packed loose; wt each 68 lbs.

+Mine Car Trucks—F. O. B. Indiana Factory Only.
+Jack Screws—F. O. B. Wisconsin Factory Only.

LEVER JACKS

BARRET PATTERN

Double Acting—Automatic Lowering.

No. 3B

No. 2B

For all around lifting purposes, and for use in machine shops, in traction line construction, etc. For high or low set loads. Lifts quickly, lowers gradually, both motions of handle move load half a notch up or down as set by eccentric at side, operates at any angle, and load can not be carelessly thrown, having no trip.

No. 2B—Capacity 10 tons; height bar down 21 ins; height bar raised 31 ins; rise of bar 10 ins; size of bar 1⅜x1½ ins; wt each 65 lbs. — Each $45 75

No. 3B—Capacity 12 tons; height bar down 26 ins; height bar raised 41½ ins; rise of bar 15 ins; size of bar 1¾x1⅝ ins; wt each 85 lbs. — 54 00

JOYCE-CRIDLAND

Lever jacks are especially suited for small and medium loads where the jack must be applied in various ways. The frames of the lighter models are of malleable iron accurately machined. Semi-steel frames are used for heavier duty, and in both instances the wearing surfaces are formed by bushings case-hardened in bone dust in an oil-fired furnace. Every Joyce-Cridland Jack is protected by a tempered steel hard plate back of the lifting bar. The lifting bars are high carbon steel forgings, the cap being solid with the bar. The pins are of high carbon steel, turned to a slight taper to prevent reaming the hole as it enters, then hardened and ground to a true fit to permit ease of lifting. The boxes or bearings for the lever pin are hardened steel. These bearings can be easily replaced at any time. The pinion is cast steel, with carefully milled teeth.

SCREW JACKS

JOYCE-CRIDLAND

Bell Base, Six-Way Head.

Showing 6-Way Head.

Joyce-Cridland Screw Jacks of all types have screws of the best machinery steel. The threads are half square, half "V" with square side to the load, and are milled instead of cut in dies.

The lever can be applied from six positions and need only be swung through an arc of 60°, nor is the screw weakened as where holes are drilled through the stem at right angles to each other.

These jacks have a closed flat base and will not cut rings into the blocks on which they are placed.

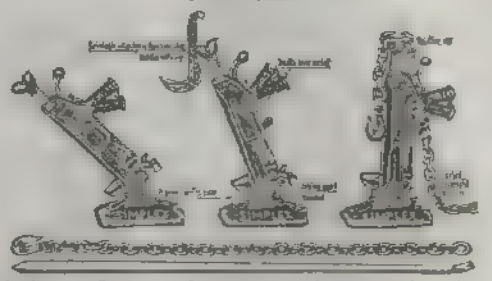
EMERGENCY JACKS

SIMPLEX



Double Lever Socket, Automatic Raising And Lowering. Universal Lifting And Pushing.

Malleable standard and base, drop forged steel working parts. It pivots on its base and can be operated at any angle or vertically. The auxiliary steel claw and steel chain permit of grappling loads in awkard or restricted positions. It is invaluable for pushing or moving heavy machinery, re-railing cars, extricating stalled motor trucks and general utility service. Used extensively by steam and electric railways, contractors, lumber mills, oil well operators, public utilities, transfer companies and industries.

Furnished complete with 5 foot steel chain, steel auxiliary shoe and 5 foot steel bar.

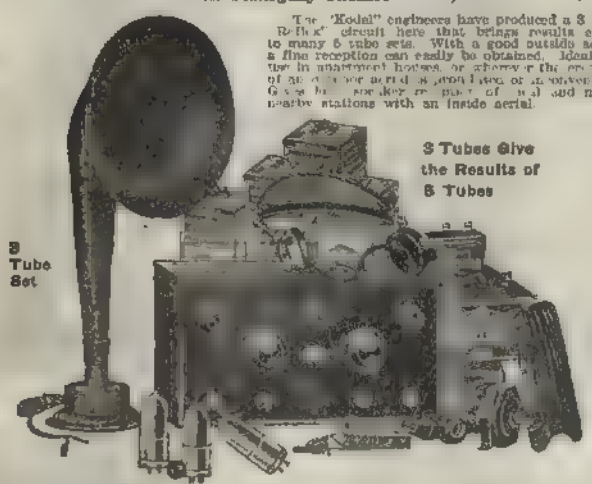
RADIO

Radio Sets and Supplies that measure up to a high standard—and the prices are rock-bottom. A merchant needs only one set for demonstration purposes and "Our Drummer" at his elbow to hook-up with one of the biggest money-making opportunities in today's merchandise field. We carry the stocks and you send us your orders as you make sales.

Kodel "C113" Set and Outfit

In Mahogany Cabinet



The "Kodel" engineers have produced a 3 tube Reflex circuit here that brings results equal to many 5 tube sets. With a good outside aerial a fine reception can easily be obtained. Ideal for use in apartment houses, or wherever the reception of the average aerial is poor. Tuning or receiving set is so simple that even a child can operate it. Gets broadcasting stations of real and many distant stations with an inside aerial.

Mahogany cabinet, 13 in. long, 7 in. high, 6½ in. wide; genuine formica panel. Circuit consists of "Kodel" detector unit, 1 stage of radio frequency amplification, 1 stage of audio frequency amplification. The reflex circuit permitting 3 tubes to do the work of 5. All binding posts are on rear of cabinet for straight panel wiring. Internal wiring all of flexible tinned copper wire insulated with varnished cambric tubing. Complete instructions with each set.

Receiving Set Without Any Equipment

1H6270—Kodel "C113" 3 tube receiving set.
Retails for $31.50

3 or more, Each **$22.05** Each **$23.63**

Complete Receiving Outfit

1H6271—Kodel "C113" 3 tube receiving set with the following equipment which makes a complete receiving outfit

3 Tubes, C13
4 "Red Seal" dry batteries
1 "Federal" 45 volt "B" batteries
1 "C" battery 4½ volts
1 "Manhattan Jr." loud speaker
1 Pair "Federal" headphones 2,000 ohms.
1 Grid leak
1 Aerial outfit

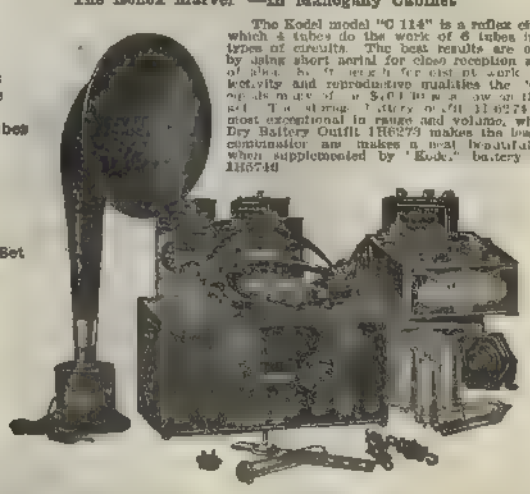
3 or more, Each **$46.00** Each **$47.60**

Important Notice

During the Summer season, from May to September we have reduced our catalogue showing of radio. Should you desire anything not listed in the catalogue, kindly refer to our APRIL book, where you will undoubtedly find it. As usual, the cost will be in accord with prevailing market prices—your orders will receive our usual prompt attention.

Kodel "C114" Set and Outfit

"The Reflex Marvel"—In Mahogany Cabinet



The Kodel model "C 114" is a reflex circuit in which 4 tubes do the work of 6 tubes in other types of circuits. The best results are obtained by using short aerial for close reception and one of about 50 feet length for distant work. In selectivity and reproductive qualities the "C 114" equals many of the $401.00 sets now on the market. The storage battery outfit 1H6274 is the most exceptional in range and volume, while the Dry Battery Outfit 1H6273 makes the best bulky combination and makes a neat beautiful outfit when supplemented by "Kodel" battery cabinet 1H5748.

Mahogany cabinet 13 in. long, 7 in. high, 7 in. wide. Circuit consists of "Kodel" detector 1 stage of tuned radio frequency, 2 stages of audio up to 6 and 1 stage of reflex audio and 1 detector. The reflex circuit permits of 4 tubes to do the work of 6. All binding posts are on rear of cabinet for straight panel wiring. Internal wiring all of flexible tinned copper wire insulated with varnished cambric tubing. Complete instructions with each set.

Receiving Set Without Any Equipment

Complete Dry Battery Receiving Outfit

1H6273—Kodel "C114" 4 tube receiving set with the following equipment which makes a complete receiving outfit

4 Tubes, C12
4 "Red Seal" dry batteries
2 "Federal" 45 volt "B" batteries
2 "C" battery 4½ volt
1 Pair "Federal" headphones
1 "Manhattan Sr." loud speaker
1 Grid Leak
1 Outside antenna outfit

3 or more, Each **$59.00** Each **$60.70**

We recommend the use of battery cabinet 1H5748 with the two above sets in order to simplify the operation and improve their appearance.

Complete Storage Battery Receiving Outfit

1H6274—Kodel "C114" 4 tube receiving set with the following equipment which makes a complete receiving outfit:

4 Tubes, 201A
1 6 ohm battery, 6 volt, 90 amperes.
2 "Federal" 45 volt "B" batteries.
1 "C" battery, 4½ volts.
1 Pair "Federal" headphones.
1 "Manhattan Sr." loud speaker.
1 Grid leak
1 Outside antenna outfit

3 or more, Each **$71.15** Each **$73.85**

Gets "Distance" On the Loud Speaker

5 Tube Set

Freshman "Masterpiece" Set and Outfit

Tuned Radio Frequency—Mahogany Cabinet—Non-Oscillating

Made by The Charles Freshman Co. The "Masterpiece" fits its name in every detail. A radio frequency set that is simple in construction and both easy and economical to operate. Receiving range 2,000 miles under favorable conditions. Excels in tone quality and faithful reproduction—very selective. The solid mahogany cabinet makes a beautiful addition to the furnishings of any home.

Genuine solid mahogany cabinet, 17½ in. long, 8 in. high, 9 in. wide, bakelite panel, 3 bakelite dials. Circuit consists of detector and 2 stages each of radio and audio frequency. Oscillation within the set is prevented by the improved neutrodyne circuit, wherein have been employed a special coil having a winding in which the primary and secondary are interwoven. This feature coupled with an improved low loss variable condenser makes one of the lowest loss units ever devised. Entire assembly is on the sub panel thus eliminating all body capacity and panel leakage, complete instructions with each set.

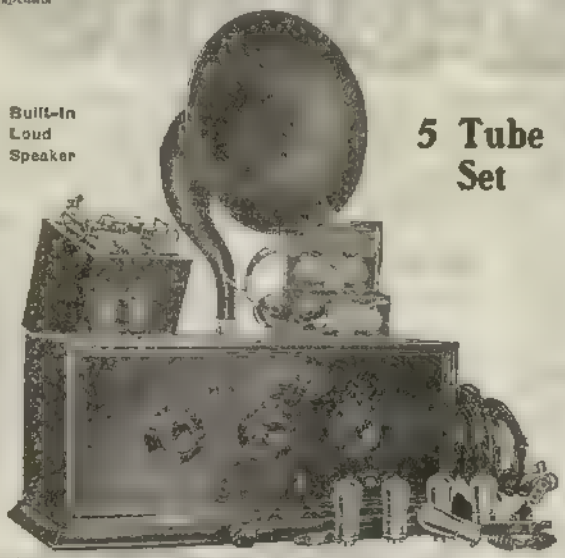
"Murdock" Neutrodyne Set and Outfit

NEW FEATURE "C" Battery to Cut Down "B" Battery Consumption

Twenty years of exclusive radio manufacture have enabled the William J. Murdock Company to produce through superior engineering and volume production the first 5 tube Neutrodyne set to retail for $100. This model includes a special improved type built-in loud speaker.



Set has many new features. Cabinet is mahogany finish, 27 in. long, 13 in. wide, 12½ in. high, and is roomy enough for "B" batteries. It has a recess for 45 volt "C" battery. Loud speaker is built in. Two variable condensers, special Neutrodons are built in. Tuning dials, illuminated, are panel mounted, type. Effective sound insulation is provided between loud speaker and receiving set, thus eliminating all whine or howl. Entire unit mounted on adjustable rubber cushioned feet, eliminating all vibration.

RECEIVING SET

Built-in Loud Speaker and Phone Plug.

1H4509—New "Murdock" 5 tube Neutrodyne receiving set with built-in loud speaker and phone plug only. Retails at $100.00. Each **$65.75**

Complete Receiving Outfit

1H4511—New "Murdock" 5 tube Neutrodyne receiving set with built-in loud speaker and the following equipment:

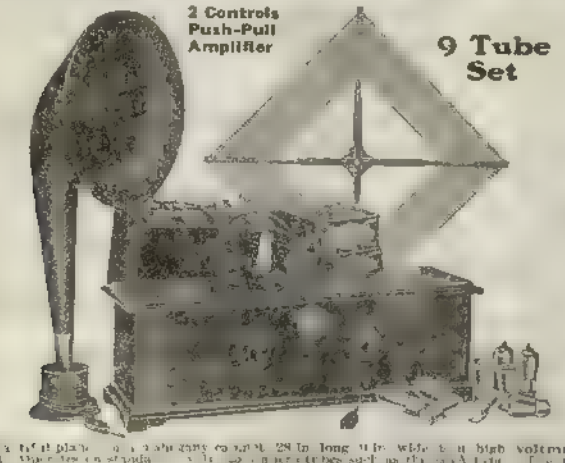
5 tubes, 3 A type
1 pair "Murdock" headphones
1 pair "Murdock" loud speaker
1 antenna outfit.
45 volt "B" batteries
6 volt "A" battery
1 plug volt "C" battery

Each **$101.00**

"Stanwood" Super-Heterodyne 9 Tube Set and Outfit

Voltmeter in Panel to Indicate Tube Voltage

A unique instrument involving but 2 controls. The super-heterodyne principle is superior to any other circuit in use today. The foremost features are: ease of operation, 2 super detector, 3 elimination of the outdoor aerial, combined with a marvelously selective, natural sound reproduction system, perfected through the push-pull amplifier. Money and labor have not been spared in an effort to achieve the height of perfection in this set. Complete instructions with each set.



Panel is of black fibre, and is 28 in. long, 9 in. wide, and 8 in. high. Voltmeter in panel shows exact voltage of tubes, thus enabling you to keep each tube at its most efficient point. This eliminates guesswork and gives better results. Uses one-half per tube than on outfits employing tubes of the 5 volt variety. Signal strength is greater and gives longer range.

Receiving Set With "C" Battery Only

1H9806—Stanwood 9 tube push-pull super-heterodyne receiving set with built-in loud speaker and battery cut-in. Retails for $250.00. Each **$152.50**

Complete Receiving Outfit

1H9811—Stanwood" 9 tube push-pull super-heterodyne receiving set with the following equipment which makes a complete receiving outfit:

9 tubes, 201A type
1 storage battery, 6 volt, 120 ampere.
1 pair "Murdock" headphones
1 pair "Murdock" loud speaker
1 antenna outfit.
Necessary hook-up wire.

Each **$213.75**

IMPORTANT NOTICE

All radio outfits and supplies are carefully inspected and tested before shipment and should be mechanically and electrically perfect when received. If, for any reason, radio supplies received seem defective or not as bought, write us for instructions. A slight exchange of letters will in most cases correct the difficulty.

We are unable to accept the return of radio goods unless and until you have written us for shipping instructions. This is in your interest as well as our own. All goods found defective after test will be replaced without charge but cannot be accepted for credit or purchases of other material.

"Ureco" Improved Tubes

Made by the United Radio and Electric Co. from highest grade materials by skilled workmen. You can definitely depend upon "Ureco" tubes for superior performance in broadcast reception. Each in carton to prevent breakage.

"OUR GUARANTEE"

All "Ureco" Tubes are carefully inspected both at the factory and in our own laboratory by testing a perfect tube but should you receive a "Ureco" Tube that does not meet with your approval we will exchange it or credit you with the amount as you wish. If tubes, they are returned to us within five days after receipt. We will replace any tube except when the glass is broken or the filament burned out.

All tubes must be tested immediately upon receipt of same if any claim whatever is to be made. We will not accept return of a tube for inspection unless it is contained in the original carton and our five days return policy is observed.

1H5810—(Mfrs U139) 3 volt detector or amplifier tube, requires dry cell or battery of 3 volts. Operates 8 to 10 volts may be used, but if so plate voltage should be reduced using a No. 6 dry cell. A resistance of 30 ohms is necessary. Used with Special small socket or with adapter. 1 in carton. Each **$1.80**
Lots of 6, Each **1.70**
Lots of 12, Each **1.60**

1H5815—(Mfrs U200) 5 to 6 volt detector only tube, consumption 1.00 amperes. Operates on storage battery with a critical plate voltage 8 to 10 volts being required. 1 in carton. Each **$1.80**
Lots of 6, Each **1.70**
Lots of 12, Each **1.60**

1H5820—(Mfrs 201A) 5 to 6 volt detector or amplifier tube consuming .25 amperes. For use with any battery that is adequate for the current and it will work equally well with storage battery. Used for detector and amplifier. 1 in carton. Each **$1.80**
Lots of 6, Each **1.70**
Lots of 12, Each **1.60**

1H5800—(Mfrs U11) 1½ volt detector or amplifier tube especially designed for dry cells, more than 1 cell must not be used. Uses plate voltage ranging from 20 to 100 volts. For use with special socket or in standard socket with adapter. Has extremely long life. 1 in carton. Each **$1.80**
Lots of 6, Each **1.70**
Lots of 12, Each **1.60**

1H5801—(Mfrs U12) 1½ volt detector or amplifier tube same as U11 1H5800 except that it has 6 prongs, with standard base for use with standard socket. 1 in carton.
Each **$1.80**
Lots of 6, Each **1.70**
Lots of 12, Each **1.60**

LOUD SPEAKERS

"Manhattan Jr."

1H9745—Has built-in 10 in. diam. fiber composition horn, heavy metal base, special "Manhattan" reed operated modulator in base with patented adjusting feature. One of the most attractive $10.00 loud speakers on the market. 1 in carton. Each **$6.00**

"Manhattan"—2555

1H9787—30 in. high bell 14 in. diam. fiber composition horn, heavy metal base, special flare composition horn. Performs satisfactorily to the extreme ends of the musical scale. Equipped with "Manhattan" modulator. Can be adjusted to suit relation to the number of tubes and varying strength of the "B" battery, with 5 ft. of silk cord and standard "Pacent" plug. 1 in carton. Each **$11.70**

HEADPHONES

"Pacent"

"Pacent"—Well constructed drawn aluminum shell, large size, comfortably constructed magnet, tested and matched for tone, metal parts nickel plated, cloth covered head bands, moisture proof cord. 1 set in box.

1H8344 — 2,200 ohms. . . Set **$2.75**
3 or more, Set **2.60**

1H8345 — 3,000 ohms . . Set **$2.95**
3 or more, Set **2.85**

"Murdock"

"Murdock"—(Mfrs 55) Best quality steel bi-polar magnets, metal parts nickel plated, phosphor bronze flat spring head band covered with black mercerized cotton webbing, regulation phone cord.

1H8351 — 2,000 ohms . . Set **$3.00**
3 or more, Set **2.70**

1H8352 — 3,000 ohms . . Set **$3.40**
3 or more, Set **3.00**

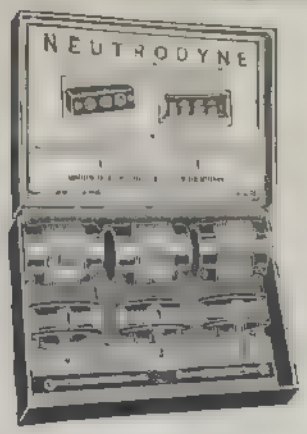
"Manhattan"

1H0738 "Red Seal," 2,200 ohms resistance, special high carbon steel core maintains sharpness of the special Swedish steel diaphragms, metal parts nickel plated, cloth cover, special moisture proof head bands, extra heavy cord. 1 set in box. Set **$4.20**

"Federal"

1H9962 Mfrs. Western Electric "Federal" 7 A type. Light weight, extra special parts, perfect tone, long distance. Head band is adjustable to any size head. Cords are 4 ft. long, moisture proof cord. Each tested and matched for tone. 1 set in box.
Set **$5.00**
6 or more, Set **4.75**

RADIO SETS AND PARTS



SET OF SPECIAL PARTS FOR NEUTRODYNE CIRCUITS

Contains the essential parts required for the Neutrodyne Set, three Neutrodyne coils mounted on variable condensers, and one double Neutrodon or capacity balance neutralizing adjustment device. Complete wiring diagram for the three and five tube Neutrodyne sets with complete instructor.

RADIO SETS AND PARTS

REGENERATIVE RECEIVING SETS COMPLETE VACUUM TUBE TYPE RADIOLA

RADIOLA VII-B

A five tube dry battery operated regenerative couple-circuit receiver, has 2 stages of tuned radio frequency and 2 stages of audio frequency amplification, highly selective and sensitive, provides reception over extraordinarily long distance when used with carefully constructed outdoor aerial having low resistance losses. Properly installed, Radiola VII-B will receive coast to coast reception on a loud speaker. Self-contained loud speaker enclosed in beautiful finished mahogany cabinet, space provided in cabinet for necessary dry batteries.

The antenna furnished with this set includes everything necessary; 150 feet of stranded copper wire, 25 feet No. 14SBRC lead in wire, 20 feet No. 18 rubber covered ground wire, 1 No. 200 lightning arrester, 1 No. 708 battery switch, 2⅞x6 inch porcelain tubes 8 No. 1NC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 connector and 12 insulated staples. Set includes the following:

	Each
No. VII-B—Receiver including built in loud speaker and 6 only UV199 tubes	605 25
	$269 00
No. 66—"A" Batteries (6 only)	90 *60*
No. 767—"B" Batteries (2 only)	7 86 *3 75*
No. 750—Bias Batteries (2 only)	54 *30*
No. BGA—Antenna equipment	12 00 *6 00*
	Per Set
No. VIIB-C—Complete	639 45
Carefully packed in cartons; wt per set 90 lbs.	*$285 10*

RADIOLA SUPER-HETERODYNE

Radio Corporation of America. Operating Distance 2000 Miles.

An instrument destined to achieve universal popularity among those who desire an equipment that can be moved from place to place, and requires neither aerial nor earth connector.

A self contained loop of the rotary type is housed in a semi-portable cabinet with self contained fixed loop of small dimensions. Space is provided in the cabinet to accommodate all the necessary dry batteries.

The loud speaker is mounted externally. A leather handle provides portability. This receiver operates a loud speaker during favorable periods of the year up to 2000 miles, but with a suitable external loop will provide a performance of 3000 miles. May be carried from room to room or transported from point to point in automobile and actually operated while the automobile is in motion.

Set includes the following:

	Each
No. SH—Receiver, with (6 only) UV 199 tubes and UZ 1325 Loud Speaker	605 25
	$269 00
No. 771C—Battery (1 only)	1 26 *60*
No. 772B—Batteries (2 only)	7 86 *3 75*

RADIO SETS AND PARTS

RADIOLA VIII DE LUXE

Radio Corporation of America. Operating Distance 3000 Miles.

A six tube dry battery operated Super-Heterodyne, utilizing a new principle, the second Harmonic oscillator, yet simplified for everybody's operation. Only two tuning controls need manipulation to bring in the entertainment from local and far distant stations. Local broadcast stations need only be heard when desired, for the Super-Heterodyne provides selectivity unattained by any other known principle. Programs of far distant stations can be heard even when several local stations are in operation provided there is a difference in wave length between the distant and local station.

Radiola VIII requires neither aerial or earth connector. A self contained loop of the rotating type mounted in the base of cabinet does the trick, giving good speaker volume over long distances and during favorable periods of the year a range of reception up to 3000 miles is possible.

It comes ready to operate and calls for no initial installation expenses. Merely insert the tubes, connect up the dry batteries and rotate the tuning dials. Built with new amplifying transformers, resulting from new discoveries which accentuate the lower base notes and the higher treble tones giving purer and better reproduction.

It is a receiver of the non-radiating type permitting several sets to be operated in the same room each tuned to a different station.

An attractive beautifully finished cabinet providing easy accessibility and a host of other features tending toward better and easier operation.

Set includes the following:

		Each
No. RVIII—Receiver, including six UV199 radiotrons, built in loud speaker, less batteries		956 25 *$435 00*
No. 771C—Battery (1 only)	1 26	*60*

No. 66A—Batteries (6 only)	90	*50*
		Per Set
No. RVIII-C—Complete		978 63
Carefully packed in carton; wt per set 175 lbs.		*$436 10*

RADIOLA III A

Radio Corporation of America.

A four tube regenerative receiver consisting of the Radiola III and the Radiola III balanced amplifier mounted in one unit.

This receiver combines all of the latest improvements known in single circuit regenerative receivers.

The antenna includes everything necessary: 175 feet copper welded antenna wire, 50 feet No. 14 lead in wire, 25 feet No. 14 ground wire, 1 protector, 3 strain insulators, 1 porcelain tube, 3 screw eyes, 6 split knobs, 12 insulated staples, 8 wood screws and 1 ground clamp.

Set includes the following:

		Each
No. IIIA—Receiver, including 4 No. WD11 tubes and head phones, less batteries		162 00 *$75 00*
No. 767B—Battery (2 only)	7 86	*3 75*

RADIO SETS AND PARTS

RADIOLA III

Radio Corporation of America. Operating Distance 1500 Miles.

A two-tube regenerative receiver, dry battery operated of an improved type. Will operate a loud speaker on local stations and on long distance stations during favorable months of the year; with head phones will receive up to 1500 miles. Selective tuning adjustment enabling the broadcast listener to select one of a group of local stations without overlapping but by merely changing the position of switch, broader tuning and greater sensitiveness are provided, permitting reception from distant stations.

The antenna includes everything necessary: 175 feet copper weld antenna wire, 50 feet No. 14 lead in wire, 25 feet No. 14 ground wire, 1 protector, 3 strain insulators, 1 porcelain tube, 3 screw eyes, 6 split knobs, 12 insulated staples, 8 wood screws and 1 ground clamp.

Set includes the following:

		Each
No. III—Receiver, with two WD11 tubes and one pair head phones		84 00 *$35 00*
No. 767B—Battery (1 only)	7 86	*3 75*

		Per Set
No. RIII-C—Complete	100 56	*$43 25*
Carefully packed in carton; wt per set 18 lbs.		

BALANCE AMPLIFIERS

For Radiola III.

	Per Set
No. IIIBA—A two tube improved amplifier unit of the push pull type which when added to Radiola III constitutes a four tube receiver	72 00 *$30 00*
Carefully packed in carton; wt per set 12 lbs.	

FOUR PHONE PLUG ADAPTERS

For Radiola III

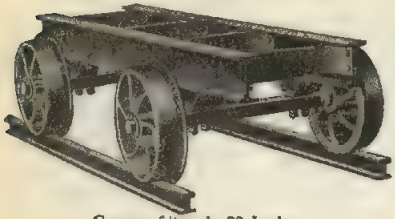
The prongs are so designed that they fit the phone holes in face of panel on case of Radiola III, and will accomodate any number of head sets from 1 to 4, all in series.

The cord tips are securely held in holes in the front by an improved spring grip which makes good contact with tips of any size.

	Each
No. 624—Diam contact prongs 3/32 in; length 3/4 in; 1 in. centers	$2 10
One in cardboard tube, 10 tubes in stand pkg; wt each 2 ozs.	

No. 33 Steel Billet Car

Capacity, 2 Tons
For Iron or Steel Billets, Etc.



Gauge of Track, 30 Inches

Designed especially for handling light billets in iron and steel mills. Frame of 6-inch steel I-beams, length, 7 feet; width, 20 inches; four double cross trusses of steel, 2½x½ inches, riveted together; V-shaped at ends, and double riveted to side sills, as shown in cut; steel axles 2 inches square, wheels 16 inches diameter. Weight, 740 pounds.

Prices on application.

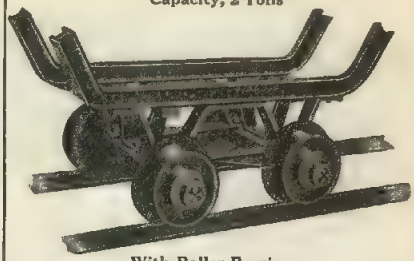
No. 720 Ingot Cars

For Copper or Other Metal Ingots and Billets
Capacity, 2 Tons



With Roller Bearings

Gauge of track, 18 inches; roller bearings of cold drawn steel; length between rails at top, 47 inches; width outside rails at top, 14½ inches; height from rail to top of T-rack, 27½ inches; rack, 20-pound T-rails; cross and side axle brackets, 2½x½-inch steel; steel axles, 2¼ inches square; wheels solid web chilled face; diameter, 9 inches; face, 3¼ inches; cold drawn steel rollers, ⅝x4 inches, 12 in each bearing. Weight 475 pounds.

Prices on application.

Mining Cage, Leadville Type

Built entirely of mild steel and Norway iron. All joints machined and fastened together with turned steel bolts, no rivets used. The highest type of cage for severest service.

Single-deck cage, weight 1,400 pounds. Double-deck cage, weight 2,000 pounds.

Prices on application.

We can supply Belted hoists with reversing friction swinging drums for derrick or excavator work---prices quoted upon request.

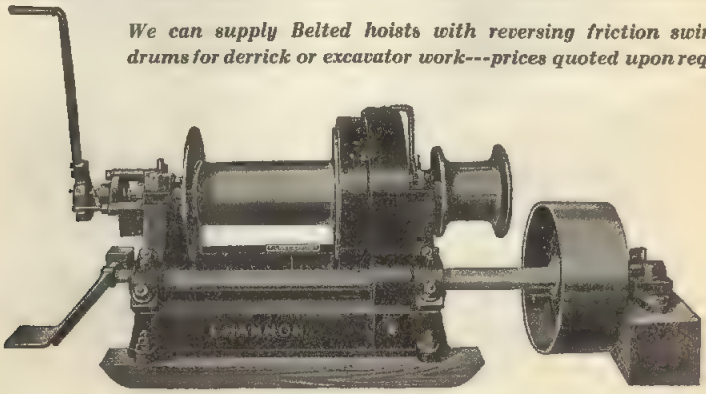

Fig. G-1418

Hoist equipped for pile driving with turned winch head and extended pulley shaft having outboard bearing. The drum is used for the hammer line and the winch head for the pile line. Belted to a gasoline engine, this makes a popular outfit for light work, requiring frequent moving. Extra price sizes 1025 to 1028.....Prices Quoted upon Application.

We carry an immense stock of machinery of all kinds in our Chicago warehouse.

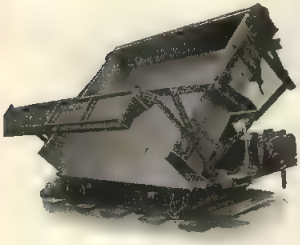
Contractors' Steam Shovel Dump Cars



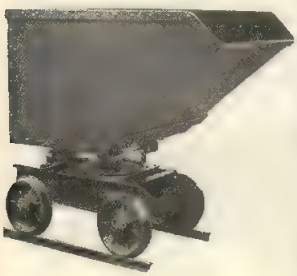
No. 1383.

These Dump Cars are fully illustrated and described in a special Catalogue which we will gladly send you on request.

These cars are declared by steam shovel and car men to be superior to all others, both in construction and operation

The type shown here is built to level capacities of 1, 1½, 3, 4 and 6 cubic yards, and is used with steam shovel for handling excavated material.

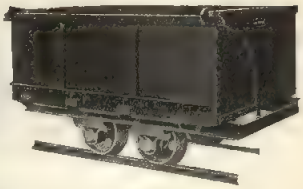
Rotary Scoop Car



No. 1384.

For use where a sharp dumping angle is desired. It may be dumped forward, or to either side. A handy car for use in mines, also in foundries and rolling mills for charging cupolas. All-steel construction, well reinforced.

Coal Cars



No. 1385.

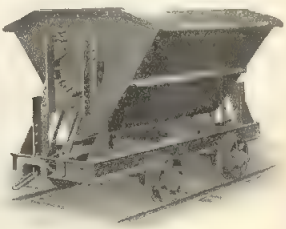
For the same use and of the same general design as Coal Wagon above but having a larger capacity Also furnished having capacity of 2000 lbs. and with wheels 12" diam.

Mine Skips

No. 1386.

Designed for conveying ore up steep inclines. Dumping wheels at the rear take special track on tipple and skip is dumped automatically Made in two capacities, 50 and 30 cu. ft.

"V" Dump Car



No. 1387.

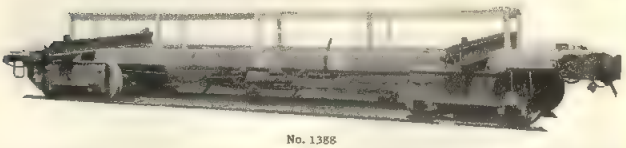
It is used not only by contractors, but in all kinds of industries for carrying all classes of material, wet or dry, such as concrete, clay ashes, sand, earth, rock, etc.

This car is accurately balanced and therefore easy to dump, and in dumping makes a positive and complete discharge. The double locking device insures against dumping on the wrong side of the track. For convenience in loading by hand, the body may be locked in a tilting position.

This car will be found especially suitable for use by road contractors in hauling all kinds of material to and from road paving jobs. It is built in 1-yard, 1½ and 2-yard capacities

Connected Logging Trucks

80 000 LBS. CAPACITY



No. 1388

These logging trucks are designed and constructed to meet the most exacting qualifications required of all modern logging equipment. The highest quality of workmanship and materials, make these trucks extremely reliable under all service conditions. Every part is thoroughly tested to withstand severe strains incident to the dropping of heavy logs, bad road bed and over load.

We are able to furnish information on different types of logging trucks and will be glad to do so on request.

One End of Connected Logging Truck jacked up to illustrate flexibility of Side Frame

SPECIFICATIONS

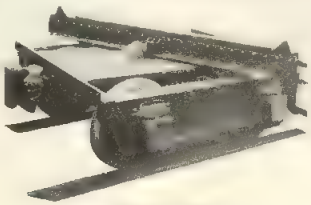
The side frames consist of 20" 65 lb. I-beams, recessed at the end to receive cast steel pedestals of ample strength. **The Springs** consist of a double coil 7 x 7 x 1¾" outside diameter and one inch inside coil. One double coil spring placed over each journal box and of ample strength to give a loading capacity of 230,000 lbs. per car. **Wheels** are 33" 600 lbs. **Brake Beams** are inside hung. **The Bunks** are provided on either side with roller side-bearings of a simple, but substantial design. These roller bearings rest upon the six inch top of the side frame which provides a rollway for them. By the use of these roller bearings it is impossible to get a bunk-bound load. Brasses, couplers and draw bar springs are MCB Standard.

Disconnected Logging Trucks

No. 1389

Solid Side Frame, 100,000 lbs. capacity

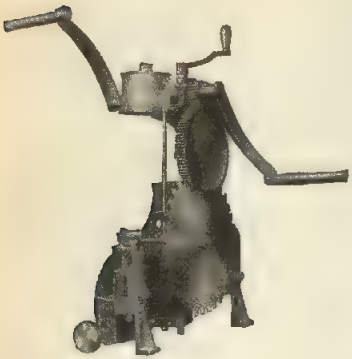
The disconnected logging trucks are designed and constructed to withstand hard service. The material and workmanship used in its manufacture are of the highest. Every part is thoroughly tested to a high degree of efficiency and can be depended upon as reliable under almost any condition.



SPECIFICATIONS

Side Frames consist of 20" 65 lb. I-beams, recessed at the end to receive cast steel pedestals of ample strength. Axles are of the best hammered steel with 5 x 9 journals and to conform to MCB Specifications. **Springs** consist of a double coil 6 x 8 x 1⅝" outside diameter, and a 1" inside coil. One double coil spring placed over each journal box of ample strength to permit a loading capacity of 200,000 lbs. per set of trucks. **The Journal-Boxes** are of cast steel, pedestal type with MCB 5 x 9 specifications. Brasses, couplers and draw bar springs are MCB Standard.

No. 7 "Q and C" Portable Rail Saw



Designed for cutting off rails at any angle with their length. The saw blade commences cutting in the center of the head of the rail, and will make a true vertical cut at whatever angle desired, leaving the ends of the rail perfectly smooth and straight.

This saw has sufficient capacity for cutting all steam rails up to 135 pounds per yard and will cut all rails up to a 7-inch girder rail in track, and higher rails out of track, by reversing rail after half of cut is made.

The reducing gear is arranged on the slide supporting the saw blade and a simple form of automatic feed lowers the saw at the proper speed for cutting the head or base of the rail. This is accomplished by means of a friction nut, located on the feed screw, which can be quickly released to feed the saw by hand through the web of the rail, or in the return of the slide, by means of the feed screw crank.

A pawl prevents the saw blade from being turned backwards, which must never be done while cutting.

The saw blade is 18 inches in diameter, $\frac{5}{32}$-inch thick. Maximum depth of cut is 7¾ inches.

Special high speed steel blades furnished at extra charge.

Dimensions, 19x30x32 inches. Gross weight, 375 pounds. Net weight, 300 pounds. Price **$250.00**

Price includes two saw blades and necessary wrenches.

Saw grinder—for sharpening the blades—can be attached to a bench in the shop and belted to run about 1200 R. P. M. Price of grinder **$30.00**

The Racine High Speed Rail Cutting Machine

Cuts Any Size Rail Quickly without Removing from Track Bed

This machine is of the draw-cut type, embodying all the exclusive features of "Racine" High Speed Metal Cutting machines.

It is the only unit of its kind manufactured and is practical, sturdily built, very fast and accurate. Its great simplicity obviates the necessity for an experienced operator.

The cut is clean and accurate, and the saving in blade expense will pay for the machine several times over, not to mention the enormous saving of time and labor over the old method of cutting a rail with two men, by hand. This machine will make four straight smooth cuts, while two men are making one cut by hand.

The machine operates without the necessity of removing rail from track bed. A pair of quick acting clamps, readily adjusted to any size or width of rail permit machine to hang on the rail without bolting, and hold tightly in cutting position by machine's own weight. When once adjusted for any rail the clamps need no further adjustment and two men can easily lift machine, on and off the rail without turning a screw or nut.

Cutting operation is automatic, in that when started, no further attention is necessary until cut is finished.

Motor equipment is furnished, either for overhead trolley connection or for lower voltages such as generated by gasoline engine-driven outfits for steam railroad use. With the 550 volt D. C. current usually used on Electric Railways a fully enclosed interpole ball bearing motor with starter is provided, taking current direct from trolley wire or third rail; and specially wound to withstand these high voltages which usually vary from 250 to 600 volts.

A 14 x ¾ x 049 gauge 10 tooth hack saw blade is used, and the machine will cut rails up to 9 inches in height and 6 inches in width. In ordinary production the machine will cut a 90 or 100 pound rail in from 10 to 15 minutes.

Cutting time is 12 to 15 minutes per cut, depending on size of rail.

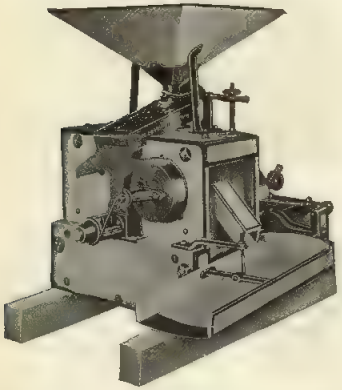
CORN AND FEED MILLS

*CORN KING



The Corn King mill is especially built for making the old-fashioned "water ground" meal which commands a premium on every market.

It will also grind graham, whole wheat and buckwheat flour and any grain or mixture of grain into soft feed

The Corn King is the only popular priced mill on the market containing genuine Brushite blue pebble stone burrs. This stone will not glaze or get slick and will grind cooler and faster and wear longer without dressing than any other mill stone.

Corn King mills are built in eight sizes to meet every need, from individual farm work to that of the largest custom mills.

Every mill is fully guaranteed

In the construction of these mills thoroughly seasoned forest pine is used for the framework, the burrs are carefully selected, properly furrowed and paired up to match in texture and equal in hardness.

The grain feed is regulated by a hand wheel and is easily adjusted to any capacity.

Each mill is fitted with specially made ball bearings, which work against the thrust end of the shaft which is made of cold rolled steel, carefully machined

They are equipped with double screen-cleaning shoes and patented reverse lock lever controlling the fineness of the meal, and bolter burrs cannot jar apart or run together while the mill is in operation.

Size No.	Horse Power	Pulley, In.	Capacity Per Hour, bu	Speed, R. P. M	Weight, lbs.	Each

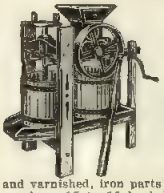
CIDER MILLS AND PRESSES

CIDER MILLS



The Senior

A large powerful mill of ample capacity where much fruit is handled. Equipped with two cranks for ease in operation.

Hardwood frames, poplar troughs which are tasteless, improved grinders and rolls, extract all the juice, steel shafts and press screws, self-aligning boxes, parts are all carefully machined and assembled, wood parts are all striped and varnished, iron parts painted and decorated. Capacity per hour 15 to 18 bushels. Tubs 14x17 in. Legs 46 in. Press screw 2x23½ in. Pulley 2½x18 in.

Senior Weight 340 lbs. . . . . Each **$123.00**

Medium and Junior

Regularly equipped with a crank and heavy 16 in. balance wheel for hand operation. In materials used and details of construction including the self aligning bearings, they are practically the same as the Senior.

In size and capacity both are smaller, the Junior being the lightest of the three.

Size, name	Medium	Junior
Capacity per hour, bushels	10 to 12	6 to 8

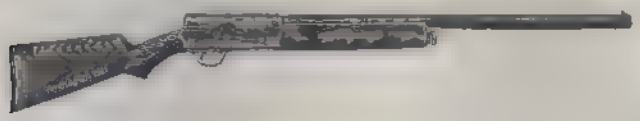
SHOT GUNS

REMINGTON AUTO-LOADING

These guns are especially designed for very quick shooting. They combine all the good features to be found in any gun, and more; they are a hammerless, auto-loading, ejector, repeating gun. After a shot has been fired, the recoil opens the breech, ejects the empty shell, inserts a new one, cocks the hammer, closes and locks the breech, and leaves the arm ready to be fired again by simply pressing the trigger. The receiver is solid on top, which keeps dirt and rain from getting in. The breech bolt does not slide out, nor is there any kind of opening in the rear; consequently it is impossible, no matter what might occur, for gas, grease, firing pin, breech bolt, bursted head of shells or anything else to fly back through the receiver in the eye or face. The top of the receiver is finely matted, which is of great assistance in taking quick, accurate aim.

Full choke barrel will shoot 70% of the load or over in a 30 inch circle at 40 yards.



Hammerless, Take Down, Model No. 11, Five Shot. Standard Grade.

Barrel—Remington steel, full choke, modified or cylinder bore.

Stock—American walnut, with half pistol grip not checkered; rubber butt plate; length of stock 14 inches; drop 2½ inches at heel and 1⅝ inches at comb. Extra charge for any variations from these dimensions.

When ordering, specify length of barrel.

	Each
No. 11A-30—12 gauge, 30 in barrel; wt 8 lbs	$166 50
No. 11A—12 gauge, 26 or 28 in. barrel; wt 7¾ lbs	166 50
Extra Barrels for above gun	✣68 25
No. 11A1—Same as No. 11A, except it has two interchangeable barrels, viz.: one 26 in. cylinder bore and 28 in. full choke	234 75
No. 11A-MR—Same as No. 11A, except has matted rib, furnished in 28 in. modified or full choke only	192 00
No. 11A1-MR Same as No. 11A, except it has two matted rib interchangeable barrels, viz: one 26 in. cylinder bore and 28 in. full choke	286 20

Ten in wood case.

Riot Grade.

For express messengers, guards, banks, or home protection, street disturbances, etc., no small arm is so effective as this gun, loaded with buckshot, with 20 inch cylinder bore barrel, otherwise same as No. 11R.

Extra Barrels—26 or 28 in	✣ 124 95

Ten in wood case.

EXTRAS

For Remington Model No. 11 Auto-Loading Shot Guns.

In all cases, extra barrels must be fitted at the factory.

When ordering extra barrels for guns already in use, the complete gun, including the old barrel, must be returned to the factory, so that both barrels may be made to interchange on the same receiver.

	Each
***Solid Ribbed** barrel, add to price of plain barrel	✣$25 80
Raised Ventilated Rib	✣ 41 85
Any length or drop of stock made to order at an advance of	47 85

*The solid ribbed barrel is particularly appreciated by shooters who have used a double gun and therefore are accustomed to a continuous line of sight. It also prevents the reflection of light on the top of the barrel from interfering with the shooter's sight. The barrel and rib are made in one solid piece, hence a rib can not be fitted to a plain barrel.

✣F. O. B. New York Factory Only.

RIFLES

REMINGTON REPEATING

The Remington solid breech hammerless take down 22 caliber repeating rifle is the latest addition to the modern Remington idea. It is modeled after the lines of the Remington pump gun, which has established the reputation of having the most graceful lines of any repeating arm on the market.

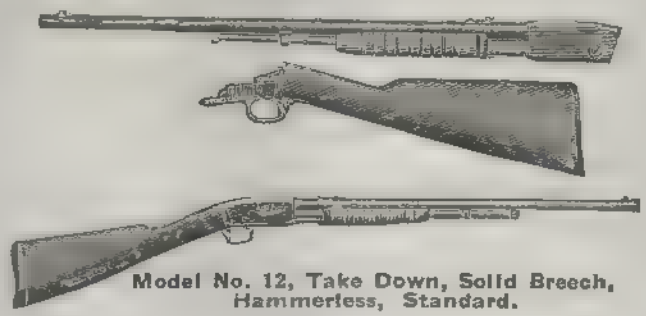
The action is strong and simple, and has fewer parts than any other repeating rifle. The positive extraction and feeding of cartridges and the absolute locking of the action when cocked, together with other excellent features, places this rifle far in the lead

Solid Breech—The top and rear of the receiver is positively closed, protecting the shooter's face from blow backs, gases, etc., and preventing rain, dirt or foreign substances of any kind from entering the action.

Safety—The safety which is absolutely positive, is conveniently located just back of the trigger, and when set securely locks the trigger, thus preventing accidental discharge.

Side Ejector—The ejected shell is thrown out the side, away from shooter, and in no way interferes with the aim in rapid shooting. The ejector slot is of sufficient size to readily admit of single loading.

To Take Down the Gun—Unscrew the assembling screw on the left hand side of receiver (a stop pin prevents its dropping out); holding the barrel and fore-end in one hand and stock in the other hand, pull gun apart, cock hammer before putting gun together.



Model No. 12, Take Down, Solid Breech, Hammerless, Standard.

16 Shot.

Remington steel, round barrel, 22 inches long, straight grip; walnut stock; fitted with rubber butt plate; weight 4½ lbs.

Chambered to take without any adjustment, 22 short, long and long rifle cartridges. Magazine capacity 16, 22 short, 12 long or 11 long rifle cartridges.

One in cardboard box; one gro in case.

PEARL STOCKS

Pearl properly speaking, Mother of Pearl) is cut from the inside of the shell. A portion of the pearl is yellow and a portion is blemished, balance fair to fine. We use for our pearl stocks only the best selected material, and for this reason our prices cannot be as low as you may find quoted on inferior grades. Our prices, however, are in keeping with the quality.

RIFLES

REMINGTON "MILITARY MODEL"

(Formerly called "Boy Scout" Rifle.)

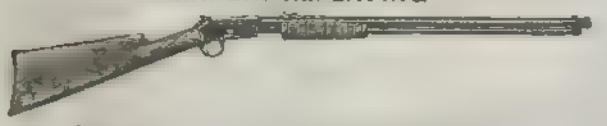
This is a semi-military arm, with sling strap bayonet and scabbard, chambered for 22 caliber short ammunition. It is fitted with a front sight similar to the military type and has a folding rear sight. Its extreme accuracy and splendid handling qualities recommend it particularly for drill and target work, while it has as good penetration as any other 22 caliber rifle.

Remington steel barrel, 28 inches long, length over all 43 inches. Walnut stock and fore-end, dull finish. Weight 5 lbs.

	Each
No. 4S-22—22 caliber, shoots 22 Shorts, Nos. 22SL, 22SB, 22SSU, 22SSG, 22SSHP and 22SLHP	✦$47 10

Ten in wood case; wt per case about 70 lbs.

MARLIN REPEATING



Model No. 37, Take-Down Slide Action.

Handles without change or adjustment all 22 short, 22 long and 22 long rifle cartridges. Slide action; side ejection; solid top. Barrel and receiver blued finish; hard rubber butt plate. Barrel made of best quality gun barrel steel; ivory bead front and flat top Rocky Mountain rear sight. Walnut butt stock and action, slide handle; length barrel 24 inches.

Magazine capacity 15, 22 shorts, 12, 22 long or 10, 22 long rifle cartridges.

22 caliber; shoots R. F. cartridges; **22 shorts**, Nos. 22 SL, 22SB, 22SSU, 22SSG, 22SSHP, 22SLHP; **22 Longs**, Nos. 22LL, 22LB, 22LSU, 22LSG, 22LSUHP, 22LLHP. **22 Long Rifle**, Nos. 22LRL, 22LRS, 22LRSHP, 22LRHP.

REMINGTON REPEATING

High Power, Take Down, Solid Breech, Hammerless, Six Shot.

A high power, slide action repeating rifle, perfect in operation, which combines rapidity of fire, strength, simplicity, and light weight.

This rifle has the famous solid breech. A thick wall of solid steel between the firing chamber and the shooter's face, affording absolute protection against injury from blow-backs or defective ammunition, and also prevents dirt, snow and other foreign substances from entering the mechanism.

The take down is remarkably strong and simple. The rifle is as strong as any solid frame rifle, and will not become loose under the hardest usage

A new form of magazine is provided which holds the cartridges end to end, and at the same time absolutely prevents any bullet in the magazine from coming in contact with the primer of the next cartridge ahead.

Special ordnance steel round barrel, 22 inches long; patented quick adjustable No. 1 buck horn rear sight, and new design copper bead front sight; American walnut stock, with half pistol grip, fitted with shot gun steel butt plate. Weight 6¾ lbs.

Each

No. 14A-25—25 caliber; shoots Nos. 25RMC and 25RSP center fire cartridges ..... ✦$132 75

Ten in wood case, wt per case about 90 lbs.

✦F. O. B. New York Factory Only.

RIFLES

REMINGTON AUTO LOADING REPEATING

Model No. 24—22 Caliber.

Take-Down, Solid Breech, Hammerless, Standard Grade, Sixteen Shot.

Embodies new and exclusive features in small auto-loading arms.

Has the hammerless, solid breech, take-down construction. The interrupted thread system of take-down is operated in a second's time and allows cleaning the barrel from the breech in the proper manner.

Action-simple, strong and readily taken apart for cleaning; bottom ejection.

Take-Down-quick, strong and dependable, being the same interrupted thread system used in Remington repeating shot guns.

Safety-cross-bolt type, conveniently located in front portion of trigger guard for operation with trigger finger.

Magazine-capacity fifteen 22 short cartridges which are loaded by drawing magazine tube to rear and inserting cartridges in loading hole in side of stock.

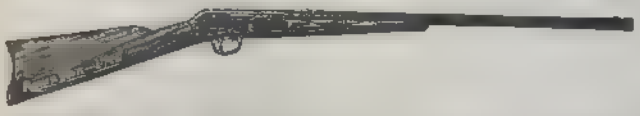
Barrel-Round, Remington steel 19 inches long; adjustable straight bar rear sight and white metal bead front sight; receiver matted.

Stock-American Walnut, with half pistol grip; steel butt plate. Weight-about 4¾ lbs.

	Each
No. 24A-22—Shoots 22 short rim fire cartridges	$75 00
No. 24A-22LR—Shoots 22 long rifle cartridges	75 00

Ten in wood case; wt per case about 80 lbs.

REMINGTON AUTO LOADING REPEATING



Model No. 16. Take Down, Solid Breech, Hammerless Standard Grade, 22 Caliber Sixteen Shot.

It combines the self-loading principle in its highest development, rapidily of fire, strength and simplicity far in excess of other 22 caliber auto-loading rifles. Has the famous solid breech. A thick wall of solid steel between the firing chamber and the shooter's face, affording absolute protection from blow-back or defective ammunition, and also prevents dirt, snow and other foreign substances from entering the mechanism.

Take down is the strongest, quickest and simplest known, and embodies perfect mechanical features to preserve alignment of the barrel with the frame.

Magazine—A simple tube, holding fifteen cartridges, is arranged within the stock where it is protected from injury incident to rough usage in all conditions. The loading hole is on the bottom of the stock and not at the side.

Remington steel barrel 22 inches long; adjustable straight bar rear sight and white metal bead front sight; American walnut stock, with straight grip, fitted with steel rifle butt plate.

	Each
No. 16A-22—22 caliber; shoots No. 22RA rim fire cartridges	+$112 50

Ten in wood case; wt per case about 80 lbs.

+F. O. B. New York Factory Only.

RIFLES

REMINGTON AUTO-LOADING REPEATING

The recoil or "kick" is utilized to reload, which reduces the shock on the shoulder, adds to the pleasure of shooting, and to the rapidity with which aimed shots may be fired.

The breech is locked by a turning bolt which locks close up against the head of the cartridge, as in the latest designs of military rifles. This reduces the liability of breaking shells, when firing, to a minimum, and gives great strength and security. Furthermore, this locked breech allows the use of high power cartridges with perfect safety.

As the bolt has two lugs on its front end which lock into each side of the barrel extension, all unequal strains are eliminated, which gives accuracy of fire. In firing, the barrel is free to recoil in a straight line, consequently has no tendency to "whip" or "switch" as in the ordinary rifle, when shooting high power cartridges.

The trigger pull is extra light, from 1½ to 3 lbs., and the balanced trigger prevents the arm from jarring off, should it be accidentally dropped while the safety is unlocked.

The arm is safe and strong, of light weight, and combines accuracy with rapidity of fire, safety and simplicity; is handsome in design, handles well, and has a decidedly pleasing and business like appearance.

Standard Grade.

Model No. 8, Take Down, Solid Breech, Hammerless. Five Shots.

Special ordnance steel, round barrel, 22 inches long; straight grip, walnut stock, shotgun style; rubber butt plate; blued finish. Half pistol grip furnished to order; no additional cost. Weight about 7¾ lbs.

No. 10TF—Premier grade, same as No. 10F, except ventilated rib	✦ 870 75

Ten in wood case; wt each 7¾ lbs.

EXTRAS FOR REMINGTON REPEATING
For Remington Hammerless Pump Action, Take Down, Model Nos. 10 and 17 Repeating Shot Guns.

In all cases, extra barrels must be fitted at the factory. When ordering extra barrels for used guns, the complete gun, including the old barrel, must be returned to the factory, so that both barrels may be made to interchange on the same receiver.

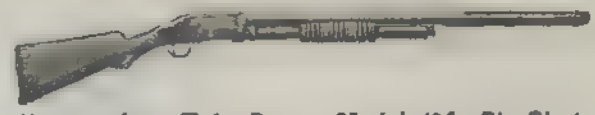
	Each
Matting the top surface of plain barrels	✦$25 80
Solid Ribbed Barrels, add to plain barrel	✦ 25 80
Ordnance Steel Barrels, instead of Remington Steel, add	✦ 25 80
Any length or drop of stock made to order at an advance of	✦ 48 00

*The solid ribbed barrel is particularly appreciated by shooters who have used a double gun and therefore are accustomed to a continuous line of sight. It also prevents the reflection of light on the top of the barrel from interfering with the shooters' sight. The barrel and rib are made in one solid piece, hence a rib can not be fitted to a plain barrel. Plain barrels, however, can be matted on the top surface, see extra charge for this operation under "Extras."

Note—Guns with special stock dimensions takes from six to eight weeks to manufacture, and all orders for such guns are positively not subject to cancellation.

✦F. O. B. New York Factory Only.

SHOT GUNS
MARLIN REPEATING



Hammerless, Take-Down, Model 43A, Six Shot.

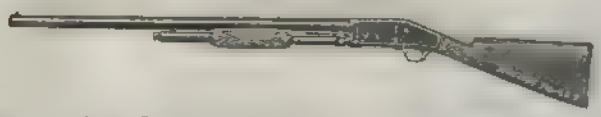
SHOT GUNS

MARLIN REPEATING



Hammerless, Take-Down, Model 43T, Trap Grade, Six Shot.

Solid steel breech; solid top; side ejection; press-button cartridge release; automatic safety device for protection against hang-fires and defective cartridges; double extractors; quick-take feature for convenient cleaning and packing.

Barrel—Special rolled steel, handsomely matted, facilitates quick sighting.

Stock—Imported circassian walnut, with dull London oil finish; straight grip butt-stock; fine hand checkered fore-arm; length butt-stock 14½ inches; drop at comb 1½ inches; drop at heel 1⅝ inches; weight about 8 lbs.

	Each
No. 43T-30—12 gauge; 30 in. barrel, full choke	**$195 00**
No. 43T-32—12 gauge; 32 in. barrel, full choke	**195 00**

Ten in wood case, wrapped separately in paper.

SAVAGE REPEATING

Hammerless, Pump Action, Take Down, Model 1921 Six Shot.

Solid breech, solid top and side ejection. Positive top tang safety; mechanism enclosed; receiver channeled and matted in line of sight; magazine capacity, five shells and one in chamber.

Barrel—High pressure smokeless steel, modified, cylinder or full choke.

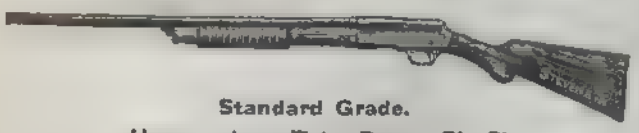
Stock—Walnut, pistol grip and fore-arm; solid rubber butt plate.

Weight 7½ lbs.

	Each
No. 21-12—12 gauge, 26, 28 or 30 in. barrel	**$135 00**

Ten in wood case.

STEVENS' REPEATING



Standard Grade.

Hammerless, Take Down, Six Shot.

Take down feature is simple, and gun can be taken apart and put together in eight seconds. Can be fired without clogging as fast as it is possible for a shooter to work the slide handle. In opening the gun, the firing pin is drawn back and locked and stays locked until it is closed. Hammer cannot possibly touch firing pin until action is completely closed and locked.

Receiver—Solid drop forging, same finish as the barrel. Fitted with extra long tangs, and gives strength to the stock at the weakest point. Shells are ejected from the side.

Barrel—Stevens high pressure compressed steel, finished black oxide, which gives it a beautiful and permanent coloring. Full choke bored.

Stock—Plain walnut, with pistol grip, not checkered; rubber butt plate, scored forearm; length of stock 13½ inches; drop 2⅛ inches at heel and 1⅝ inches at comb.

Can furnished in cylinder modified and full choke bored.

	Each
No. 520—12 gauge, 26, 28, 30 or 32 in. barrel; wt about 7¼ lbs.	**$105 00**

Ten in wood case, wrapped separately in paper.

SHOT GUNS

STEVENS' REPEATING

Trap Grade.

Hammerless, Take Down, Six Shot.

Gun can be taken apart and put together in eight seconds. Can be fired without clogging. In opening the gun the firing pin is drawn back and locked and stays locked until it is closed. Hammer cannot touch firing pin until action is completely closed and locked.

Receiver—Solid drop forging, same finish as the barrel. Solid breech matted top. Shells are ejected from the side.

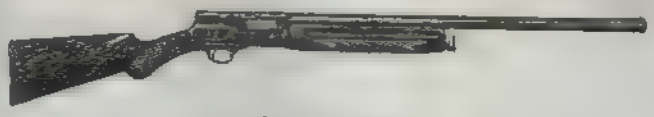
Barrel—High pressure compressed steel full choke bored; hollow matted rib.

Stock—Fancy walnut, checkered; straight grip; rubber butt plate; length 14 inches; drop 1½ inches at comb and 2¾ inches at heel; fancy walnut slide handle, checkered.

	Each
No. 522—12 gauge, 30 in. barrel; wt about 7¾ lbs.	**+$180 00**

Ten in wood case, wrapped separately in paper.

BROWNING AUTOMATIC



No. 1 Grade.

Combines all the good features to be found in any gun. Improved safety, magazine cut-out, double extraction and light weight. A simple movement locks the cartridges in the magazine, permitting the cartridges in the chamber to be ejected without disturbing the others.

Double extractors insure positive extraction and feed. Barrel guide ring forged in one piece with the barrel.

Barrel—Cockrel steel of unusually high tensil strength.

Stock—Hardwood with checkered grip and fore-arm.

12 gauge furnished in 28 in. full choke.

16 gauge furnished in 28 in. full choke, and 26 in. cylinder or modified.

	Each
No. BA-12—12 gauge 28 in cylinder bore; wt 7¾ lbs.	**$165 75**
No. BA-16—16 gauge, 26 or 28 in. barrel; wt 7 lbs.	**202 50**

Ten in wood case, wrapped separately in paper.

+F. O. B. Massachusetts Factory Only.

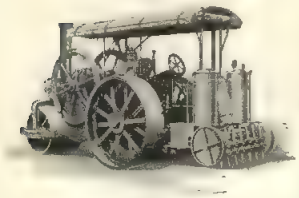
Road Machinery

On this page are illustrated a few of the most commonly used road machines and the limited space in the catalogue does not permit us to illustrate the full line, but we are able to supply all designs and types of machines used for Road Building and Road Maintenance.

A special catalogue on each type of machine can be had on request

Road Roller

No. 1391



With scarifier attachment. All types and weights can be supplied These include both the motor driven and steam engine types and the weights are from 3 to 15 tons.

Tandem Motor Roller

No. 1392

The Motor Roller illustrated above has exceptional power and ease of handling The Motor is of the heavy duty 4-cycle type

Scarifier

No. 1393

This Scarifier has special features which will appeal to road builders, it has independent steering. Adjustment of tynes for wear and depth of cut and instant raising and lowering device.

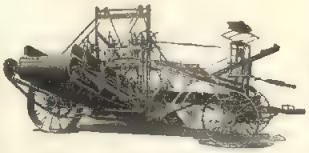
Graders

No. 1394

The machine illustrated is a Rip Snorter, combining a powerful scarifier and grader. Graders of all types with or without the scarifier can be supplied.

Elevating Grader

No. 1395



We guarantee this machine capable of plowing and throwing a 1 000 yards of earth into embankments, or loading from five to six hundred yard-and-a-half wagons in ten hours work, where the condition of the soil is suitable for its operation.

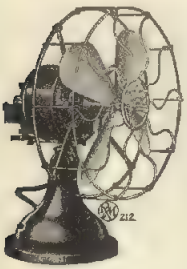
Street Sweeper

No. 1396

Can be supplied with single or double speed broom drives and has a capacity of 90,000 sq ft. of pavement per hour. Other types of street sweepers can be supplied.

Electric Fans

Oscillating Desk or Bracket Fan—Gear Type 12 inch and 16 inch Sizes



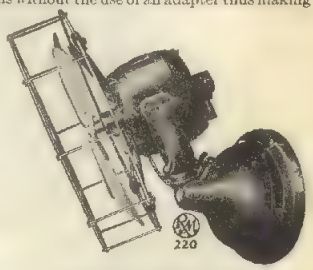
12 Inch Desk Position

These electric fans are made from the best material in every detail of construction, both electrical and mechanical. They are made with tools and gauges on the American Interchangeable plan and should any part need replacement, a new part may be obtained by giving the number of the fan motor, and with absolute assurance of a perfect fit. The reduction mechanism is enclosed in an oilproof box filled with non-fluid oil. The worms and gear wheels are large in their proportions, accurately machined and substantially supported in bearings. The ends of the connecting rod are provided with hardened steel bushing which practically eliminates wear at any point. Fan can be made stationary by a slight operation, if desired. Made with highly efficient motors. For further particulars as to the motors, see the table below. Can furnish 8-inch fan if desired.

No.	Diameter Blade, Inches	Volts	Price Each
Direct Current			
1128	12	110	On Request
1129	12	220	
1131	16	110	
1132	16	220	
Alternating			
1153	12	110	On Request
1154	12	220	
1159	16	110	
1160	16	220	

Alternating Current Swivel and Trunnion Desk or Bracket Fan

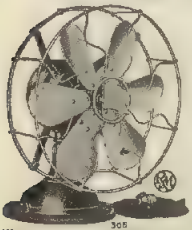
Designed with highly efficient type of winding that eliminates the centrifugal or automatic switch and gives a wide speed range. The type of winding employed also assures freedom from burn-outs, even though the motor should fail to start from any cause whatever. The body of the motor is symmetrical in appearance, avoiding deep recesses or projections, which tend to collect dirt. The bearings are accurately finished throughout, thereby securing perfect alignment. They are convertible into wall bracket fans without the use of an adapter thus making them universal desk or bracket fans. The switch base is exceptionally strong and will not crack under ordinary strain. The base of the motor is marked "Off, 1, 2, 3," indicating the different speeds. Can furnish 8-inch fan if desired.



12 Inch Wall Bracket Position

No.	Diam. Blade, Inches	Volts	Cycles	Price Each
Direct Current				
1500	12	110		On Request
1501	12	220		
1502	16	110		
1503	16	220		
Alternating Current				
1404	12	110	60	On Request
1405	12	220	60	
1411	16	110	60	
1412	16	220	60	

Six Blade Residence Fan

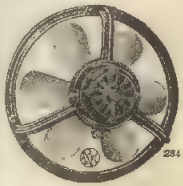


The Residence Type Fan is a type particularly adapted for home use. It is lighter than cast iron on account of its steel construction, yet it will not creep across the table or ledge on which it may be standing. It has a very low center of gravity, making it practically impossible to tip over. Has six blades, giving a wide distribution of air, runs quietly and has three speeds. This type is also well adapted for office use.

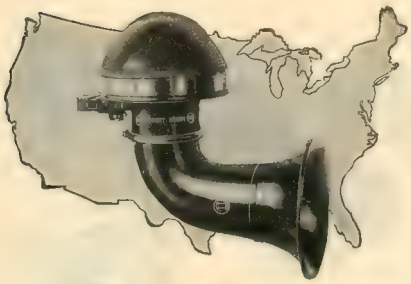
No.	Model Specifications	Price, Each
2104	Model 21 A. C. 110 V. 60 Cycle Desk	On Request
2200	Model 22 D. C. 110 V. Desk	
2404	Model 24 A. C. 110 V. 60 Cyc. Osc.	
2500	Model 25 D. C. 110 V. Oscillating	

Small Exhaust Fans

For ventilation, removing smoke, dust or objectionable odors, these exhaust fans are frequently installed. Intended for mounting in walls or partitions and exhausting into open space (free air). Can be mounted in ceilings, but will require an end thrust at a slight extra cost. The motor blades and fans are the same type as described above. When working against free air the 12-inch fan will displace from 1500 to 2000 cu. ft. of air per minute, the 16-inch from 2200 to 3300 cu. ft.



No.	Diam. Fan, Ins.	Volts	Full Speed Free Air	Watts Consumed	Price Each
1000	12	110	1550	65	On Request
1001	12	220	1550	65	
1002	16	110	1450	100	
1003	16	220	1450	100	



This trade mark and the full name, Robert Bosch, are always inscribed on every piece of ORIGINAL BOSCH automotive equipment. Look for these identifications. They are your guaranty of ORIGINAL BOSCH quality as known the world over since 1887

All over the country~ the *Original* Bosch Horn is being chosen by the owners of fine motor cars

WARNING

Horns of which the sound producing mechanism is essentially that of the ORIGINAL BOSCH Horn are being offered to the trade by various manufacturers. The selling or using of such imitations constitutes infringements of the patent by which the Bosch Horn is protected. Infringers will be held strictly accountable.

On broad, smooth boulevards; in the traffic-tangled streets of cities; along far-flung country roads—wherever fine motor cars are driven—you will hear the musical, penetrating tone of the ORIGINAL BOSCH Horn. An efficient — and courteous — warning signal.

Naturally, being an ORIGINAL BOSCH product and, therefore, of unquestioned worth and accuracy, this new, high-frequency warning signal is being profitably handled by many of the country's best automotive dealers.

To automotive merchants who have not already stocked the ORIGINAL BOSCH Horn the invitation to become selling agents is extended. Write for full information to Robert Bosch Magneto Co., Inc., 111c West 64th Street, New York, N. Y. Chicago branch, 1302 South Wabash Avenue.

LIST PRICES

"Junior" for motorcycles..... $16
"Standard", for passenger cars..... $21
"Master" for large cars, motor busses and motor boats..... $25

When ordering your stock of ORIGINAL BOSCH Horns, please be sure to specify the model or models desired, and the voltage.

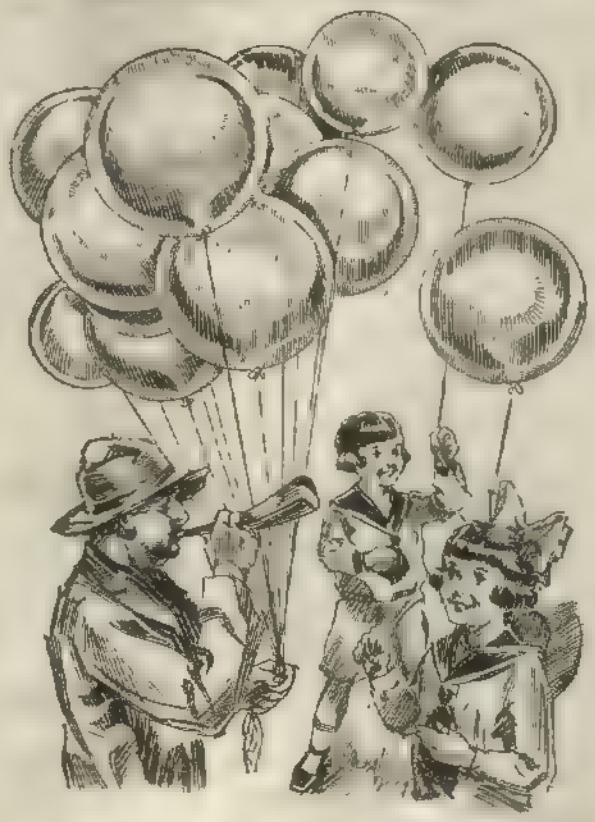
Franco-American Balloons

TWO SIZES

To Balloon Men who know the FRANCO-AMERICAN Balloon, we announce our new size 70 Centimeter. It is exactly the same quality as our 85N14—no better, no worse.

Those who do not want to use so much gas will find the 70Cm. size meets their requirements.

85 CENTIMETER | 70 CENTIMETER



To the man who has a regular balloon route and regular customers to please, we have this to say:

(1) We are the exclusive sales agents in the United States for the **Franco-American Balloons**

(2) The **Franco-American Balloons** are made by experts and we guarantee selected stock, you will find no weak thin spots known to the trade as pinholes

(3) Only the purest Para Gum Rubber is used and the best chemical colorings regardless of price in **Franco-American Balloons.**

(4) Every box of **Franco-American Balloons** comes assorted red, blue and green, all bright, clear shades and thoroughly transparent. Our balloons when inflated have no dark blotchy spots

(5) We only list the **Franco-American Balloons** as 85 Centimeter and 70 Centimeter oversize. We guarantee that either size balloon when inflated with gas to the size we guarantee them to be, will stand the hottest sunshine

(6) **Franco-American Balloons** weigh more to the gross than others and have extra long necks with even rolled strong edges.

(7) [illegible] always fresh and constantly [illegible] season we receive shipments nearly every day.

THE FRANCO-AMERICAN GUARANTEE

We only ask you to please send a sample order of each size and give them the most severe test. If you are not absolutely satisfied in every respect return the balloons to us and we will send back the money you paid us, as well as transportation charges both ways. Don't say you have the best until you have made this trial.

Fully brass bound, including brass end plates. Otherwise the same as No. 4-ABE. A model any mason will take pride in owning. A quality product that looks the part.

Each

White Pine Makes Better Levels

The white pine used for the manufacture of Sand's Levels actually costs us more than hardwood. The clear-grained pine that grows on the west coast has proved the best for our purpose. We scouted the country for a wood that would serve best, one of the heads of this company finally locating it in the states of California and Idaho.

This pine does not shrink, swell, check, split or twist—it doesn't rot, even after years of exposure under the most exacting climatic conditions. It is light and soft yet strong. It seasons thoroughly in less time than hardwoods. This wood takes nails and screws without splitting, and closes in around them, holding them fast.

A decided advantage for level making is its freedom from objectionable acids and oils, and the close grain, which takes paints and stains perfectly.

RIFLES

MARLIN REPEATING

Model 93 Carbine, Solid Frame, Full Magazine, Center Fire, 7 Shots.

Adapted to use high power smokeless cartridges. Lever action; visible hammer; side ejection; solid top, closed-in frame. Built on carbine lines throughout and is thoroughly accurate and quick handling. Blued finish barrel and butt plate, case hardened receiver. Special smokeless steel barrel, 20 inches long; carbine front and rear sights. Black walnut straight grip butt stock and forearm; drop at comb 1¾ inches; grip at heel 3 inches; length over all 38 inches.

	Each
No. 3093-C—30-30 caliber; shoots No. 30-30WMC and 30-30WSP cartridges; wt each 6¾ lbs	$82 50
No. 3293-C—32 spec caliber; shoots Nos. 32WSPMC and 32WSPSP cartridges; wt each 6¾ lbs	82 50

One in cardboard; ten in wood case.

SAVAGE REPEATING

Model 1914, Trombone Action, Take Down, Hammerless.

22 caliber, hammerless takedown repeater; shoots 22 short, 22 long and 22 long rifle cartridges, without adjustment, has solid breech, solid top and side ejection. Direct feed of cartridges from magazine to chamber prevents jams and dislodgement of bullet in shell, this insures accuracy. All the moving parts are enclosed within the receiver, the safety is of the shot gun type and is located on top of the tang, immediately in front of the grip, the action is positive, short, quick and easily operated.

Best steel octagon barrel 24 inches long; bead front and adjustable wind gauge rear sight, American walnut shot gun, full pistol grip stock with steel butt plate. Length taken down 27½ inches. Tubular magazine holds twenty 22 short, seventeen 22 long or fifteen 22 long rifle cartridges.

	Each
No. SH2214—22 caliber; shoots 22 short, 22 long and 22 long rifle cartridges; wt each 5¾ lbs	$52 50

One in cardboard box, ten in wood case.

Sporter Model 1922, Hammerless, Six Shot.

A rifle with the precision of the finest small bore range rifles combined with the most modern features found in up-to-date sporting models.

Best round steel barrel 23 inches long; sturdy hunting bead front sight and a flat top hunting rear sight; genuine American walnut stock, varnished; checkered full curved trigger; detachable box type magazine is inserted in front of the trigger guard and holds five 22 long rifle cartridges in a single column.

	Each
No. SS22—22 caliber; shoots Nos. 22LRL, 22LRS, 22LRSHP, 22LRLHP, 22NRA and 22 NRAHP long rifle cartridges; wt each 6 lbs	$46 50
No. SS22M—Extra magazine for No. SS22 rifle	1 65

Ten in wood case; wt per case about 80 lbs.

RIFLES

SAVAGE REPEATING

Sporter Model 1923, Hammerless, Six Shot.

25-20 caliber bolt action rifle with rear locking lug on bolt into receiver. Best round steel barrel 25 inches long; sights are Rocky Mountain knife blade front and flat top elevator adjustment rear of sturdy construction. One piece stock and forearm of selected American walnut, varnished; full curved pistol grip. Five shot detachable box type magazine.

	Each
No. 23B-25-20—25-20 caliber; shoots Nos. 25-20WMB, 25-20WSMC, 25-20WSSP and 25-20HS; wt each 6 lbs	$59 25
No. 23C-32-20—32-20 caliber; shoots Nos. 32-20WMB, 32-20WSMC, 32-20WSSP and 32-20HS; wt each 6 lbs.	59 25

Ten in wood case; wt per case about 80 lbs.

SAVAGE REPEATING

Model 1899, Feather Weight, Hammerless, Six Shot.

For the sportsman who does not wish to carry a single unnecessary ounce, this Savage will prove a delight. Not only because it is the lightest big game repeating rifle in existence, but because it has all the same good qualities of the other Model 1899 Repeaters—the strong breeching mechanism, the hammerless feature, the revolving magazine—in a word, those advantages that make Savage rifles distinctive from other guns.

The special barrel is 20 inches in length, beautifully tapered and made from Savage "Hi-Pressure" steel. The stock is the shotgun style, fitted with steel butt plate. The metal bead front sight, brazed on the barrel, is of special design, and can not be removed. Supplied with No. 15 wind gauge rear sight having flat top with simple and secure adjustment for elevation and windage. This makes an excellent combination. For all practical hunting ranges, the 20 inch barrel will be found to kill just as quickly and accurately as the longer lengths. Weight 6 lbs.

	Each
No. $30-30FW—30-30 caliber; shoots Nos. 30-30WMC and 30-30WSP cartridges	$116 25

Ten in wood case; wt per case about 80 lbs

RIFLES

SAVAGE REPEATING

Model 1899, Hammerless, Six Shots.

Model 1899 hammerless repeater; automatic revolving, indicating magazine, in which the cartridges lie side by side preventing bullets touching primers of other loads; safety is thus secured and balance of gun does not continually change, as is the case with a tubular form of magazine; equipped with hammer indicator and positive safety, which locks both firing mechanism and lever; accurate range for caliber 303-1000 yards on remaining calibers 800 yards. Solid wall of steel between barrel and operator insures protection in cases of defective shell or primer.

Forged steel barrel 26 inches long, white metal bead front sight and flat top sporting rear sight; blued trimmings; genuine American walnut stock, with steel butt plate.

Round Barrel.
Solid Frame.

SAVAGE REPEATING

Model 1899.

22 Caliber, Savage, Hi-Power; Center Fire, Six Shot.

Built with the Savage strong and durable take down feature, which is the simplest and most convenient ever devised.

The velocity is 2800 feet per second, being higher than that of any other rifle manufactured in the United States and 100 feet per second higher than that of the new Springfield U. S. Army Rifle. It uses a sharp pointed bullet weighing 70 grains and gives a muzzle striking energy of 1200 foot pounds. Will penetrate half-inch steel boiler plate or nine ⅞ inch pine boards.

Round tapered barrel 20 inches long made from Savage "Hi-Pressure" Steel; highly finished American Walnut Stock and fore-end; Shot Gun steel butt plate. Weight 7 lbs.

	Each
No. S22HP—22 caliber, shoots Nos. 22SSP and 22SMP center fire cartridges	$116 25

Ten in cardboard box; wt per case about 85 lbs.

✚F. O. B. New York Factory Only.

RIFLES

Model 1899, Take Down, Hammerless, 250-3000 Caliber Six Shot.

This rifle is made on the same action and is of the same general type as the .22 Savage Hi-Power, except it is of larger caliber with heavier bullet, longer range, and greater striking power. Has higher velocity, flatter trajectory and greater accuracy than any other rifle made in this country. The velocity is 3,000 feet per second. The energy is 1739 foot pounds and the trajectory (mid-range height for 300 yards 5.7 inches) is so flat that sight need not be raised for the longest sporting ranges.

Round tapered Hi-Pressure steel barrel 22 inches long, with integral front sight base; nickel silver bead front sight and sporting wind gauge rear sight; checkered shot gun butt stock and fore-arm; extra full pistol grip, capped; corrugated steel butt plate. Weight 7 lbs.

	Each
No. 250-3000—250-3000 caliber; shoots Nos. S250-3000MP and S250-3000SP cartridges	$128 25

Ten in wood case; wt per case about 11[illegible] lbs

.410 gauge barrel can be adjusted to any model '99 take down rifle of .30-30, .303 or .250-3000 caliber, regular or featherweight and .22 Hi-Power featherweight Savage rifles. No tools are required to change the barrels.

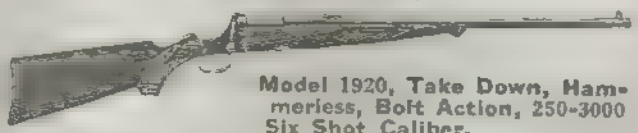
Note—Always specify the caliber of rifle for which the shot gun barrel is wanted.

	Each
No. 410SB—Wt each 4½ lbs	✚$25 50

One in wood box.

RIFLES

SAVAGE RIFLES



Model 1920, Take Down, Hammerless, Bolt Action, 250-3000 Six Shot Caliber.

Represents the latest and highest development of the American hunting rifle. Not a modified or converted military arm adapted as a makeshift to hunting purposes. The action was designed around the efficient cartridge which it handles. Holds as steadily as a much heavier arm. Velocity is 3000 feet per second.

The cartridge is rimless and in spite of its tremendous velocity and great accuracy is easy on the rifle.

Round tapered high pressure 22 inch steel barrel, with integral front sight base checked pistol grip stock and fore-stock; pistol grip capped; varnished one piece walnut stock; corrugated trigger; corrugated steel shot gun butt plate; white metal front and flat top sporting rear sights. Weight 6 lbs.

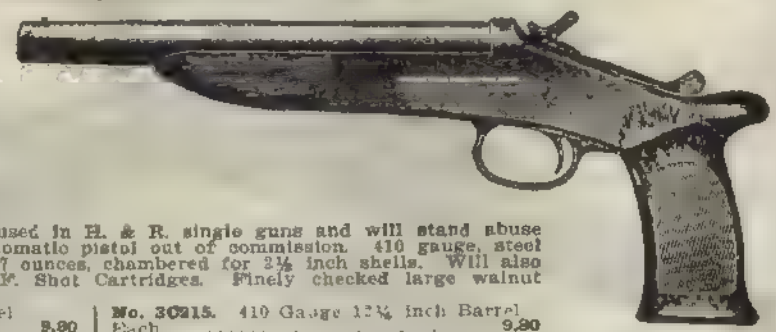
	Each
No. S250-3000BA—250-3000 caliber; shoots Nos. S250-3000MP and S250-3000 SP cartridges	✚$132 75

Ten in wood case; wt per case about 100 lbs.

✚F. O. B. New York Factory Only.

RIFLES AND SHOT GUNS

PRICES QUOTED INCLUDE WAR TAX



[illegible] is just what the name implies. The "sawed-off" shot gun has long been recognized as an extremely effective weapon at short range. The action and working parts are the same as used in H. & R. single guns and will stand abuse that would put a revolver or automatic pistol out of commission. 410 gauge, steel barrel, 8 and 12¼ inch; weight 37 ounces, chambered for 2½ inch shells. Will also take without change 44 W. C. F. Shot Cartridges. Finely checked large walnut stock affording an [illegible] grip.

No. 3C214. 410 Gauge 8 in Barrel. Each **9.90**

No. 3C215. 410 Gauge 12¼ inch Barrel. Each **9.90**

Adapted for any standard loaded shell up to 2¾ inches in length, six shots. Weight 7¾ lbs. Each 32.25

SCHLAICH CAP LOCKS

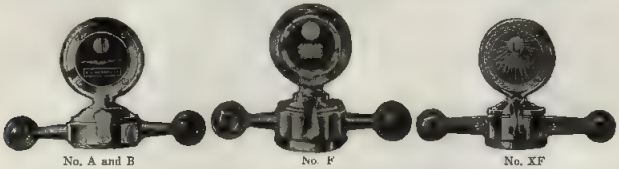
FOR MOTO-METERS

Designed to fit snugly on the radiator filler neck, keeping the moto-meter at correct elevation for best temperature indication. With the patented set screw on the insert provides a positive lock for every type of moto meter

Made of the best materials, highly polished nickel finish. Guaranteed rust-proof.

Initial discs or emblems can be placed in arm ends under thick glass bulls-eye, directions for installing furnished.

Emblems or Initials furnished free by returning Card enclosed with Each Cap to Factory.



No. A and B — No. F — No. XF

For Cars With Narrow Radiators

	Each
No. A—3 in. outside diameter, without insert	$4 75

For Cars With Large Radiator Necks

	Each
No. B—3¾ in. outside diameter, without inserts	$4 75
Extra Inserts Only—For Nos. A and B	1 25

For Chevrolets, Fords, Jewetts, Oldsmobiles, Overlands, Stars, etc.

	Each
No. F—Small type cap designed for both Midget, Standard and Universal moto-meters, without insert	$3 50
No. XF Same as No. F, but with vitrified blue enamel and silver insert plates, without insert	5.50
Extra Inserts Only—For No. F caps	.50

SPECIFICATIONS FOR CAR MODELS

The letters A, B, F, and XF refer to the four models of caps manufactured:—

"A" Cap. Outside diameter 3 in., Especially designed for cars with narrow radiators, will not strike engine hood when raised.

"B" Cap. Outside diameter 3¾ in For cars with large radiator necks.

"F" Cap. Used as regular equipment on Aristocrat Boyce moto-meter.

"XF" same as F cap, except with vitrified blue and silver plates on side of arms.

The numerals 1 to 33 specify the insert to fit the various radiator filler necks.

Example: Dodge A2, F2. The Dodge requires a No. 2 insert and either an A or F cap. All "A" inserts are interchangeable in "A" caps, "B" inserts in "B" caps and "F" inserts in "F" caps, but are not otherwise interchangeable.

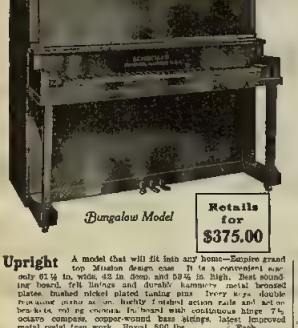
We stock the caps separate and the inserts separate believing this the simplest way for the dealer to handle his stock. The F cap for Ford does not require an insert, all other cars require an insert.

"SCHOFIELD" PIANOS

Built by one of the oldest and best known manufacturers. Only the finest materials are used to produce "Schofield" pianos—instruments of exquisite beauty and fine finish with unexcelled tone quality. Every art of the craft and years of experience are combined in the making of these wonderful instruments. Yet we are able to secure and sell them at prices which are remarkable—you can readily see your liberal margin of profit. Remember, you can sell a lot of pianos carrying only two or three instruments in stock—we make prompt shipments.



Bungalow Model

Retails for $375.00

The Ideal Pianos

Beauty of tone, handsome design and refined appearance at such attractive prices make these superb instruments appeal to even the most critical buyer. "Schofields" are as nearly perfect as it is possible to build pianos. Each instrument embodies a surprising volume of beautifully modulated tones from carefully drawn scales. The case work is of only the best stock, carefully built up layer by layer, cross-grained, and cannot warp or pull apart. Double veneered and cross-banded inside and out. The veneers are perfectly matched and are furnished in either satin or polished finish.

Modern Design

Retails for $750.00

Upright A model that will fit into any home—Empire grand top. Mission design case. It is a convenient size, only 61¼ in. wide, 25 in. deep and 53¼ in. high. —another Member

of the satisfactory Schwarze Sound Signal family—Model 999. This new type of signal has less weight and requires less adjustment than most other horns. Its melodious and distinctive tone is audible for surprisingly long distances and may be likened to the sharp warning signal of a train. Complete with bracket for either right or left-hand installation. Finished in all black enamel with nickel plated trimming.

The warning signal that you have wanted at a price that you can afford—maintaining the Schwarze policy of dominating moderate priced horn sales. Back of the new 999 is the same Schwarze value that has always spoken for itself. This model is going to rapidly coin profits for those jobbers and dealers who display and sell it.

One dozen in a carton.

MINERS CARBIDE LAMPS

SHANKLIN GUY DROPPER

Polished Brass

Corrugated bottom, round hook and brace. Has a 2½ inch polished reflector intended for miners working in wet places or where the roof is low. This reflector is deep enough to protect the burner tip from water. Self-lighter attached to reflector. With patented water dropper with valve cleaner; should dropper become clogged a few turns of the valve cleaner will open it

No. 288L—Polished brass; weight per dozen about 6 pounds .....Per Dozen $18.00

One in a box, one dozen in a carton.

VICTOR

Polygon Feed

Detachable reflector and brace; 2⅝ inch saucer shaped reflector; made of brass; height 3¾ inches; diameter bottom 2 inches; capacity 2 ounces carbide; burning capacity 2½ hours; candle power 16.7; net weight 5 ounces. Sharp corners of button on valve feed break away caked carbide, insuring steady, free water flow; will not clog, requires no agitation

Per Dozen

No. 661—Polished brass; weight per dozen 6 lbs...$18.00
No. 663—Nickel plated; weight per dozen 6 lbs... 20 00

One dozen in a carton.

AUTOLITE

Polished Brass

Patented water dropper, will not clog, gives a steady even flow of water at all times and never needs cleaning. Produces a steady, even flame that does not flicker. Seamless brass, height 3¾ inches; net weight about 5 ounces; has a burning capacity of from 3 to 4 hours and gives a 20 candle power light. Each lamp tested and guaranteed free from imperfections.

No. 106—Polished brass; weight per dozen about 6 pounds .....Per Dozen $18.00

One dozen in a carton.

ACETYLENE LANTERNS

JUSTRITE

Automatic Generator Controls the Gas

Gives a 20 candle power light. Burns 3 to 4 hours with 3 ounces of carbide. Flame is controlled by the valve and can be turned high or low or extinguished as desired. Made of brass throughout, nickel plated and highly polished

Self-lighter attachment; glass globe; bull's eye lens; removable reflector.

No matches required. Superior to any portable light in cleanliness, safety and candle power. For hunters, sportsmen, campers, mine superintendents, inspectors, mining engineers, watchmen timekeepers and for the automobile.

No. 12—Height 9 inches; diameter at bottom 4 inches; weight each about 1½ pounds.....Each $6 00

One in a case

MINERS LAMP ACCESSORIES

REVOLVERS

IVER-JOHNSON

The Safety Action—The top of the hammer of an Iver-Johnson revolver rests against the solid frame, so that no conceivable impact could force it against the firing pin.

A lifter, which is a long upright part, fits into the notch in front of the hammer; when the trigger is pulled, this lifter is at its highest point and covers the firing pin and at this relative position the hammer is released, striking the lifter and driving the firing pin into the cartridge. Then as the trigger snaps forward the lifter drops down, leaving a clear space between the hammer and firing pin.

The safety action does not add a single extra part nor does it impair the smoothness or speed of action. It demands no thought or intelligence from the user. There is no other conceivable way to discharge the cartridge except by simply pulling the trigger. You can throw the revolver against the wall, kick it about the room or "hammer the hammer" and the cartridge will not explode.

FISHING REELS

SOUTH BEND—ANTI-BACK-LASH

Frame—Solid nickel silver frame; light, strong and rigid. **Bearings**—The spool and gearings are of special steel, accurately turned, ground. The end thrust is supported by adjusted jeweled spool-journal caps of screw-off pattern. **Gearing**—The gearing consists of a special hunting tooth train, the gear of which is cut from hard drawn brass, and the pinion from special tool steel, which, in action, produces a powerful, yet quiet, free running reel. **Crank**—The crank is accurately balanced; the grip is of white ivoroid bushed with bronze. **Click**—Made of hardened tool steel, operated by a thumb button on the tail plate, and actuated by a phosphor bronze spring.

Each

No. 1131—Capacity 100 yds; length of pillars 1⅛ ins; diam of disk 2 ins; wt each 7 ozs $27 45

One in cardboard box.

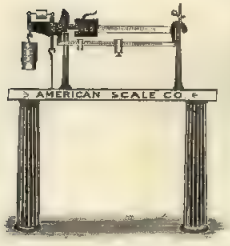
†May be built with platform 10 feet long.

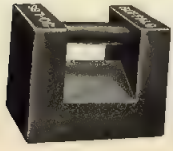
*COMPOUND BEAM AND OFFICE FIXTURES



AMERICAN

This beam and office fixture can be furnished with the various American wagon and motor truck scales shown on this and the following page with certain variations to meet the requirements of the different sizes. It is an ornament in any office. It is designed for extreme accuracy and convenience of operation; it requires no loose weights and is easily and quickly read.

U. S. STANDARD TEST WEIGHTS



Used to test scales and prove their accuracy.

They are of the latest approved design, carefully made and warranted correct.

No.	Actual Weight, lbs.	Each
1601	50	$8.00
2902	25	6.50
2903	20	6.00
2904	15	5.00
2905 (Round)	10	3.00
2906 (Round)	5	2.00

*Not carried in stock; will ship from factory

*MOTOR TRUCK SCALES

BUFFALO

Designed and built according to the construction used in railroad scales, especially adapted for weighing the heavier vehicles and motor trucks where the load is concentrated on the rear axle. A demand for heavier construction in motor truck scales is that the motor truck rear axle sustains 75 to 95 per cent of the load where each wheel of the wagon sustains 25 per cent of the load, each axle carries 50 per cent. A motor truck scale must be double the strength of a wagon scale of the same capacity; scale includes mechanism with compound beam and short pillar outfit or beam box, all lumber, structural steel, foundation, including bolts not furnished unless otherwise quoted.

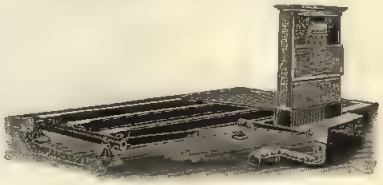
With Rigid Bearings

No.	2222	2238	2243	2245	2248
Capacity, tons	6	10	15	20	30
Platform, ft.	8x16	8x16	9x18	9x20	9x24
Weight, lbs.	1400	2300	2575	2738	2975
Each	$270.00	600.00	700.00	775.00	825.00

With Suspension Bearings

No.	3238	3248	3245	3248
Capacity, tons	10	15	20	20
Platform, ft.	8x16	9x18	9x20	9x24
Weight, lbs.	2828	3286	3491	3578
Each	$650.00	775.00	925.00	975.00

*AMERICAN SHALLOW PIT TYPE



This shows the scale installed with a phantom view of the pit, the foundation, the lever, the steel joist, the platform and beam in the beam box as well as the shallow pit.

It requires a pit only about one half that of regular pit scales as the 5, 6 and 8 ton requires but 16 inches and the larger sizes but 20 inches.

The scale has all the advantages of the pit type and is of the same high grade construction; levers are semi-steel of ample size; joists are I-beams heavy enough to carry more than the capacity of the scales.

Weigh beam is standard full capacity with beam box or office fixture. Very easy to install.

No.	86	87	88	89	90	91
Capacity, tons	5	6	8	10	15	20
Platform, ft.	8x14	8x14	8x14	8x16	9x18	9x18
Weight, lbs.	800	900	950	2100	2650	2750
Each	$92.00	104.00	156.00	206.50	316 00	363.00

*Not carried in stock; will ship from factory.

*WAGON AND STOCK SCALES

AMERICAN

This scale comes to you complete with everything shown in illustration except the floor boards, every part is steel, iron or brass except the beam box It is to be set entirely on top of the ground, 9 inches high, requires no pit; is easily and quickly placed; can be moved readily to any desired location.

The entire lever system always remains stationary, the oscillation of the platform is provided for by means of hardened ball bearings, thus saving the wear of the weighing levers, which are made sharp like a chisel and tempered to endure indefinitely.

STANDARD WAGON AND STOCK—PITLESS

No.	Capacity, tons	Platform, ft.	Shipping Weight, lbs.	Each
*81	5	8x14	1400	$291.00
*26	10	8x14	2000	486.00
*71	10	8x22	2600	654.00

*STANDARD WAGON AND STOCK—PIT TYPE

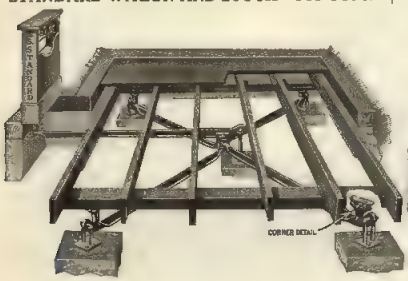


Illustration shows the pit type of scale, its construction and the way it is installed, requires a pit about 28 inches deep.

It has four independent levers—one from each corner to the center and a fifth lever extending directly to the beam. Levers are solid cast semi-steel, designed for greatest strength and rigidity, equipped with ball bearings that relieve the steel knife lever edges of all unnecessary wear. All working parts together with beam and beam box are furnished; customer supplies the balance of material.

No.	Capacity, tons	Platform, ft.	Shipping Weight, lbs.	Each
*23	5	8x14	650	$184.50
*46	10	8x14	835	295 50
*48	10	8x22	1000	366 00

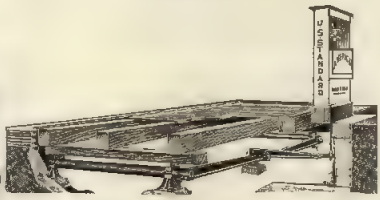
*Not carried in stock; will ship from factory.

HEAVY DUTY MOTOR TRUCK—PITLESS

Extra heavy frame and joists, it is twelve inches high and requires no pit.

No.	Capacity, tons	Platform, ft.	Shipping Weight, lbs.	Each
*79	5	8x16	2300	$511 50
*80	10	8x16	2500	609.00
*81	15	9x18	4800	1065 00

*HEAVY DUTY MOTOR TRUCK—PIT TYPE



This shows the scale installed with a phantom view of the pit, the foundation, the lever, the platform and beam in the beam box

The depth of pit varies with the size of the scale; for the 10 ton size illustrated 16 inches is required for the height, bearing timber 6 inches, joists 10 inches and floor 2 inches, making a total depth of 34 inches. This pit must be walled up with stone, brick or cement.

The scale sets on heavy iron standards on foundations in bottom of pit and none of the weight is carried on the wall. Complete illustrated directions for installing accompany each scale.

No.	Capacity, tons	Platform, ft.	Shipping Weight, lbs.	Each
*84	10	8x16	1420	$412.50
*85	15	9x18	1800	666.00
*86	20	9x18	1900	723.00

WRIGHT MANUFACTURING COMPANY DAVENPORT

The New STANLEY

STANLEY DEALERS ARE MAKING MONEY

Judging by the experience of Stanley Dealers in various parts of the country, every territory contains more than enough people who are *sold on steam* to take all the cars we can allot to it.

Their legitimate profits are not dissipated by the expense of forced selling.

If you are located in open territory, we should be glad to hear from you.

5 Passenger Touring Car ..... $2500 f.o.b. factory

Genuine English Overcoat

Made in England and Imported Direct

All Wool — Finely Tailored

SPECIAL BARGAIN

$25.00

39 C 2705

$7.98

"Academy" Model for Boys

This is the first time in many years that we have been able to sell boys' All Wool Overcoats at $7.98. The Academy model is tailored in our own shops, and a coat of this kind usually sells at retail for from $10 to $12.

We know by experience that the 20-22 ounce cotton cloth used for making boys' overcoats selling at our price is less every good quality that an overcoat material should have —warmth, fine finish and heavy enough to wear like iron.

Double breasted with all around belt, two roomy pockets and a big warm ulster collar. Full lined with good quality serge. Choice of dark brown mixture which makes the Academy model portrays any suitable for school wear.

SIZES 7 to 14 years
Waist size wanted. Read "How to Measure" on page 24.

English Overcoat in Dark Brown

Less Than Half The Usual Retail Price

Length 48 Inches

39 C 2701

Genuine "Thornbury" Model in Warwick Blue or Dark Brown

THIS fine All Wool English Ulster, made in England from a soft, warm English woolcloth, is the very newest style overcoat that created such a sensation last fall when we first introduced it to our customers. It was the biggest value in our catalogue. That is exactly what thousands of our customers said after they had received and examined these fine overcoats in their own homes. Our entire stock was sold in 90 days, and we received only the highest praise on the quality and style. For the season we have purchased seven thousand more direct from the English manufacturers.

The Kind That Retails for at Least $50

To prove our claims about this stylish, warm, imported coat, we have visited some of the leading retail clothing stores in the country and tried to buy a similar English coat. To match this coat for quality material and workmanship we had to pay at retail from $50 to $60, which convinces us that this Thornbury model is the greatest overcoat value offered in America. We want you to be the judge.

How This English Overcoat Is Made

When you see this stylish imported coat, feel the soft, warm material, notice the fine tailoring and observe the perfect fit and comfort, you will realize at once why it is so popular with our customers and would undoubtedly buy one immediately at our low price of $25.

Popular ulster style, full 48 inches long, to cover your knees when you sit down, a big advantage all automobile owners will appreciate. Made in England by English weavers from All Wool English overcoating weighing full 32 ounces to the yard. Big roomy, double breasted with a big ulster collar, and full lined back. Bartacked pockets and roomy sleeves. Yoke and sleeves are lined with high quality imported twilled venetian which has a soft satiny finish and is "wear like iron."

I have English overcoats are not so full that we recommend your ordering the same size as the suit you wear. For instance if you wear a 38 suit coat order a 38 overcoat. Not too full. Then you will have a comfortable, well fitting overcoat.

Your Choice of Two Popular Colors

This season we are offering these imported overcoats in two popular colors, the very fashionable Warwick blue—a dark smoke blue; and the ever popular dark brown mixture. We suggest that you order yours early to be absolutely sure of getting one of these fine English coats at less than half the usual retail price.

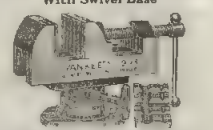
YANKEE VISE With Swivel Base



With Swivel Base, While Used on the Bench the Vise Proper Can be Quickly Detached from Base, and Without Removing Work from Vise, Can be Used on Bench Drill, etc. and Returned to Position Again.

This is a New Feature in Vises and One That Will be Quickly Appreciated by the Best Mechanics Where Work can be Held Rigidly in the Vise and While so Held be Worked on by Either Hand or Machine.

The Upper Part of Swivel Base has a Taper Part to Receive Corresponding End of Vise Proper, and with Set Screw in One End to Force Tapers into Position, Thus Clamping Vise and Base Perfectly Rigid.

No.	With Swivel Base	Each
1991		$2.50
1992		3.75
1993		6.25

One Only in a Box.

LOUD SPEAKERS

HORN TYPE

STROMBERG-CARLSON

No. 2-ALS

Reproduces speech and music with true tonal characteristics. Gives an abundance of sound volume necessary to fill the largest room of a residence in a pleasing manner. Equipped with adjustment lever for regulating sound volume. Non-metallic horn, finished in oxidized silver. Wood base in mahogany and metal parts in dull black. Over all height, 25 inches. Bell of horn, 13 inches in diameter. Furnished with 5 feet of silk cord and plug. Weight, 6 pounds.

No.	Each
2-ALS	$20.00

One in a fibre carton.

MANHATTAN JUNIOR

It's not a makeshift—it's not just a headset in a horn—but a real loud speaker that reproduces all radio programs with excellent musical quality.

The Manhattan Junior has a reproducing unit especially and correctly designed to operate the long air column of the horn. The diaphragm is large and heavy—firmly locked in place—no rubber is used. The permanent magnet is extra large—and no batteries are required for operation.

The Manhattan Junior is the only loud speaker in its price class to have that most necessary adjustment—the "Concert Modulator." The importance of this feature, first introduced and popularized on the Manhattan Loud Speaker, is now thoroughly established. By means of it, the instrument can be satisfactorily accommodated to set, tubes and the strength of "B" battery current, so that the best results can always be obtained. It also eliminates any possibility of "chattering" caused by overloading from powerful receiving sets.

	Each
Manhattan Junior	$8.00

One in a carton.

HEAD PHONES

STROMBERG-CARLSON

No. 2-A

Receivers are equipped with a powerful one-piece bi-polar permanent magnet, phenol fibre spool heads, slotted soft iron pole pieces, corrosion-proof diaphragm and enameled copper wire coils, which have a wrapping of tough insulating material between each layer. Will stand up under high plate voltages now prevalent.

Head band of spring wire covered with brown webbing. Equipped with slide and swivel adjustment and knurled thumb screws to lock adjustment after fitting to head. Either receiver may be disengaged from head band. Light in weight and comfortable. Furnished with 5 feet of silk cord with pin tips at plug end. No plug. Weight, 1½ pounds.

No.	Each
2-A	$6.00

One in a box; one hundred in a case.

RED SEAL

Designed for "DX" work. Tone quality excellent. Workmanship the best. No distortion or chattering. Bakelite case, soft rubber sanitary headband.

No.	Each
Red Seal	$6.00

One in a carton

PICO

The Pico is of the "All Composition" construction with one-piece spool construction. Makes grounding of case or coils impossible. Light in weight, but maintaining volume, clarity and durability. Matched receivers wound to 2,200 ohms resistance. Weight, 1¼ pounds.

	Each
Pico	$1.00

One in a box; twenty-five in a case

STRUCTO TOYS

TANK

Designed like the famous Whippet tank. Equipped with powerful slow speed motor, which drives the mechanical caterpillar smoothly over rugs, carpets or rough surfaces. Caterpillar traction has 2 inch sprocket in front and 1 inch sprocket in rear.

Each

No. 48—Length 10½ ins; width 3½ ins; finished in French gray, trimmed with red and gold..... **$6 60**

One in cardboard box; wt each about 3 lbs.

STRUCTO TOY OUTFITS

TRACTOR-BUILDER

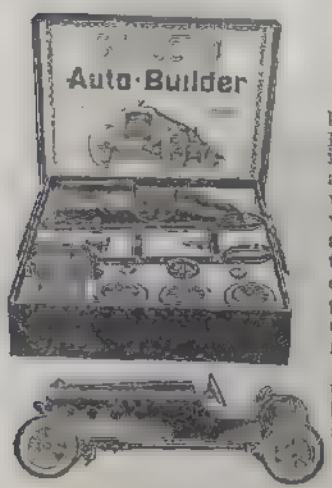
Contains required number of parts to build a complete four wheel toy farm tractor. Equipped with 4½ inch drive wheels connected directly to the big triple unit motor with low speed gears. Pulls heavy loads up grade or on the level. Trailer parts are also furnished. Finished in blue-green and brilliant red enamel, trimmed with black and nickel.

The accompanying illustration shows the outfit not assembled and the model after it is assembled.

Each

No. 11—Outfit complete; wt each about 6 lbs **$13 50**

One outfit in cardboard box.



AUTO-BUILDER

Contains all the toy auto parts required to build a complete speedster model, 12½ inches long, 10 inch wheel base and 5½ inch tread. Equipped with latest style racing body with long hood and low seat; artillery type wheels with white tire effect and red spokes; powerful mechanical motor; bevel gear drive on rear axle. Finished in blue-green, trimmed in nickel and black.

The accompanying illustration shows the outfit not assembled and the model after it is assembled.

Each

No. 8—Outfit complete; wt each about 6 lbs **$10 50**

One outfit in cardboard box.

STRUCTO TOY OUTFITS

AUTO-BUILDER

Contains sufficient toy auto parts to build the Bear Cat roadster model, 16 inches long, 12½ inch wheel base and 5½ inch tread. Equipped with 2½ inch artillery type wheels finished in red and white. Powerful mechanical motor, high speed, shaft drive and bevel gear transmission. Finished in red and black enamel with nickel trimmings.

The accompanying illustration shows the outfit not assembled and the model after it is assembled.

Each

No. 10—Outfit complete; wt each about 7 lbs **$13 50**

One outfit in cardboard box.

AUTO-BUILDER

Contains all parts required to build an up-to-the-minute auto, the De Luxe roadster, 16 inches long, 12½ inch wheel base and 5½ inch tread.

Equipped with triple unit motor, sliding gear transmission, real toy differential, two speeds forward and reverse gear shift control lever. Latest design roadster body and imitation top, extra wheel mounted on rear of body. Finished in orange and black with red wheels.

The accompanying illustration shows the outfit not assembled and the model after it is assembled.

Each

How to Order Lamps

All orders should specify whether Mazda B, Mazda C, Mazda Daylight, Mazda Mill Type or White Mazda lamps are desired and should give the following information

Quantity—Number of lamps desired. Purchasers will avoid delays and get best discount by ordering package quantities

Size of Lamps—Specify wattage of multiple lamps and lumens of series lamps

Voltage—For multiple lamps

Amperes—For series lamps

Bulb—For example S-19, G-25, T-20, P-19, PS-25, etc. The letter in the bulb designate its shape and the figure its diameter in eighths of an inch. Thus an S-19 bulb is straight-sided and is 19/8 or 2⅜ inches in diameter. G indicates a round (globular), T a tubular, P and PS a pearshaped bulb

Finish of Bulb—Clear, coal painted or all frosted

Base—Medium screw or mogul screw.

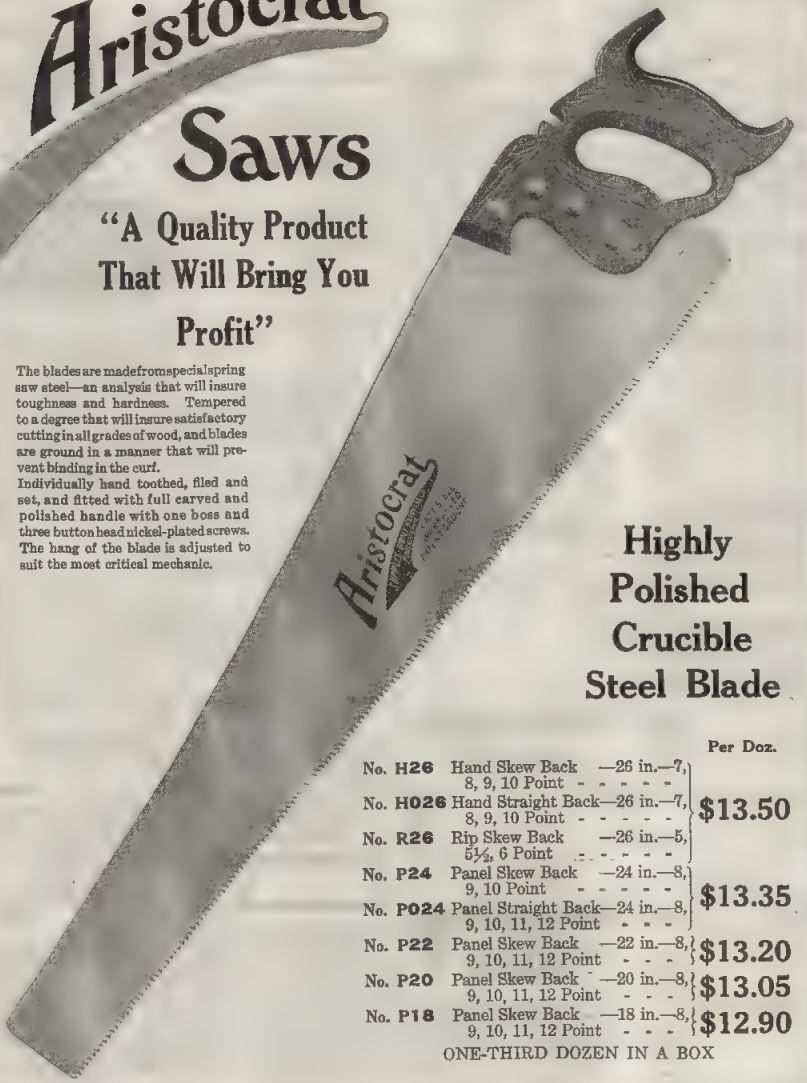
Service—For example Projector, Floodlighting Locomotive Headlight, etc

Lamps for Special Lighting Service in 220—230—240—250 Volts. Prices on Application

Aristocrat Saws

"A Quality Product That Will Bring You Profit"

The blades are made from special spring saw steel—an analysis that will insure toughness and hardness. Tempered to a degree that will insure satisfactory cutting in all grades of wood, and blades are ground in a manner that will prevent binding in the curf.
Individually hand toothed, filed and set, and fitted with full carved and polished handle with one boss and three button head nickel-plated screws. The hang of the blade is adjusted to suit the most critical mechanic.



Highly Polished Crucible Steel Blade

The Crescent Universal Wood-Worker

Nos. 2826-51 to 2826-59

This machine is constructed on entirely different lines from other combination machines; and should not be classed as a combination, in the sense of a single machine that can be adapted for different uses. It is, however, a combination of machines each independent of the other, arranged compactly and self contained, so that all are driven by one main belt from the line shaft. There are no separate countershafts, but the machine has two drive shafts, so located on the base of the machine as to be entirely out of the way, the separate machines being driven from these two drive shafts.

It is not necessary to run more than one machine when only one is in use, but four persons may use different machines at the same time without hindrance.

There are five units proper, to the completed machine, viz., a band-saw, a jointer, a shaper, a saw-table and a borer. The machine is not sold with any of these omitted, except the band-saw By means of the special attachments, the machine is adaptable as a re-saw, hand-feed molder, tenoner, panel-raiser, pole-rounder, disk-grinder, knife-grinder, plain grinder and hollow-chisel mortiser.

These machines are made up with various sizes of machines, for example, the **No. 2826-51** machine combines an 8" jointer and 26" band saw. The **No. 2826-55** machine has a 12" jointer and 32" band-saw, etc.

Full information on request.

Crescent Universal Wood-Worker

Nos. 2827-101 to 2827-112

This new model of Wood-Worker is a remarkable machine for its capacity, completeness and compact form. While it is in no sense a light machine, it is, nevertheless, lighter in weight than the Crescent No 51 to 59 Universal Wood-Worker. It will satisfactorily do the same kinds of work, without serious sacrifice in point of convenience and workmanship. In cases where the additional weight and price are not of prime importance the heavier model, No. 51 to 59 is recommended, but when lighter weight or lower price are considered necessary, then this No. 101 to 112 model will be found a most efficient tool, and a splendid value for the money.

The machine proper consists of five principal parts, viz.: band-saw, jointer, saw-table, shaper and borer. These are so mounted that either of them can be used independently, each being provided with a separate lever for starting and stopping the particular machine used; and the other machines that are not in use are not in motion. It is quite practical for as many as four of the machines to be in use at one time and each of the four operators can control his own machine independently of the others, and without interference on some classes of work.

"Oliver" Band Saw 18-inch

No. 2823-192

Most Complete Portable Band Saw Ever Made

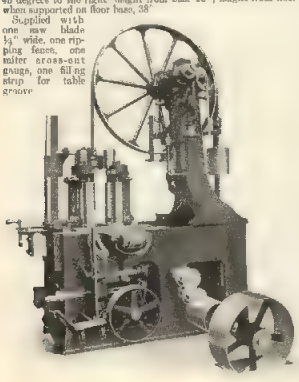
The **No. 192** is a self-contained portable machine, regularly fitted with motor, cord and switch ready for use, but it can also be furnished with tight and loose pulleys for belt drive.

It takes 18" between saw and column 8" high under upper guide can use saws up to ⅝" wide, by using gauges will rip up to 11" wide and will cross-cut and miter up to 8"; table tilts 45 degrees to right.

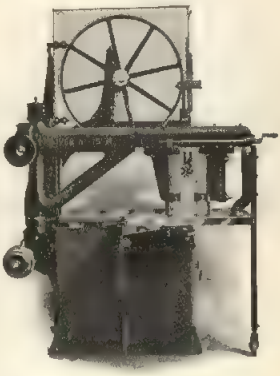
Wheels are cast iron, 18" diameter, 1¼" face, covered with rubber; run in Ball Bearings; both wheels completely guarded with steel doors, speed 770 R. P. M. Upper wheel has 4" vertical adjustment.

Table is cast iron, well ribbed, accurately machined; 24" wide, 20" long, carries a ripping fence and a miter cross-cut gauge, tilts 45 degrees to the right; height from base 20", height from floor when supported on floor base, 38".

Supplied with one saw blade ⅛" wide, one ripping fence, one miter cross-cut gauge, one filling strip for table groove.



Combination Re-saw and Band Saw



No. 2824-15R

We recommend this as a general utility tool of more than the ordinary merit.

With its 2½" re-saw blade, expensive lumber, such as white pine, cherry, mahogany, etc., can be made thin without making shavings of over half of it. The almost universal rule in practice today is to plane down a 1" board (or 2" if you haven't a 1" in stock) to get ⅛", ¼" or ½" thickness, and with pattern or other lumber at one hundred dollars or more per thousand feet, the economy is enormous if the waste may be avoided.

Three Speeds. 10', 15', 20' per minute in its capacity.

Economy.—Change from re-sawing to ordinary band sawing is instantly effected by swinging the arm carrying the two corrugated power-driven rolls out of the way and changing saws.

Capacity.—Will re-saw 16" wide, 8" thick.

Weights. 4,000 lbs.

Horse Power.—7½ to 10. Belted or direct connected motor drive may be furnished.

Band Re-Saw

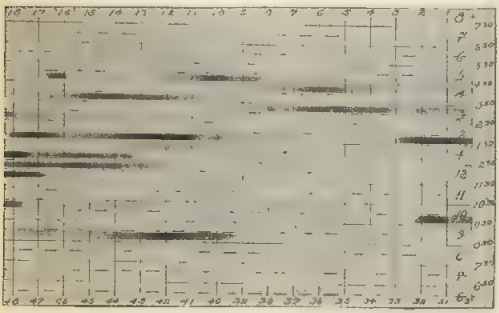
No. 2825-219

48' Wheels, Carries 4" or 5" Saws. Tilting Rolls. Rolls Recede 6" on Either Side of Saw. Will Feed Stock 50" Wide. Rolls Adjust to and from the Saw.

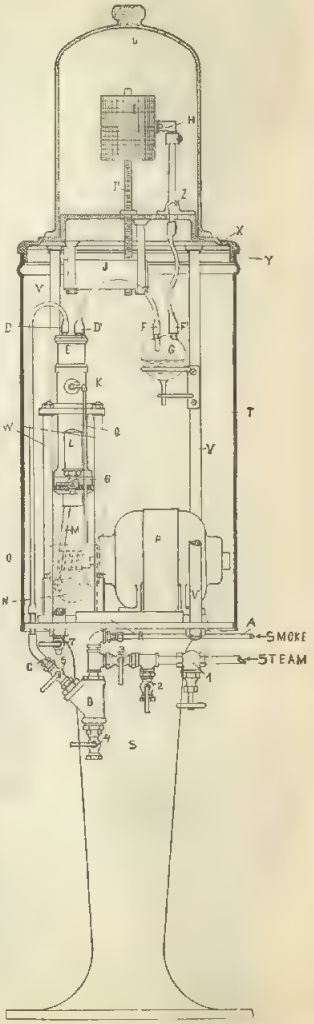
In design this machine is a first class Resaw in all respects convenient and accurate in adjustment, durable, powerful, and economical to operate. It was gotten up to meet the demand for a first-class tool which can be sold at a moderate cost. It is well suited to do all sorts of resawing, such as pictures backing and veneers, where accuracy is required, as well as resawing panels, box boards, bevel sidings, etc. Pieces as short as 8 inches or less can be sawn with safety. It is especially adapted to the requirements of sash and door factories, furniture factories, planing mills, etc. Saws as thin as 23 gauge or thinner may be used removing a saw kerf of less than 1-20th of an inch.

The Eddy Smoke Recorder

The Eddy Recorder furnishes the only accurate means of conducting a smoke test on an individual furnace when that furnace is one of a battery all using a common breeching, the chief difficulty with smoke occurs in the banking and cutting of fires. The fireman consulting the recorder shows when to speed up or check the grate travel and the draft; in action a sample of coloring matter from the smoke laden gas of a furnace is blown on the white paper chart, the movement of the chart is regulated with the rest of the mechanism, with the result that the density of the sample is the same as the smoke density emitted from the top of the stack. The chart has a capacity of fourteen hours; is ten inches long and four inches wide; is cross sectioned for time so that violations may be identified. The use of an Eddy Recorder will raise to a higher standard an improper installation and will insure the success of a good one, no matter how perfect the equipment may be it requires constant, minute attention. It will save money if it reduces or stops the escape of unburned fuel, and it will reduce or stop smoke for the reason that the fireman can view the record sheet and be guided in the handling of his furnace. Can be fitted to any hand-fired installation.



Section of Graphic Record



Specifications

Height over all, 58 inches. Diameter, 12 inches. Electric motor drive, ⅛ H P., A. C. or D. C. Pump, outside plunger packed, pump valves operate in oil cushion. Speed of 55 discharges impulses per minute effected through a worm and gear reduction. Consists of 80 feet of copper tubing coupled, moisture trap with fittings, 100 recording charts, pack thread and brush for cleaning nozzle, glass funnel and breaker for charging the dryer, installation chart and directions for operation and care.

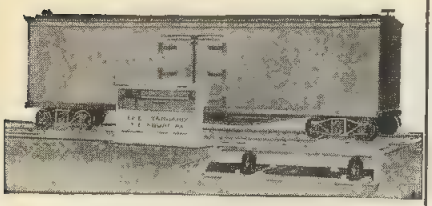
Railroad Track Scales



Our latest extra heavy iron frame "The Standard" track scales are everywhere known as durable, accurate and well adapted for railway use and large industries.

The standard gauge of track is 4 feet 8½ inches, and will be understood to be desired unless other gauge is specified.

They may be installed with steel construction instead of timber, especially suitable for use in hot climates and other localities.

These scales are usually fitted with improved single beam, but double, tripie or gridiron beams, which are the various types used in collieries, will be furnished when ordered with the scales.

Prices do not include foundation or material for framing scales, which are furnished by purchaser.

Short iron pillar beam fixtures, or beam box furnished when desired at extra price.

Railroad scales furnished to be built with third or dead rail when so ordered, at extra price for metal supports, upon application.

Number	Platform, Feet	Capacity, Tons	Price
4104	6	30	On Application
4108	6	50	
4112	6	70	
4114	8	80	

Prices on larger or smaller sizes quoted on application.

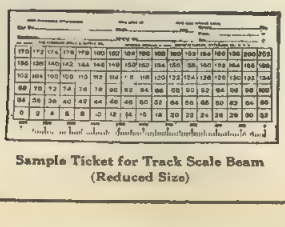
Reed Recording Beam



Sample Ticket for Track Scale Beam
(Reduced Size)

For Railroad Track and Wagon Scales

The recording beam shown in this illustration is the most satisfactory device yet invented for obtaining a correct record of weights. Its simplicity of construction, absolute accuracy of record of weight at one operation cannot be surpassed. Movement is not affected by wear, dirt or weather.

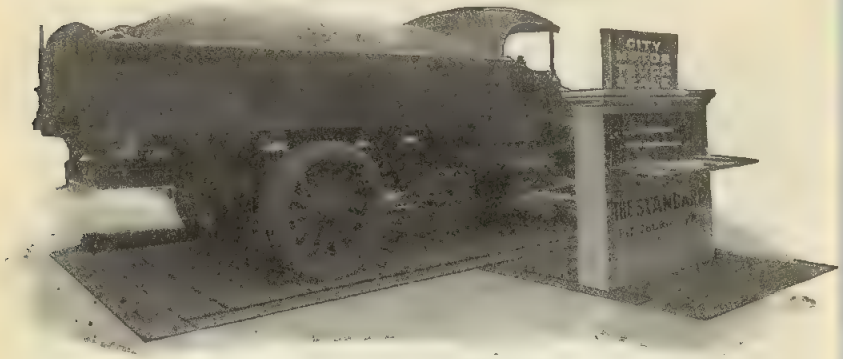
Correct weight can be had in less time than by reading beam, and record obtained can be referred to at any time, which is valuable evidence in case of disputed weights.

Our beam with attachment can be applied to any make of scales.

Recording Ticket

Cut shows ticket (reduced size) for 100-ton full capacity beam for railroad track scales. Ticket is placed before beam in receiver, and when correct position of poise is attained a touch of the ticket holder will make a hole in ticket, indicating number of pounds in unmistakable manner. The tickets for other scales are arranged upon the same principle, differing only in size and capacity.

Standard Motor Truck Scales



Note the Load on Rear Axle

The use of Auto Trucks for carrying heavy loads has created a demand for a much heavier type of scale than wagon scales. This is necessary for accurate weighing and to guard against accidents which may occur on the scales of insufficient capacity

These scales are of railroad type, having self-aligning pendulum bearings with big adjustment; self-centering blocks on top of pivot and at supporting point on the pendulum. Length of pendulum is sufficient to be effective in absorbing shocks, thrusts and deflections, therefore, oscillation on the knife edges is practically nothing. The yokes that bear upon the bearing links are braced laterally.

The "Standard" Wagon Scale is not suitable for weighing auto trucks, due to the fact that about 70% of the load on a motor truck is carried on the rear axle, which will usually crush an ordinary wagon scale, which is designed for loads distributed equally

Full capacity Double Beam. Tare bar, 6 tons.

Suspended Bearing				Rigid Bearing			
No.	Capacity Tons	Platform Feet	Price	No.	Capacity Tons	Platform Feet	Price

8228	20	24x9	**1100.00**				

Platforms wider than 9 feet increase price $4.00 per inch. All prices are exclusive of the timber, steel, beam box and foundations, which are to be furnished by purchaser.

Standard Automatic Dial Scales

Constructed entirely of metal, self-contained and ready to place on foundation.

The bearing surfaces in dial are rolling in links which eliminates practically all wear and jar, an essential in automatic scales.

No Cloth in Its Innards!

Millions of feet of EKLA have proved that a radiator hose doesn't have to have cloth "in its innards" to stand the gaff.

Although EKLA all-rubber hose is better, it costs less, so shows the dealer a bigger profit.

Increased capacity now enables us to offer EKLA hose through the replacement trade. It is sold in cut lengths for Fords and in 3-foot lengths, all sizes with inch markings.

We are also makers of EKLA CORD—"Heavy Duty" and MUSKETEER—"Price Competition" inner tubes. A few more distributors can be added, and they will make unusual profits with these brands.

THE NEW MULTIPLEHEAD

A Special Airbrush for the New Lacquers

Apply Nitro Cellulose finishes the only right way with the Paasche Multiplehead. The lacquer goes on smooth as mist. Will not strip from the surface. Will not ridge in corners. Age does not affect it. Complete atomization takes place immediately after leaving the nozzle—found only in the Paasche Multiplehead.

Build your business with Paasche equipment.

Get our booklet—valuable secrets about automobile finishing. Write for it now.

10 for $2.55
We Pay Postage

Grey Gull Records are the finest you can buy. Next the musical word is to offer them through this little book. And that your favorite singer, orchestra or entertainer will receive one of these records. All records are 10-inch unless otherwise stated.

J. L. MITCHELL, Manager Music Department

THE final test of a good instrument is its TONE. The tone quality depends entirely upon the materials used and the care and skill with which the maker has worked.

No matter how perfect the design of a violin or piano or brass instrument, if the maker chooses inferior wood or metal or if he shapes it carelessly or leaves it badly, the tone of his instrument can not fail to be flat and unmusical.

It is a point of pride with us that every instrument we sell is fine through and through. We entrust their manufacture only to makers who are known the world over for the tone excellence of their instruments. We set high standards for quality of materials and workmanship and we accept only the best.

When an instrument is shown in our catalogue you can be sure it has passed our test for tone excellence.

It is desiring to try to judge the quality of Ward's instruments by comparing our prices with those of other makers. Remember, we are buying direct from the makers, in the huge quantities necessary to supply millions of customers. Our prices as a rule are twenty per cent to fifty per cent lower than you will pay elsewhere for instruments of the same quality.

J. L. Mitchell

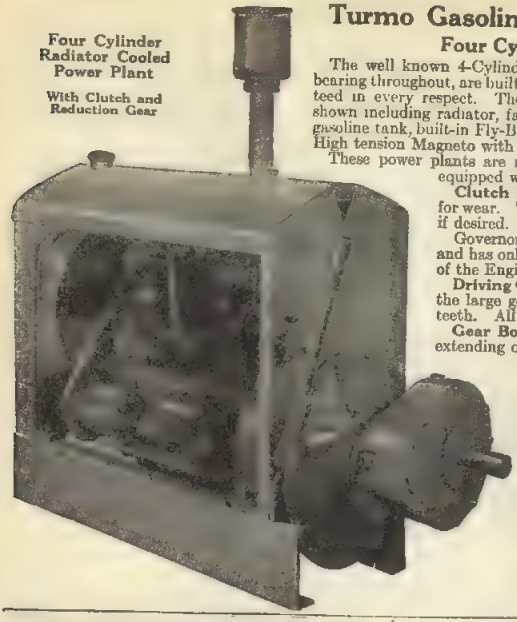
Turmo Gasoline Engine Power Plants

Four Cylinder Radiator Cooled Power Plant

With Clutch and Reduction Gear



Four Cylinder Power Plant

The well known 4-Cylinder Engines used in these plants are ball bearing throughout, are built to stand continuous usage and are guaranteed in every respect. They are furnished completely equipped as shown including radiator, fan and belt. Hood with removable sides, gasoline tank, built-in Fly-Ball governor, Zenith Carburetor and Bosch High tension Magneto with Impulse Starter.

These power plants are mounted on Channon non-skids and are equipped with a hood entirely enclosing the Engine.

Clutch is the Dry Disc Type and easily adjusted for wear. The plants can be furnished without clutch if desired.

Governor is of the Fly-Ball type, self lubricated and has only one adjustment for regulating the speed of the Engine.

Driving Gear is steel Carbonized and hardened and the large gear is cast semi steel with accurately cut teeth. All run oil.

Gear Box can be furnished with a take-off shaft extending on either the right or left hand side or on both if necessary. This shaft can be run in either direction.

Direct drive take-off shaft runs at engine speeds 1200 to 1400 r. p. m. Geared boxes running same direction as engine or opposite can be furnished in geared ratios 2½, 3, 4 or 5 to 1. Right angle reductions in ratios 3, 4, or 5 to 1.

Two Cylinder Power Plant

The Engine in these two Cylinder plants is same in the four cylinder plants as described above.

They can be furnished Radiator or hopper cooled with take-off shafts running 600 or 1200 r. p. m.

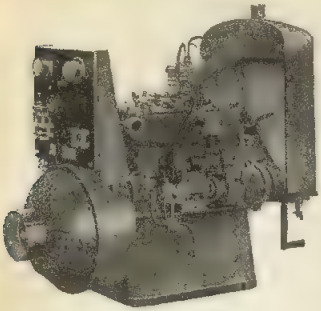
Clutch for either of the above Power Plants when required	45.00	

Two Cylinder Radiator Cooled Power Plant



Universal Electric Plants

Complete Self Contained Units, Designed to Operate Equally as Well, With or Without Storage Battery

Furnished in the following Sizes

1½ K.W., 2½ K.W., 4 K.W., 7½ K.W., 12½ K.W

All Universal Electric Plants are equipped with 4-Cylinder Engines as experience has taught us that the 4-Cylinder Principle is best suited to Perfect Balancing. It is also The Ideal All-Round Economical Type of Power Plant, because it has not the destructive vibration of an Engine with one Cylinder or less than four, nor has it the complicated construction of an Engine with more than four Cylinders. It is practically impossible to perfectly balance a Motor with less than four Cylinders, and "Balance" in a motor is what insures long life, because it is vibration that wears out a motor. The effect of 4-Cylinder operation is important too on the Electricity side of the plant. With the 4-Cylinder Universal plant you are absolutely independent in case something should happen to the Batteries. The smooth power of the Universal 4-Cylinder Engine generates a current of electricity so steady as to provide perfectly Flickerless light direct from the Generator.

The Generator has been especially designed to operate in connection with the above type of engine. Windings of ample capacity throughout and provisions for adequate ventilation are responsible for the comparatively low operating temperature and the high efficiency of the generator. The Armature cores are built up of thin electrical steel of the highest magnetic quality. Commutator Bars are made of rolled copper and insulated from each other by the best grade of Amber Mica. The Box Type Brush Holders are simple in design and trouble proof with spring tension just right for the brush.

1½ K. W. Electric Plant

Furnished in Either 32 Volt or 110 Volt

Standard Equipment consists of Bosch Magneto Ignition Carburetor, Governor, Muffler, Radiator and Fan, Fuel Tank and Switchboard mounted, weight—without Battery, 420 lbs.

2½ K. W. & 4 K. W. Plants

Furnished in Either 32 or 110 Volt

These Sizes are ideal for places requiring dependable and economical electric service where the loads come within the capacity of the Machines, such as Large Farms, Country Estates, Country Clubs, Summer Resorts, Small Towns, Circuses, Carnivals, Picture Shows, for use on Dredges and in construction work, Public Institutions, etc. and for operating electric tools. Standard Equipment consists of Bosch Magneto Ignition, Zenith Carburetor, Built-in Flyball Type Self Oiling Governor, Muffler, Radiator and Fan, Fuel Tank in Base, Stewart Vacuum Tank, Power Pulley and Switchboard mounted, making a compact and completely Self-Contained Unit. Weight—2½ K. W. without Battery 700 Lbs., 4 K. W. 800 lbs.

7½ K. W. Electric Plant

110 Volt

Furnished Fully Equipped for Operation, including Ignition System complete, (consisting of Bosch High Tension Magneto with Impulse Coupling) Carburetor, Muffler, Stewart Vacuum Tank, Fuel Tank, Radiator, Fan and Standard Switchboard. Weight—without Battery, 1200 lbs.

12½ K. W. Electric Plant

110 Volt

Furnished Fully Equipped, same as above. This size can also be equipped with a 6-Volt, two-unit Automobile Type Starter and Generator and Storage Battery. When so equipped, the Ignition System will be of the Battery Distributor Type in place of High Tension Magneto. Weight—without Battery, Approx. 2000 lbs.

Note.—Full Description with complete Specifications and Prices covering any of the above outfits will be furnished on request. Write us relative to your requirements and we will gladly recommend a suitable outfit for your needs.

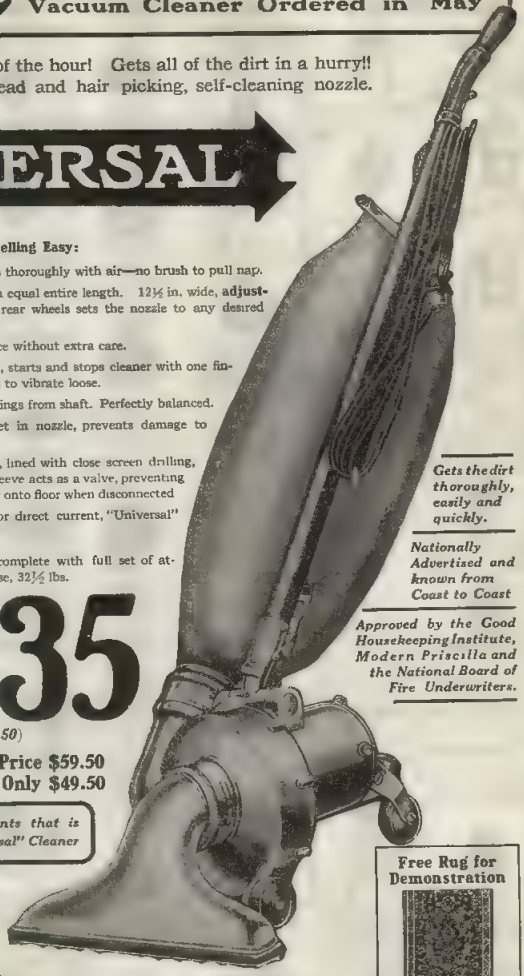
FREE

A Full Set of $6.50 Attachments Will Be Given Free With Every "Universal" Vacuum Cleaner Ordered in May

The cleaner of the hour! Gets all of the dirt in a hurry!! Patented thread and hair picking, self-cleaning nozzle.

UNIVERSAL



The Following Feature Points Make Selling Easy:

1. **Extra Powerful Suction**—Cleans thoroughly with air—no brush to pull nap.
2. **Patented Nozzle**—Makes suction equal entire length. 12½ in. wide, **adjustable,** turning thumb screw over rear wheels sets the nozzle to any desired level for rugs.
3. **"Universal" Motor**—Long service without extra care.
4. **Trigger Control**—Handle trigger, starts and stops cleaner with one finger. No exposed wires—no parts to vibrate loose.
5. **Self-Cleaning Fan**—Keeps ravelings from shaft. Perfectly balanced.
6. **Rubber Buffer**—Permanently set in nozzle, prevents damage to furniture.
7. **Bag**—Mercerized sunfast sateen, lined with close screen drilling, dust and dirt proof, inner cloth sleeve acts as a valve, preventing dirt dropping back into cleaner or onto floor when disconnected
8. **Current**—110 volts alternating or direct current, "Universal" motor, weight of cleaner 12 lbs

1H6657—(Mfrs 7201) Cleaner complete with full set of attachments in wood case, 32½ lbs.

Gets the dirt thoroughly, easily and quickly.

Universal Ball Bearing Turntable

One man can operate these tables when loaded to full capacity.

The table is revolved on a serpentine circular track filled with 2, 2½ or 3-inch balls—according to the diameter. As the weight of the table is sustained only by those balls at the highest point, friction is greatly reduced. Of course the balls roll around the race course in the ordinary manner, only as they roll up and down but a few carry the weight at one time.

"Universal" tables are neat, strong and substantially made, weights distributed so as to reinforce parts subjected to the greatest strain.

All tables, regardless of size and style, are 6-inch in depth, allowing of their being placed in any flooring. Their construction is such—the top casting overlapping the bottom—that there are no places for dirt to accumulate. This makes the "Universal," in addition to its many other virtues, a dirt proof table.

The locking device furnished with "Universals" Nos. 2 and 3 is positive, automatic and at all times out of the way.

When ordering state style, number of tables required, gauge of track and wheel base of cars—or diameter of tables—if flange of wheels runs on the outside, please advise, otherwise will assume that it rests on the inside.

No. 1 table has plain checkered top without locking device. No. 2 has grooved top with locking device. No. 3 has grooved top locking device and guard rails.

"Planet" Roller Bearing Turntable

Cut Shows Top Removed

This is a very efficient and easy operating turntable. There is no pumping, no getting out of line, no trouble to keep in order and no journal friction.

Made in three types as listed, plain top, grooved and raised rail.

There is no center bearing. The entire load is on the chilled rollers, turning on roller path near the outside of the table. These rollers are conical and cannot slide or grind against each other, being held rigidly apart by spacing frame. There is only rolling friction resulting in an easily turning table. No oil is required.

Every *"UNIVERSAL"* Sale Makes The Next One Easier by Creating a *Booster*

The cleaner of the hour! Gets all of the dirt in a hurry!! Patented thread and hair picking, self-cleaning nozzle.

UNIVERSAL

The Following Feature Points Make Selling Easy:

1. **Extra Powerful Suction**—Cleans thoroughly with air—no brush to pull nap.
2. **Patented Nozzle**—Makes suction equal entire length, 12½ in. wide, **adjustable**, turning thumb screw over rear wheels sets the nozzle to any desired level for rugs.
3. **"Universal" Motor**—Long service without extra care.
4. **Trigger Control**—Handle trigger, starts and stops cleaner with one finger. No exposed wires—no parts to vibrate loose.
5. **Self-Cleaning Fan**—Keeps ravelings from shaft. Perfectly balanced.
6. **Rubber Buffer**—Permanently set in nozzle, prevents damage to furniture.
7. **Bag**—Mercerized sunfast sateen, lined with close screen drilling, dust and dirt proof, inner cloth sleeve acts as a valve, preventing dirt dropping back into cleaner or onto floor when disconnected.
8. **Current**—110 volts alternating or direct current, "Universal" motor, weight of cleaner 12 lbs.

Gets the dirt thoroughly, easily and quickly.

A WORLD BEATER!

Aladdin

The Wonder Cleaner

Improved Model

The "Aladdin" is a quality product in every particular. Made by the largest manufacturer of Electric Vacuum Cleaners in the world. There is no better cleaner on the market in construction and performance than the "Aladdin." Combines excellence in construction and operation with moderate price.

Features of the "Aladdin"

Read over these points and compare them with those of any vacuum cleaner but

(1) **GENERAL ELECTRIC TYPE MOTOR**—The heart of the vacuum cleaner. Strong, compact and powerful. Air-cooled, no belts or cogs, fan forces air through motor and cools it during the actual operation.

(2) **REVOLVING SPECIAL BRISTLE BRUSH**—Positive action, double drive, loosens the embedded dirt and picks up hair, threads, lint and other surface matter

(3) **POWERFUL SUCTION**—To draw up the embedded dirt that ents the rug nap

(4) **TRIGGER SWITCH**—In the comfortable pistol grip for easy starting and stopping.

(5) **TWILL BAG**—Handsome blue bag of finest twill, dust tight slide-on clamp—simply pull the clamp off the end of the bag, empty it and slide the clamp on. A quarter turn fastens the bag onto cleaner by a bayonet lock—a quarter turn back releases it for emptying

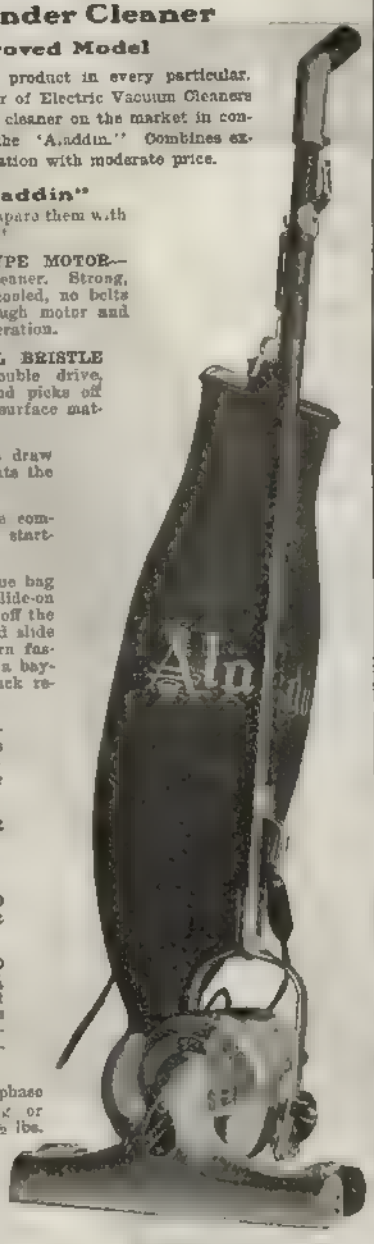
(6) **NOZZLE ADJUSTMENT**—Adjustable to all surfaces from bare floors to the longest nap rugs. Located over the rear caster.

(7) **NON-MARRING RUBBER CASTERS.**

(8) **ALL ALUMINUM BODY.**

(9) **FLEXIBLE COVERED CORD**—20 ft. of the finest cord obtainable.

(10) **EXTRA WIDE TAPERED NOZZLE**—13¼ in. long, 1¾ in wide, tapered so that it gets into the corners. It is unnecessary to make a separate job of cleaning out-of-the-way places.



1H6900—110 volts, single phase motor, alternating or direct current. 1 in case, 15½ lbs.

Each **$28.75**

Lots of 3, Each **$27.50**

AIR RIFLES

UPTON MACHINE CO.

Model 40, 1000 Shot Repeater, Lever Action.

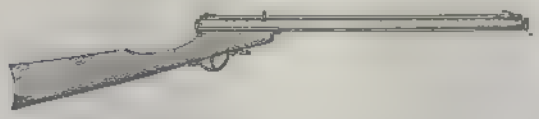
Army blue finish steel barrel, frame and trimmings; walnut stock. Safety lever which can not fly back to gun stock and injure fingers. A loading device which makes it impossible to get oversize shot in magazine. Length over all 36 ins.

Per Doz

No. G40—1000 shot repeater; will hold 350, 500 or 1000 shot; shoots air rifle shot..... $50 25

One doz in case; wt per doz 35 lbs.

BENJAMIN



This is a pneumatic rifle and is operated entirely by air. The air is compressed in an air chamber by a stroke or two of the pump rod, and when released by pressure upon the trigger throws a shot which will easily pass through a ½ inch white pine board. An ideal rifle for target practice and small game. Simple, strong and efficient.

Nickel plated steel barrel and trimmings, varnished walnut stock. Length over all 37 ins.

Per Doz

No. 1BE—Single shot; shoots air rifle shot; wt each 2 lbs..... $117 00

One in carton.

POP GUNS

DAISY

One in carton; six doz in case.

DAISY

Breakdown action; heavy metal barrel and frame; gun metal finish; hardwood stock; shoots a cork attached to gun.

Per Doz

No. 7—Length 17 ins; wt per doz 5 lbs..... $6 30

One in cardboard box.

POP GUNS

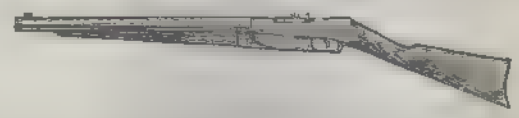
KING

Per Doz

No. 15—Made like an air rifle; Winchester action; one piece nickel plated steel barrel and frame; black walnut stock; shoots a cork attached to a cord; length 17 inches; wt each 7½ ozs..... $6 30

One in carton, three doz cartons in case.

KING RAPID FIRE



A pump action, rapid fre pop gun. Operates similar to a real pump gun; barks hard, loud and fast; easy and simple to work. Loads automatically, explodes with both forward and backward movement of the hand piece; absolutely safe, not even a cork to fly out.

Per Doz

No. 25PG—All metal parts nickel plated; genuine black walnut stock, polished; length 27 ins; wt each 13½ ozs..... $25 20

Three doz in case; wt per case 36 lbs.

WYANDOTTE

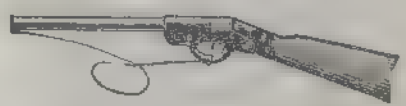
Breakdown action; heavy metal barrel and frame; black gun metal finish; hardwood stock; shoots a cork enclosed in a guard, is automatically pulled in with the breakdown action; can be used by small children with safety.

Per Doz

No. 1—Length 19 ins; wt per doz 7 lbs..... $6 30

One in cardboard box.

WYANDOTTE



Breakdown action; heavy metal barrel and frame; black gun metal finish; hardwood stock; shoots a cork attached to gun.

Per Doz

No. 2—Length 17 ins; wt per doz 6 lbs..... $6 30

One in cardboard box.

GUN DISPLAY CASES

Revolving Hexagon Display Case for Guns and Rifles.

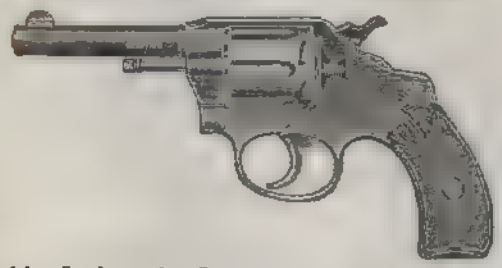
Each

No. 2—Solid oak, 4 ft. 7 in. high, 32 in. wide, each hexagon side 18 in. wide. To be placed on platform or counter; has one door with lock and key; holds 12 rifles and 12 shot guns. . ✦$157 50

One in crate; ship wt 225 lbs.

REVOLVERS

COLT'S NEW POCKET POSITIVE



Double Action, 32 Caliber, Center Fire, 6 Shot.

Simultaneous ejection; jointless solid frame; equipped with the Colt positive lock, an absolute preventive of accidental discharge.

Chambered for 32 Short Colt, 32 Long Colt 32 S&W and 32 S&W Long Cartridges.

Nickel Plated.

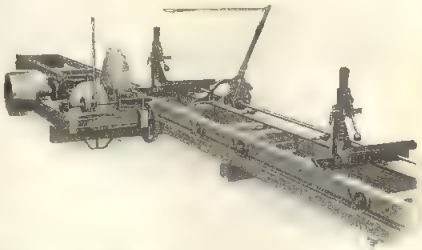
Variable Friction Feed Saw Mill

No. 2915-1



Can be operated with any kind of power up to 20 h.p., and has been operated successfully with gasoline engine of 8 h.p. and 6 h.p. steam.

Capacity 2,000 to 6,000 feet per day. Takes saws up to 50", carriage has travel of 24 feet and will handle logs up 36" diameter and 20 feet long.

VARIABLE FRICTION FEED SAW MILL

No. 2915-2

Requires 10 to 25 h.p. Has capacity of 5,000 to 10,000 feet per day according to power used. Takes saws up to 54" and can cut logs as large as 40" in diameter.

VARIABLE FRICTION FEED SAW MILL

No. 2915-3

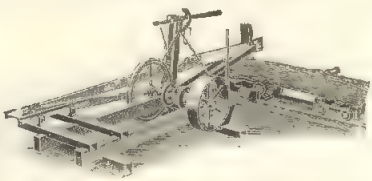
Requires from 15 to 30 h.p. Has capacity of 6,000 to 15,000 feet per day. Takes saws up to 60" and can cut logs as large as 48" in diameter.

"HEACOCK" VARIABLE FEED SAW MILL

No. 2915-4

A heavy portable rig that is not surpassed in quality or performance. It is adapted to any power up to 40 h.p. and is capable of cutting up to 20,000 feet per day. Saws up to 60" in diameter may be used.

Friction Feed Drag Saw



No. 2916

The Friction Feed is very simple, yet positive and effective. It will start, stop or reverse instantly by very slight motion of the feed lever, without any effort on the part of the operator. It will not stick or get out of order and will last for years. This enables the operator to feed the logs ahead or back at will as much or little as desired, and stop at any point without running back or losing time. This feature alone puts the "Champion" ahead of any other drag saw in the market, yet it has every practical advantage that can be desired in a machine of its kind.

Unless otherwise ordered each machine is furnished complete with 24" by 6" driving pulley, log truck power rolls, tumbling rod with two Universal Couplings 16' of track and one 5' 6" saw.

Capacity: 30 to 40 cords of wood per day, depending on kind of wood, power and speed.

Power required. Two to four horse power will operate machine to good advantage, more more will give greater capacity.

Full specifications on application.

Lock Corner Box Machine

No. 2911 61

Two Sizes, 12" or 16" Deep

This machine is designed for cutting or notching box stock, intended to be put together in lock corner style.

The table can be raised or lowered to cut different thicknesses, and also to allow for wear of cutters. The spindle carrying the cutters is 1⅝".

The cutters are 8¼" diameter, each with two cutting points. They are fitted to the spindles spirally, so that when in operation, there is a continuous cut. They are regularly made to cut ⅝" joints. Cutters with a greater number of cutting points or different thickness supplied as ordered.

Each machine is furnished with a separate countershaft, a plate attachment for setting the cutters, a jointing table for jointing the points of the cutters when they become worn uneven, and tools to keep them in working order.

The machine is made in two sizes, to corner boxes 12" or 16" deep and as large in other dimensions as desired. Tight and loose pulleys 12" x 8". Speed. 800 r.p.m.

Dowel Machine, 80H

Made in two sizes.

No. 2912-4 for dowels ¼-in h to 1¼-inch. Pulleys 4 x 4 inches. Speed 2800 R.P M. No. 2912-5 for dowels ¼-inch to ⅝-inch. Pulleys 4 x 4 inches Speed 3,000 R.P.M. Knives are set in the heads to give a draw cut and it requires very little effort on the part of the operator to feed the stock.

Power Door Clamp

No. 2913-242

This machine is designed for clamping doors by power. It will handle blind tenon and dowel doors, or we can make it to work the old style of wedge door. End clamps can also be furnished. Capacity, doors 4-ft. by 8-ft. 6 ins. The machine is operated by two foot levers, one to close and one to open the clamp. After the foot lever is operated the machine is entirely automatic. Both beams move at once, a feature which gives greater speed, more capacity with less strain on the frame of the machine.

For dowel doors it is not necessary to use the end clamps. We do not ship end clamps with machine when it is to be used for dowel doors only.

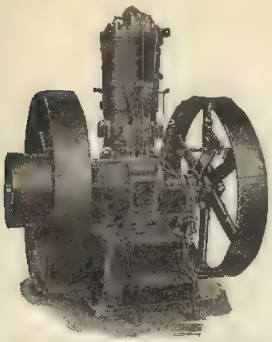
Veneer Press

No. 2914-56

These presses are made in a very superior manner, each section being complete in itself and can be used singly or in combination with any number of them. Several of them are, as a rule, placed side by side and all pieces to be clamped are placed lengthwise through the presses Distance between top and bottom castings 36 inches. Hand wheels can be placed either above or below the top casting. When placed below the distance between castings is greater to allow for same. They are frequently easier to operate when placed below. We make the following sizes:

9 x 18 , two screws	12 x 38 three screws
9' x 28", two screws	10" x 50" four screws
9' x 32", two screws	12" x 50" four screws
9" x 38", three screws	12" x 81" five screws

Full specifications on application.



The Venn-Severin Vertical Oil Engine

This engine is designed and constructed along distincitve lines which avoid the difficulties common to most gas and oil engines.

It operates at ordinary gas engine pressures, not too high to cause wear or breakage, nor too low to interfere with efficiency. Every part is reduced to the most simple mechanical form. All gears, valves, magnetos, batteries, carburetors, etc., are eliminated. There are no adjustments necessary, to meet changes in load, fuel, climate, etc.

The Venn-Severin is distinguished from other crude oil engines in its principle of internal carburetion. The fuel is not injected against a red hot surface, but is sprayed by a patented inspirator in perfectly vaporized form into every part of the compressed air in such a manner that a gaseous mixture, or carburetion, is formed, which ignites spontaneously from the heat of the compressed air.

Inspiration of the oil occurs near dead center, the moment combustion is desired, thereby eliminating pre-ignition which is so destructive to an engine. Ignition is instantaneous and combustion complete.

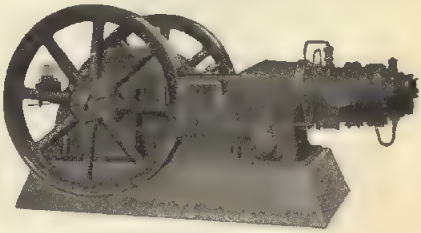
For these reasons it runs with exceptional smoothness and a total absence of any perceptable jar or knock. Therefore, there is no danger of breaking any parts or causing early deterioration of the engine.

The superior principle of operation is indicated by the exceptional low fuel consumption which averages from .65 to .75 of a pound of fuel oil per H. P. hour. It will operate with equal success on any kerosene fuel and crude oil provided these oils are in a free flowing water like condition.

This engine has given exceptionally good results in every class of service. It is particularly adapted for electric light and power generation for pumping plants, factory power houses or other service requiring continuous heavy duty. It is built in both stationary and marine types.

Marine engines from 10 to 120 H. P. Prices on application.

The Bessemer Horizontal Oil Engines



Of massive construction well balanced and very symmetrical in design.

Its functions being comparatively few and easily understood a skilled mechanic is not required to operate.

The cheapest grade of crude oil may be used, which together with its simplicity of parts and low cost of maintenance make it a very economical proposition.

The crank end of the cylinder is used as a pump, to furnish the air necessary for combustion of oil. Into this crank end of the cylinder, during the head end stroke of the piston, air is drawn through the valve at the bottom, filling the evacuated space at atmospheric pressure.

During the crank end stroke of the piston this air is compressed slightly (to about 5 pounds per square inch) and immediately upon the uncovering of the inlet port in the upper side of the cylinder by the piston this compressed air rushes over to the head end of the cylinder, sweeping before it and out of the exhaust ports at the bottom of the cylinder, the burned products of the previous charge.

Upon the following head end stroke the fresh charge is compressed in the combustion end of the cylinder, while a new charge is being drawn in at the crank end. A pump injects fuel into the combustion chamber, near the dead center, which is ignited by contact with the hot surface of the ignition bonnet in the head, and drives the piston outward upon its power stroke. The ignition bonnet is heated by means of a gas or kerosene torch for a few minutes before starting, after which the combustion supplies the necessary heat for ignition.

Bessemer oil engines are built in single cylinder type to 85 H. P. and in twin cylinder type to 180 H. P. They are guaranteed to develop their full rated horse power at the shaft, and there is an overload capacity sufficient to handle and overcome the heavy starting torque of high speed machinery or motors, or for an occasional peak load, such as sometimes occurs in wood working plants They will overcome certain losses due to high elevations, but in choosing any engine, it is advisable to allow for the standard corrections for elevations. Bessemers are tested at 1250 feet.

Special bulletin with full description sent on request.

Prices also on request.

Improved Class "F" Vertical Engine

This center crank vertical engine is well made throughout. The rods are of steel. The crank shaft of solid forged steel balanced, and the brasses are of phosphor bronze. It is very popular with the manufacturers of cement and concrete-mixers, the majority of mixers in the country being equipped with this engine.

A critical steam test of every Engine is made before it leaves our factory, and the necessary adjustments carefully made, so that the Engine is ready to run the moment it is placed in position and given steam.

The fittings and fixtures comprise: Fly-Wheel, Pulley, Oil Cups, Sight feed Lubricator, Throttle Valve and Nipples, Governor and Governor Belt. Foundation Bolts and Washers will be furnished when ordered, at an extra cost.

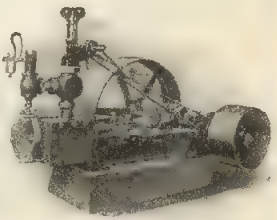
Class "L" Horizontal Engine



This engine is suitable for all kinds of work where high speed and smooth running is required. It is correctly proportioned, especial attention having been given to distributing the metal along the lines of strain.

The bed is made with solid bottom and arranged to catch all drippings which are conveyed to an exit which has been provided.

The crank shaft is cut from a solid forging of the best quality of steel and is equipped with counter-balancing weights. The main bearings of the crank shaft are made especially large and strong.

The connecting rod is equipped with extra heavy phosphor bronze boxes at each end. The crosshead end is of the solid end type, while the crank pin end is of the strap type. Both brasses are adjusted by means of wedges.

The crank pin and crosshead pin are long and of large diameter, giving very liberal wearing surfaces.

The fittings comprise: fly wheel, pulley, grease cups, sight-feed lubricator, throttle valve and nipples, automatic governor and governor belt. Foundation bolts and washers will be furnished, when ordered, at an extra cost.

No. 785—Wt per doz 9 lbs **$39 00**

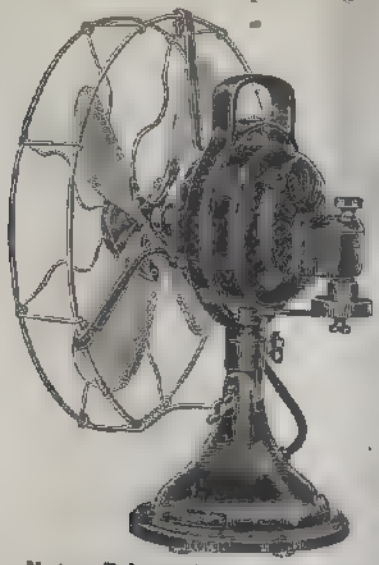
ELECTRIC FANS

GENERAL ELECTRIC CO.

DESK AND BRACKET FANS

Standard Type—Four Blade.

The "16" fan is designed particularly for service in large rooms, stores, restaurants, etc., where a high velocity air discharge is the most effective. The "12" fan is designed for rooms and enclosures of meduim size where a moderately strong velocity is desirable. Noise is reduced to a degree consistent with the general operating characteristics. They are arranged for three speeds and "off" position.



OSCILLATING

The accompanying illustration shows position as desk fan, however fan can be instantly changed to a bracket fan by means of a thumb nut.

Cast iron. Base motor body and guard supports, black enameled. Blades and guard, dipped and lacquered brass. Swivel and trunnion mounting.

A simple friction device in the reducing mechanism prevents the motor from overturning or burning out should it encounter an obstruction during the stroke of oscillation. The steady and graceful operation is due to a two-bearing support for motor body, straight connecting rod and a correctly designed train of gears.

Note—Prices given below include ten (10) feet of New Code Reinforced Portable Cord, with separable attachment plug.

Alternating Current. 110 Volts. 60 Cycles.

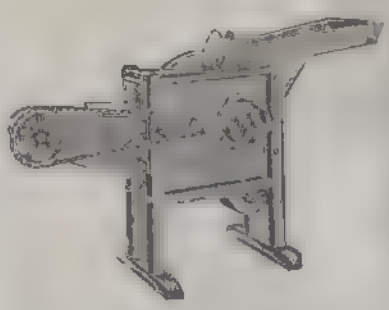
CORN SHELLERS

HOCKING VALLEY

Two Hole, With Cob Carrier.



The castings are made of the best grade of foundry iron; the frames are are made of the best hardwood, painted red and green stripes and varnished. Capacity 35 to 40 bushels per hour. Length of table 27 inches, depth 3 inches, extreme width 16 inches; pulley 8 inches by 3 inch face, fly wheel 24 inches diameter with 1¼ inch rim, crank 12 inches long with hardwood handle. Extreme dimensions 41 inches high, 11 inches wide, 32 inches long. Speed about 100 revolutions of the crank shaft or 300 revolutions of the balance shaft per minute. If used with power, use 2 H. P. gasoline engine or electric motor.

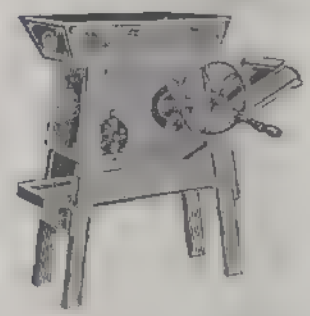
Each

No. 20—Complete with crank, fan, feed table and pulley **$121 50**

Shipped loose, wt each 175 lbs.

PEA HULLERS

ROYAL



A small wooden machine of large capacity, considering its size. Has wooden cylinder and steel teeth, all bearings of iron and all material of the best. Provided with hand screen operating on cleats in box. Nicely painted and varnished.

To be used only for hulling common varieties of cow peas. Cannot be used for hulling navy and field beans. Floor space 16x30 inches; height over all 41 inches.

Each

No. Gem—Capacity 2 to 3 bushels dry peas per hour; weight each 100 pounds ..... **+$40 50**

Shipped loose.

ROYAL

Made of iron and steel with the exception of the base and hopper, 11 inch cylinder, equipped with patent automatic revolving screen. Slices the peas clean, ready for sacking. Painted and varnished.

To be used only for hulling common varieties of cow peas. Cannot be used for hulling navy and field beans.

Floor space 17x40 inches; height over all 50 inches.

Each

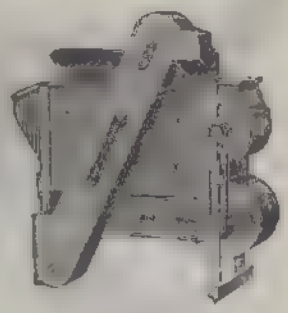
No. 3—Capacity 4 to 7 bushels dry peas per hour; weight each 150 pounds ..... **+$79 50**

Base and hopper wired in a bundle, action in a crate.

+F. O. B. Tennessee Factory Only.

PEA HULLERS

STAR



Improved, Star huller has indestructible malleable iron cylinder and concaves which cannot break or decay. Patent automatic conveyor carries out the hulls while the fan cleans the peas. The 50 pound fly-wheel tightens and equalizes the draft. There are no set screws to cut the shafting and come loose. The blast from the fan can be regulated for grading oats and cleaning wheat and corn.

Will not hull lima beans. Will hull soy beans without any extra attachment. An extra screen is needed for use in hulling velvet beans.

KEY CUTTING MACHINES

RUSSWIN

The Russwin key cutting machine will cut duplicates of all makes of pin tumbler cylinder, flat, double bit, solid and hollow ground keys by changing the cutter and gauge accordingly.

It is the only machine that will do this without complicated changes or adjustments and possible loss of accuracy.

Equipped with two types of cutters, one milling cutter (F) and gauge for cutting pin tumbler keys and two cutting saws and gauges for all other types of keys.

The hinged vice (A,A) holds both original key and blank to be duplicated in rigid and correct position; a shelf on the vice supports the bow on the cylinder key. On each vice there is a hinged stop which screws both as a top shoulder stop (B1) and a setting stop (B2); the shoulder is indispensible when cutting cylinder keys, all cutting from the original cylinder key should be started from the top shoulder. Stop (B1) insures accurate reproduction of the original key; the setting stop (B2) gives the correct distance from the cutter to the gauge (C) by resting the shoulder of one stop (B2) against the cutter and the shoulder of the other stop (B2) against the gauge (C).

Two gauges (CC) one for cylinder and one for other types of keys are furnished with this machine. After the original key and the blank to be cut are placed in position, raise lever (D) with the left hand, turning handle (E) until cutter engages and cuts into blank to be duplicated. Equipped with .035 and .062 inch saws.

Operates by hand or if desired by motor.

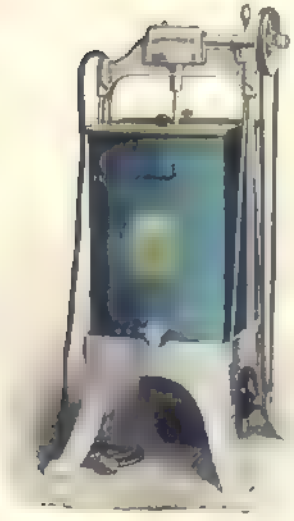
MATERIAL AND FINISH

Heavy, clear glass jar, with smooth finished neck, heavily plated screw cap top, hard, white maple dasher, cast frame and gears finished with double coat of aluminum bronze, perforated removable strainer in cap

DAZEY ELECTRIC CHURNS

The same principle of butter-making which has made DAZEY Hand Churns so universally popular, has been combined with every essential feature of a practical and efficient Electric Churn.



Clutch for starting and stopping Churn without shutting off motor is provided; the high base provides safe mounting for motor, and raises the receptacle so a vessel can be placed under faucet; the gears are fully enclosed and protected; the extension cord is protected by carrying same thru hollow side rod. Years of faithful service is assured thru use of highest grade motors, best of materials and careful workmanship.

★MOTORS —The following motors are furnished as standard equipment. Single phase, alternating current, 60 cycle motors of 110 and 220 volts; 32, 110 and 220 volt direct current, compound wound Motors of special cycles, phase, etc., can be furnished at an extra charge

★IMPORTANT.—When ordering Electric Churns it is necessary to specify voltage, cycle and phase on alternating current; specify voltage on direct current.

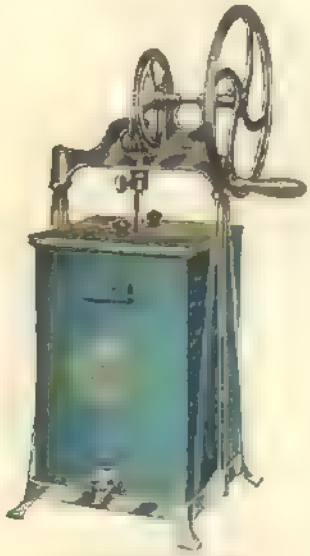
DAZEY CHURNS

Nos. 100-200



Nos. 300-400-600-1000-1600

THE DAZEY PRINCIPLE AND WHY IT IS BETTER

The principal butter-making property of cream is butter fat, which is an oil contained in a tiny, delicate tissue and best compared to a soft shell egg. The principle of ordinary churns is to break these tiny butter fat tissues, allowing the fat to gather in a mass at the top of the cream; but with the DAZEY, it is different and better.

As the cream is rolled along under the wings of the patented DAZEY Dasher, the whole fat globules are **rolled-up** in their natural condition, in uniform sized grains

Cream contains other valuable butter-making properties which are usually lost with ordinary churns, but by the DAZEY System are **rolled-up** with the fat globules. This is the reason the DAZEY produces more and better butter

Just sufficient working to salt evenly is all that is necessary, because the **rolling-up** of the whole globules has squeezed out all milk from inside of grains. This means saving of labor.

The powerful dasher produces a scientific agitation that results in the production of butter in from five to twenty minutes.

The receptacles are non-absorbent; no cracks to harbor the cream and become rancid. The receptacle lifts out of frame and can be cleaned as easily as an ordinary pail. There are no complicated parts in the DAZEY.

MATERIAL AND FINISH

Frame strong, and rigidly constructed of steel and iron, and finished with double coat of pure aluminum bronze; receptacle of triple-plated charcoal dairy plate, enameled outside; covers and dasher of hard, white maple

One set in cardboard box.

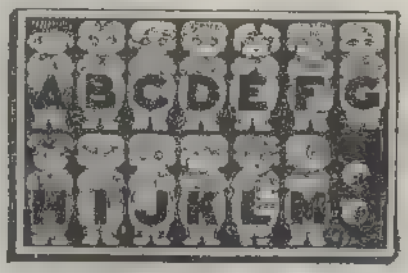
SCHOENHUT



Hardwood, shaped to present the resemblance of human figures and decorated on both sides with artistic designs, reproduced in seven colors. On one side the blocks present the appearance of children dressed in attractive, quaint costumes, reverse side shows funny animals and birds arrayed in bright colored costumes. So designed that one letter of the alphabet appears on either side of each block, making a complete alphabet. **Flat on top** bottom and sides can be used in numerous ways for building, spelling and marching rows which can be knocked down like rows of dominoes. Complete with 2 rubber balls for playing ten pins.

They Pick Them Off the Board!

TOOLS set where they can be handled are an irresistible lure to the average man. He picks a pair of pliers off the board, "hefts" a hammer —a sale is made!

Many retailers have written us enthusiastically, telling of remarkable increases in tool sales since they installed the Vlchek board.

This board costs you nothing. It is like an extra salesman—except that you pay it no salary. For a greater tool business this year get the Vlchek board! Full details will be sent you on receipt of the coupon below.

Making Customers of Window Shoppers

A "Vlchek" Display Board in the window of the Riverside Company's store, 17219 Lorain Ave., Cleveland, is a big factor in drawing customers. "We've made a lot of sales to window shoppers and passing motorists who saw the tools they needed on this board," they say. "That's why we keep it in the window."

Auto accessory dealers are writing us telling of increased sales through this silent salesman. The "Vlchek" Board first attracts, interests, and then, by its appeal, creates the desire to buy.

This colorful board, with its neat rows of good tools, is irresistible to the man who likes tools—and most men do. Add to your tool sales by filling in the coupon below and mailing to us.

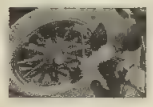
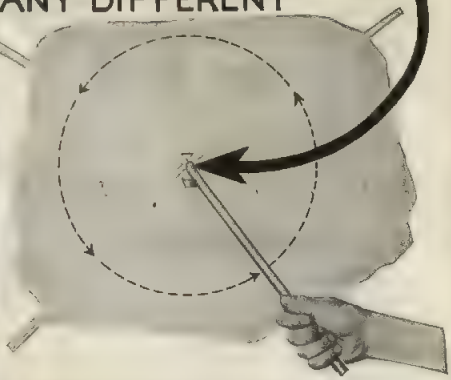
THE SWIVEL ACTION

OF THE HANDLE ALLOWS ITS USE AT MANY DIFFERENT ANGLES





AN INNOVATION IN SOCKET WRENCHES

The new feature—the swivel action of the handle—makes it one of the most useful wrenches we have ever brought out because it can be used in many different positions and on many different cars.

Two Stock Numbers:

No. 774—$\frac{3}{8}$" Hex.—will reach Fourth Connecting Rod on Fords *with crank shaft in any position.*

No. 775—$\frac{3}{8}$" Sq. — will reach Front Main Bearing and Center Main Bearing on Fords *without taking the motor out.*

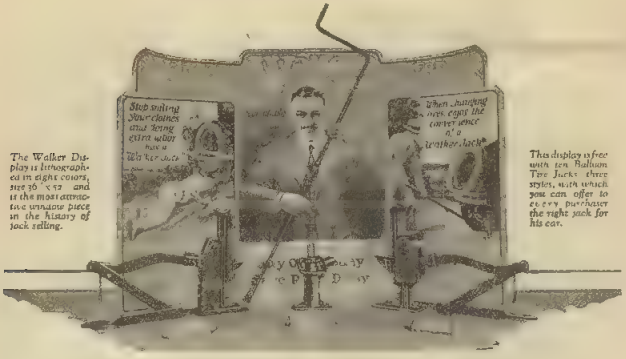
WALDEN BULLETIN WRENCHES

WALDEN-WORCESTER

The original and largest exclusive manufacturers of All Steel Socket Wrenches—in the World

475 SHREWSBURY ST., WORCESTER, MASS., U. S. A.



The Walker Display is lithographed in eight colors, size 36 × 42 and is the most attractive window piece in the history of jack selling.
This display is free with ten Balloon Tire Jacks—three styles, with which you can offer to every purchaser the right jack for his car.

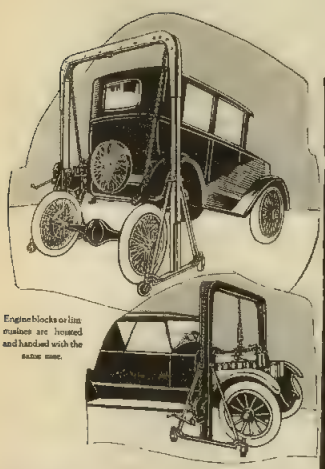
Let me place a Walker Jack Display in your window, and I will create in the mind of every one who passes your store, a desire to own a Walker Jack, because I will illustrate to him the difference between his jack and the one he ought to have to make tire changing easy. By doing this, I will show you the way to increase your jack sales and profits • • •

Willard Walker
President.

Walker JACKS
"Dependable in Service"

Walker Manufacturing Co.
Racine, Wisconsin

100% Hoisting Service Inside or Outside Your Shop



Engine blocks or limousines are hoisted and handled with the same ease.

This is a hoist that's never in the way—never occupies space you need for something else. You move *the hoist to the job*, and not the job to the hoist.

In crowded shops it's a big help because when not in use, you can straddle it over a car somewhere else in the place.

The safety screw hoist supplies tremendous lift strength. And the worm drive mechanism which permits raising or lowering a fraction of an inch at a time, also makes slipping impossible.

Without other power you can hoist anything from a big limousine to a Ford engine block with ease, indoors or out-of-doors. And it is tip-proof—slip-proof—safe.

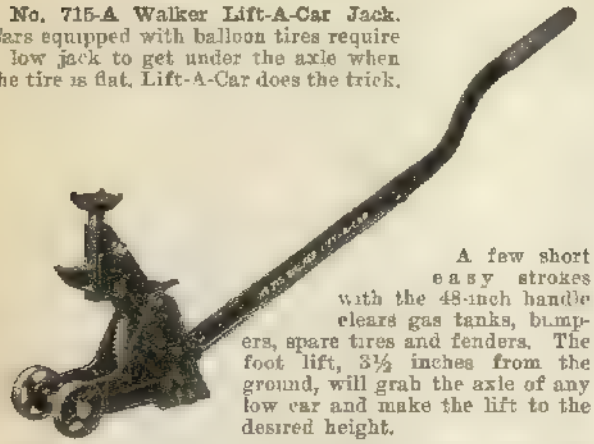
WALKER GARAGE JACKS

WALKER LIFT-A-CAR JACK



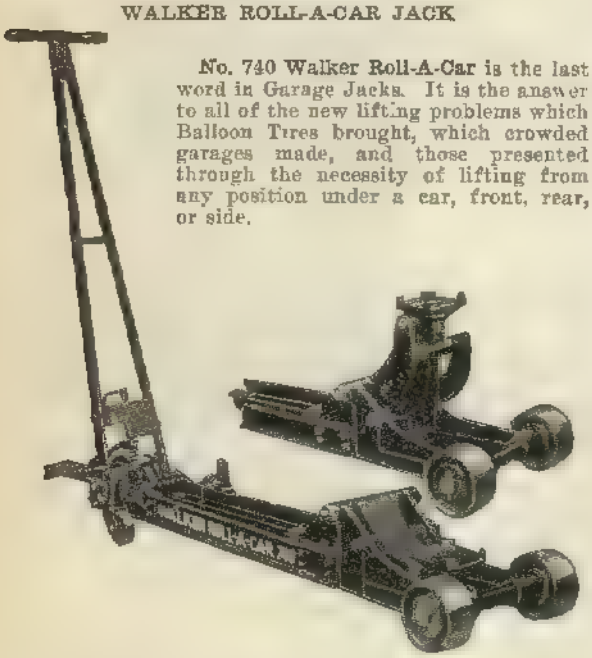
No. 715-A Walker Lift-A-Car Jack. Cars equipped with balloon tires require a low jack to get under the axle when the tire is flat. Lift-A-Car does the trick.

A few short easy strokes with the 48-inch handle clears gas tanks, bumpers, spare tires and fenders. The foot lift, 3½ inches from the ground, will grab the axle of any low car and make the lift to the desired height.

Lift-A-Car will lift one wheel of the heaviest car with ease. All working parts are sturdy. The pawls and cap are drop forgings; the lifting segment and racks are hardened steel. The frame is of malleable iron.

No. 715-A Walker Lift-A-Car Jack. Height: Cap, 7¼ in.; Foot, 3½ in.; raise, 8½ in.; extended raise, 3 in., extended height: Cap, 10 in.; foot, 12 in.; capacity, 1 ton. Weight, 50 pounds.each **$17 50**

WALKER ROLL-A-CAR JACK

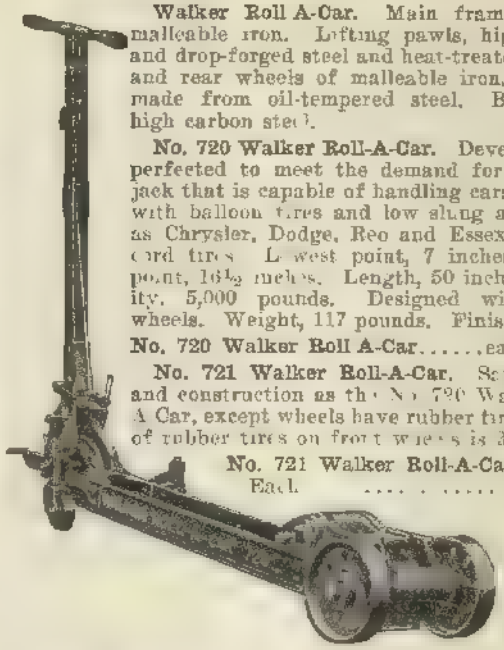


No. 740 Walker Roll-A-Car is the last word in Garage Jacks. It is the answer to all of the new lifting problems which Balloon Tires brought, which crowded garages made, and those presented through the necessity of lifting from any position under a car, front, rear, or side.

The exclusive safety features embodied in this new Roll-A-Car, which prevent injury to operator or damage to a car while being lifted or lowered, the automatic reverse which operates when the high lifting point is reached, preventing damage to the Jack, and the means of disengaging the handle while the car rests on the Jack, are the greatest steps in advance in the history of Garage Jack building. Low lifting point, 5 inches; raise under power, 12 inches; maximum height, 17 inches; capacity, 5,000 pounds; weight, 120 pounds.

No. 740 Walker Roll-A-Car.....each **$36 00**

WALKER ROLL-A-CAR JACKS



Walker Roll A-Car. Main frames are of malleable iron. Lifting pawls, high carbon and drop-forged steel and heat-treated. Front and rear wheels of malleable iron. Springs made from oil-tempered steel. Back bars, high carbon steel.

No. 720 Walker Roll-A-Car. Developed and perfected to meet the demand for a garage jack that is capable of handling cars equipped with balloon tires and low slung axles, such as Chrysler, Dodge, Reo and Essex Six with cord tires. Lowest point, 7 inches; highest point, 16½ inches. Length, 50 inches; capacity, 5,000 pounds. Designed with 7-inch wheels. Weight, 117 pounds. Finish, blue.

No. 720 Walker Roll A-Car.....each **$36 00**

No. 721 Walker Roll-A-Car. Same design and construction as the No. 720 Walker Roll-A-Car, except wheels have rubber tires. Width of rubber tires on front wheels is 3¼ inches.

No. 721 Walker Roll-A-Car.
Each **$50 00**

No. 725 Walker Roll-A-Car. Designed with 8 inch wheel for very uneven floors, has an additional ½ inch ground clearance. Lowest point, 7½ in.; highest point, 17½ in. Capacity, 5,000 pounds. Weight, 118 pounds. Finish, blue.

No. 725 Walker Roll-A Car..... .....each **$36 00**

WALKER ROLL-A-TRUCK JACK

No. 745 Walker Roll-A-Truck Jack. Designed to carry the maximum load required in lifting and moving heavy busses and trucks. The extremely low lift, the high raise, the long handle with short stroke and leverage, compounded through gears, makes it possible for one man to make the heaviest lifts.

The construction of all parts is massive. The wheels are on roller bearings, and the pivot bearings are bushed; steel, malleable iron, and forgings are used in their proper places, with the idea of having a jack that will withstand continual and severe service. Weight, 240 pounds; length, 68 inches; low point, 5½ inches; high point, 16¾ inches; capacity, 6 ton; wheels, 5 inches.

No. 745 Walker Roll-A-Truck.....each **$125 00**

GARAGE JACKS, TOWING DEVICES AND TIRE CHANGER

STANDARD QUICK-LIFT JACK

No. 60 Standard Quick-Lift Service Jack. It is balanced just right so that with a slight leverage on the long 6-foot well-braced handle an automobile can be easily lifted. The long handle is of heavy pipe construction, which will not bend or break under load. This jack is of malleable iron construction, giving strength and durability. The braces from the frame to the handle give a greater leverage against the load, resulting in extreme ease of operation. Rack bar, lowered, 10½ inches. Rack bar, extended, 17 inches. Weight, 31 pounds. Wheels 3 inches; width over all, 7½ inches.

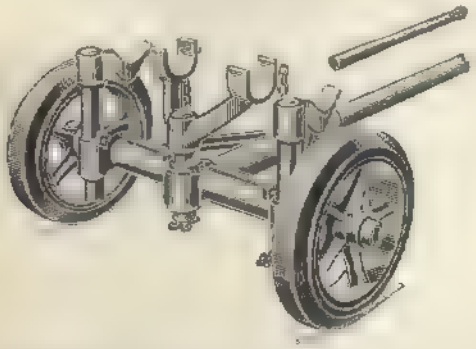
No. 60 Standard Quick Lift Jack.....each $7 15

STANDARD BALLOON TIRE GARAGE JACK

No. 67 Standard Lo-Lift Balloon Tire Garage Jack. It will take axles as low as four inches from the ground and raise them to a point of sixteen inches. The jack can be operated at the side of the car beneath the running board, and is especially adapted for use in congested spaces. Length, over all, 63 inches; width, 17 inches. Length of handle, 40 inches. Height, down, 4 inches; height, raised, 16 inches.

No. 67 Standard Balloon Tire Garage Jack...each $45 00

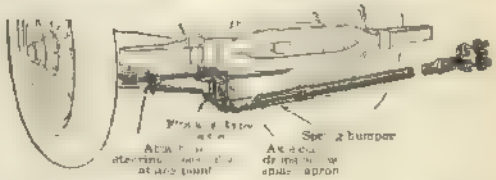
STANDARD TOWING TRUCK



No. 70 Standard Towing Truck. For trucks and autos. All uprights are of the best steel and will carry an auto. The axle shaft is made from cold-rolled steel, with long roller bearings enclosed in steel sleeves and connected to the wheels in such a manner that either wheel or axle may rotate to accommodate proper movements of the truck. Width, over all, 36 inches. Steel wheels, 14x3 inches. Rubber tired wheels, 16x3½ inches. Tongue closed, 7 feet 3 inches; tongue extended, 12 feet.

No. 70 Standard Towing Truck, steel wheels..each $65 00
No. 70 Standard Towing Truck, rubber wheels " 85 00

STANDARD ONE-MAN TOWING POLE



No. 75 Standard One-Man Towing Pole. The only model that can be universally used for all cars. The guiding arrangement can be firmly fastened to the towed car's axle and steering cross tube, not interfering with the splash apron. The steering attachment bar and clamp can be adjusted either in front or just at the rear of the axle clamp, depending upon the splash apron conditions. A heavy coil spring is inserted in the pole to absorb the shock of starting and stopping and in running over rough roads. Length, 6 feet 8 inches. Diameter, 1⅝ inches.

No. 75 Standard One-Man Towing Pole.....each $30 00

WALKER TIRE CHANGER

Walker Tire Changer. Removes tires from all rims, disc or wire wheels. Its many points of advantage, particularly its foot-operated hook, put this tire changer in a class by itself for speed and ease of operation. The foot-operated hook leaves both hands free. Four sets of jaws grip the rim, top and bottom, which prevents twisted rims. The turning feature for revolving tire with index head allows tire to revolve continuously or to be held firmly in any one position. Furnished with wood platform.

A Walker Tire Changer placed in service in any garage or tire shop will prove itself to be the simplest, fastest and most practical way of handling all tire removal problems. The important feature of the tire changer is that its hook is foot operated, leaving both hands free. Also the vertical screw which provides a quick, easy means of expanding and contracting split rims and for gripping wire, disc or solid rims.

Walker Tire Changer. ....complete $50 00

Guaranteed To Wear 6 Months

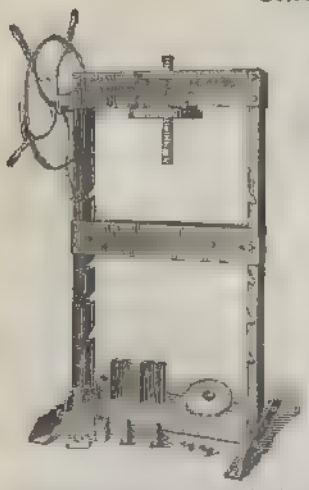
MECHANICS EDGE TOOLS

KEITH-SIMMONS CO., INC.
NASHVILLE, TENN.

PRESSES

CHAMPION



30 Ton Capacity.

Very powerful, for garage and general shop work. Built of 5 inch channel steel uprights; cross bars 6 inches wide and ⅝ inches thick; leverage 1500 to 1. One hundred pounds exerted on hand wheel develops seventy-five tons pressure on screw, making it possible to straighten or pull all classes of work. The hand wheel is geared 3 to 1, with heavy enclosed bevel gears operating a 2 inch diameter; 4 pitch acme screw. The hand wheel being geared 3 to 1 gives the operator three times the power with the same effort, or will do the same work with one third the effort. The hand wheel weighing 57 lbs., is used as a fly-wheel to run the spindle up or down quickly, acting as a quick return. The table can be raised or lowered by one man, without removing bolts or pins, by merely lowering or raising one side at a time to reach desired. The bolted frame acts as a safety device in case press is overtaxed.

HOISTS

WEAVER'S

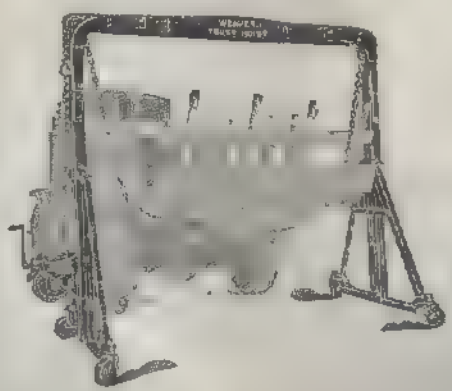
Constructed of heavy channel steel, with the arch reinforced on either side by heavy steel plates. The hoisting mechanism is operated by worm drive which is absolutely safe and positive. No gears or ratchets to slip or break and allow the load to fall. Can be run into position over a car in a crowded shop without requiring more than 12 to 14 inches space on either side of the car.

The frame is designed so as to permit the height of the arch to be increased approximately 24 inches; this enables the hoisting of the rear end of a car with the top up, or removing the rear system.

Each

No. A-7AH—Lifting capacity 4000 lbs for double suspension and 3000 lbs for single suspension; distance between uprights 6½ ft; minimum height 7½ ft; maximum height 9 ft 2 ins $390 00

Ship wt 555 lbs.



WEAVER'S

Constructed of heavy channel steel, with the arch reinforced on either side by heavy steel plates.

The hoisting mechanism is of the well-known worm drive type which not only supplies an enormous leverage for raising the load, but also makes it absolutely impossible for the load to be accidentally released and allowed to fall. There are no ratchets or dogs to break or slip and the load is held securely elevated in any desired position. In addition to the safety feature, this construction has the advantage of allowing the burden to be raised or lowered the minutest fraction of an inch and held firmly in that position as long as desired.

Has a compound leverage giving a lifting leverage of 400 to 1. An auxiliary lever operated directly onto the drum enables the chain to be adjusted to the load very rapidly.

Each

No. A-8TH—Lifting capacity 6000 lbs for double suspension and 4000 lbs for single suspension; width between frame 8 ft 4 ins; minimum height, 8 ft 4 ins; maximum height 10 ft ..... ✦$645 00

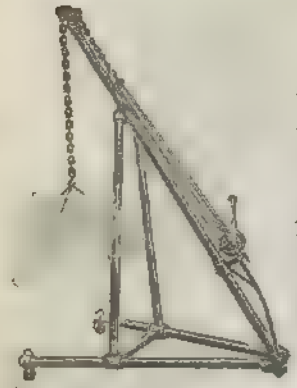
HOISTS

PULL-U-OUT



This crane has many advantages over the regular crane, among which are its simplicity, adaptability, lightness and strength. Always ready with a strong pull or lift. For shifting heavy parts of machines, taking out or reseating engines, changing wheels or adjusting parts, etc., that are located on the under side of the car. It is handier to use for such purposes than jacks or overhead trolleys and is unlimited in action. Light in weight, but is so designed that it has tremendous strength, both in lifting device and crane. The Pull-U-Out device can be detached from the crane and used as a block and tackle for innumerable purposes. It has a pulling strength seventy three times that of a man, and is strong enough for any ordinary purpose around a garage.

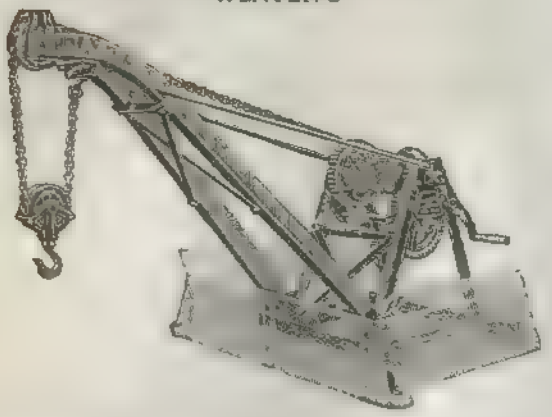
Crane made of 2½ inch extra heavy steel tubing, slip jointed and mounted on stone roller wheels. Black enameled finish.

	Each
No. A-3CC—Complete with Pull-U-Out; base 3 ft 3 ins wide by 6 ft deep; height 10 ft; lifting capacity 2000 lbs; pulling capacity almost unlimited; lift from floor 9 ft 6 ins	✦$219 00

Ship wt each 300 lbs.

WRECKING CRANES

WEAVER'S



An indespensable garage item for towing in cars.

Made of steel throughout, substantially braced and trussed for a two ton lifting capacity. The boom can be adjusted to four different heights by inserting side rods in the holes near top of boom. Furnished with 26 feet of high grade 5/16 inch 3-B close link chain, sufficient to handle any wreck. Chain and hook tested to withstand a strain much beyond the recommended capacity of crane. Drum is of sufficient diameter to enable cable to be used with success and will accomodate 40 feet of 7/16 inch flexible steel cable.

	Each
No. A-18C—Complete as described above	$300 00

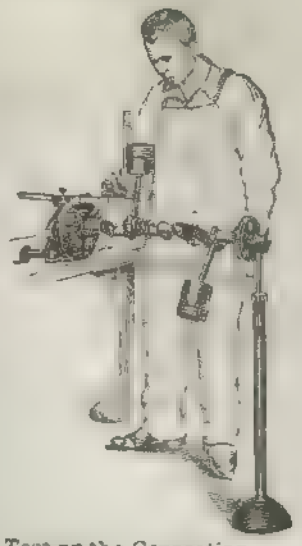
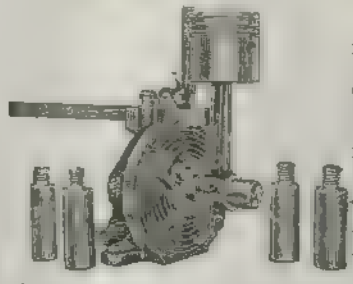
CRANK SHAFT SUPPORT AND ALIGNING FIXTURES

Fitting the Connecting Rod Bearing.



Testing the Connecting Rods and Pistons.



Made from high grade materials.

A mechanic's device especially designed for accurate aligning of connecting rods, pistons and the fitting of connecting rod bearings properly. Eliminates all danger of injury to the shaft.

When the crank shaft is not taken out of the motor, the pistons and connecting rods can be aligned individually by the use of separate mandrels of different size, which can be attached to the fixture.

The master plate and supporting stand can be easily adjusted to any size crank shaft.

	Each

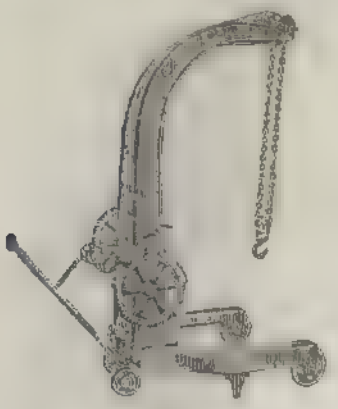
✦Nos. A-69 and A-71—F. O. B. Missouri Factory Only.

PORTABLE FLOOR CRANES

A most convenient crane for use in machine shops, foundries, garages, etc. The design is such that it can be easily used in close quarters, under work benches, etc.

The base casting, projecting arms and gears are made from semi-steel, a mixture of northern iron, and about 20% of steel which produces a tougher mix than cast iron.



The projecting arms are reinforced with a heavy wrought iron band which takes up the severe strain and enables the hoist to handle the heaviest kind of work with absolute safety. The chain is a hand-forged tested grade. The hook, block, axle, fork and yoke are high quality drop forgings. Wheels are tested roller-bearing. Base casting is reinforced at points subject to greatest strain.

Wettlaufer Block Machine

No. 1421

The Wettlaufer Block Machine with ordinary care, will last a lifetime, and should not require any repairs. It is constructed of the very best iron castings, and cold rolled steel and is guaranteed against defective material or workmanship. It is furnished complete, ready to make finished Blocks Machines are thoroughly milled and machine finished and make blocks which are absolutely true to the square, exact for length, height and width, and unskilled labor cannot produce an imperfect Block for the size. Best grade of iron and steel used in the construction, and guaranteed for one year against any defective material and imperfect workmanship.

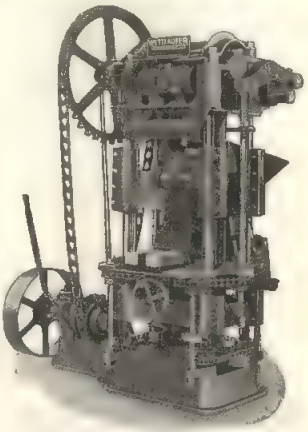
The length of the machine is 36 inches, the width 20 inches and the height 31 inches. It weighs 120 lbs.—easily portable.

Wettlaufer Power Brick Press

No. 1422

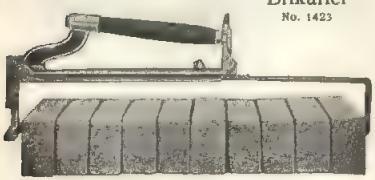
Makes the finest quality building material high grade pressed cement brick from all kinds of aggregate to suit every kind of building. It produces from 4,000 to 14,000 bricks per 10-hour day depending on the number of help used. Makes plain, fancy or rug brick. Any colour, any size. Brick can be removed by hand or pallet. Requires only 6 h.p. to operate it. Patented double repress action produces gigantic pressure and saves power. Floor space takes up about a five foot square.

A low priced machine, quality of product, economy of power and money making possibilities. Specifications and prices can be had on application.



Brikarier

No. 1423

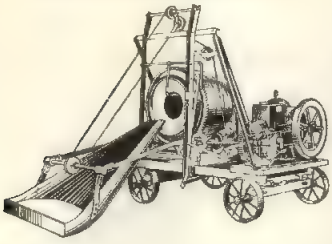


This brick handling tool will load or unload brick or tile in one half the time required by other methods. It is a decided improvement over any brick carrier on the market. Indispensable when handling faced brick, eliminates all damage from chipping, and will never drop its load until it is released by the natural motion of setting it down.

Information and prices on application

Wettlaufer Tilting Drum Mixers

The Famous Heart-Shaped Mixers



The shape alone of this Drum, when it revolves, has a natural tendency of rolling the material in at both ends, while the material in the center is carried higher up, away to the great amount of depth. With the addition of Fans to this Drum, we have what is admitted by the most prominent Engineers and Contractors from all over this Continent, the most perfect and efficient Mixing Drum that is possible in the handling of Concrete Material, both as to capacity and quality of mix.

Operated by one man—Improved Loading Hopper—Automatic Dumping Device—Centre Bearing Oil Feed System—Semi-Steel Castings Steam or Gasoline Engine Drive

Wettlaufer Stationary Drum Type Mixers

With Heart-Shaped Drum

No. 1427.

These mixers have all of the excellent features of the tilting drum type and are built in all sizes up to 1½ cu. yds.

Send for complete specifications.

Wettlaufer Traction Paver

No. 1428.

This New Wettlaufer Paving Mixer is absolutely in a class by itself. It is built especially for Road Paving, but is such a grand success that it is being used on many different kinds of concrete work.

A few of its many distinctive features are:

Note. Particular Elevated Drum ensuring a positive stream of concrete down the Distributing Chute.

Elevated Drum.

Direct Connected Oval Bottom Hopper.

Rear Discharge.

Rotary Delivery Chute.

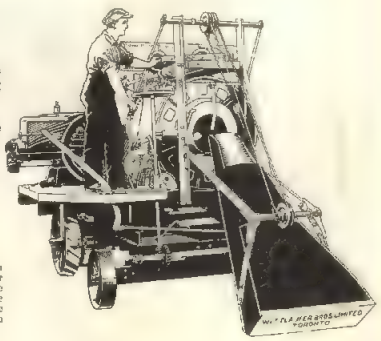
Traction Drive (Both Wheels.)

Two Speeds, Forward and Reverse.

Reversible Link Motion Engines.

No Intermediate Hopper to Dog Up.

The Elevated Drum is a very distinctive feature in this new Model. We can absolutely guarantee our Customers that their trouble with Gravity Chutes are at an end. Gravity Chutes are not a success with the ordinary Mixer on account of the Low Drum. We have absolutely the only successful Gravity Chute Mixer on the market today.



"Made in Canada." Send for complete Catalogue.

Concrete Mixers

(Showing Mixer Discharging into Wheelbarrow)

No. 1424-0 Hand Mixer

This Hand Mixer has found a place in the smaller contractor's equipment, who has not enough work for a power mixer, that cannot be replaced. It is direct gear driven, and the main bearing at the back of the drum which carries the weight, is adjustable to take up wear.

This means a very easy running machine, and cannot be beaten for small work It means a saving over, shovel mixing of at least one or two men per day This machine is also used extensively for brick and block work No matter how small your job is, you cannot afford to be without it.

A boy can turn this mixer all day with ease.

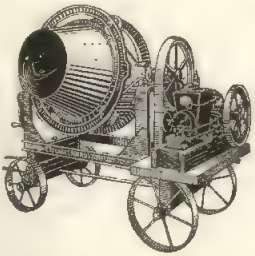
No. 1425-0 Power Mixer

This Mixer can be set to dump direct into foundations. It runs smoothly and is not so heavy as to cave in the sides.

It mixes cement, mortar and plaster of all kinds to perfection and is specially built for block makers, tile makers, bricklayers and plastering contractors.

It allows a shovelful, barrowful or the whole batch to be discharged at any time. It is impossible to clog it, and when dumped it is dumped clean.

The material can be tempered to any degree because it is always in sight.



No. 1425-0 Power Mixer

ELECTRIC FANS

ROTAIRE CEILING

This fan may be installed wherever the common type of ceiling or gyrating fan is practicable. It is especially adapted to restaurants, theatres, stores and offices. The drive in transmitted through a pinion and gear to a universal joint, which permits the entire fan body to slowly revolve in a circle of 360 degrees at the rate of five times per minute. Slip rings are used to transmit current to the motor. When suspended from the ceiling the fan is held at a rigid angle of 45 degrees from the perpendicular.

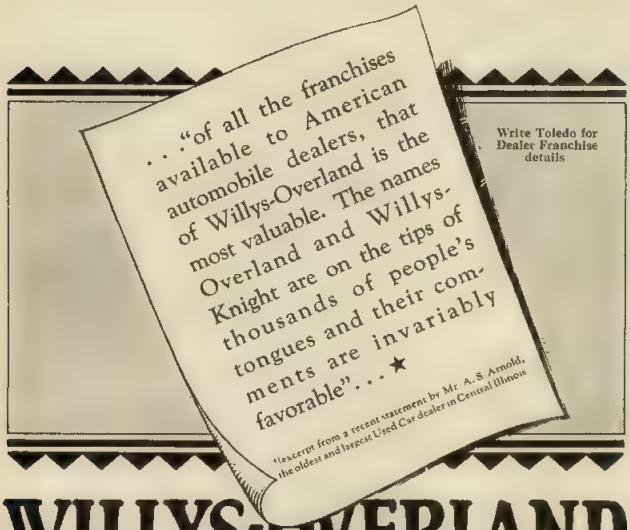
1A2590—BLUE pencil stripe Pair **$2.45**

1A2591—BROWN pencil stripe Pair **$2.45**

Every day in every way the Overland and Willys-Knight picture gets better and better . . . The 1926 Willys-Overland contract holds *the sweetest opportunity ever offered* for sales-making and profit-taking in the marketing of fine automobiles.



. . . "of all the franchises available to American automobile dealers, that of Willys-Overland is the most valuable. The names Overland and Willys-Knight are on the tips of thousands of people's tongues and their comments are invariably favorable" . . . ★

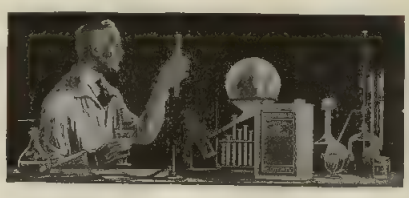
Wolf's Head Pennsylvania Base Motor Oils are ready sellers with the best class of trade from Maine to California. Have better body, grade for grade, than any other oils on the market.

QUAKER STATE OILS



AN OIL WHICH MEETS ALL REQUIREMENTS

A scientific formula has been evolved for an oil which meets all the varied demands of motor lubrication. Quaker State Medium, the certified oil, is refined exactly on this formula. A chemist not in the employ of the refiners tests every "run" of the oil to make sure that no deviation from any detail of the formula has occurred in the refining process. He puts his seal on each can and barrel of Quaker State Medium sold, and this seal certifies to the following uniform lubricating qualities:

(1) The correct viscosity: maintained the most evenly throughout the wide range of working temperatures.
(2) Greatest resistance to evaporation and burning: "flash" and "fire" points 445 deg. and 500 deg. F.
(3) Easy starting in cool weather: cold test 25 deg. F.
(4) Least carbon deposited in the cylinders: has coke content of 80-100 of 1% (Conradson test) and almost no carbon residue.
(5) Slowest breaking down or sedimentation: absolute purity—no acids nor adulterations.

Per dozen .85

BEAD DOLL

Bead Doll. Made of hardwood beads varnished in assorted colors with bells on feet and rubber teething ring on end of waxed string. A beautiful item which is sure to make a hit with the kiddies. Height from head to feet 6 inches. Each in box, one dozen in package

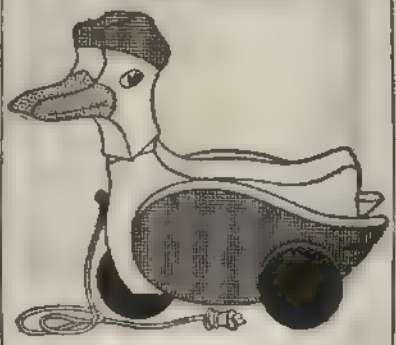
No. 39N112. Per dozen .

TOM TINKER

Tom Tinker. No baby's happiness is quite complete without Tom Tinker the ideal companion. To the eye Tom presents a front most amazing. Seemingly all the bright colors in the world are gathered into this little man's body. Perhaps that's why the babies insist on his company. And then he is so comfortable. Made entirely of round balls. No sharp corners or edges to hurt soft hands. The colors do not lick off or suck off, or bite off. They are absolutely fast, and are, furthermore, covered with a coating of elastic celluloid shellac. Each in box, size 8½x2½x2⅛ inches.

No. 39N104. Per dozen..... 4.68

DADDY DUCK



Daddy Duck. One of the nicest pull toys ever turned out. A cute little Donald, size 10x8 inches, made of 1⅛ inch wood, covered with high gloss enamel, yellow body and red wings and cap. Black hardwood wheels. String attached for pulling. Each in box

No. 39N100. Per dozen 4.25

BUNNY

Bunny. A most attractive wood pull toy. Beautiful high gloss enamel finish, in the daintiest, most appealing white and pink. Size 10x7 inches. Made of 1⅛ inch thickness wood. Hardwood black wheels. Pull string included. Each in box

Yale Narrow High Platform Truck

No. 1491-K20

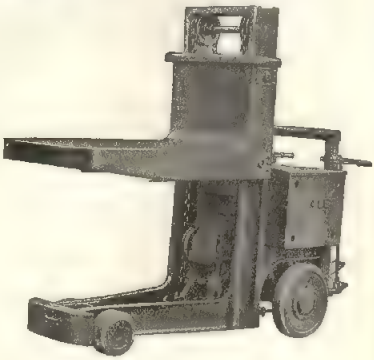
This model meets the general requirements of economical inter-plant movement of material. It has a capacity of 4,000 lbs. and a platform of 38 by 84 inches.

Auxiliary equipment for this truck includes a gravity dump body for handling loose material and an electrically operated swinging boom crane. Model **K21** is the same as Mode. **K20**, but with platform 46 inches wide.

Yale Elevating Platform Truck

No. 1492 K22

This model is a self-loading transportation unit, combining the advantages of high and low lifting. It is used to lift loaded skids from the floor, transport them to a given place and raise them to such a height that the cost of stacking or tiering in storeroom, freight car, etc., is reduced to a minimum. The capacity is 4,000 lbs.



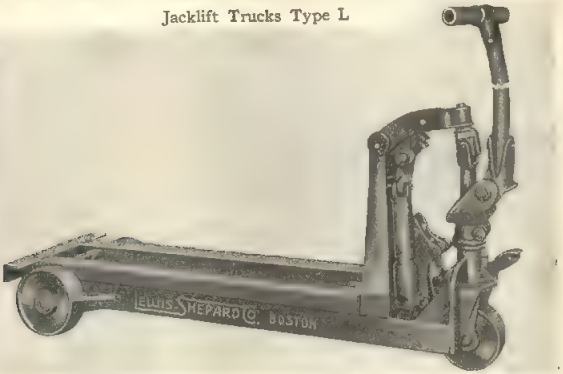
Yale Three-wheel Tractor Truck

No. 1493

This model is a three-wheel tractor and its clear deck space makes it available also as a small load carrying truck for service in the most congested spaces. The low centre of gravity of this machine is a notable achievement for safety of operation. The common occurrences of overturning against stalling loads or tipping over sideways while rounding a corner are eliminated.

The normal drawbar pull is 400 lbs., and the maximum 1,800 lbs. The platform load capacity is 3,000 lbs. and the platform space 11 sq. ft.

Jacklift Trucks Type L



No. 1489—Capacity, 2500 pounds; Vertical lift, 2½ inches; Leverage, 25 to 1.

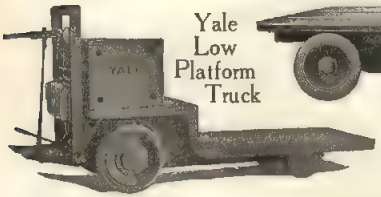
No. 1490



Yale Low Platform Truck

No. 1494-K23

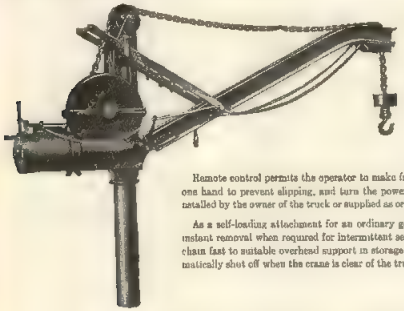
This is a general utility truck which finds its application in plants and shops where loads of a miscellaneous character must be economically moved. The low platform reduces lifting to a minimum, making it easier to pile heavy loads on the truck either by hand or auxiliary crane equipment. The capacity is 4,000 lbs., and platform size 33" by 60".

Yale Trailer

No. 1495-C-6-36

This model is built for the severest service, and the heaviest duty with the maximum of efficiency. Perfect trailing through a properly arranged system of accurately steering all four wheels, keeps the trailer in line whether straight or curved, behind the trailer.

The Yale Trailer has a platform 36 inches wide by 72 inches long 18 inches from the ground, with a carrying capacity of 4,000 lbs.



Yale Electric Crane

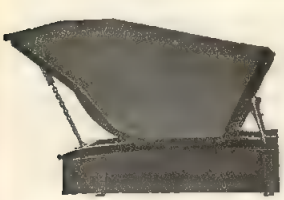
No. 1496

The Yale Electric Crane may be mounted on Yale Industrial Trucks, Models **K20, K21** and **K23,** for service where material too heavy to be loaded by hand must be transported horizontally, the work being accomplished by a single mechanical and electrical unit, and one man.

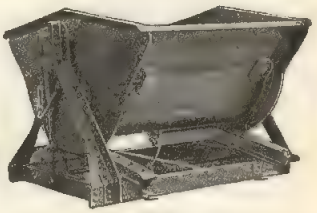
Remote control permits the operator to make fast to his load, hold the sling on the load with one hand to prevent slipping, and turn the power on or off with the other. The crane may be installed by the owner of the truck or supplied as original factory equipment.

As a self-loading attachment for an ordinary general utility truck, the crane is arranged for instant removal when required for intermittent service. To remove crane, simply make hoisting chain fast to suitable overhead support in storage space and turn on power, which will be automatically shut off when the crane is clear of the truck.

Yale Detachable End-Dump and Side-Dump Bodies



No. 1497 End Dump



No. 1498 Side Dump

Yale Electric Industrial Trucks can be equipped with detachable side and end-dump bodies. There are various models designed especially for use on the **K20, K21, K22 and K23** trucks, and the trailers.

These dump bodies are made in five different sizes having various over-all widths, lengths and clearances with capacities for both end and side-dump bodies as follows:

14 cu. ft., 21 cu. ft., 27 cu. ft., 34 cu. ft., 40 cu. ft.

An automatic lever holds the body in a rigid position when being loaded. The weight of the material and the sloping design of the framework make the body roll into a dumping position when the lever is released. The dumping angle of these various bodies is steep enough to completely expel any kind of loose material.

Many Rickenbacker Eight Units Interchangeable With Six

ECONOMIES effected through the redesigning of various important units so that they are interchangeable with those of the six cylinder chassis making for simpler manufacturing and service operations, have brought about reductions in price ranging from $200 to $600 on the Rickenbacker vertical "8" chassis.

New bodies of more advanced design are mounted on the refined eight cylinder chassis. A coach brougham is now offered for the same price as the sport phaeton. In addition a new line of de luxe models having the highest grade of upholstery and selling at $125 more than the regular models are available on both the eight and six cylinder chassis.

A new line of bodies identical in design, coloring, and upholstery to those on the "eight" chassis are now mounted on the "six" which continues without any mechanical change other than a few minor refinements. The price of the "six" phaeton has been advanced $100 to $1,495 and the sedan cut from $1,995 to $1,795. In addition to the roadster and coach-brougham which remain unchanged in price, a new coupe-roadster at $1,695 is announced, while shortly a seven passenger sedan will be included.

Through the standardization of the majority of parts used on the "six" and "eight" chassis, the dealer will be able to carry a smaller inventory in the form of replacement parts for both Rickenbacker models and the customer will benefit correspondingly in having greater facility of servicing, and the lower cost of parts.

The most important change on the new "eight" model lies in the larger bore of the engine which is increased from 3 inches to 3¼ inches, thus bringing the power output up from 72 to 84 horsepower. With the bore of the "eight" the same as the "six," all parts of the smaller engine are interchangeable with the "eight," with the exception, of course, of such units as cylinder block, crankshaft, etc. A larger and more effective water pump is now mounted on the bigger engine, most of the parts of the former being interchangeable with those on the "six," while the oil pump and relief body interchange with the "six."

Brake Simplifications

Simplification of the four-wheel braking system has been made on the larger car so that the hook-up corresponds to that on the "six" and all the operating parts can be used on both models. With the exception of the side rails, all frame parts are interchangeable on the two cars, as are the gasoline tanks, and the fenders, the style of the larger car fenders being adopted for both models. A new heavier construction of the rear axle is employed, while the tire size has been increased from 33 in. by 5.77 in. to 33 in. by 6.00 in. on all body models on the eight cylinder cars.

All body models on both chassis have a moulding strip starting at the radiator and extending the entire way round the body giving a pronounced double belt effect and enabling the two-tone exterior finish which is used on all models to be displayed to advantage. With the exception of the open models which are upholstered in long grain

Rickenbacker sedan on eight cylinder chassis

leather, the interior covering of all regular closed cars is in velvet velour, while the "de luxe" models are upholstered in silk-faced mohair. The following color schemes are employed in two-tone Duco effect: Phaeton Dublin gray; coach-brougham, Bambalina blue with black moulding; Sedan, green with gold stripes and the roadster, brown.

Besides the new line of bodies, several minor refinements have been made on the "six" models. One inch has been added to the height of the radiator, while the thickness of the core has been increased from 1 11/16 in. to 2¼ in. The "coincidental lock" which has been standard equipment on the "eight" since its conception, is now applied to the "six" also. In connection with the new fenders on the "six," metal running boards have replaced the former wooden type while their height from the road has been decreased by 1½ in. Tires, 33 in. by 6.00 in. similar to those on the "eight" are now fitted on both "standard" and "de luxe" special sedans. Wood wheels of natural finish are now standard equipment on all models on both chassis.

Photograph of the new Rickenbacker coach brougham was shown in the July issue of this publication, page 64.

The following are the prices now in effect:

Eight Cylinder Chassis

2-4 Pass. Roadster, $1,995; Sport phaeton, $1,995; Coach-brougham, $1,995; Coupe-roadster, $2,095; Sedan, $2,195; 7-passenger sedan, $2,470.

Six Cylinder Chassis

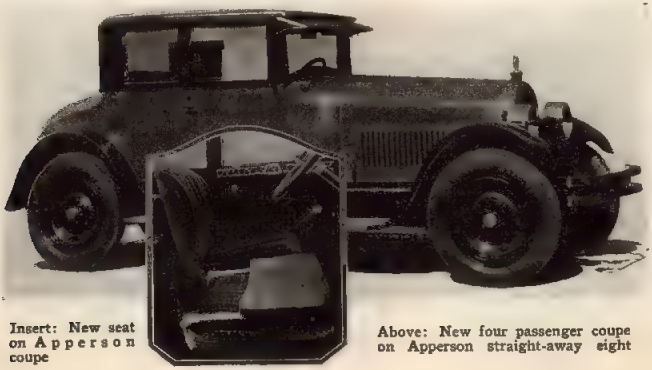
Roadster, $1,595; Phaeton, $1,495; Coupe-roadster, $1,695; Special sedan, $1,795; "De Luxe" 7-passenger sedan, $2,070.

Apperson Brings Out Four-Passenger Coupe

A NEW four-passenger coupe on both Straight-Away Eight and Super-Value Six chassis is announced by the Apperson Automobile Co. The new models are now in production and are being offered the trade for immediate delivery. Both chassis models are available in blue, maroon, gray and two-tone green in either varnish or lacquer finish at no additional cost. List prices are: Super-Value Six, $2,050, Straight-Away Eight, $2,450, f. o. b., Kokomo, Ind. An extra heavy set of cushioned springs is used in the "extra" seat which is claimed to be unusually comfortable and the back is adjustable up or down for a distance of four inches to meet the varying height of the occupants, the back cushion on the folding seat sliding up and down on the supporting rods.

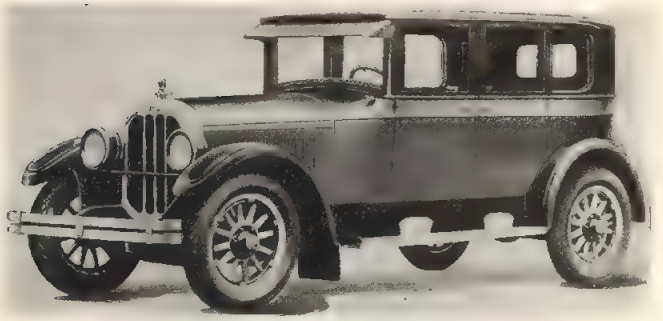
All four-passenger coupes are equipped with ventilating eaves over both door and rear quarter windows.

These two models are being produced as standard items in the Apperson line and will be continued in conjunction with the new all-leather glove finish fabric sport coupes just announced by the Apperson Company for delivery late in July.



Insert: New seat on Apperson coupe

Above: New four passenger coupe on Apperson straight-away eight



New 7-passenger Chandler sedan

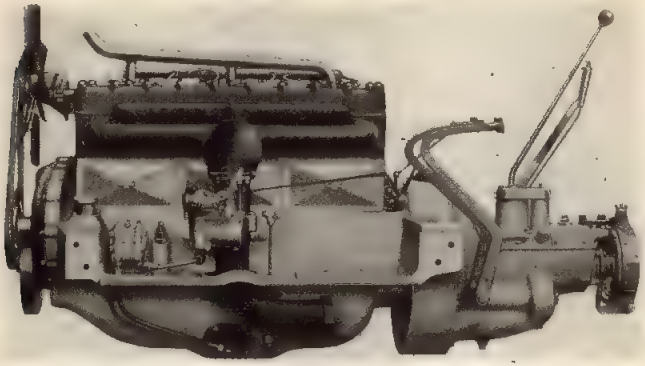
Novel Radiator Shell Features New Series Chandler

A NEW vogue in radiator shell design has been set by the Chandler Motor Car Company in presenting their 1926 line of cars. But for the addition of a new body model, slight changes in the "Metropolitan" sedan, several engine modifications and the new radiator style, the latest Chandler cars are substantially the same as the 1925 models, there being no change in prices or in company policy.

While the general contour of the new radiator is identical with the previous models, an individual and exclusive style is achieved by three vertical strips spaced about four inches apart and extending down the front of the radiator. These triple bars which are of channel section are pressed out of the same stock and in the same operation forming the steel radiator shell which including the vertical bars is heavily nickel plated. A new name plate of gun-metal having the letters in white enamel and mounted on a background with a gold border extending around the design is now employed.

New radiator design of the 1926 Chandler with vertical bars and gun-metal name plate.

Of seven passenger capacity, the new sedan lists at $2,175. The most noticeable change in appearance of the new sedan over the old model is the rounding of the corners on the rear quarter upper section, the employing of heavy beading accentuating the double belt effect, the use of a one-piece vision-ventilating windshield and a new color scheme. The last mentioned is a Duco two-tone brown finish, while a sage brush green is offered at no additional cost. To allow greater vision and visibility for the passengers in the tonneau, changes have been made on the "Metropolitan" sedan. The landau bows formerly mounted on either side of the body at the rear have been eliminated and their place taken by windows of larger dimensions than previously used Leather was formerly used to cover the rear quarter upper section which is now encased by a



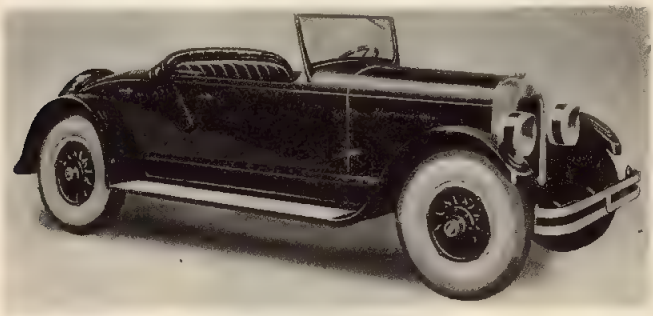
Carburetor side of power plant of 1926 Chandler

pressed steel stamping. The seven-passenger sedan comes equipped with an automatic windshield wiper.

The ignition system which formerly was mounted on a separate platform and driven through a coupling from the rear of the generator is now a part of the latter forming a single unit. The position of the generator remains unchanged while the make of the unit is American Bosch as formerly.

Reduced engine vibration, smoother running and fuel economy have been attained by the addition of a small flywheel which is carried at the forward end of the crankshaft and a newly developed manifold.

Unusual design of the manifold now permits the exhaust gases to flow through a separate passage cast in the intake manifold and from there the gases are carried behind the centrally located carburetor to the muffler pipe. The exhaust manifold which is a separate casting is now ribbed on the top with five fins to assist cooling the gases and is secured to the intake manifold by two cap screws. Slight modifications in the clutch have reduced the overall length of the transmission housing by two inches while minor changes have been made in the transmission brake hook-up.



Auburn 6-passenger Roadster

This six passenger roadster is available on both the six and the eight cylinder Auburn chassis. The rear seat is provided with a door for easy admittance and egress and the body is finished in hand rubbed pyroxylin lacquer. The interior is upholstered in hand buffed brown Spanish leather. Gasoline gage, heat indicator, rear vision mirror and automatic windshield wiper are regular equipment.

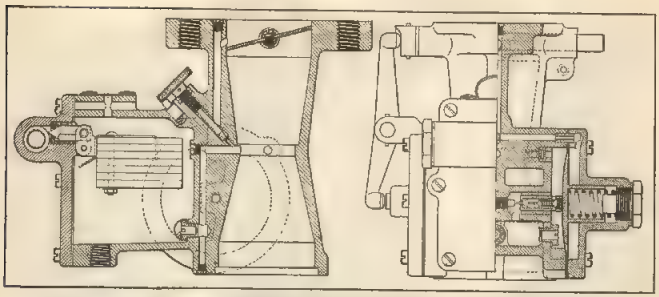


Fig. 1. Sectional views of Stewart-Warner carburetor, showing diaphragm and angularly mounted needle adjustment

Accelerator Diaphragm Features New Stewart-Warner Carburetor

SEVERAL innovations in mixture proportion and in the method of providing extra fuel for accelerating are embodied in a new carburetor which has been brought out by the Stewart-Warner Speedometer Corp., of Chicago.

As will be seen by the sectional views in Fig. 1 the carburetor has a single air passage which is constructed to form a throat into which the fuel is discharged after passing through metering orifices. There are three of these jets all located below the fuel level in the float chamber. They discharge at the periphery of the unobstructed throat thereby contributing to high pressure recovery across the carburetor.

Proportion of fuel to air in the mixture supplied is substantially constant except at light and heavy loads when richer mixtures are supplied. From 4-10 down to zero load this enrichment is provided by an idling by-pass which in conjunction with a spring latched needle-valve provides the necessary adjustment for the idling mixture. This latter is the only adjustable orifice and the metering for the other portions of the range is determined by the internal specifications of the carburetor.

Accelerating Supply

The extra quantity of fuel required for full acceleration is provided by means of the idling by-pass just mentioned and two diaphragm mechanisms. One of these is mechanically operated and the other one is actuated by the change in pressure in the inlet manifold. On one side of the latter diaphragm is a chamber connected to the inlet manifold above the throttle. When the throttle is open, the pressure in the chamber increases and the diaphragm moves inward. Gasoline is fed to the chamber on the other side of the diaphragm by two metering jets, one of which is normally closed by a valve. The opening of the other jet is much smaller than the outlet from the diaphragm chamber, the orifice of which discharges at the rim of the throat into the air passages, so that when diaphragm moves inward due to an opening of the throttle, an extra amount of fuel is injected into the air stream. The third jet which, as stated before, is normally closed comes into action automatically near the end of the diaphragm motion and supplies extra fuel to enrich the mixture at full load. The diaphragm mechanism and the two jets just mentioned are utilized to supply about one-half of the total quantity of extra fuel required for full acceleration. The remainder of the total accelerating fuel is supplied by means of a second or additional diaphragm mechanism positively actuated and arranged on the side of the carburetor opposite the pressure actuated diaphragm. A rocker lever transmits motion from a cam to the diaphragm through a plunger. The diaphragm is returned by an opposing spring-backed plunger when the cam releases it. The rocker arm and exterior parts of the second diaphragm mechanism are visible at Fig. 2. The cam is mounted on the throttle shaft and engages the lever to move the diaphragm after the throttle has been moved through an angle of about 15 deg. of its total movement.

Fig. 2. The mechanically operated diaphragm is actuated by the cam controlled rocker arm shown.

This movement of the diaphragm causes an extra quantity of fuel to be discharged to the air stream. The diaphragms are of hard rolled alloy said to have physical qualities that make it capable of long life in this service. None of the springs are delicate or sensitive as to strength and none of the passages are so small or so located that they are liable to obstruction.

The float mechanism in its entirety is mounted by six machine screws and fuel can reach the float valve only after passing through a screen of 100 mesh having a useful area of 2 sq. in. The strainer screen element can be removed for cleaning without disconnecting the fuel line.

Ochrome Alloy Valves

Poppet valves for internal combustion engines made from a non-ferrous alloy are manufactured by the Ochrome Valve Co., Shelton, Conn. The material used for these valves is a cupro-nickel-chromium alloy which not only has very good physical properties at normal temperatures but is highly resistant to the effects of high temperatures.

The forgings for these valves are made by the Curtiss Bay Copper & Iron Works, a subsidiary of the U. S. Industrial Alcohol Co., and the Ochrome Valve Co. finishes the forgings and markets the product. These valves, of course, are particularly suited for use in engines of the high duty type in which the conditions of valve operation are particularly severe. The valves are intermediary in price between alloy steel valves and nickel chromium valves. We are informed that tests extending over a period of approximately two years have developed no case of breakage, burning or warping.

At the present time the Ochrome Valve Co. is furnishing these valves to three manufactures of marine engines, who use them as standard equipment. The valves are being made both for original equipment and for replacement purposes. One of the advantages of the valves is that, since they have no iron in them, they will not rust and are therefore not subject to deterioration in case the engine is laid up for a long period, as commonly happens with marine engines, tractor engines, etc. The alloy from which these valves are made, known under the trade name of Everbrite, consists of substantially 65 per cent copper, 30 per cent nickel and 5 per cent chromium.

New Anti-Knock Fuel Announced in Detroit

Cyclo gas, a pure petroleum product that will give more power and mileage, it is claimed by its manufacturers, and also will eliminate any fuel "knock," has been perfected for large commercial distribution, according to an announcement made by the Great Lakes Refining Company, of Detroit. It is obtained through a new process of refining crude oil.

The chief quality of Cyclo gas is that it is a slow burning fuel and according to its makers will fire as quickly as the best grade gasoline. Being a pure petroleum product it is absolutely harmless, according to the manufacturers, and contains no poisonous compounds that are dangerous either in a liquid state or in the exhaust fumes.

The process of distilling the new fuel was discovered three years ago by Dr. Alex S. Ramage, of the Chemical Research Syndicate of Detroit. For some time it has been on sale in Detroit, Cleveland and Toledo. The public announcement has been delayed until the production facilities at the refinery at Dayton, Ohio, could be enlarged sufficiently to meet the demand.

E. M. List, General Manager of the Watson Stabilator Co. of Wilkes-Barre, Pa., has recently taken a contract for distribution of Watson Stabilators for ten counties of Northern New Jersey, the company formed for this purpose to be known as **Watson Stabilator Co. of New Jersey,** and also a similar franchise for New York City and surrounding territory, the new company to be known as the **Watson Stabilator Co. of New York.**

Wide World photograph

THE *MAIDEN DEARBORN*, FIRST OF THE FORD AIR TRANSPORTS

Which flew from Detroit to Chicago, 285 miles, with 1,000 pounds of freight on April 13, in 2 hours, 50 minutes, and returned to Detroit the same day. The train time between Chicago and Detroit is 6 hours 20 minutes.

NOW FOR THE FLYING FLIVVER

THE NAME OF HENRY FORD, which adorns so many hundreds of thousands of inexpensive automobiles that it is almost synonymous with economical transportation, was carried through the air between Detroit and Chicago on April 13 on the fuselage of the *Maiden Dearborn*—not "Made in Dearborn"—the first of a fleet of all-metal airplanes of the first purely commercial air-line to be established in the United States by the first large corporation to employ intercity air service within its own organization. For "the Ford air line is to be operated exclusively for company business, and has no connection with any other commercial air-lines that are proposed or suggested," says a statement by the company in the Detroit *Free Press*. Thus the Ford company, which hitherto has been content to operate its own railroads, Great Lakes and ocean steamship lines, and motor-truck fleets, with the addition of an air-line now utilizes under its own control every type of modern transportation. "Certainly," remarks the New York *Times*, "the science of aeronautics is looking up."

While the establishment of the mail, freight, and express-carrying line between Detroit and Chicago, to quote a Detroit dispatch to *The Times*, "marks the beginning of the most elaborate venture ever made in commercial flying," it is not the first indication that Henry Ford and his son Edsel are interested in the development of aviation and the future of Detroit as the center not only of the automobile industry, but of the aircraft industry. According to *The Wall Street Journal*,

"This is what the Fords already have accomplished and are now doing to further the cause of aeronautical development:

"1. They have built and equipped a 260-acre flying field for public use.

"2. They are now erecting the largest dirigible mooring mast in the world.

"3. Financially supporting the Stout Metal Airplane Company and the Aircraft Development Corporation, the former manufacturing all-metal airplanes and the latter metal-clad dirigibles for commercial purposes.

"4. Offering use of organization of Ford representatives in sale of product of above companies.

"5. Making preparation for production of airplane motors in own plants.

"6. Devoting part of engineering force and facilities at the new Dearborn laboratory to experimental work in aviation problems.

"7. Cooperating with leading authorities in the industry.

"The air-port is the gift to the industry of Henry and Edsel Ford, and adjoins the Ford property at Dearborn, eleven miles from Detroit's City Hall. It is intended to serve as a terminal for airplane companies and a public landing field. Thus the embryo aircraft industry in Detroit, backed by the moral and financial support of the Fords and the active efforts and cooperation of such authorities as Ralph Upson, William B. Stout, E. V. Rickenbacker, Alfred V. Verville, Herbert V. Thaden and others, has an auspicious beginning which is laying the foundation for an industry which may rival that of the automobile."

The first flight of the *Maiden Dearborn* to Chicago, by way of Bryan, Ohio, thence over the Air Mail route, a distance of 285 miles, says a Detroit dispatch to the New York *Herald Tribune*,

"Marked the beginning of an extensive air service which will link the chief Ford centers in the Middle West. As soon as the Dearborn-Chicago system is perfected, lines will be established between Dearborn and St. Louis; Dearborn and Minneapolis, and a third to Iron Mountain, Michigan, where the Ford sawmills, body plant and wood distillation plant are located. Daily plane service is contemplated."

"Up to the present, I've left this flying business to Edsel," said Henry Ford as the *Maiden Dearborn* was taking off, "because it's a young man's job." In an interview given the Detroit *Free Press*, the youthful President of the Company said:

"While we are not actually engaged in the manufacture of airplanes, we are financially interested in the Stout Metal Airplane Company, manufacturing the Stout metal 'air transport,' and the Aircraft Development Corporation, which soon will place the first metal-clad lighter-than-air ship in the air, with Detroit as its home.

"We are willing that the Ford name be used in these companies because we believe that William B. Stout, designer and builder of the air transport, has an exceptionally good plane, and that Ralph Upson's idea of a metal-clad airship is the best yet produced.

"The five or six planes that will be finished this year will be sold easily, we believe, and we probably will use our organization of Ford representatives in the large cities in the sale of them.

"While it is not our purpose to enter the manufacturing field in aviation, we probably will find our place in the manufacture of airplane motors. Several types are now in our experimental laboratories in the course of development.

"There is no question but that the Ford organization needs such a transport service of its own. We now have sufficient mail and express matter, requiring swift delivery, to keep three such planes as this busy every day.

"We do not have in mind the establishment of a public air transport line. This line is being put into operation entirely for our own use. No passengers will be carried, provision being made only for a mechanic to accompany the pilot.

"The plane is entirely constructed of duralumin. It has a wing spread of 60 feet and its length is 46 feet, 2 inches. The ship, which is equipped with a Ford-built Liberty engine, has a maximum speed of 115 miles an hour and the cruising speed is 100 miles an hour."

From other Detroit dispatches we learn that—

"The freight carried by the plane on its first trip consisted of thirty bags of machined automobile parts, weighing in all

782 pounds; 107 pounds of moving-picture film, and ten cartons of various articles, which weighed 116 pounds. The mechanic and his outfit weighed 208 pounds, which made a total useful load, exclusive of the pilot and extra gasoline, of 1,213 pounds.

"Eddie Hamilton, who is Henry Ford's first sky pilot, is a former Royal Air Service flyer who has had considerable success in aerial photography enterprises here since the World War. For the last two years he has been a test pilot for the Stout Company. Both the trip to Chicago and the return voyage were made in 2 hours, 50 minutes. Hamilton was instructed to fly to Bryan, Ohio, and there to take the Air Mail route. The trip could be made direct in about 2 hours. The train time between Detroit and Chicago is 8 hours, 20 minutes.

"The Ford organization will operate its air-line along conservative lines, sacrificing speed to obtain the utmost dependability and safety. Round-trip flights on single days are planned. The schedule calls for a flight from Detroit to Chicago in the morning, and return to Detroit in the afternoon.

"Substantial interest of the Ford organization in aviation dates back to two years ago, when Edsel B. Ford, president, joined groups of other Detroit manufacturers and business men in financing the experiments of the Stout Metal Airplane Company.

"The second phase of the Ford interest in aeronautics took form a year ago, when Henry and Edsel Ford built the Ford Air-port near Dearborn and invited the Stout and Upson organizations to utilize its airdrome and manufacturing facilities.

"The company air-line established to-day marks the beginning of a third phase. It is regarded as the most significant commercial air transport enterprise of the year."

In the opinion of the New York *Evening Post*—

"If Henry Ford means business in the new airplane venture of his, industrial history will be made by the flights he keeps his pilots in Detroit and his plant in Chicago. When he began in the motor-car industry he was trying to build a cheap carrier for land use. He is now searching for a cheap, swift carrier for the air.

"Private initiative is the driving force in America. It was so with the railways, and in all probability it will be so with aviation."

"If Henry Ford and his son wish to develop commercial aviation, they are in a better position to do so than any one else in the United States," declares the Jersey City *Journal*. "The flight of the *Maiden Dearborn* is merely the beginning,' points out the Brooklyn *Eagle*, which also reminds us that—

"Meanwhile the Government is planning experiments expected to stimulate the development of commercial aviation. Under the Kelly Law, passed by the last Congress, the Post-office Department is empowered to contract with private individuals for the carrying of mail through the air. Already the Department is advertising for bids.

"Thus, of course, is merely a beginning, but with the Government offering special inducements to private enterprise, and with the vast resources of the Ford Company back of a single project having the same objective, it is merely a matter of time before flying will be an important part of American business life. It has taken a long time for this country to overtake Europe in the utilizing of airplanes, but, like everything else, we seem to be preparing to go into the business of flying on a large scale now that a beginning has been made."

A NEW POWER IN PETROLEUM

Col. Robert W. Stewart, Chairman of the Board of the Standard Oil Company of Indiana, whose company becomes a world factor in the oil business by acquiring control of the Pan-American Company from E. L. Doheny.

ANOTHER BIG OIL COMBINE

SOME RATHER LEFT-HANDED COMPLIMENTS are being handed out by the press as the oil map of the world is changed by the creation of a new combination in the international field, and our newspaper editors pay their respects to the personalities involved in the deal. All the oil men figuring prominently in the merger of the Standard Oil of Indiana, Pan-American Petroleum, and British-Mexican Petroleum into a combination, with assets of about $548,000,000 also figured, except for Lord Inverforth of the British company, "in the oil reserve scandal uncovered in the Washington investigation of Doheny's alleged bribing of former Secretary of the Interior Fall," we read in the Philadelphia *Public Ledger*. The chief engineer of the deal and the dominant figure in the new corporation, according to the news dispatches, is Col. Robert W. Stewart, chairman of the board of directors of the Standard Oil Company of Indiana. And the New York *World* calls to mind that "it was Stewart who cleared out when the Government wanted him as a witness in the Teapot Dome suit and returned to the United States the day after the court proceedings ended." This paper declares that "with men like Mr. Stewart and his fellow directors in charge, there can be no peace between the people and the oil industry," and that "an industry managed by men who will allow a Cabinet officer to be corrupted, the courts disregarded, and their stockholders ignored, has earned suspicion." Yes, remarks the St. Louis *Post-Dispatch*, "big business is getting bigger, but if bigger business is to grow and prosper into a ripe old age it will need a quality of leadership that will not stoop to bribery or flee from subpenas." To which the New York *Commercial* indignantly replies that there has as yet been no proved evidence of fraud in the oil leases, and that there is nothing in the new merger to call for any talk about high crimes and misdemeanors, and it laments that "while encouragement is the portion of the nationals of other lands buying crude oil and marketing its refined products, here discouragement is the portion allotted by the world to such men and the companies they have built up and controlled."

The combining of one of the greatest of the American independent oil companies with a powerful member of the Standard group and a British concern opens up a new phase in the history of the American petroleum industry, so it seems to several papers. The precise arrangement of the holding companies by which the merger is accomplished is too complicated for description here. The main fact is that the Standard of Indiana, which has been a leading factor in oil distribution in the Middle West and has been closely allied with the Sinclair interests, now takes over by stock purchase from the Doheny family the control of the Pan-American Petroleum Transport Company, with its enormous oil reserves in Mexico, its refineries, its tankers, and its extensive shipping facilities. The British company gives the new combination an entrance into the oceanic tanker oil trade and

SPORTS AND ATHLETICS

COUNTRY BOYS IN THE BIG LEAGUES

OVER a third of the four hundred players in our two greatest leagues, the American and the National, grew up on farms, thinks a veteran sport writer, and, if you include those who grew up in small country towns, fully half the four hundred are country boys, he believes. According to Robert H. Reed, who discusses the phenomenon in *The Country Gentleman*, the estimate is a fair one. "Cleveland lists seventeen, we are told, and "their manager, Tris Speaker, hails from Hill County, Texas." As Mr. Reed goes on to say,

> A handy place to break into the subject is with the [world's champions of Washington. It was perhaps the most popular team ever to go into a World's Series. Popular, it might be remarked, to some great extent because it included a tall, broad-shouldered farm boy who has set down a pattern for good sportsmanship and honest effort that every American boy might well follow.
>
> Of course that man is Walter Johnson
>
> There were other farm boys who played a mighty important part in winning a pennant and the World's Series for Washington. Leon Allen Goslin, the product of a Salem County, New Jersey, farm, did a giant's share.
>
> Then almost all the pitching staff came from the farm—Zachary, Ogden, Marberry and Speece, besides Johnson.
>
> You have only to dig back in your memory to know what these men did in that thrilling series.
>
> First, Walter Johnson. No less an authority than his mother says that Walter as a youngster expected and wanted to be a farmer when he grew up—a wish that has in some degree been gratified.
>
> He now owns a fine farm near Coffeyville, Kansas, where his mother and a married sister live. One of Johnson's greatest interests is in pure-bred cattle, and up until the death of his father about three years ago his farm had the finest herd of Holsteins in the county.
>
> Johnson has always been an outdoor man. He has loved to hunt since the time, when he was six years old, that he came into the house with a whole litter of young coyotes he had discovered and announced that he had been hunting. To-day the year isn't complete unless he has some kind of hunting trip.
>
> "Walter is happiest when he can be on a farm," declared his mother. "He has always been that way and he always will be. He likes nothing better than to spend a few hours looking after the stock or doing the chores."

Copyrighted by Henry Miller Picture Service

HE WANTED TO BE A FARMER

This is Walter Johnson himself. He was born on a farm and wanted to be a farmer. Now he owns a big farm in Kansas purchased with some of the fortune that has accompanied his baseball fame.

> One of baseball's most interesting characters is John Thomas Zachary, the left-handed pitcher who won two of the series games. During the baseball season he roams with Johnson, and Mr. Reed tells us:
>
> He is a graduate of North Carolina State College, a student, an ex-soldier, a tobacco planter and a good baseball pitcher. When he isn't pitching he raises tobacco at Graham, North Carolina, and when he isn't doing either he reads all the books he can find.
>
> Warren Ogden, better known as Curly, comes from a family of athletes. His brother John is a star pitcher with the Baltimore Orioles; another brother, Carrol, is a college star in both football and baseball.
>
> They come from a farm near Ogden, Delaware County, Pennsylvania, where the family has lived for a long time; in fact, the town takes its name from the family.
>
> Curly Ogden jumped straight from college into the big leagues and this past year he pitched and won some of his team's most crucial games.
>
> Fred Marberry's parents own a cotton plantation at Streetman, Texas, and his fellow moundsman, Speece, hails from a farm near West Baden, Indiana.

Thus far Mr. Reed has been considering only the members of a single team, the "World's Champions," and he now goes on to speak of others, naming first a celebrity known the country over:

> Babe Ruth, the home-run king and most talked about man in the game, did not come from the farm, but he does go back to the farm at every opportunity he gets. Two or three years ago he bought a farm near Sudbury, Massachusetts.
>
> Ruth's farm is not a plaything, but a real farm. His stock is not fancy stock, but good practical dollar-earning stuff.
>
> The Bambino himself built ten 100-hen-

SINCE sheet metal holds an important place in good building construction, it is essential that it be *right*—and embody the highest known standards of protection and durability. Keystone quality should be used for two reasons—it gives maximum wear and *resistance to rust*, and the *cost is always reasonable.*

KEYSTONE

Rust-resisting Copper Steel

adds a new measure of wear and permanence to Black and Galvanized Sheets and Roofing Tin Plates. Leading architects, contractors, builders, roofers, and sheet metal workers in all parts of the country recognize in Copper Steel an advance step for service and permanence in roofing, siding, gutters, spouting, conductor pipe, cornices, eaves trough, metal lath, and building sheet metal work; also for culverts, tanks, flumes, and all other uses to which sheet metal is adapted. Time has fully proved its excellence. Sold by leading metal merchants. Send for our "*Facts*" booklet.

Apollo

GALVANIZED SHEETS

Recognized as the standard of quality since 1891. APOLLO-KEYSTONE Galvanized Sheets with the copper steel alloy base are unequaled for Culverts, Flumes, Tanks, Roofing, Siding, Spouting, Gutters, Cornices and all forms of exposed sheet metal work demanding superior rust resistance. Write for Apollo booklet.

Roofing Tin

High grade plates, carefully manufactured in every detail—grades up to 40 pounds coating. Also American Coke and Charcoal Bright Tin Plates.

houses and filled them with carefully selected chickens. He is raising pedigreed dogs on a small scale

Turning now to the case of another hero of the metropolis, Mr. Reed observes

> You would go a long way to find a more popular player than Zack Wheat, captain of the Brooklyn team, and you would look just as far to find a man who takes his farming more seriously. His farm is in Caldwell County, Missouri
>
> Wheat's great love is pure-bred cattle, but being away from home all summer he hasn't much of an opportunity to build up the herd he wants. That will come later
>
> "Yes, when my active baseball days are over I intend to devote all my time to farming, chiefly to developing a good pure-bred herd of Herefords," he said.
>
> "I'm just completing a good modern house on my farm that's what I think of the farm and farming."

Eddie Roush, the great center-fielder of the Cincinnati Reds, was born on an Indiana farm which his family homesteaded, and he lives there now. His first baseball training came when he and his twin brother took turns at standing in the barn lot batting flies into adjoining fields for the other to chase

Quiet and retiring in nature, this strapping big Indiana farmer is thought by some to be taciturn and unfriendly, but his neighbors at home assure you that a better fellow never lived

Some years ago Eddie jumped from a boat into a swollen river and saved a boy from drowning. It was two years before his family heard of it. That's Roush.

You can't mention farm boys in big-league baseball without some one naming Fred Williams. He got the nickname Cy because of his origin. Cy is a country banker and a farmer in Northern Wisconsin, in a place called Three Lakes.

Cy is just about the best home-run hitter in the National League, and one of the most popular men. Wilhams has played a good many years and he credits his long stay in the big leagues to the out-door work he does in winter

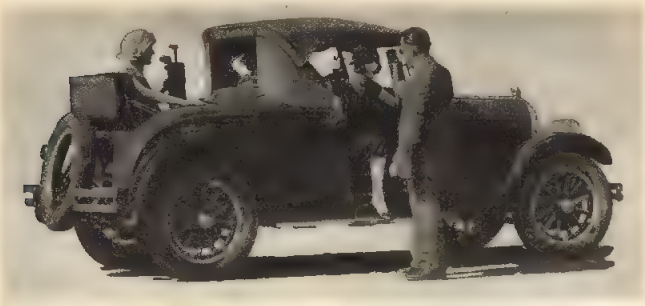
> Feeding stock, milking and farming are just the thing to keep a fellow fit," he says. "Cutting down trees trains the eyes, strengthens the arms and I feel that it has aided me in my hitting."

Hubert Leonard, better known as Dutch, has a record as a big-league pitcher that will be remembered as long as baseball history lasts

Out in California in the past few years, Leonard has made some grape-growing history

He developed a system of irrigation himself that was a great departure from the accepted standards, but he startled the old-timers with his yields. Moreover, he got such a quality into his grapes that the Dutch Leonard Brand is pretty well known, and that quality brought him a good fat bonus from the raisin association.

There is no space or occasion to list all the farmer boys who have reached the highest peak in baseball. The farm boy has made a place for himself in baseball; he has played hard and clean; and that is the best thing that can be said for anybody in the sport world



New Chrysler Six roadster

Refinements and Price Reductions Feature New Series Chrysler

PRICE reductions on all models ranging from $30 to $130, finer bodies in new color designs, a vibration dampener added to a more powerful and refined engine, new single-plate type clutch and several improvements on the chassis, characterize the Chrysler Six cars for 1926.

Except for changes in the roadster design, a droop in the top line of the closed bodies towards the rear, rounding off the back corners and the new color schemes, the distinctive body lines which identify the Chrysler Six cars for 1926.

In order that the performance of the new series cars would remain unaffected by the increased weight of the new bodies and other refinements, ⅛ in. has been added to the bore of the engine which now stands at 3⅛ in. in diameter. This change increases the rated h. p. from 21.06 to 23.44, the piston displacement from 201.4 cu. in. to 218.5 cu. in. and allows 8½ per cent greater engine torque.

Crankshaft Improvements

To balance the increased power, the crankshaft has been made larger and heavier. All seven main bearings are enlarged in diameter from 1⅞ in. to 2¼ in., while ⅜ in. has been added to the connecting rod bearings which are now 2 in. in diameter instead of 1⅞ in. Corresponding increases in sizes have been made on all main and connecting rod bearing caps, studs and bolts.

To secure smoother operation a torsional vibration dampener is now mounted on the front end of the crankshaft. The dampener is a simple automatic device acting as a secondary fly-wheel, the latter providing the drive for the fan.

Of the same design but slightly modified, the pistons are now fitted with a pin of 13/16 in. diameter instead of ¾ in. and of greater length. Similar to the ends of the crankshaft, Welch plugs instead of screw-in plugs are used to seal the ends of the hollow camshaft.

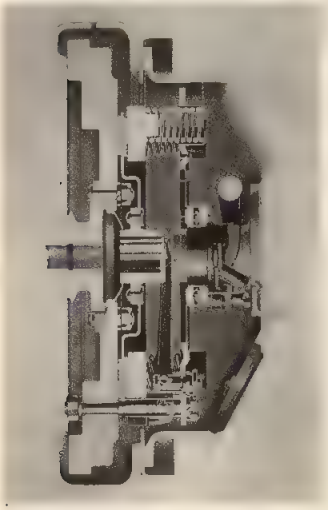
Wider by ⅛ in. The faces of the oil pump gears are ⅛ in. wider, which represents an increase of the pump capacity by 12½ per cent. At the same time, an improvement in the oil suction feed has been made. If the oil screen should become clogged, the suction of the pump will open a valve held in place over relief holes by spring tension. This opening of the relief holes will allow the oil to come through the pump without passing through the screen.

Although no changes have been made in the radiator or water pump, the water capacity of the cylinder jackets has been increased to provide greater cooling for the engine. No changes have been made in the fuel system or manifolding except that the intake of the Ball and Ball carburetor has been enlarged by 1/5 in. Extra rigid front support of the engine has been accomplished by casting the legs integral with the timing chain case cover.

Into a slightly larger flywheel has been fitted a new and simpler type of clutch which is claimed to make gear shifting much easier.

The new clutch is a single dry plate unit similar in respect to that used on the

Chrysler Four. Comprised of a pressure plate assembly, having six springs, pressure is applied to a hardened steel splined hub to which is riveted the metal disk carrying the special woven asbestos cord facings. Three release levers provided with spring locked knurled nut adjustments are connected with the stationary sleeve which carries the clutch release bearing.



Single dry-plate clutch used on the Chrysler Six

To compensate for the added torque, the face of the transmission gears has been increased in size ranging from 1/16 in. to 3/16 in. larger. Instead of the stub type teeth which are customarily used, teeth of full depth are employed. By grinding all constant mesh and intermediate gears, smoother and quieter transmission operation has been obtained. The speedometer gears are now located under the rear main bearing, where they operate constantly in a bath of oil. Because of the larger transmission case necessary to accommodate the new gears and shafts, the propeller shaft has been shortened, while at both ends the flanges have been changed. The gear shift lever has been made longer to give greater comfort in changing speed while the pedals have been changed in shape and material. To make for smoother application, the emergency brake has been redesigned and in its new form incorporates several parts common to the four cylinder model. The diameter of the transmission brake drum has been increased by one inch.

In line with the other chassis changes, the rear axle housing has been strengthened and the differential carrier made more sturdy and rigid, making at the same time for quieter operation. Both ring gear and pinion are now larger by ¼ in. and have the spiral teeth cut at a steeper angle forming a more substantial engagement. A change has also been made in the angles and capacities of the pinion shaft bearings as well as on the pinion shaft sleeve.

Except for changes in the master cylinder body, tube leads and T-fittings, there has been no alteration in the four-wheel braking system.

Turning to the bodies, most changes have been made on the roadster model which is now finished in two-tone drab, copra drab above the streamline bead and chicle drab below, set off with black moulding and a fine flamingo carmine stripe. New bullet type nickel-plated headlights and nickel-plated windshield frames and stanchions give an added touch of dash. Both doors have been widened by 1 7/16 in. to afford easier access, while the door of the golf club compartment now opens sideways instead of downwards as formerly. The top bows, which are now of wood, finished in walnut to match the steering wheel and new type of instrument panel, fit into nickel-plated thimbles, giving a neat finish. The latter can be folded down neatly and is so designed that it is readily detachable by those who desire to have no top at all.

Plymouth and Pilgrim grays are used on the phaeton, which is set off by a striking stripe of flamingo carmine. Long grain, bright finish, water-proof material is used for the top which has a white whip-cord lining to harmonize with the Colonial gray ivory tinge soft leather of the upholstery.

The sedan, is also finished in chicle drab, black upper structure and carmine striping. Its interior trim is of blue gray worsted pile fabric with a velour headlining.

The color of the coach has been changed to thebea gray with fawn gray striping, which with the exception of the changes already mentioned as applying to all closed cars, remains the same as the previous model.

Equipment included with the bodies is practically the same as on the previous models except that a Sparten "S. O. S." electric horn is standard equipment on all models.

The new prices on the eight body models which have comprised the line for some time past are announced to list as: Phaeton, $1395; Coach, $1445; Roadster (no change), $1625; Crown Imperial, $2095; Imperial, $1995; Brougham, $1865; Royal Coupe, $1795; Sedan, $1695.

SCIENCE AND INVENTION
Continued

outlets overground. Several may have underground outlets.

"Stiess correctly traced the Jordan-Red Sea rift along the eastern face of Abyssinia, down between the highlands of Somaliland and Abyssinia, inclosing the lake chain of southeast Abyssinia, across British East Africa to Lake Manyara. Here he found a gap, so far as his evidence went. This has now been supplied and the Rift has been traced on through the Shire lowland across the Zambezi with laterals in several places, including Tanganyika, Kivu, and Albert Nyanza, and with lesser rifts to the Sabi Valley. Nyassa is in the main course; so are Naivasha and Nakuru, and many more lakes."

The Rift crosses mountains and rivers, Mr Osborn tells us. In certain parts it is as clearly formed as if done with a channeling machine, and at other places is eroded so that it is not easy to follow. Between the Dead Sea and the Araba Valley there is a ridge 660 feet high marking the uplifts of Edom and Sinai. Blanckenhorn gives the depth of the fault of the Jordan as 4,500 feet, all in limestone. In the Red Sea, Crossland gives the down-throw as 11,000 feet. Hume, director of the geological survey of Egypt, reports at least five subsidiary rifts in the Sinai peninsula. The Afar desert plains between Abyssinia and the sea contain many lakes below the sea-level, and these plains are the northern entrance to the Great Rift Valley in Africa. The British War Office has attempted a map of the Great Rift which is quite perfect in such regions as Abyssinia and British East Africa, but which is more vague farther south. He goes on:

"The Great Rift is volcanic, with secondary sedimentary rocks. For the entire length of the fissure there are volcanoes of all ages, from active, steaming ones to dead craters of great antiquity.

"The Master of Nazareth was born in the Rift region and knew its demon weirdness. It was in the Great Rift that the devil tempted Him. Moses won the Decalog from the top of a neighboring mountain. Israel's hosts were helped across the Red Sea by some magic of the Great Rift. Mohammed took his midnight walks along its escarpments and there heard the voice of Allah. There are mineral riches, too: gold and precious stones and iron and copper. In ten thousand ways the Rift has been the stage of the world as well as its deepest wound and least-healed scar.

"The origin of the Rift is usually placed at the end of the Eocene period, but it was by no means finished then and, in fact, is still subject to minor convulsions. The Ophir gold trails, over which came the gold for Solomon's temple gathered by Hiram of Tyre, were obliterated no doubt in the inconstant Rift.

"In large part, the phenomenon still encompasses the wildest portions of Africa. Thousands of square miles of its area are infested with the tsetse fly, and the graves of sleeping-sickness victims within its walls are millions. I have heard the lion roar there as the honey-bird chirped, and the

Kampkook No. 4 is America's finest camp stove. Has 10-gallon tank cooking surface. 10x18 inch warming shelf, cooking capability absolutely guaranteed. Finished in baked olive drab enamel. Price in U. S. $16.50

Corns
Lift Off—No Pain!

Doesn't hurt one bit. Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

SCIENCE AND INVENTION
Continued

THE AGE OF SPECTACLES

NOT of theatrical pageants, altho these doubtless play their part. Rather of the lenses that now bestride the nose of humanity. They are obtrusive where they used to be modest, complains a French critic—solidly coarse framework where they were formerly almost invisible. Writing in *Le Temps* (Paris), he gropes about for an explanation of the prevailing fashion, and after trying to account for it on hygienic grounds, takes refuge in symbolism. We read in the paper just named

An attentive observer of our fashions, Mr. de Trevières, has characterized the present generation as the "tortoise-shell-spectacle generation." Spectacles, indeed, are a very significant peculiarity of our time. One might believe that post-war humanity were composed wholly of the near-sighted, the far-sighted and the astigmatic. A fashionable youth must now shave his face carefully, plaster his hair back, leave off his hat and protect his eyes with two aggressive lenses like automobile lamps—such is a synthetic portrait of the Americanized European.

There was a time when the masterpieces of medical optics were more discreet. The weaknesses of the eye were hidden as much as possible. Light glasses were worn, spectacles with almost imperceptible bows. The lenses were as small as possible. Care was taken not to change the appearance of the face, and the nose was pinched as delicately as it could be.

To-day such scruples are not the mode. Tortoise-shell spectacles with enormous lenses and solid frames are affected even by youths and maidens. Formerly a young person wearing spectacles would have been regarded as ridiculous. To-day a Harold Lloyd and a Buster Keaton sport their heavy eyepieces as buoyantly as a cavalry officer maneuvering his troop.

It is perhaps not very easy to explain this evolution in our manners. Doubtless American influence has played a great part in it but this is not enough to justify such universal adoption. In reality, we have become accustomed to study the infirmities of vision without reserve. For many years we have now been examining very attentively the eyes of children. Methodical tests are required in the schools. It is sought at the earliest moment to ameliorate and cure certain cases that formerly aroused no interest. The important part now played in our lives by reading, and the intensive study required of modern pupils, tend assuredly to fatigue the optic nerve. Oculist and dentist are no longer specialists called in accidentally and exceptionally. Modern hygiene has made them attentive and regular watchers over our organic equilibrium. We are no longer ashamed to call at an optician's to procure supplementary eyes.

Finally, it has been quickly seen that on the fresh face of a girl the heavy spectacles of our grandparents create a piquant and amusing contrast, which simply goes to emphasize the triumph of youth. This argument was certainly not the least compelling among those that decided the arbiters of our fashions to replace the invisible pince-nez with this robust optical apparatus.

(Remember, these are merely printed reproductions of the real photographs)

The marvelous Semi-Automatic—just *one* camera among *famous Anscos*

The New Semi-Automatic automatically spends up onto film. Takes pictures 2¼ × 4¼. Price $50.

IT'S no surprise at all, that *Ansco* should put out the first automatic film-winding camera! For eighty-three years—long before any other American manufacturer—Ansco has been pioneering in the photographic field.

The Semi-Automatic is a remarkable camera for catching scenes that pass in a few seconds. With other cameras you lose them while winding up the film for the next picture. You just take the picture, press the lever and you're ready for another! Just like putting your foot on the self-starter instead of having to crank the automobile by arm work!

Any good camera and film place will be glad to show you how the Semi-Automatic works (or we'll send you a booklet for the asking). It has a fine Rapid Rectilinear lens, costs only $50.

Ready-Set cameras have revolutionized picture-taking

Perhaps you're one of many who used to say, "I'd love to shoot some pictures if I ever *got* any—but I don't."

Well, that is as dead now as the mule-pulled street-car! Ready-Set cameras always get good pictures. For they are all "set" for you so that you can't do any worrying or guessing. The lens is fixed at a universal focus so that you don't have to judge the distance. The shutter speed is regulated, too. All you do is set for snap shots or time exposures and *shoot*.

The No. 1A Ready-Set has an automatic finder which makes you get in your picture every single thing you see in the finder.

Vest-Pocket Ready-Sets are $8.50. Ready-Set Junior ettes are $10.50, and 1A Ready-Sets are $13.50.

The $13.50 Ready-Set camera takes pictures 2¼ × 4¼

Illustrated catalog sent free on request. *It's an Ansco!*

John Bagley created a marvelous *Aroma*

YEARS ago . . . oh, many years ago . . . . John Bagley of Ole Virginny perfected a wonderful blend of pipe tobacco. Buckingham he called it, Sir . . and never did tobacco have so sweet and pleasant an aroma. Even the ladies liked its irresistible fragrance . . . no reproving household voice was raised when the master filled his pipebowl with golden Buckingham!

We've brought this marvelous Buckingham back from its rich and romantic tobacco past . . . *your dealer now has it.* Sun-cured . . . as John Bagley cured it. Blended . . . as John Bagley blended it. Aged . . . as John Bagley aged it. Fragrant and sweet as of yore!

Tonight, a pipeful of Buckingham!

If you are unable to obtain Buckingham from your tobacco dealer, just send us his name and 15c—back will come a full-sized package.

CURRENT EVENTS

FOREIGN

April 22.—Edouard Herriot, former Premier, is elected President of the French Chamber of Deputies.

The Council of Ambassadors authorizes Bulgaria to increase her armed forces by 7,000 until the end of May to settle the present disturbances. More bloody outbreaks in Bulgaria are reported.

Three German Communists are sentenced to death in Leipsic, and thirteen others are sentenced to imprisonment on charges of murder and plots to overthrow the German Republic, a striking feature of the verdict being the statement that the plots were financed directly from Moscow and connected by the Soviet Embassy in Berlin.

April 23.—King Boris of Bulgaria is reported being held a prisoner in the royal palace by the military junta headed by General Lazaroff. The imprisonment is said to be due to the King's invitation to Premier Zankoff to resign so that he could form a coalition government including the Agrarian opposition.

Joseph Caillaux, French Finance Minister, serves notice in Parliament that he proposes to increase the income tax, bringing France up to the level of the American and British ratio

April 24.—Four men are killed and eight wounded in an outbreak between Communists and French Fascisti in Paris.

April 25.—Fresh acts of terrorism occur in Bulgaria, a theatre and library in Plevna being destroyed by a bomb and unsuccessful attempts being made to destroy three bridges in the region of Varna, while in Vralsa a member of a military patrol is killed.

April 26. Field Marshal Paul Von Hindenburg is elected President of Germany by a plurality of 888,684 votes. The returns show that about 3,000,000 voters who had failed to cast their ballots in the first presidential contest on March 29 voted in the present election for Hindenburg

An official communication issued in Sofia states that the recent Bulgarian Communist outbreaks were financed from Moscow and Vienna. A semi-official communication states that the number of persons arrested is not 6,000 but 2,000, and that the number of killed does not amount to hundreds but only to a few.

April 27 The Earl of Balfour is appointed Lord President of the British Council, succeeding Marquis Curzon, who died recently.

April 24. Great Britain will return to the gold standard immediately, Winston Churchill, Chancellor of the Exchequer, announces in Parliament. Australia reestablishes the gold basis at the same time, and the other self-governing Dominions are to follow suit. Mr. Churchill also announces a cut in the income tax of six pence to the pound, making the tax four shillings.

Premier Mussolini of Italy has informed Jugo-Slavia that Italy will not tolerate any action by Jugo-Slavia against Bulgaria, according to a dispatch from Milan

DOMESTIC

April 22.—The landing detachment of 165 officers and men from the light cruiser *Denver* has been withdrawn from Ceiba, Honduras, as a result of the arrival of

Vary the hearty soups you serve!

Hosts of people find a hearty soup one of the most tempting and satisfying of all dishes. It is so substantial and so delicious.

Campbell's Vegetable is the most popular hearty soup in the world.

But do you realize that with Campbell's you can vary these soups and always give your appetite the change it so welcomes?

12 cents a can

Vegetable Soup: Here the fifteen different vegetables are either diced, sliced or whole, blended with rich beef broth, tomato puree, cereals and many other ingredients.

Vegetable-Beef: In this soup most of the vegetables are in a puree in which beef broth is blended. In addition there are toothsome pieces of beef and diced vegetables.

Beef Soup: And when your appetite inclines to a similar soup, but with more of the beef—hearty, pieces in every spoonful—this will be your choice.

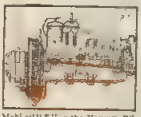
Ford Long Life

Did you ever say this about your Ford?

"OH, YES, I'd use Mobiloil if I had a more expensive car! But I don't see why a cheaper oil won't do just as well for my Ford."



Mobiloil "E" is the Vacuum Oil Company's specialized oil for your Ford Engine

If you have ever said that or thought that about *your* Ford, won't you look these facts squarely in the face?

It makes no difference whether your car costs $5,000, $2,000, $1,000, or is the efficient, but modestly-priced Ford—in time friction wears out all motors. *The time depends upon the lubrication.*

Specialization pays

Specialization has won for the Ford car its unique position in motordom. *Specialization* has resulted in "The Economy Car."

Specialization has given Mobiloil "E" its unique success in protecting Fords. *Specialization* has made Mobiloil "E" the economy oil.

In quality Mobiloil sets a world standard.

The real quality or "character" of a lubricant accrues from the presence of certain highly complex compounds within the crude stocks used.

These petroleum compounds possess the property of entering into enduring association with the molecules of the metal surfaces to be lubricated. This process is termed "AD-sorption."

Adsorption develops a tough, semi-permanent lubrication surface, distinct from, and independent of, the liquid oil film—almost an amalgam of oil and metal. This definite characteristic of Mobiloil "E" is your real protection against friction and wear during periods of operation when the liquid film is missing, as in starting; or when the liquid film is unduly stressed by excessive heat, pressure, speed or otherwise.

The Ford Motor Company has produced for you an unusually sturdy car. But the life and economy of your engine are largely in your own hands. If you really want lowest cost per mile you cannot afford to accept less than Mobiloil protection.

MAKE THIS CHART YOUR GUIDE

THE correct grades of Gargoyle Mobiloil for engine lubrication of prominent passenger cars are specified below. If your car is not listed here, see the complete Chart at your dealer's.

The grades of Gargoyle Mobiloil are indicated by the letters shown below. "Arc" means Gargoyle Mobiloil Arctic.

Follow winter recommendations when temperatures from 32°F (freezing to 0° F. zero) prevail. Below zero use Gargoyle Mobiloil Arctic except Ford Cars, use Gargoyle Mobiloil E.

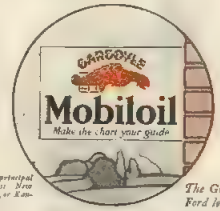
How to buy

From bulk you—50c is the fair retail price for single quarts of genuine Mobiloil from the barrel or pump.

For Touring Convenience—the sealed 1-quart can is ideal for touring or emergencies. Carry 2 or 3 under the seat of your car.

For Your Home Garage—the 5-gallon or the 1-gallon sealed cans or 15-, 30-, or 55-gallon steel drums with convenient faucets.

Add 2c per qt. slightly higher in Southwestern, Mountain and Pacific Coast States.



The Guide Sign to Ford long life

Branches in principal cities. Address New York, Chicago, or Kansas City.

VACUUM OIL COMPANY

The Eversharp point cannot wobble or turn

IT seems simple enough now. Everyone knows that a good pencil must hold the lead securely at the tip.

Yet for generations the makers of mechanical pencils overlooked this fact.

And nearly everybody went right on using wood pencils.

Then Eversharp appeared!

Eversharp was different in principle. It had the *rifled tip.*

This tip *gripped* the lead at the point. The lead could not wobble or turn. So Eversharp wrote as smoothly as a wood pencil.

Also it was *ever sharp.* Practically indestructible. Handsome and handy.

The world changed its mind about the mechanical pencil. A wood pencil in a man's pocket begins to appear odd.

Today, the new, *perfected* Eversharp is rapidly adding to the twenty million present Eversharp users.

It does not clog or jam. Reloads in a second. Is made with the precision of a watch.

There is an Eversharp fitted to be your companion in success.

Perhaps an Eversharp in working togs at $1 or less. Or probably a gold-filled or sterling model—harmonizing with your watch and other personal articles—$3 to $6.

Out of all the Eversharps priced up to $45, one is certain to be *your* pencil.

Thirty thousand Eversharp dealers are ready to help you select. Several are conveniently near.

The New WAHL EVERSHARP

PERFECTED

Wahl Eversharp and Wahl Pen
Made in U. S. A. by The Wahl Co., Chicago
Made in Canada by The Wahl Co., Ltd., Toronto
Prices same in Canada as U. S.

Wear-proof—unbreakable and an Ivory-smooth Point

The barrel of a self filling pen is not an ink fount, but a case to hold the nib and protect the soft rubber ink sac which actually contains the ink supply.

The barrel should be stout and long wearing like a watch case.

Taking another suggestion from the watchmaker, the pen barrel and cap should be gold or silver. For beauty aside, what other materials are so enduring and satisfactory?

The thin, strong walls of the beautiful metal barrel of the Wahl Pen allow space for a much larger ink sac. Ink capacity is far greater than in the ordinary fountain pen.

The nibs of Wahl Pens are the finest product of the jeweler's art. Their iridium tipped points are ivory-smooth. And no nib in the world will outwear them.

Your dealer can show you a Wahl Pen to match your Eversharp. Carry both and be sure you are right in your writing equipment.

Red Tip Leads are the smoothest quality perfect in size, and economical. Made in black (F grade) red, blue, green, yellow, purple copying. At all dealers.

WAHL PEN

Orange Jell-O

© Genl. Foods Corporation, 1925

WE Americans have a way with desserts that is all our own. It is an Anglo-Saxon trait to eat a heavy pie or pudding that is a meal in itself after a hearty dinner, and we alone of all people discourage the flow of gastric juices by generous servings of frozen ices and creams as a last course. The ideal dessert is one that is light, not too sweet, delicate and not an added burden to digestion; a dainty, for a gracious "farewell," not a substantial course.

Dishes that have gelatine as a basis have just these characteristics. They melt in the mouth, they are chilled without being frozen, solid without being hard, and they furnish nutrition in the way of protein and sugars, supplemented by the whipped cream or fruit that is added to them. Plain or with cream, they make an ideal dessert for children, giving a sweet taste without an undue amount of sugar.

Reprinted by permission from the New York Tribune Institute.

"Best in the Long Run"

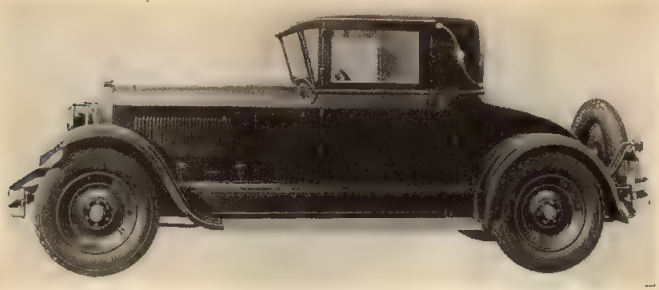
STUTZ
THE Car Manufacturer should be vitally interested in the profits the car dealer makes.
In my plans for the expansion of the Stutz business, I have not overlooked this great essential.
To those who are seeking a connection which will guarantee them the maximum of protection and co-operation, I have a message of real interest to deliver.
FREDRICK E. MOSKOVICS
President
STUTZ MOTOR CAR COMPANY-
OF AMERICA, Inc.
INDIANAPOLIS, INDIANA.

FACTORY quotas are dealers' nightmares, and the larger the production the more horrible the dream.

This is the stuff that overhead is made of and overhead is the demon that devours the dealer's profits.

I want to see Stutz dealers sell a fair amount of cars in their territory, but I am vitally interested in seeing them earn a reasonable profit.

FREDRICK E. MOSKOVICS
President
STUTZ MOTOR CAR COMPANY OF AMERICA, Inc.
INDIANAPOLIS, INDIANA.



Gardner 8-in-line foursome cabriolet

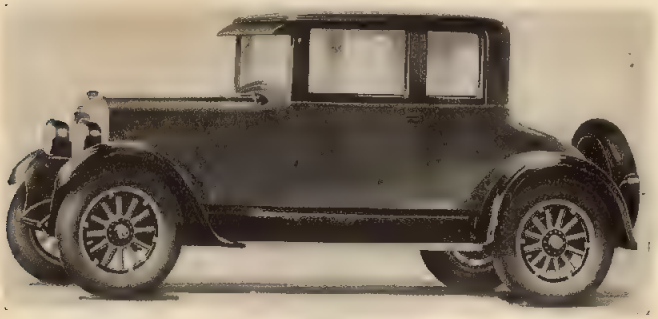
Gardner Adds Foursome Cabriolet

THE Gardner Motor Co., Inc., St. Louis, is now in production on a new model of the eight-in-line series. The new job called the Foursome Cabriolet accommodates two passengers in the rumble seat and two in the forward compartment.

Upholstery is first quality mohair harmonizing with the outside body finish of two-tone Musketeer and Matchlock gray Duco. The rumble seat in the rear deck which provides seating capacity for two passengers is upholstered in machine-buffed Spanish leather. The windshield frame is a solid aluminum casting designed so as to eliminate the usual blind corner and give clear driving vision.

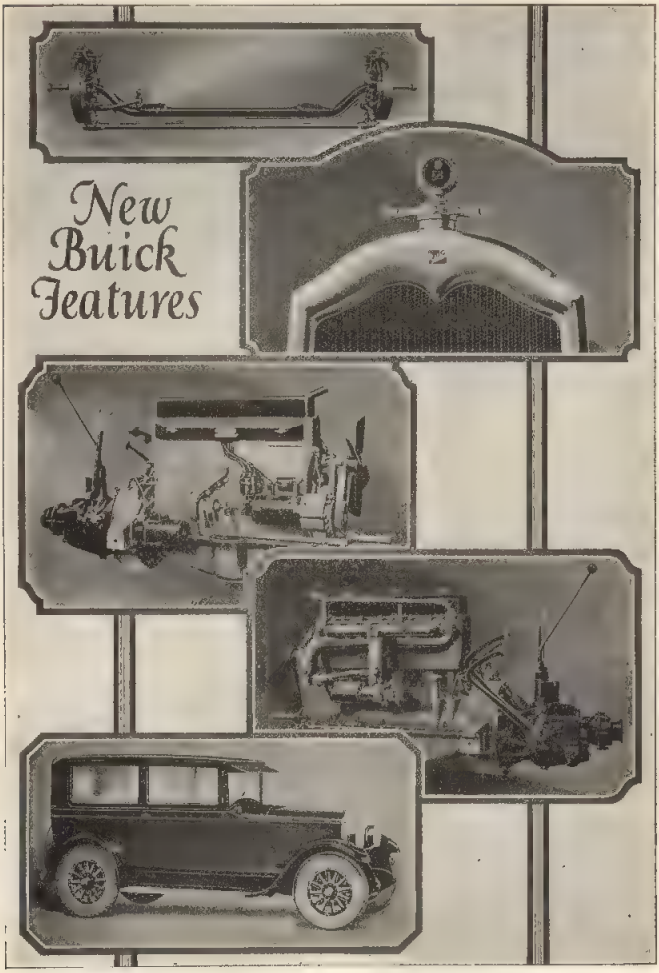
Corner post lights are used for interior illumination and there is a compartment just back of the main seat for packages and tools. A sliding plate glass window in the rear gives added ventilation when desired and permits friendly communication with passengers in the rear seat.

Regular equipment includes five Disteel wheels, five 5.77 balloon tires, double-barred bumpers front and rear, cover for spare tire, snubbers all round. The car lists at $2,245 f. o. b. St. Louis.



New radiator shell on Studebaker Standard Six Country Club Coupe

All Studebaker models on the "Standard Six" chassis are now being equipped with a radiator shell of improved appearance. Earlier "Standard" editions carried a shell whose upper part while of convex shape has a somewhat flat appearance. The new shell which of course is interchangeable with those of the former style, has a perfectly rounded contour and is very similar to the "Big Six" design except that it is smaller and the fluting or scroll work eliminated. A slight change has also been made in the shape of the side rear quarter windows on the duplex-phaetons.



Price reductions and chassis revisions in Buick line for 1926

Chief among the mechanical changes is an increase in cylinder bore diameter of ⅛ inch on all engines. Front wheel brakes have been fitted with boots on linkage, radiator has been rounded out in front slightly, a two unit electrical system is now installed in place of the former motor generator, and both an air cleaner and oil filter are now fitted as regular equipment. Several other revisions have been made which will be covered in a later description.

Prices on new models are listed on page 101.

The Human Desire to Own the Best Suggests *the* Cadillac

Own the Car You Long Have Wanted

Value more remarkable than that of this fine Cadillac Coach is simply not to be had in the motor car market. For Cadillac has built—not merely a closed car at open car price—but a closed car in which outstanding value, quality and beauty go hand in hand.

Those who have viewed the Coach, who have observed the elegance and comfort of its large five-passenger body and experienced the powerful, vibrationless performance of the V-63 eight-cylinder chassis, tell us that the car confers new meaning upon Coach design.

And so, in steadily increasing numbers, discriminating purchasers are acquiring this fine Cadillac Coach, fulfilling their desire to own the best.

CADILLAC-COACH

A New V-63 Closed Model at the Same Price as the Touring Car—$3385 f. o. b. Detroit

Many Are Deciding That Their Day of *Cadillac Ownership* is Here

A logical thing is happening in the motor car market · · · It is the "stepping up" of a large number of motorists from ordinary automobiles to the outstanding *fine* automobile.

For years, these men and women have desired Cadillac closed cars. For years they have been thinking, "Some day Cadillac will build a closed model priced but little higher than closed cars of average quality—then nothing will stop me from owning one."

Now, in the Cadillac Coach, mounted on the V-63 chassis with its harmonized 90° V-Type eight-cylinder engine and built-in Cadillac Four-Wheel Brakes, these motorists recognize the car they have been awaiting and anticipating.

Eagerly, they are fulfilling their desire for Cadillac ownership.

CADILLAC MOTOR CAR COMPANY, DETROIT, MICHIGAN
Division of General Motors Corporation

The human desire to own the best suggests the CADILLAC

THE MAN who buys a V-63 Cadillac is influenced above all else by consideration of its known quality.

He buys the V-63 because he wants the most thoroughly reliable and the smoothest performing eight-cylinder automobile; because he wants the absolute security and marvelous control provided by built-in Cadillac Four-Wheel Brakes; because he wants Cadillac beauty, comfort and distinction.

He buys the V-63 to have and enjoy all of the advantages of Cadillac ownership - greatest of which is the assurance that he can continue to drive the car year after year and receive the same flawless, dependable, economical service. He knows of no other automobile that is so thoroughly proved, that offers the same certainty of satisfaction and that can be so completely relied upon as the Cadillac.

In buying it, he buys assured quality—he fulfills his desire to own the best

How Chrysler's New Results Are Revising an Industry

If a year ago the Chrysler Six had been merely another new car, its influence in the industry would not have been felt; nor would its first-year production of more than 32,000 cars—the largest ever recorded—have been required.

But it was in reality the first step in the general revision of motor car design which the past year so plainly indicates.

For Chrysler Six is an entirely new *type* of car, built on a new *kind* of engineering which produces results radically *different* from any others yet registered in the industry.

In the motor car industry, Chrysler quickly became the turning point which inevitably arrives in every industry—when revolutionary improvements render the original invention almost obsolete.

No other interpretation can be placed upon a car which with a 3-inch motor delivers 68 horsepower and a speed of more than 70 miles per hour.

The difference of Chrysler Six engineering is emphasized a hundred fold by the further fact that this motor yields better than 20 miles to the gallon of gasoline.

Nothing but engineering of the highest scientific character, with quality of the highest degree, could produce such a vibrationless engine as the Chrysler Six.

There is no other explanation for the fact you can comfortably drive the Chrysler Six at 60 miles an hour or more over a cobbled street; or safely take it around turns at 50 miles an hour.

That is balance in the *nth* degree—scientific balance, if you please.

Chrysler Six disposes for all time of the idea that weight and length are necessary to easy riding—that a great cumbersome engine is necessary for power.

For the first time, a car of Chrysler Six size has been engineered to afford not only comfortable seating space but comfortable riding. Even the side-sway is gone, because the rear springs are placed close to the wheel-hubs and parallel to the wheels.

Details quoted by the score would show that the Chrysler Six was and still is as far in advance of ordinary practice as the harvester of today is ahead of the first clumsy reaping machine.

You will find any Chrysler Six dealer eager to give you a demonstration, and supply you with all the structural details which prove every Chrysler claim.

The Touring Car, $1395; The Phaeton, $1495; The Roadster, $1625; The Sedan, $1825; The Royal Coupe, $1895; The Brougham, $1965; The Imperial, $2065; The Crown-Imperial, $2195. All prices f.o.b. Detroit subject to current government tax. Bodies by Fisher on all Chrysler Six enclosed models. All models equipped with special design six-ply, high-speed balloon tires. There are Chrysler dealers and superior Chrysler service everywhere. All dealers are in position to extend the convenience of time-payments. Ask about Chrysler's attractive plan.

Low-cost Transportation

Star Cars

2-DOOR SEDAN
$750 f. o. b. Lansing, Mich.

Why the 2-Door Sedan Leads in Value

THIS recent addition to the Star line offers amazing evidence of the values made possible by modern production facilities.

Here is a five passenger car, having not only the highest quality chassis and motor in the low-priced field, but also a body that in style, comfort and roominess is unsurpassed even on cars selling at much higher prices.

Externally, the body is finished in a rich blue lacquer with white stripe. The top is of grained artificial leather embellished with carriage guards in black enamel and nickel. Fenders and running gears are black. The radiator shell is nickeled with the same quality of plating as used on high priced cars.

The interior of the 2-door Sedan is upholstered in a durable, figured, basket weave worsted in serviceable French blue.

The windshield is in one piece and fixed in position. Ventilation without exposure to the weather is available through a cowl ventilator plus two ceiling ventilators directly over the windshield.

The seat next to the driver's folds towards the latter, affording, with the extra wide doors, ample room for entering or leaving.

The cubical capacity of this body exceeds that of any other low-priced car.

The most surprising feature of this car is the price: $750, f. o. b. Lansing, Mich. We urge comparison with any other car listing for less than $1000.

Finally, the million dollar motor and high grade Star chassis yield the utmost in operating economy, reliability and ease of handling.

STAR CAR PRICES

The Joy of Climbing Hills on High

THIS comes to the owners of Durant Cars. Hills that demand shifts to second gear in most cars yield easily to the flexible power of the Durant Motor.

Without strain or knock and with only a slight extra pressure on the accelerator the Durant mounts long, steep grades and passes higher-priced cars whose owners are busy shifting gears.

In addition to this exceptionally powerful, quiet motor, the Durant has a chassis that throughout is of most substantial and satisfactory construction.

It is as reliable and as nearly trouble-free as that of any car on the market.

The design, finish and interior appointments are in keeping with the high quality of the engineering. At the new low prices, the Durant offers great value per dollar of cost

$750.00 f. o. b. Lansing, Mich.

Style, Comfort and Low Cost

THE new Star 2-Door Sedan is a real 5-Passenger car that offers the average family an ideal year 'round transportation facility.

It is finished in rich blue lacquer with grained artificial leather top and has an unusually roomy interior arrangement. The right-hand front seat folds towards the driver's seat when not in use, and the extra wide doors afford easy passage to and from the rear seat. Upholstery is both artistic and durable. This car must be seen and tried to appreciate its exceptional merit and value.

Essex Alone Gives This Quality and This Price

The Reason for its Amazing Sale

Buyers know what Essex gives can be had elsewhere only at far higher cost. The great Essex sales record is due to no other thing. It is recognition of a value leadership so overwhelming that it is not even challenged.

Today's Essex is the greatest of all Essex values. It is the finest Essex ever built. It is the smoothest, most reliable Essex ever built. It is the best looking, most comfortably riding Essex ever built. We believe its maintenance and operation the most economical of any car in the world. And the price because of famous patents, with volume manufacturing advantages that are absolutely exclusive, is the lowest at which Essex ever sold.

THINK *Where Else So Much for*
$895
Freight and Tax Extra

On every side its hosts of owners praise it with such pride and conviction as we have never heard for any other car. What they say has revealed this great value to thousands of buyers. It is reflected in the greatest sales in our history. And the rapidity of this sales increase shows how thoroughly the facts about Essex have penetrated the entire market. Wherever you go, note how Hudson Essex outnumber all new cars—the surpassing proof of value—greatest sales.

THE FINEST ESSEX EVER BUILT

A RELIEF FROM THE COMMONPLACE

Realizing that many people would prefer the distinction and exhilaration of an open car if they could find the right kind, Franklin presents the new de Causse design. This Touring Car has a made-to-order air that sets it apart from ordinary open models. It satisfies fully the desire for fineness and style among those who delight in action and the open.

In service, it becomes more than ever the sort of car in which you take especial pride and pleasure. For beneath its design appeal are not only high power and exceptional comfort, but also the Franklin reputation for long life and owner satisfaction. Over 75% of all Franklins ever built are still in active service, while 62% of last year's entire output went to those who already owned Franklins.

* * * * *

Like the six other Series 11 types, this Touring comes ready for the road—fully equipped with appropriate accessories, spare tire and cover—at the catalog price. Only freight and tax are extra.

FRANKLIN

Announcing

SMART NEW MOTOR CARS

Beautiful new bodies by Fisher, handsome new radiator, striking color combinations in permanent Duco Finish and long, low lines, combine style, beauty and distinction absolutely unequaled in Oakland's type or price class.

THE HARMONIC BALANCER

An exclusive engineering development which renders the Oakland Six engine positively unmatched in the absence of vibration at all speeds. *This is but one of many important engine and chassis improvements.*

PRICES $70 TO $350 LOWER

Motorists everywhere will be talking about this latest Oakland—its irresistible beauty—its incomparable smoothness—its surprisingly lower prices.

Without exception Oakland Dealers tell us that Oakland has more than made good its pledge to keep the Oakland Six far in advance of its field.

5-PASSENGER
$1795

7-PASSENGER
$1895

Freight and Tax Extra

Because all know higher price can buy no smoother performance than Hudson's. It cannot buy more brilliant results in acceleration, power or speed. It cannot buy greater reliability or endurance. At the cost of a moderate priced open car, Hudson gives closed car comforts, with chassis quality that is only comparable to the greatest and costliest cars. The largest Hudson sales on record show how well buyers know the facts.

Only Hudson Can Build This Value

Hudson's supreme advantage is the famous Super-Six motor. It is patented. No other maker can use it. For ten years it has made Hudson the largest selling fine car in the world. Now it gives like dominance among all 6-cylinder closed cars. When it came, it almost doubled the efficiency of "Sixes." No type, however costly, has ever been developed to excel it in performance, smoothness or reliability.

Its simplicity has always meant a lower selling price than is permitted in complicated types. And today, economies possible only to the largest production of 6-cylinder closed cars give it value advantages never held by any rival. Hudson's invention and three years' development of the Coach, also give it exclusive manufacturing advantages in this most famous of all closed car values.

The high resale value of Hudsons is due not only to their wanted closed car comforts, but even more to a mechanism that stays new for years in smooth performance and reliability.

The World's Largest Builders of Six-Cylinder Closed Cars

$1250

Freight and Tax Extra

New Price for HUDSON COACH *(Was $1345)*

Today's Hudson Super-Six Coach costs less than half the price at which the open models have sold. We are the world's largest builders of 6-cylinder cars. Quality is constantly improved and therefore Hudson is more than ever

"The World's Greatest Buy"

Hudson's leadership is based upon ten years' concentration in refining a great car around the famous Super-Six motor. This exclusive invention added 80% to motor efficiency, yielding 76 horsepower without added weight, size or cost. It almost doubled car endurance. No motor, however costly, in design or construction excels Super-Six smoothness, reliability and performance.

There has been constant improvement in every detail. Easier steering, greater roadability, more comfort, better materials, finer workmanship, handsomer appearance, and more lasting finish. In all ways it is the greatest Hudson and the lowest priced Hudson.

HUDSON SUPER-SIX SEDAN

5-Passenger **$1695** *(Was $1795)* *–7-Passenger* **$1795** *(Was $1895)*

All Prices Freight and Tax Extra

Such Quality Has Always Cost Hundreds of Dollars More

Today's Essex is the finest ever built. It is the smoothest, most reliable Essex ever built. It is the best looking, most comfortably riding Essex ever built. And the price, because of volume, is the lowest at which Essex ever sold.

The Finest ESSEX Ever Built

$895

Freight and Tax Extra

Proof of Greatest Value—Which Is Sales

Its overwhelming public acceptance confirms by actual sales supremacy the outstanding leadership of Essex value. Never was that position so clear, and so rightly deserved as today.

Essex won its great recognition on the issue of finest quality, performance and utility without useless size, weight or cost.

And with its low first cost and operating economies, you get qualities of long-lasting, reliable performance, smoothness and riding ease.

Essex requires little attention to keep in top condition. Its maintenance cost, we believe, is the lowest of any car in the world. You sacrifice no motoring pleasure, comfort or good looks that large, high-priced cars can give. Essex is nimble of action It is easily handled in crowded traffic, responsive to every call for power or speed. And with it you know all the satisfaction that comes with its distinction as a fine and beautiful car.

Can any other car within hundreds of dollars of the price satisfy you so well?

The Harvester aim —low-cost hauling

ALMOST a century ago—in 1831 to be exact—the first of the Harvester Company's products began to build a reputation that was to extend through every country of the world. Since then other products have followed, deserving in every instance to be members of this famous line.

Twenty years ago motor trucks were added. During the years that followed, the International organization has played a steadily constructive part in the progress of motor transportation.

The mechanical excellence of International Trucks has advanced in keeping with the standards set by other products of this Company throughout its history.

Today the accumulated International experience is evident in outstanding features of design, such as the life-guaranteed ball-bearing crankshaft, the removable cylinders, steer-easy steering gear, and auxiliary rear springs. And the International reputation is reflected in the fact that the entire capacity of three great factories is required for the manufacture of International Trucks.

Good trucks for twenty years—better trucks now than ever!

The International line includes a Speed Truck for 2000-pound loads, Heavy Duty Trucks ranging from 3000 to 10,000 pounds, maximum capacities, and Motor Coaches for all requirements.

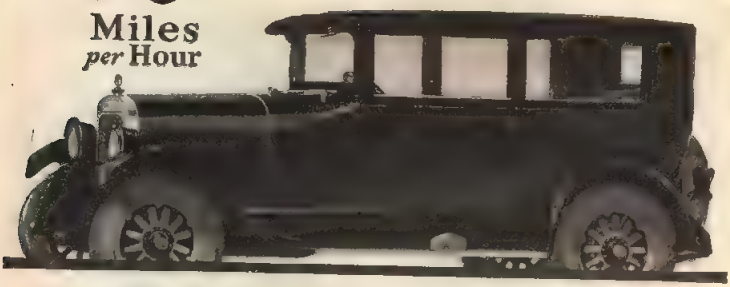
58 Miles per Hour



Ever since the new good Maxwell startled the country with performance heretofore associated only with far costlier automobiles, America's favor has been sweeping the Maxwell Club Sedan onward to an ever-growing preference.

In every section, the new good Maxwell is rapidly deepening and strengthening its place in public regard. This process continues as tens of thousands of car buyers realize more and more fully the strength, ruggedness and long-life of the new good Maxwell, and the luxurious comfort, beauty and utility of the Club Sedan.

The new good Maxwell Club Sedan, finished either in handsome cloth or genuine Spanish leather upholstery, with doors of extraordinary width and generous roominess for five adults, is the most distinctive car of its type on the market.

Such a combination of abilities and value is being produced only by the splendid Maxwell engineering and manufacturing organization working in the great Maxwell plants.

You will find every Maxwell dealer eager to prove the truth of these assertions. Be sure to see, and to ride in the Club Sedan.

5 to 25 Miles in 8 Seconds

25 Miles to the Gallon

Balloon tires, natural wood wheels, stop-light, transmission lock, Duco finish *standard* on all Maxwell models. Shrouded visor integral with roof; heater, standard on all closed models.

A New Line *of*

Cadillac Cars

THE simplest, quickest way to convey to you an adequate conception of these new Cadillac cars—the most superlatively beautiful line that Cadillac has ever produced—is to record a practical and highly important fact.

Providing, by means of new engineering, a new standard of beauty, a new measure of ease and a new brilliancy of performance unequaled in Cadillac history—and true to all the fine Cadillac traditions

That fact is that in the development of these new cars, Cadillac has expended more than $2,500,000 in jigs, tools and dies alone for the *purpose of producing the finest Cadillac in history.*

All of the resources—engineering, purchasing and manufacturing—of both Cadillac and General Motors have been brought to bear upon this paramount object.

All of Cadillac's 23-year experience in manufacturing fine cars—the last 11 years with eight-cylinder cars exclusively—unites with Cadillac's latest engineering conceptions in producing this new creation.

We are certain that you will share our opinion that the new line of eight-cylinder Cadillac cars not only surpasses all others in every important essential, but goes far beyond Cadillac's previous best.

The new Cadillac cars will be shown beginning July 30 by Cadillac dealers everywhere.

How Well Do Literary Digest Readers Know Automobiles?

You ought to know them intimately—for most of the world's finest motor cars are advertised regularly in these pages.

And yet you must realize that you cannot know and appreciate a motor car by reading about it any more than you can take a vacation by reading travel advertisements.

That's why we urge you *to drive* this Oldsmobile! For an hour or a day behind its wheel will make you more genuinely enthusiastic than anything we could possibly say.

Certainly, until you drive this car, you simply cannot realize how close to perfection Oldsmobile and General Motors have brought this Model 30 during the year and a half it has been out.

Only quite recently a few major and many minor improvements have completely revolutionized the smooth-running performance of its L-Head engine.

A greater length of life, with an added certainty of small maintenance expense, has been built into its chassis.

If you've seen, you have admired the beautiful lines of its Duco-finished body. Now won't you arrange with an Oldsmobile dealer *to drive* one of these cars yourself in actual comparison with any other car?

If you will—your next car will be an Oldsmobile. For *you*—as well as we—will then *know* that this latest Oldsmobile is just about the finest car in its class!

You can buy any Oldsmobile on General Motors' easy-payment plan. All prices f. o. b. Lansing, plus tax.

New Pierce-Arrow Custom-Built coach on series 80 chassis

Coach Body Now Available on Pierce-Arrow 80

A NEW closed body called the Custom-Built coach mounted on the series 80 chassis has been recently announced by the Pierce-Arrow Motor Car Co. The price of the new model is $3,150 or just slightly higher than the open models. The body is built in the Pierce-Arrow shops at Buffalo and is available in six color options. The doors are 36 inches wide and permit entrance and exit without need of folding up the tilting front seat. The rear seat is 56 inches wide with plenty of room for three passengers. Space between seats is 42 inches.

Royersford springs and curled hair are used for the cushions. Tailored across the bottom of each door is a strip of carpet to protect the upholstery from scuffing feet. Silk roller curtains, silk toggle grips, mahogany vanity and smoking cases, and a carpet covered foot rest are provided.

The framework of the custom-built coach is northern white ash. Laminated joints claimed to be 2½ times as strong as ordinary mortise type and tenon joints are used throughout the framework wherever twisting and weaving strains occur. Side plates are of hand-hammered aluminum. Doors are double braced and fitted with weather strips.

Hoo-Dye cushioned springs, four-wheel brakes and balloon tires are regular chassis equipment.

Davis adds new sedan

A sedan, listing at $200 more than the Davis phaeton, built on both the series 90 and Mountaineer series 91 chassis, has been announced by the George W. Davis Motor Car Co. The new sedan has three wide doors, giving easy access to both front and rear seats, and the interior of the car is exceptionally roomy. Characteristic dual-tone finish on Davis cars is optional on the new model in combinations of Algerian and Rolls-Royce blue or Brewster and Topango green without additional cost.

Four-Door Sedan

$820 f.o.b. Lansing Michigan

BODY BY HAYES-HUNT
Finish Dark Blue Lacquer

ANOTHER home on wheels—this is the purpose embodied in the Star Four-Door Sedan. Comfort, protection from the elements, yet with ample facilities for ventilation and broad sweep of refreshing breezes, is combined with year-round reliability, extra power and unusual economy. At its very low price and evident quality it is unsurpassed as a car for the average family.

Low-cost Transportation

Star Cars

Prices f. o. b. Lansing, Mich. *Touring, $540;* *Coupster, $625;* *Coupe, $715;* *2-door Sedan, $750;* *4-door Sedan, $820;* *Commercial Chassis, $445.*

25 Miles to the Gallon

Startling good news to tens of thousands—the first announcements of the new good Maxwell's amazing results. Never since the Chrysler took the country by storm has the automobile industry known such whole-hearted response—such a dramatic and decisive triumph.

58 Miles per Hour

5 to 25 Miles in 8 Seconds

Not content with designing into this car power and pick-up equaled only in the higher priced fields, Chrysler engineering genius and fine manufacturing facilities enable the new good Maxwell owner to enjoy these performance advantages with unparalleled economy.

In almost sensationally low cost of operation and maintenance—as in speed and acceleration—this great car has written a wholly new page in motor car achievement, and in the accomplishment of the great organization which builds the Maxwell.

Balloon tires, natural wood wheels, stop-light, transmission lock, Duco finish *standard* on all Maxwell models. Shrouded visor integral with roof; heater, standard on all closed models

Touring Car	$895	*Standard Four-Door Sedan*	$1095
Club Coupe	995	*Special Four-Door Sedan*	1245

All prices f. o. b. Detroit, tax extra

There are Maxwell dealers and superior Maxwell service everywhere. All dealers are in position to extend the convenience of time-payments. Ask about Maxwell's attractive plan.

The New Good MAXWELL

being 120 feet long, and capable of baking 6,000 loaves of perfect bread an hour," whereas "the ovens used before the war turned out about 200 loaves an hour." And then "changes in methods of selling and distribution have been forced into operation by the large wholesale production." As the editor of *The Bache Review* calls attention to facts gathered by the bank journal:

Large fleets of motor-trucks as auxiliaries to railway service have been brought into use to serve the widely extending sales territories, some of the latter covering a radius of 250 miles. Large capital is required to finance these developments. New machinery is expensive; some of the modern ovens cost $100,000. Capitalization of a wholesale bakery company is not uncommon at $1,000,000

The organ of the Minneapolis bank is then quoted directly as follows:

Within the last five years leading millers who popularize their flour through advertising have switched their appeal to a large extent from the housewife to the baker. The former will always use flour for the making of dishes which will continue to express her individuality and ability as a cook, but the time is rapidly passing when she spends long hours on the uncertain outcome of home bread-making

But, the bank paper says

The retail baker always will flourish, for he is indispensable, due to his output of "sweet goods" which, in any variety, are almost impossible of wholesale production and distribution. But for bread products and a few other articles which can be standardized and easily distributed, at least in districts of concentrated population, the wholesale baker is here to stay and to thrive. He has become a manufacturer. He can not, we believe, monopolize production of bakery goods, for the small baker, with his great variety and individuality of output, and distinctive merchandising methods, will retain his necessary field, and can at any time bake more bread, or less bread, or no bread at all, as he likes

NEW STATUS OF AN ANCIENT BANK

ONE of the oldest banks in Europe is the Banco di Santo Spirito, or Bank of the Holy Ghost in Rome. And, reports Basil Miles in a report from Paris to the International Chamber of Commerce with which he is connected, this very ancient institution, which originally was of a semi-ecclesiastical nature, has recently been transformed into a modern banking establishment. Says Mr. Miles.

Created by Papal Bull in 1606, it has recently been authorized to transact all kinds of banking operations with a capital of fifteen million lire. Originally, this bank made its profits by charging clients a fee for the safe custody of their funds, and the profits were turned over to the Pio Istituto di Santo Spirito, the oldest and most important philanthropical institution in Rome. The antiquated regulations governing the bank made competition with modern institutions impossible, so that about fifty years ago it ceased to do general banking business. Reorganization last year has turned the Bank of the Holy Ghost into a modern institution.

RE-FRESH YOURSELF! FIVE CENTS IS THE PRICE

THE LEXICOGRAPHER'S EASY CHAIR

To decide questions concerning the correct use of words for this column, the Funk & Wagnalls New Standard Dictionary is consulted as arbiter

Readers will please bear in mind that no notice will be taken of anonymous communications

bonify.—"F. C. E.," Beckley, W. Va.—Will you please define the verb *bonify* and state what word in the Spanish language expresses this idea?"

To bonify is "to make excellent or better; to ameliorate." See FUNK & WAGNALLS *New Standard Dictionary*, p. 308, col. 1. In Spanish "to make better" is expressed by the term *mejorar*.

enthused.—"H. J. B.," Los Angeles, Calif.—The word *enthused* is a colloquialism and is not recognized as such by the dictionaries.

everybody, every one.—"V. V. F.," Ironton, Ohio.—There is no difference in the meaning of *everybody* and *every one*. *Everybody*, written as a solid word, means "every person"; *every one*, written as two words, all persons considered distributively. Each of us. In a limited circle; people in general; or collectively. *Every one*, written as two words, means each individual out of the whole number; all persons distributively; everybody.

pantomime.—"A. B.," Hagerstown, Ind.—Has *pantomime* ever been in use, either correct or incorrect?

The correct form of the word cited is *pantomimus*, the word being derived through the French from the Greek *pant*, all, plus *mimos*, imitator. The form mentioned is a common error, especially with children.

post meridiam, post meridiem.—"H. M. C.," Chicago, Ill.—"Please explain the technical difference between *post meridian* and *post meridiem*. Is *P. M.* the correct abbreviation for the former or the latter?"

Compare the terms in any good dictionary. The first word is used as an adjective and as a noun. As a noun it means "the afternoon," but as an adjective it is used principally to distinguish the afternoon hours from the morning. *Post meridiem* is a Latin phrase meaning "after midday." *P. M.* or *p. m.* is the correct abbreviation for *post meridiem*, not for *post meridian*.

recurrence, reoccurrence.—R. S. O.," Chicago, Ill.—"The word *recurrence* means a periodical return," whereas the term *reoccurrence* may be taken as an indication of only one repetition. Both words are in good use and both are to be found in the *New Standard Dictionary*, *recurrence* in its vocabulary place and *reoccurrence* under the prefix *re-*, following a definition which indicates that it means 'occur again.'"

sort of.—"D. J. B.," Washington, D. C.—In the sentence submitted, "What *sort* of method . . . Will [illegible] of a method?" two "W at method" rather than the first or second [illegible] you must use *sort* there omit the a for the [illegible] that the word *sort* suggests a plurality of words, and therefore should not be followed by a singular. "What sort of method?" implies "of all the methods in use, what sort should one use?"

tell it to the marines.—"J. A.," Hillside, N. J.—The term "Tell it to the marines" is used as an expression of disbelief, referring to the supposed ignorance and credulity of marines as landsmen on shipboard. Brewer states that originally the phrase read "Tell that to the horse marines," a decision as there is no such force.

year.—"V. P. K.," Elvins, Mo.—"Please tell me whether the following uses of the word *year* are correct: (1) 'A two year old child. (2) 'Five year ago.' (3) 'A ten year lease.'"

Whenever a sentence violates the canons of accepted usage, it should be recast. (1) "A child two years old" is to be preferred to "a two-year-old child." (2) *Five years ago* is correct, and not "five year ago." (3) In "a ten-year lease" the compound *ten year* assumes the quality of an adjective as *two-year-old* does in the first sentence cited.

"L. K.," Selma, Ala.—"Is the question mark correct at the following sentence?—'If your Association will take care of more than the amount you indicated in your letter, will you kindly do me so that I can pass the word on to Sr. —— and Dr. ——?' for they will want the full sum returns by the close of this campaign period."

No. The interrogation point should be placed at the end of the sentence following the word *period*, instead of where it is, for the entire sentence is of the nature of an inquiry which needs an answer. Under no circumstances should the interrogation point be placed after the Doctor's name—there a comma should be used.

a lot of money to his owner. He died a short time ago. Other animals in the comedy class, and still living, are Charlie, the elephant, Pepper, the cat, and Freddie, the trained seal, who first jumped into prominence in "The Galloping Fish."

In the "Lost World" picture, a python, an alligator, a spider, a ring-tailed monkey and a South American sloth were required for special scenes in the jungle.

Earl Hudson, supervisor of the mammoth production, had to pay the owner of the python at a rate which would have aggregated $36,500 yearly. For the monkeys he had to pay at the annual rate of $14,600; for the alligator, the yearly stipend would have been $300 more than the monkeys' pay, while the sloth's yearly salary would have come to $15,000.

To catch some insects for one of the scenes, a man had to be sent on a journey of several hundred miles to find them, and last, but not least, he had to catch them.

These extras are quite apart from the regular animal colony of Hollywood, who command such big salaries for their owners. If the extras were permitted to work as much as the principal animal actors, their owners would have nothing to do any day in the year but sit back and live on the earnings of their pets, which may be anything from a flea up to an elephant.

HOW SOME INSECTS DIGEST A WOOD DIET

THE termites, or so-called "white ants," once regarded as peculiar to tropical or sub-tropical regions, are moving north, and we hear increasing complaints of their depredations upon furniture and books. In some countries they actually demolish houses, which collapse before their attacks, more slowly, but not less completely than before the fury of the tornado. These creatures, and many others "eat wood," but it has recently been proved that they do not digest it by their unaided efforts. Some wood-eating insects live, not on the wood itself, but on fungi that grow on and in it; others live on it only after it has been changed to glucose by the action of certain parasitic animalcules. Writing in *L'Echo de Paris* a contributor who signs himself "Onyx" gives the following account of the matter, which the work of an American biologist has lately contributed greatly to clearing up. We read

Wood as a food would hardly seem a very substantial diet, and it is a fact that woody fiber does not constitute an aliment, properly speaking. We often take in, notably with fruits, cellulose products chemically similar to wood, but they are rejected without assimilation. How does it happen, then, that so many insects live exclusively on wood?

There exists, to the great injury of our gardens, our furniture and our woodwork, a very large number of "xylophagous," or wood-eating, insects. These are largely coleoptera, but they include caterpillars and termites. Special mention should be made of the *vrillettes*, whose larvæ fill our furniture with the tiny tunnels so greatly

who goes to France with the impression that the tricolor is blue, white and red is due to be disillusioned. It is red, gray, and yellow, or will be by the time he succeeds in obtaining (with a quire of applications) the Red Card, the Gray Card and the Yellow Card, without which no motorist in France may so much as toot his horn.

Not only is it considered the mark of a criminal nature if one does not obtain all these "cartes" before setting the car marching, as they say. It is equally incriminating not to carry them on the person forever after.

"Your papers, please," is the first curt command of the gendarme if you make the mistake of letting a taxi-driver run into you, or if you turn by error into the autobus lane of the Champs Elysées, or if you suddenly catch up with some one in the mad rush of the Avenue de l'Opera. And if you haven't the required bale of licenses, identification cards, registrations, tax receipts, etc., to show him, back you go to the Ile de la Cité to learn something further about the Prefecture.

One way to avoid "this two weeks' course in French bureaucracy" is to hire a lawyer and leave all problems to him, we are told, but—

This is not only lazy, it is obscurantist, and for one particular reason. In no other way, neither in the French divorce mill nor in the peep shows of the Montmartre, is to be ascertained the hold of the *pourboire* on the French mind, soul and system. The best rule for halving the time, for cutting the fortnight to a week, is to double your contributions. Amazingly the wheels speed up all along the line in a way they have always sped. It is not exceptional. It is part of the system.

"Have you twenty francs, Monsieur?" asked my taxi-driver when we were told that M. le Président, himself, could not get signatures faster. That bearded taximan, old and wise in the system of *pourboire*, knew better. He knew that the way to the heart of routine is through the pocketbook.

With regard to the red Permis de Conduire, or driving license, the wheel grease and more official disbursements are well spent. The three—count 'em, THREE!—small photographs demanded are not wasted. For the driver's license, when one gets it, is good for life. The most expeditious way of obtaining it is to take one's American license, for the French permit is issued against the home-town card without test or finger-print. That, all investigators admit, is the only weak spot in a system that asks to know everything about the individual except the amount of his insurance premium and the size of his hat.

In case an international boundary has to be crossed, "this paper business holds further perils," and the writer tells us:

The wise motorist always crosses boundaries before he comes to them. This is done in the rooms of the Touring Club, in the Avenue de la Grande Armée, where duty deposits are made and triptyches issued. In no way can the duty deposit be dodged, but if one waits until reaching the border before unloading it, frontier-crossing becomes the most annoying pastime in Europe. But the triptyque is a motorist's passport, and it has been especially designed to make it difficult for customs inspectors to be as irritating as they would like to be

Comes along the day at last when one

The Raw Material of Power

TWO factories are operated by the manufacturer who supplies his own power. In one he makes the goods he sells. In the other—his boiler house—he manufactures *power* for his machines.

Hence coal is as much a raw material of the manufacturer as steel, sugar, silk, wood or rubber. It should measure up to definite standards.

So considered, Consolidation Clean Coal is the economical raw material of factory power.

For Consolidation Coal is free from visible impurities which will not burn. It delivers a full measure of power because it is clean and because of its high-heat value and low ash and sulphur content.

Consolidation Coal is Clean Coal

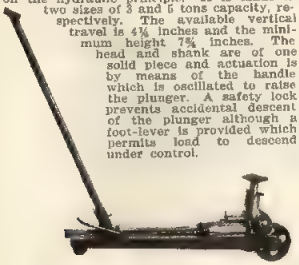
Hird Hydraulic Auto Jack

Ideal Machinery Co., Seattle, Wash.

A HEAVY-DUTY type of garage jack operating on the hydraulic principle. It is made in two sizes of 3 and 5 tons capacity, respectively. The available vertical travel is 4¼ inches and the minimum height 7¾ inches. The head and shank are of one solid piece and actuation is by means of the handle which is oscillated to raise the plunger. A safety lock prevents accidental descent of the plunger although a foot-lever is provided which permits load to descend under control.



HSP Counter Boring Tool

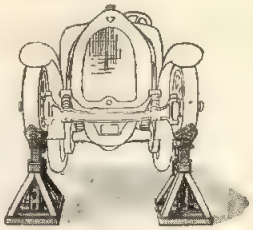
The Hellyer Steel Parts Co.
1511 West Pico St.
Los Angeles, Cal.

THIS tool enables the user to narrow down the valve seats in the engine by taking off a small cut of metal adjacent to the seat. It may also be used for enlarging the inlet or outlet ports and is equipped with adjustable cutting blades. It is manually operated and will handle a seat from 1¼ in. to about 2½ in. in diameter, a few turns of the tool being required to secure any desirable width reduction. Cutting edges are of high speed tool steel and are easily sharpened. Pilots to fit any valve guide are obtainable as are extra blades of various lengths.

Handelite

Mitchell Specialty Co.
3560 Coral St., Philadelphia, Pa.

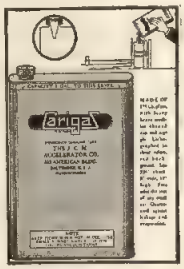
A PARKING light embodied in a door handle. As a door handle it has a smooth, comfortable grip and opens the door easily. As a parking light it throws a white light forward and a red light to the rear. The light is controlled by a dash, push-button switch. It is also made with a white light front and a greeen light to the rear, so that the green can be put on the right side of the car and the red on the left side. The price complete, including wiring switch and two candle power bulb, is $4.



S. O. S. Steel Stands

Goldwyn Mfg Co., Chicago, Ill.

ONE article of a line of car blocking devices which is adjustable vertically. The upright and center support are of malleable castings and the construction is such that the weight is carried on the center post, the base piece of which rests on the floor regardless of the height to which vertical is adjusted. Made in two sizes, one adjustable from 11 inches to 18 inches and the other from 18 to 32 inches. The smaller size lists at $2.50 and the larger, No. 18, at $3.50. Attachable metal shoes for installation on these stands are offered at $1.50 each.



Carigas Emergency Gasoline Tank

J. C. M. Accelerator Co.
813 American Building, Baltimore, Md.

THIS is an emergency under seat type of gasoline tank which has a capacity of one gallon. The tank is of 175 lb. plate, is 2½ in. thick, 8 in. wide and 12 in. high. It is featured by the brass machined filler cap and combination funnel for filling empty vacuum tank. Price, $1.25.

Starrett Special Hacksaw Frame

L. S. Starrett Co., Athol, Mass.

ANOTHER new Starrett tool designed to fill the requirements of a hand hacksaw in cramped quarters is the new frame illustrated herewith. The new frame will take any length blade from 8 to 12 inches and has a handle which may be adjusted to no less than thirteen positive locking positions, to suit particular working conditions. In addition, the saw may be set to cut in any one of four directions.

separate body processes: (1) Thorough mastication and mixing of saliva with both solids and liquids; (2) good digestion; (3) thorough assimilation, and (4) complete elimination of wastes and poisons. He proceeds:

When food, including liquids, is bolted and is shoved into the stomach with little or no saliva, the stomach makes a poor job of it, for it can not do its own work and that required of the teeth and mouth. After feeble efforts the stomach passes the buck, along with undigested foods, on to the small intestines. The latter fails in its attempt to handle its own job as well as that of both stomach and mouth. Instead of extracting nourishment from this food and passing on and out the wastes and poisons, these, in large measure, clog the intestines in ever-increasing volume and are later absorbed into the blood-stream and passed to every cell of the body.

These wastes and poisons form the real cause of nearly all disease. Like the anarchists, or "Reds," they bore from within. The blood-stream, instead of carrying to the teeth large volumes of calcium, saturates teeth and gums with these deadly enemies to health and life and actually leaches from the teeth the lime or calcium needed elsewhere in the body. Robbed of their substance and denied further building material, the teeth soon decay, gums become diseased, abscesses form, and there follow any and all combinations of diseases of teeth and mouth.

Dentists, tooth-brushes, dental creams, mouth washes were unknown to Eskimo, Indian and other peoples not burdened with our civilized habits, because they had perfect teeth. Yet we scrub and wash with brush and paste and continually pester the dentist in our blind efforts to save our fast-rotting teeth, while blandly ignoring the alarming and ever-increasing cause. "Crusty whole-wheat bread alone would wipe out half of our dental diseases," declares Dr. Friend, eminent London physician, after extensive experiments.

Teeth are built of calcium, or lime. This is found in milk, preferably unpasteurized fruits, raw vegetables, cooked vegetables with the essence, cottage cheese, nuts, whole-grain breads and cereals. Let these foods form the great bulk of your feeding, reducing to a minimum meats, starches and sweets while eliminating coffee and tea. I have known of many cases where all teeth have been lost between the ages of 15 and 20 because the foods named in the first group above had been avoided or little used from childhood.

The plans and specifications for modern buildings require exact amounts of concrete, steel, etc. Reduce the proportions of concrete or steel and the building soon collapses. Nature's plans and specifications for building and maintaining the teeth demand just so much lime. To the extent that the required amount is short, just to that extent will the teeth decay and collapse.

Many a business deal is lost because of indigestion disorganizing the physical and mental works, many a social occasion marred by stomach pains and gases and other body ills; many a family and friendship wrecked—all because of that common and vulgar habit of fast eating and no chewing, together with our utter lack of interest and intelligence in the selection and preparation of the foods necessary to insure physical health, mental balance and a genial personality.

"See America First"

Strange things can happen when one hundred and twenty pounds of girl meet thirty hungry compact pounds of trout. Though you never have fished in your life before, luck (but the most expert angler would envy), will reward you here.

Fishing to talk about for a lifetime—

Glacier
NATIONAL PARK

Open June 15 to September 15

Fishing is only part of the fun at Glacier National Park. Climb up to mile high cliffs. Ride horseback over miles of mountain trails. Explore glaciers. Motor over scenic highways. Glide in launches on the lakes. Or just loaf and rest at fine hotels or rustic chalets.

The Northwest
Via the New Oriental Limited

Eastbound from the Pacific Northwest, or westbound from Chicago, you can travel direct to Glacier National Park without change and without extra fare on the de luxe New Oriental Limited, finest train to Pacific Northwest or other fine Great Northern trains.

Arrange for Glacier Park stop off—an all-expense-paid tour of 1 to 7 days or longer—or a Glacier-Yellowstone circuit tour, on your way to or from Chicago, Spokane, Seattle, Tacoma or Portland.

Before or after visiting Glacier Park, take the free side trip to Vancouver. See Victoria, Lake Chelan, Rainier and Crater Lake National Parks. Great Northern schedules facilitate steamer connections for Alaska and The Orient. Your choice of steamer or rail to or from California. You see high peaks from low passes on the Great Northern—only 60 miles of the entire main line are above 4,000 feet. Longest cinderless mileage of any railroad in the Northwest—1,100 miles behind giant oil-burning locomotives.

Every piano should be tuned at least twice a year. Is yours?

Without entering into the simple, yet slightly complicated, calculation necessary to give the comparative energy of the water-motion in causing rotation, it is evident from the above quotation that this energy is very small in the slow-moving water in an ordinary wash-basin, which contains about two quarts (four pounds) of water. The slightest inequality in the shape of the basin, or of the movement of the hand in withdrawing the stopper, or of the construction of the cross-pieces or of the centering of the drainpipe will almost certainly introduce effective factors.

Whether trees in actual fact do always and with no exceptions whatever twist in a counter-clockwise direction in the Northern Hemisphere is a point of a good deal of interest, and on which those who live in forested districts should be able to give exact information.

"Those who live in forested districts" will doubtless be able to assure Mr. Bond that "twisted trees" of both kinds often occur impartially a few feet apart in the same "neck of the woods."

ELECTRICITY AS A LIFE-SAVER

TWENTY years ago few suspected that electricity would some day be a great direct factor in conserving life and health. However, thinks an editorial writer in *The Electrical World* (New York), that day has dawned with rosy promise. Civilization, he says, has ever been a process of replacing a natural environment by an artificial one, and it may be measured by the degree of this replacement as well as in any other way. We read further.

Man is biologically a creature of sunlight, and it begins to appear as if his indoor life has robbed him of some of the vitalizing action of solar radiation. If this be true, civilized human beings are bound to pay the penalty of lowered vitality, poorer health and shorter life. Much research is still necessary before the complete relation of the many cells and processes in the human body to various radiations can be laid bare. Many interesting facts, however, are already available. For example, rickets is proved to be due, in part at least, to lack of sunlight. Electric sources of ultra-violet radiation, such as the quartz mercury arc, are already doing much as a substitute for sunlight in the prevention and cure of rickety bones. Ultra-violet and other radiation also favorably influence many reactions in the body processes upon which life depends. X-rays are used to-day as much for treating disease as they are in their earlier applications of photography and fluoroscopy. The germicidal action of certain ultra-violet radiations is now well known and utilized. Many other applications of radiation are being studied or anticipated by research.

All these sources of radiation which are already being used for preserving and restoring health and thereby conserving human life are electrical and man-made ones with the exception of radium. Even to those who think in terms of kilowatt-hours the total present consumption of electrical energy by incandescent filament lamps, X-ray tubes, quartz mercury arcs and other arcs, in sterilization and in the many phases of radiation-therapy, would doubtless be surprisingly large. It is still more fascinating to note the promise of the future.

Why the KIMBALL *has won Fame*

THE approval of the Kimball has not been confined to a single group, nor to a limited area, nor to a short span of years. Artists of voice, of violin, of piano, have bestowed their highest praise; and teachers, students, schools, are among its devoted admirers. In homes from far north Alaska to tropical climes the Kimball is a cherished possession.

George Liebling, internationally famous pianist and composer, has recently added his name to the list of celebrated artists who enthusiastically praise the Kimball. For his tour of 1925-26 Mr. Liebling will use Kimball Pianos exclusively.

There is a Kimball of unquestioned excellence suited to your home

The Cheapest Fuel Known

Cut down your cost of cooking by using ordinary kerosene. With an oil stove equipped with the patented Kerogas Burner, you get the same advantages you have in a gas range—but you spend less for fuel.

The Kerogas Burner uses only one part kerosene to 400 parts air—so you see how little it costs; and the steady Kerogas flame is always under perfect control. None wasted.

Don't buy an oil stove until you see the Kerogas *Genuine One-Piece Brass* Burner. Many of the best makes of stoves are equipped with it, and leading dealers carry them. Insist on a demonstration.

The KEROGAS Oven for Baking and Roasting
is a fitting companion for the Kerogas Burner. As reliable as any range oven, ever made, and as durable. Gives sure uniform results because its temperature can be regulated perfectly by burner or beneath.

The Giant Kerogas Burner

Every "Giant Kerogas Oil Stove" equipped with "regular" Kerogas Burners also has one of the new Patented Giant Kerogas Burners. This "Giant" is capable of the most intense heat—when you need it quickly—but is easily regulated for ordinary use. You can get the new Heavy Duty Giant Kerogas Oil Cook Stoves equipped entirely with Giant Burners. Models equipped only with "regular" Kerogas Burners are also available.

PATENTED

DEALER'S NOTE: The best jobbers are prepared to supply oil stoves equipped with Kerogas Burners.

It Protects

To prevent cracking in alternate extremes of heat and cold, PAINT as well as gloss must allow for ample expansion and contraction.

It is unnecessary to further delay that much needed painting job—get in touch with the *Lucas* dealer and arrange through dealer and the painter for protection against further property loss, on convenient time payments. To provide a dependable and economical protection against weather, select *LUCAS* TINTED GLOSS PAINT, because:

IT COVERS
more square feet per gallon and more thoroughly hides the surface, due to finer grinding of materials, a higher percentage of pure linseed oil, and *LUCAS* superior methods of combining all ingredients into one perfectly finished product.

IT BEAUTIFIES
and its beauty lasts because of its high gloss and clear, perfect shades, made with pure tinting colors of *Lucas'* own manufacture, possessing maximum permanency.

IT LASTS
longer because it is made of highest grade materials, carefully selected, scientifically combined by skilled workers of long experience.

IT PROTECTS
positively because its smooth, glossy surface is resistant to weather. Its elasticity prevents checking or cracking during temperature changes, consequently preventing moisture, the cause of decay, from getting to the underlying surface.

IT IS ECONOMICAL
Its GREATER COVERING CAPACITY reduces the cost of application.
Its GREATER LASTING QUALITY decreases the cost per year of protection.
Its GREATER PROTECTION saves costly repairs.
Its GREATER BEAUTY increases the value of your property, reflects prosperity and radiates happiness.

Ask the nearest Lucas dealer—or write us—regarding the Easy Payment Plan for preserving your property.

BOOK ON HOME DECORATION—*FREE*

Send to us for "The Book of Happiness" which gives artistic and scientific color combinations—interior and exterior. Written by a noted psychologist. Explains color reactions on human happiness. Very interesting. Get your copy now.

THE SPICE OF LIFE

Fearfully and Wonderfully Made. He has a curiously quadrilateral head, seemingly too large for his body, which is based solidly on a mighty jaw.—*From an article on Senator Borah in the Boston Herald.*

And So On Indefinitely.—"What is the modern girl coming to?" commented Mrs. Oldwed.

"Slowly, but surely," replied Mr. Oldwed, "to that period of life when she will ask that very same question."—*Judge.*

His Great Misfortune.—"Poor ole Bill! 'E's so short-sighted 'e's working 'imself to death."

"Wot's 'is short sight got to do with it?"

"Well, 'e can't see when the boss ain't looking, so 'e 'as to keep on shoveling all the time."—*Humorist (London).*

Caustic, Very. She insisted hotly that, as plenty of room was left, a new frock she must have. And he, with equal warmth declined to produce the cash.

"I never speak to you again!" she snorted angrily.

"How like a woman!" he sighed. "When everything else fails, you try bribery."—*World's Pictorial News.*

Dogless.—"Mose, can you explain wireless telegraphy to me?"

"Yessuh, it's like dis. Ef you-all had a long, long hound dawg, an' he stretched from Cincinnaty to Cleveland, and you stept on his tail in Cincinnaty, he would howl in Cleveland. Dat am telegraphy. Only in wishless you does de same thing without de dawg."—*Columbus Dispatch.*

Doing His Bit.—During the recent Prohibition plebiscite in Ontario, a prominent Ottawa man, who is an ardent prohibitionist, was surprized by a visit at his office of his small bare-legged son.

"Hullo, young man," the father said. "What brought you to town?"

"I was in a parade," the little boy said proudly.

"What parade?" asked the father.

"I don't know," he answered, "but I carried a big sign."

"What was on the sign?" asked the man curiously, and almost collapsed as his son replied:

"MY FATHER'S A DRUNKARD! I've got no shoes!"—*Everybody's.*

True Sensibility

("A Russian woman would be quite offended if a man opened a door for her.")

The Bolshevist lady is not less refined
Than Victorian misses, but more.
They shrank if a man might be under the bed,
She shrieks if he opens the door.

Though shirt-sleeves might shock them, the Bolshevist maid
Is far more fastidious than that.
They frowned at a man if he took off his coat,
She faints when he takes off his hat.

She blushes at anything all the day long,
Which is why it is commonly said
That while other young ladies are normally pink,
She is now irretrievably Red.

—*G. K.'s Weekly (London).*

remain indefinitely in their present niches in the automotive Hall of Fame.

It is certain, however, that there has been considerable shifting about in the relative standings, with some companies near the top last year, dropping down a few pegs and being replaced by others which were further down.

Analyzing the list of companies in production to-day we find 24 lines made by 16 companies which give every indication of being able to remain in the field permanently, unless they are voluntarily discontinued by their makers. This includes four small concerns which have been in business many years, but whose combined output is insignificant.

There are 22 others which almost certainly will be in the market for two or three years yet, and probably longer.

There remain only eleven others which really are in production at this time. Five of these, all in good financial condition, may be continued indefinitely, but it is more probable their makers will discontinue them voluntarily in the relatively near future for one reason or another. The remaining six are not strong financially and, altho they may be continued for some time, their ultimate demise will be involuntary.

Vain Self-Denial.—A bishop was eating dinner with his host before the afternoon service at which he was to speak. He ate little or nothing, explaining that it was not good for a preacher to eat heavily before a sermon. The housewife could not attend the service, as she had to stay at home and prepare supper. When her husband came home, she said, "Well, how was he?" The husband, drawing a sigh, replied, "He might just as well of 'et."—*Christian-Evangelist.*

Pity the Blind! The benevolent old lady was about to drop her usual coin in the hat of the blind beggar at the corner. "You don't seem to be the same man who sits here always," she remarked. "No, lady, he's my brother." "I hope your brother is not ill," she went on.

"Oh, no, mum," was the unexpected answer. "He's taken an afternoon off an' gone to the movies." *Boston Transcript.*

Awaiting Orders.—The station master on the East Indian Railway had been given strict orders not to do anything out of the ordinary without authority from the superintendent. This accounts for him sending the following telegram:

"Superintendent's Office, Calcutta. Tiger on platform eating conductor. Please wire instructions."—*Jewelers' Circular.*

Sticking to His Story.—"Where have you been until this hour"

"To the lecture, dear."

"But people don't lecture until two o'clock in the morning!"

"This one did, dear—he stuttered very badly." *London Mail.*

Here It Is Again!—"Reginald," said the Sunday-school teacher, during a lesson on the baptismal covenant, "can you tell me the two things necessary to baptism?"

"Yes, ma'am," said Reginald. "Water and a baby."—*Everybody's Magazine.*

Largest and Fastest Ships to California

HAVANA-PANAMA CANAL

A 15-day cruise through two oceans on a magnificent liner.

Your choice of rail routes across the Continent.

ONE WAY WATER - ONE WAY RAIL

No monotony in this remarkable vacation opportunity. Happy, refreshing days on a great ship, sightseeing in Havana, by daylight through the Panama Canal, up the West Coast stopping at San Diego, Los Angeles and San Francisco. Across the Continent with authorized stop-overs at points of interest.

Round Trip $335 from your home town [on main line points] and back, in either direction.

Rate includes First Cabin passage, meals and berth on steamer, either Eastbound or Westbound, and ticket across Continent in either direction over choice of routes.

2nd Cabin **$245** Intermediate **$320** 3rd Cabin **$190**

This New Ideal Mower Sets New Economy Records

NEW mechanical features that make operation still easier, mowing still faster and durability even greater are found in this *new* model Ideal. It is the old, reliable Ideal that has been the leader for ten years, but with new features that make it still better.

It does the work of five men with hand mowers, rolls the sod evenly as it mows, and reduces mowing costs to a mere fraction of the cost with hand mowers. It is a labor saver and a lawn builder, but more important than ever it is a mower that will last for many years and one that anybody can operate.

Ask our nearest dealer, or write for interesting literature

gone out fishing, a woman of a party camped near us came over to visit with me. Immediately she mentioned our breakfast. She said it had made her mouth water, that her husband had planned their trip and bought the supplies to be brought along. He had got plenty of ham and bacon and eggs, and caught quite a few trout. The result was they had bacon and eggs and ham and ham and eggs and bacon. The food was always heavy and greasy, and her stomach was on the verge of revolt. That apple-sauce of mine—

I gave her some, and she went away grateful.

Another instance. A few summers ago we took the wonderful trip down the Pacific coast to Mexico. We were on a ferry that was in operation across a lake while the road around was being repaired. A woman came over to me, and she looked like a last year's bird's nest. I didn't know whether she was the right kind to visit with or not. She saw my hesitancy, and smiled without mirth.

She said: "You look spick and span now, but wait till you've been on the road as long as I have, and then you'll know why I look this way."

That was our fifth week out, so I asked her how long she had been on the road.

"Six days to-day!" she answered triumphantly, as if asking me whether that didn't explain everything.

Poor soul, she simply didn't know how a woman ought to dress for a long trip on the road. So I am writing this article that women may get some information from one who has been there.

First, I want to tell you the most comfortable way to dress. I have tried the heavy khaki skirt, but save that it stands much wear and doesn't show the dirt, it is open to the usual objections to skirts. It binds when you are jumping a stream or from rock to rock; it catches on fences or twigs, and is inevitably mussy.

I have tried the regular breeches. In some ways I think they look prettier than anything else. But they have one drawback that, for me, was too much: they bind your knees. When you are stooping over at the fire, or even seated in the car, this binding and pinching is likely to go on; and in the course of weeks it rubs and irritates too much.

The ideal outfit is as follows: A pair of tweed or wool khaki knickers, a wool khaki middy, tweed hat, sweater (a jacket or coat gets wrinkled or mussed when you do not have it on), wool stockings and high, heavy oiled shoes. Fourteen inches is high enough for the shoes, and there is not so much to lace as in the sixteen-inch kind. Twelve will do. But these high, heavy oiled shoes are great; when it rains your feet won't get wet, the dust doesn't get to your feet, because of the high bellows tongue, you are not afraid of mud or snakes, and you have an ideal shoe for hiking.

I take in addition to the above two pongee blouses for hot weather, a change of underwear and stockings, and if we are going to spend much time in cities, one black silk dress, pumps and hose to match. All of which take up very little space.

I wouldn't go touring at all if I could not have a good, clean bed at night. The majority of the camp grounds (as I know them in the Far West are a sea of dust, and getting down in it to sleep has never appealed to me.

I have slept (or tried to) on the ground, and every time a leaf moved my flesh crawled. I thought surely a snake was coming in for a nice cold visit. The first four years of our camping we had a steel

A Mower That Does Three Things at One Time

HERE is what an Ideal Power Lawn Mower will do for you. First, it will mow your lawn at a small fraction of the usual cost, for it enables one man to do the work of five with hand mowers. Second, it rolls as it cuts, leveling the sod to velvety smoothness and saving the cost of separate rolling. Third, it does much to halt the activity of worms, insects and other pests. Ideal mowers are simple, sturdy and last for years. More are in use today than all other makes combined. Any unskilled man can operate them. Write for literature telling how you can save from two-thirds to four-fifths of the money you spend on your lawn.

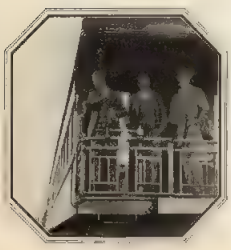
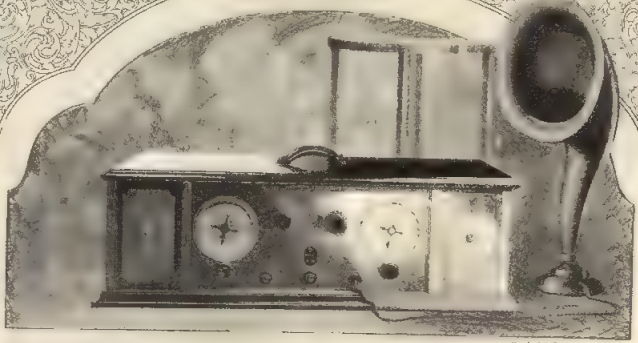
The Prince of Wales Special on the Canadian National Railway

It is interesting to know that the famous special train prepared for the Prince of Wales' trip across Canada's Wonder-land was finished throughout with Sherwin-Williams paints, varnishes and enamels.

Great interest attaches to the Prince of Wales' trip, not alone because of himself, but because of that army of travelers who enjoy, no less than he, the beautifully finished traveling equipment which carries them through a notable section of the American continent.



For who does not look forward to the famous wonders of the Triangle Tour—to its snow capped peaks and mighty rivers—its mystic Skeena—its 600 miles through sheltered seas of the "Inside Passage"—its stupendous canyons and towering Mt. Robson—its Jasper National Park in Alpine Canada!



Radiola Super-Heterodyne

Leadership in Radio

Radiola Super VIII—
the famous Super Heterodyne in a stately cabinet with a fine loudspeaker built in. It is complete as it stands—needs no connections to anything. Brings in distance at the turn of the knob. Its fame is not only for its big performance but for its simplicity and its *tone quality*

The nation looks to the Radio Corporation of America not only for the production of ever better Radiolas and the development of Radiotrons; not only for advances in international radio telegraphy and country-wide radio broadcasting; but for an honesty of statement that shall pierce the fog of radio claims and counter-claims with conservative promise and confidence-building performance.

Radio Corporation of America

PERSONAL GLIMPSES
Continued

extensively and lived for some period in the south of Spain. The monuments and symbols of their lost glory, which are evident everywhere, especially in Granada, have stirred up in these men a nostalgia at once noble and dangerous. And Abd-el-Krim makes the most of this feeling, communicating it to all that can be reached through the agency of the "sentones"—the so-called high priests, who exercise a powerful hold on the ordinary Arab.

Abd-el-Krim, for some time past, has styled himself president of the Riff Republic. He even has a cabinet. His ambition is to unite, under a species of sovereignty, all the tribes and peoples of his own race.

The present situation in Morocco is of extreme importance, thinks Mr. de Meneses who assumes that France—

Is waiting for all the inhabitants in Morocco to turn against it, before admitting that the situation is really alarming. And such an uprising is not at all unlikely in the near future. History is full of examples. It will be remembered that Napoleon, with a formidable army, was routed in Spain by a handful of men (1808), who fought much in the same manner that the Riffians are now contending with the French.

The insurrection of the Boers against the British is another instance that may be cited, as also the uprising in India (Punjab) etc. Nowadays the possession of distant colonies is a very expensive luxury, even for rich and powerful nations. The level of culture in these colonies is at a point where the man-in-the-street is a politically-conscious creature and not at all ignorant of the history of his own country as well as of those that are fighting to dominate it. From these colonies come men like Abd-el-Krim, who resorts and study in the country of their masters and return to impart among their compatriots the knowledge they acquired. And this knowledge, derived from their rulers, becomes a weapon in the hands of the "scholars" turned against the masters. It will avail France little, therefore, simply to put down the uprising (even if it can do so) unless the propaganda spread by Abd-el-Krim and his followers is somehow counteracted. A defeat at arms means nothing to the Arabs. In a month they will be back, fighting with greater spirit than ever.

Meanwhile,

It must not be forgotten that if the Moors do not fight in larger numbers, it is not because of a lack of men but rather because of a lack of arms. Fighting in small numbers overcomes, in a measure, this deficiency. When a Moor fights, he is brave; or rather, he forgets fear. The Moor that sees his companion fall does not run away; he takes his place. Abd-el-Krim's characteristic fighting tactics is to withdraw or retreat while the enemy advances; but at the first halt of the latter to start sniping, at which the Arabs are expert. And it is very difficult to shoot them down, as they never fight in large groups, but in isolated bevies, which are continually on the move; whereas, the French and Spanish troops, moving in concentrated masses, form an easy target.

The Arab warrior on horse is extraordinary. The agile mounts ride full tilt

PERSONAL GLIMPSES
Continued

conclusions." When they did so, they were generally impressed.

When he had a spectacular bit of evidence he did not conceal it behind some incognito, but brought the person who had imparted it to the witness chair and had the story told all over again. Whenever public interest appeared to be waning, other startling figures were brought to the witness chair, sometimes without a word in advance to let the public know what was in store for its entertainment.

When Mr. Buckner announced his intention of proceeding against liquor-law violators by the injunction and padlock method, and named fourteen well-known places where lawyer friends had obtained evidence, all sorts and conditions of men and women, connected with all sorts of publications, descended upon him. The propositions made to him ranged all the way from writing a few columns for publication, under or over his signature, to submitting to an interview and a cartoonist at the same time.

As an instance of Mr Buckner's publicity methods, the *Times* reporter presents this "sample" of the daily interviews which the new District Attorney gives to the reporters.

Seven reporters enter the outer office. Word comes instantly to admit them. They file into the big room, where Mr. Buckner is found sitting at a big square desk littered with papers. Opposite him sits Robert E. Manley, his confidential assistant. About the desk are a number of easy chairs. Mr. Buckner smilingly indicates them and says, "Be seated, gentlemen." Then he asks, "What is on your minds to-day?" "What is on yours?" he is asked. He grins. "Looks like it's going to be pretty dull to-day."

Then it develops that the Collector of the Port has called to learn what is to be done with all the rum-running vessels which have been libeled and what would happen to the large quantities of seized liquor in storage. Mr. Buckner explains that all such cases will be transferred from the Admiralty Court to the padlock court and that it is as simple a matter to padlock a ship as to padlock a saloon. The reporters all ask questions and Mr. Buckner listens, and replies with information on every conceivable detail of the question.

A feature of these talks is that there are no criticisms of any man's work, no odious comparisons.

At one conference a reporter, who had been worrying his brain over what Mr. Buckner was trying to achieve by all his activity against rum violators, came to the conclusion that what he was after was a nomination for Governor or Mayor. So he began to question Mr. Buckner about his political connection, starting with the fact that Elihu Root is his friend, and as the questions ran along Mr. Buckner's face wore a more and more puzzled expression. Finally another reporter elucidated:

"What the gentleman desires to know is whether the things you are doing now in Prohibition matters are being done for the sole purpose of procuring future political preferment."

Mr. Buckner leaned back in his chair and laughed heartily.

"Why, no," he replied. "I expect to serve out my term of office and then go back to private law practise. That is my program now and I am not likely to change it."

Mr Buckner is an easy man to get along with because the way he is heading is plain. Asked what his opinion was about the manner the Prohibition law had been enforced, he replied.

"It has been a farce and full of bunk I intend to de-bunk it."

When the Prohibition phase of Mr Buckner's work has become too much of a commonplace to figure prominently in the day's news, interesting stories will arise, stories about mail-fraud cases, counterfeiting, with attacks here and there on spectacular offenders, and Mr. Buckner's skilful hand will cast these forth with such frills as they never had before. Take the case of Jacob Busch, which appeared on the surface as only an ordinary attempt to defraud the Government out of income taxes. A reporter smelled this out, but when he searched for details he had to go to Mr. Buckner for them. When the story appeared it owed to Mr Buckner's nose for news the interesting detail of a secret bank account accidentally discovered by a revenue agent, with all of the attendant details that marked the story as one altogether out of the ordinary. One reporter remarked:

"If Buckner wasn't earning $10,000 a year in the government service he would be earning more with some good newspaper. What a cracker-jack reporter he would make."

But Mr Buckner has earned more than he could have hoped to gain in any other profession. He is soon to leave the Bronx, where he is living now, and move to the Park Avenue district, where his rent will be nearly as much as his present salary. This indicates that during his career as a lawyer he has acquired enough to enable him to pay as much for rent as he is earning. To put it more brutally, he has reached the point where he can emerge from obscurity and enter the limelight of publicity without

SIMONDS
HOME AND FARM SAW

Repairs to be made—odd jobs to be done—that is the call of Spring. So Spring calls for Simonds Home and Farm Saw with teeth that bite their way smoothly and easily through the toughest board. In the Home and Farm Saw, Simonds has produced a cutting tool worthy of the name. Confining manufacture to one size—24 inches long—Simonds is able to offer the Home and Farm Saw at $2.00—a price that is actually less than you *thought* you would have to pay for an *ordinary* saw. Ask your hardware dealer about this saw today

mother and cub loping along a ridge of rock.

"A little later on in the afternoon I ran across a flock of willow grouse, and, altho I tried several shots, I was unable to bring one down. I thought this peculiar and examined my revolver to see if it had been damaged before being put in the pack-sack. It appeared to be all right and then I discovered that my hand was so shaky that I could not keep it still."

TRYING TO HUMANIZE AN APE

THE scale of culture is like Virgil's path to the lower regions; it is easy to go down but quite another matter to climb up. Man may, and does, learn to behave like a beast; but there are limitations that interfere with the opposite transformation. This fact has again been demonstrated by a four-years' experiment recently concluded in Germany and described by Marcel Thiébault in a contribution to the *Journal des Débats* (Paris). Writes Mr. Thiébault:

If a monkey were not brought up by monkeys, would he be as much of a monkey as other monkeys? This problem has been attacked by Professor Pfungst, well known in Germany for his studies in animal psychology.

Speculations on this matter are worthless. We must have recourse to scientific observation. So the professor has not hesitated to tear a young ape from its parents to place it in a children's clinic at Frankfort. A clean room, furniture and a special nurse; the young baboon, two days old, lives provided with all these things, while at the same time deprived of the hope of learning directly from its parents the good traditions and customs of the apes of the island of Celebes. Brought up by men, will not Rasiko reveal the indefinite possibilities of the simian brain." Almost anything may be expected of him—even that he may become a veritable man, capable not only of taking drinks and riding a bicycle, as do many of his relatives in music halls, but also of reasoning, of working, and possibly, in case of necessity, of performing useful labor.

Since his earliest days, Rasiko has overturned all the theories of heredity; he has taken to sucking his thumb. Nothing like this has ever been observed; monkeys do not suck their thumbs. Together with laughing, this is a peculiarity of man. Nevertheless, Rasiko has not seen any of the babies in the neighboring rooms. It would seem that the idea occurred to him quite personally, since the nurse had never acquired this bad habit. Here, however, the peculiarities of Rasiko ceased. In other respects he showed himself more than ordinarily like a monkey. When angry he opened his mouth furiously, like all other monkeys, not to mention cats and the wild men of Borneo. When any object excited his curiosity, he at once tried to break it open, desirous of penetrating its mysteries. This is an instinct common to apes and men—see all the eviscerated dolls of the nurseries and the questions that Elsa thought she ought to ask Lohengrin. As for pleasure, Rasiko showed it by confused gestures and an increase of activity. Here also, the baboon of Frankfort did nothing new, neither to monkey nor to man; he modestly contented himself with the invention of dancing, on his own

(Remember, these are merely printed reproductions of the real photographs.)

Ansco Speedex Film gets pictures you'll be proud of

Ansco Speedex Film fits all cameras; it is foil wrapped and comes in the red box with the yellow band.

Have you got discouraged because *something* you couldn't feel just was wrong with your pictures? Perhaps the shadows are too black. Or the high lights too flat and glaring.

Try Ansco Speedex Film and you'll get better pictures, and so, you'll have more fun.

Why does Ansco Film give better pictures? Because it has a wider range of light exposure. This means two things: first, you get good pictures even if the sun is not at its brightest; and second, when the sun is really *too* bright, you'll still get flattering pictures because there is a special "compensation" in the film to even up the effect of the stronger light. Send a dollar for some rolls of film to fit your camera, if your photographic dealer cannot supply you.

A *Ready-Set* means more fun

Of course, picture-taking is fun—*if you get good pictures!* To get more fun than you've ever had before, buy one of the Ready-Set cameras. The Ready-Set Juniorette costs only $10.50, the No. 1A is $13.50 and the Vest Pocket Ready-Set is $8.50.

A Ready-Set reduces picture-taking to its simplest terms. No focusing, no shutter complications. Just set for snapshots and shoot. Time exposure simplified as well. The name describes it—it's ready and set for pictures. Taking them right is easy—you simply can't go wrong.

Buy a Ready-Set now for good pictures. If your dealer cannot supply you, use the coupon below and we'll send you one immediately.

The Ready-Set Juniorette costs only $10.50. It takes pictures 2¼ x 3¼.

Illustrated catalog sent free on request.

The "Standard" Original Bosch Horn (formerly $25). The horn that sounded a new note in warning signals.

Three models—one quality.

"Junior" - now $16.00
"Standard" - now $21.00
"Master" - now $25.00

The horn that sounded a new note

Its instant success and volume sales make possible a new and lower price

The ready acceptance and popularity of the Original Bosch Horn now make it possible to reduce the price so as to place it within the reach of every discriminating car owner.

The Original Bosch Horn is of the high frequency type, and operates with a minimum of current consumption. It has a distinctive, musical tone which, though far-reaching and penetrating, is most pleasant to hear.

Built into the Original Bosch Horn are the same careful workmanship, accurate detail of design, engineering skill and sturdiness that, since 1887, have characterized *Original* Bosch Magnetos and other *Original* Bosch automotive equipment. The full name, Robert Bosch, and the trade mark shown below, are stamped on every *Original* Bosch product. Be sure to specify "Robert Bosch" in order to get the *original* and genuine.

This trade mark and the name "Robert Bosch" are your guarantee of original Bosch quality as known the world over since 1887. Always specify "Robert Bosch" to get the original.

AUTOMOTIVE DEALERS

There are quick turnover and good profits for you in selling the Original Bosch Horn. Write for schedule of prices and discounts on Original Bosch Automotive equipment.

The Grebe Dealer Franchise Offers Unusual Profits

The Synchrophase will satisfy your customers, enhance your prestige, eliminate worry and increase your earnings

GREBE is out to make this the banner year in its long history. Retailers who hold the Grebe franchise will find it exceptionally profitable. Grebe policy protects them absolutely: viz,

1. Prices will be rigidly maintained. We never have "unloaded" and never will.
2. Price-cutting will not be tolerated.
3. Dealer discount is raised to 40%.
4. The number of retailers will be restricted; jobbers will have exclusive territories.
5. With our new factory we can keep pace with demands. There will be no shortage of sets.
6. Dealers will be backed up with local and national advertising more extensive than ever.
7. Special proposition to retailers for local advertising.

Every part of the Synchrophase is designed and built in our plant so that we control construction rigidly. We do not assemble nor make sets to sell at a price; they are built to give enduring service and do so. The unsurpassed reception of the Synchrophase, which has given it such outstanding success, is due to this thorough construction and the exclusive features which are not mere talking points, but real performance-producing innovations.

The GREBE

We can supply the Synchrophase in this De Luxe Console Model.

All Grebe apparatus is covered by patents granted and pending.

The Synchrophase is also supplied without battery base

—and increase your gasoline sales by giving speedier service. You will not only do more business by serving more cars during the rush hours—but you increase your regular trade by attracting motorists who are impressed by Tokheim efficiency.

Tokheims will filter, visibly measure and deliver 5 gal. of gas in half a minute. All you do is press a lever. Our catalog gives full description. Write for it.

Tokheim Oil Tank & Pump Company

1601 Wabash Avenue

Ft. Wayne, Indiana

Tria Horn

Isotta Motors, Inc., Fifth Ave., New York.

A HIGH grade two tone horn of the electro magnetic type. The vibrator unit is housed in a hemispherical bell which is sealed at the factory. Equipped with dual push buttons one each for the low and high tones. Available for either six or eight volts and lists for $38, complete with wiring and push buttons.

Portable Acetylene Generator

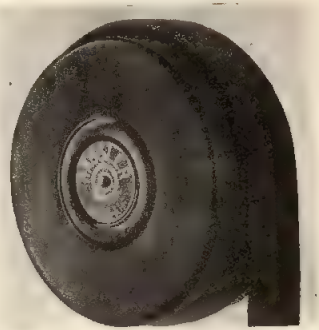
Oxweld Acetylene Co., 30 East 42d St. N. Y. C.

A N addition to the line of the above named company is this new portable generator for producing acetylene at low pressure for welding and cutting. Empty, it weighs 210 lb. and takes a charge of 36 lb. of carbide. No adverse effects result if the generator is knocked over while in operation, it is claimed, and it will work satisfactorily even if tilted to a considerable inclination. It has been listed as an acceptable device for installation on insured premises by the Underwriters' Laboratories, Inc., according to the manufacturer.

Ramco Inner Ring

Ramsey Accessories Mfg. Corp. St. Louis, Mo.

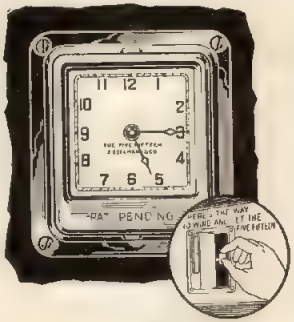
A SUPPLEMENTARY steel ring used in connection with the ordinary cast iron piston ring. It is claimed by the manufacturers that the new model inner ring does not produce excessive wall pressure and that they are so flexible that they can be inserted in new engines along with new piston rings without danger from scoring or premature wear. It is also claimed they will prevent piston slap. Made in sizes to fit all standard diameters. List price, 20 cents each.



Hassler Stabilizer

Robert H. Hassler, Inc., Indianapolis, Ind.

A NEW model of shock absorber designed especially for use in connection with balloon tires. A claimed feature of the device is the quick recovery of the flexible member or connecting belt which is desirable in overcoming the rebound from bumps. Internal mechanism is sealed against mud, water, dirt, grit and other destructive elements. The connecting belt is housed entirely on the outside of the stabilizer mechanism. A separate model has been developed for the Hassler Company for each make of car to which the device has been fitted. This means that the stabilizers are individually designed for the car, adjusted to it and fitted before they leave the factory. A set is packed and labeled front and rear for the particular make of car to which it is to be affixed. The stabilizer was at first made only for Chevrolets, Dodge, Hudson, Essex, Buick and Overland, but will soon be available for all the popular makes of automobiles.



Five-Fifteen Motor Clock

Edelmann & Co., Chicago, Ill.

THIS square clock for dashboard mounting is made by E. Edelmann & Co., Chicago. It has a thirty hour American movement and it is finished in polished nickel. For winding and setting the clock is swung outward on a hinge to give access to the knob in back. Installation is said to be simple and to require the use of only a punch and key hole saw.

The immediate acceptance of the Walker Lift-A-Car by service stations, at home and abroad, is proof that it has met and solved the new lifting problems created by the advent of the balloon tire, the low slung axle and the bumper equipped car. With its low initial lift, its high raise and the long handle with short stroke, it combines more features than have ever been found in one lifting tool. To those garages who are still without a Lift-A-Car I will stake my reputation as a jack manufacturer, that once having one you will never be without it.

Juvenile Automobiles

PAINTED FOR THE LADIES' HOME JOURNAL BY BARBARA BRIGGS

The Bond

By Strickland Gillilan

BABY'S love and sister's love, with mother's envelop-ing all;
Baby's love for the pretty toy holds him in pictured thrall;
Sister—craving the plaything too—stifles her childish yearning,
Whetstoned by her love for Babe himself—soon in her lifetime learning

Love remembers to feast love; contentment comes from giving!
Each, say they who greatly live, is truly the art of living.

Mother, dreaming above the two—her every breath in a prayer is—
Wrestles hard with a futile wish always to keep them there.
Yet months away though the twain may stray, eager to part, or both,
Her mother-love, as now, will aye securely enfold them both.

Hello boys! — how would you like to build models of concrete mixers, steam shovels elevators, motors and dynamos that actually go?

This free book tells you how you can do it!

MY new book, "1,000 Toys in 1" tells all about the new Erector. I want every one of my boy friends to have a copy. It's free; just send me the coupon.

When I was a boy, we didn't have toys like Erector to give us fun every day of the year. If we wanted to build things, we had to use anything we could find. When I graduated from Yale, I made up my mind to make a real toy for American Boys. So I invented the Erector with its hundreds of marvelous parts.

With Erector you boys make marvelous working models—drawbridges, steam shovels, concrete mixers, diggers, lighthouses, engines, motors, dynamos, railroad signals and then the powerful Erector electric motor makes them whiz and spin just like real ones. Oh boy, how you will shout!

The powerful Erector electric motor is a wonder—You can take it apart and put it together easily because it's built so simply. The motor shaft is the same size as the other shafts in the set. That means you can hitch pulleys and gears direct to both sides of the motor itself. Erector electric motor comes in all sets from No. 4 up.

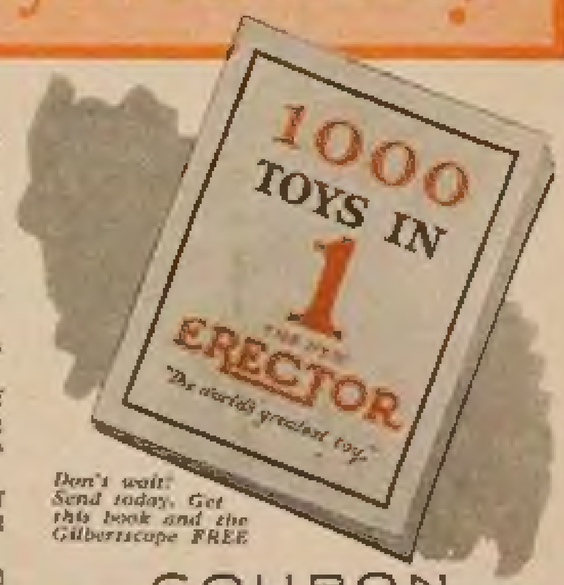
Why Erector is the World's Greatest Toy

1—Erector contains more parts, builds more models than any other toy.
2—Erector square girders—an exclusive Erector feature.
3—Erector powerful electric motor—twelve big special exclusive features. (In No. 4 set and up.)
4—New Erector Boiler—an exclusive feature (in all sets from the Super Erector No 7 up).
5—New Steam Shovel—an exclusive Erector feature. (In the Super-Erector No. 7 and up.)
6—New Erector Dredge Bucket—an exclusive Erector feature. (In new No. 8 and up.)
7—Curved Erector girder—an exclusive Erector feature. (In all sets.)
8—Giant Fly Wheel—an exclusive Erector feature. (In No. 10 set.)
9—Perforated strips, 4 holes to the inch—hundreds of other genuine perfect mechanical parts for duplicating every engineering feat ever attempted. Possible with no other toy than the New Erector.
10—The New Erector contains the greatest assortment of gears—ten in all—from die-cast, bevelled gears, solid brass gears, to the big 50-tooth steel gears.
11—Erector is made from structural steel, plated, enameled and electrically baked.
12—Designed by engineers, used by engineers and endorsed by engineers.
13—The mechanical engineering features of Erector are correct. It is the only perfect method of reproducing engineering feats.
14—It is perfectly interchangeable, owing to the minute detail of standardization.

My free book shows many wonderful models. But there is no end to the things you can build.

There is a lot of fun coming to you when you get your Erector. When you lift the lid and see all the wonderful parts, your hands will itch to start building models right away. You'll play with Erector *first*. You'll be playing with Erector a year from now too. Tell Dad now that an Erector will make you happier than any other present. Show him our book to convince him.

Your friend,
A. C. Gilbert.



Don't wait! Send today. Get this book and the Gilbertscope FREE

Packed in hardwood box, sanded, stained and varnished, brass finished handle grips, suit case catches for convenience in opening and closing. Other Erector Sets from $1.50 to $60.00.

THE NEW

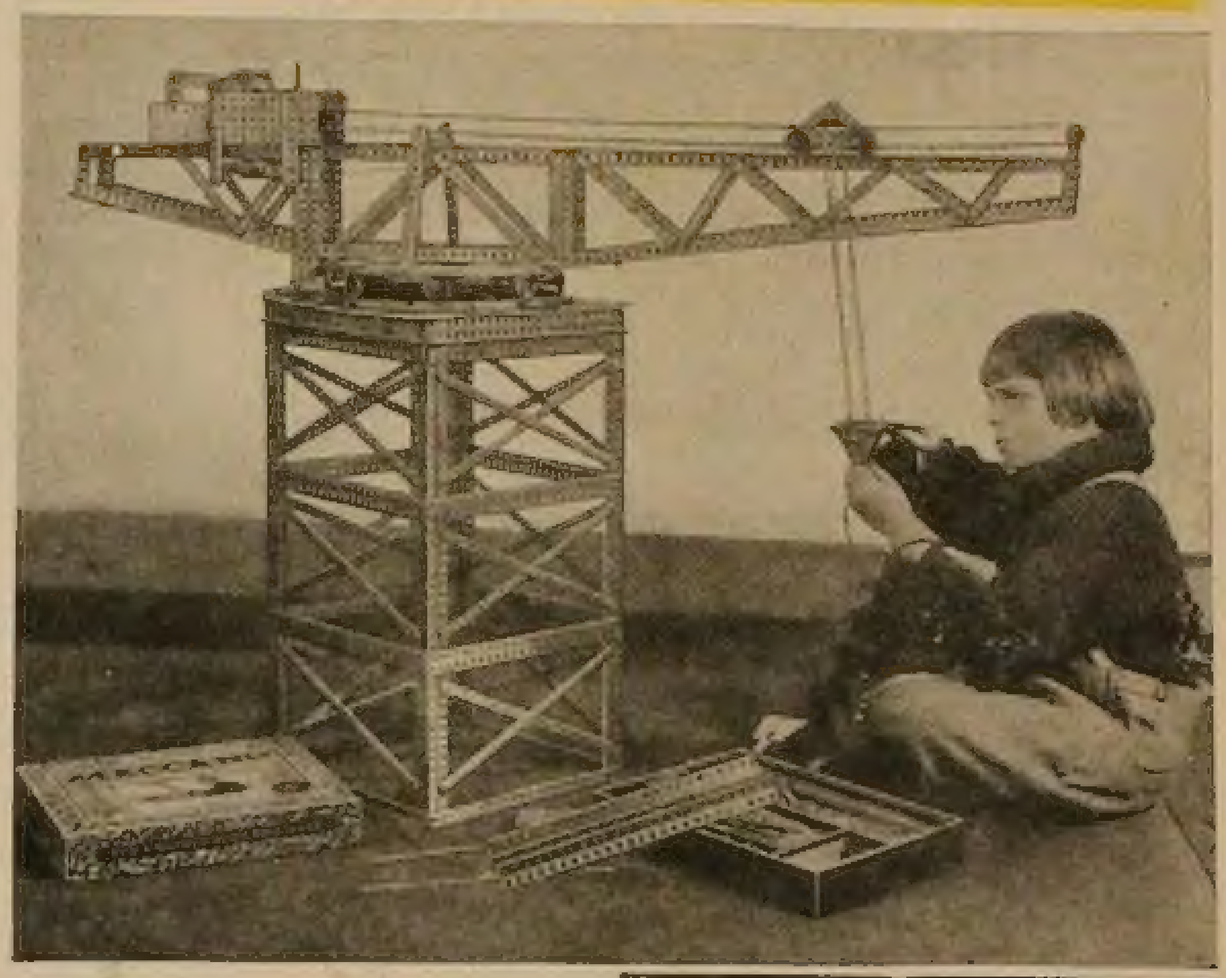
ERECTOR

Built with the New Erector (with powerful electric motor) *"The world's greatest toy"*

MADE FIRST—MADE BETTER—BUILDS MOST

"I have been a Meccano Fan since I got my first set"

Jackie Coogan



HAVING a choice of all construction toys, Jackie Coogan selected Meccano, the original and "The Daddy of them all." When Jackie is not acting in the movies, you will find him playing with Meccano. More than once between pictures he has been found finishing a Meccano model which he has designed himself.

You, too, can share in this Meccano fun. You can build towers, cranes, bridges, steam shovels and endless other models—anything you can think of, but you must have the real Meccano.

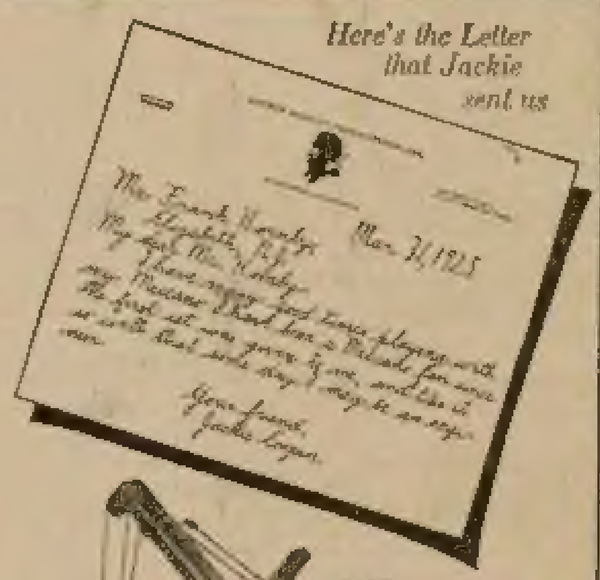
Made First—Made Better—Builds Most

Meccano has more than 200 parts—a part for every purpose. That's why it will build more models than any other toy. There are strong steel strips, with holes every half inch to make building easy; solid brass pulleys and gears; couplings for strips and rods, curved strips and many others. Other toys have copied some of these parts but only Meccano has them all. In fact there has never been a steel construction toy that did not adopt some Meccano parts—that's how good Meccano is. But don't be fooled, get the original Meccano every time.

With every Meccano outfit is included a big book full of pictures of models. There is nothing further to buy—the fun begins as soon as you open your set.

Yes, Jackie is enthusiastic about Meccano and you fellows will be, too. Ask Dad to give you Meccano and then—Oh Boy!

Here's the Letter that Jackie sent us



Mar. 31, 1925

Mr. Frank Hornby
Liverpool, Eng.

My dear Mr. Hornby,

I have many good times playing with my Meccano. That's how I got the idea for the book. All you have to do is to put the parts together as the book tells you to and you can make it.

Your friend,
Jackie Coogan

AS EASY AS BUILDING WITH BLOCKS

Never before were there such red blooded stories! Every page grips you—makes your heart beat faster—for Zane Grey knows the REAL romance and thrill of the TRUE West. He knows its haunting mysteries, its throbbing adventure, its picturesque personalities. He has actually lived with them. And he knows how to make you see them, hear them, know them.

Mail the Magic Coupon Below and—

—Gallop, with Zane Grey, over the wind-swept plains of the daring West!

Zane Grey

"He has more of the epic spirit than any other living American. He gives the Homeric bigness, resourcefulness, tremendousness to his people. His landscapes are in themselves thrilling."—*Rupert Hughes.*

"Nothing could be more real than the romances of Zane Grey. He lives them all before he writes them. . . . He is the master creator of Western Romance, the biographer of the most romantic country in the world."—*Success Magazine.*

"If an Easterner, you will have a better understanding of the West; if a Westerner you will have a better one for having read how the West as it is to-day, came to be."—*Salt Lake City Tribune.*

FORGET business! Forget any cares or worries you may have. Gather, in the evening, somewhere in the Golden West, around a fresh-smelling wood-fire. Listen to the yarns of the drawling cowboys. Hear the quaint songs of the ranchmen. Follow quiet trails that lead up rocky mountainsides and down into deep canyons!

Here is your passport to a new world, to a thousand undreamed-of new experiences. The magic coupon below will transport you—*whenever you want to be transported*—into a realm of true adventure.

Ride like mad; shoot quick, if you *must* shoot; love and be loved; *lose yourself* completely in the mountains, canyons and deserts of the gorgeous, historical, red-blooded, big-hearted West. Those are the vivid sensations that will be given you by

ZANE GREY *The World's Most Popular Living Author*

MASTER TALES of the GOLDEN WEST

12 Magnificent, Thrilling, Full-length Novels (The Only Uniformly Bound Edition)

Let Zane Grey introduce you to some of the men and women he has known—gamblers, cowboys, preachers, outlaws, scouts, bandits, Indians, Mormons, miners, cattle thieves, train robbers—gentlemen and gunmen—bankers and horse thieves—good women and bad women—all those indomitable, devil-may-care adventurers who, with spirits high and guns spitting fire, rode and fought their way over the mountains and across the plains of the Golden West.

No set of books can compare with these in interest and entertainment. They are more than literature, they are history and life. Better than any other writer, Zane Grey knows these gallant, heroic men and women of the old West. He has lived with them, in ranch house and cabin. He has shared their fun and their privations.

That is why these books of Zane Grey's will live forever and ever. *The U. P. Trail, To the Last Man, Wildfire, Wanderer of the Wasteland, The Lone Star Ranger, The Light of Western Stars, Desert Gold, Riders of the Purple Sage, The Rainbow Trail, The Border Legion, Heritage of the Desert, The Mysterious Rider.*

Short-time 33 1/3% Bargain Offer

Recognizing the permanent literary and historical value of these masterpieces that have sold singly by the hundred thousand copies at much higher prices, and responding to the insistent popular demand for a Uniform Set, we now present this First and Only *Uniform* Edition of Zane Grey—the Home-library Edition.

Through the co-operation of Zane Grey and his publishers, both of whom have generously agreed to cut their royalties to a minimum, we are able to make an especially attractive offer. *For the first time,* you may have the wonderful, gripping, famous novels of Zane Grey—*uniformly bound* in a handsome, permanent, beautifully printed library edition—at a startlingly low price—a reduction of 33⅓% off the regular publishers' price for the single volumes.

Complete Sets Free on Approval

Furthermore, you needn't pay a single cent until you have seen, examined and read the books in your own home. If, for any reason, you do not find the books all that you desire, just send them back before the ten days are up, and you won't owe us a penny.

But Act At Once

This remarkable set of books has been issued in a limited edition only. So, if you want to be sure of getting yours, you must act *at once.* Fill in and mail the coupon *to-day.* Life will be infinitely more splendid—more gloriously worth living after that! Get your pen or pencil *now*—fill in and mail this coupon at once!
